14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	I10																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	+	D	T	Local	Air quality, vulnerable communities	Cumulative reduction in greenhouse gas emissions and air pollutants over time	The combined use of shared transport and other sustainable modes can amplify the reduction in emissions, leading to faster improvements in air quality	The policy has positive effects as it references integration with bus and active travel, as well as shared transport.	The policy could be enhanced by making explicit reference to reducing emissions as part of the Mass Transit Strategy.	N	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to reducing emissions as part of the Mass Transit Strategy.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	D	T	Local	Air quality, vulnerable communities	Cumulative reduction in greenhouse gas emissions and air pollutants over time	The combined use of shared transport and other sustainable modes can amplify the reduction in emissions, leading to faster improvements in air quality	The policy has positive effects as it references integration with bus and active travel, as well as shared transport.	The policy could be enhanced by reducing emissions as part of the Mass Transit Strategy.	N	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by reducing emissions as part of the Mass Transit Strategy.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Cumulative reduction in emissions over time	Improved mass transit can lead to long-term changes in travel behavior, with more people opting for public transport over private vehicles. This shift can significantly reduce overall emissions	The policy has positive effects as mass transit will enhance public transport availability and accessibility.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Cumulative reduction in emissions over time	Improved mass transit can lead to long-term changes in travel behavior, with more people opting for public transport over private vehicles. This shift can significantly reduce overall emissions	The policy has positive effects as mass transit will encourage greater carbon efficiency in the movement of goods and people.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to innovative technologies, however the policy is focused on mass transit.	The policy could be enhanced by making explicit reference to new low and zero carbon transport technologies.	N	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to new low and zero carbon transport technologies.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Cumulative reduction in emissions over time	Improved mass transit can lead to long-term changes in travel behavior, with more people opting for public transport over private vehicles. This shift can significantly reduce overall emissions	The policy has positive effects as mass transit will provide a wider choice of low carbon passenger travel and quality integrated facilities and services.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Cumulative reduction in greenhouse gas emissions and air pollutants over time	The combined use of shared transport and other sustainable modes can amplify the reduction in emissions, leading to faster improvements in air quality	The policy has positive effects as it references integration with bus and active travel, as well as shared transport.	The policy could be enhanced by making explicit reference to reducing emissions as part of the Mass Transit Strategy.	N	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to reducing emissions as part of the Mass Transit Strategy.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on mass transit.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.	N	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on mass transit.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.	N	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Regional	Transport network, road network, road users, utility network, construction industry	As fuel consumption decreases, there is a corresponding reduction in greenhouse gas emissions, contributing to better air quality and mitigating climate change	Promoting sustainable transport can encourage behavioral changes, such as increased use of public transport and active transport, leading to a collective reduction in fuel consumption	The policy has positive effects as it by providing a low carbon alternative to the private car, mass transit will support a modal shift to sustainable transport.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on mass transit.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.	N	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on mass transit.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.	N	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to road traffic and congestion, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as mass transit will enhance public transport availability and accessibility.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as it references integrating active travel with the mass transit network but does not reference quality and availability.	The policy could be enhanced by making explicit reference to integrating high quality active travel into the mass transit network.	N	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to integrating high quality active travel into the mass transit network.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on mass transit.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.	N	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as it references integrating sustainable forms of transport when developing the mass transit network.	The policy could be enhanced by making explicit reference to convenience, accessibility, and affordability.	N	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to convenience, accessibility, and affordability.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low emission vehicle infrastructure, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to housing and employment areas, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as mass transit will improve accessibility for all users.	The policy could be enhanced by making explicit reference to improving accessibility to services.	N	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to improving accessibility to services.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on mass transit.	The policy could make explicit reference to reduced journey times as a result of integration with other modes of transport.	N	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could make explicit reference to reduced journey times as a result of integration with other modes of transport.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as mass transit will help to contribute to a resilient transport network.	The policy could be enhanced by making explicit reference to measures within the Mass Transit vision that help to establish an effective and resilient transport network .	N	The policy text remains the same, however, it has been rearranged.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to measures within the Mass Transit vision that help to establish an effective and resilient transport network .
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on mass transit.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.	N	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on mass transit.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.	N	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on mass transit.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.	N	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to the content of the mass transit vision within the policy text.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on mass transit.	None identified.	No mitigation identified in 2025.	The policy text remains the same, however, it has been rearranged.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

Policy Name	I11																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users, which could encourage more sustainable transport use and decrease air pollution emissions. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users, which could encourage more sustainable transport use and decrease air pollution emissions. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?"	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users, which could encourage more sustainable transport use. Therefore, the scoring has increased to positive.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users, which could encourage more sustainable transport use. Therefore, the scoring has increased to positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users, which could encourage more sustainable transport use and contribute to achieving Net Zero. Therefore, the scoring has increased to positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users, which could encourage more sustainable transport use. Therefore, the scoring has increased to positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscape, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to road traffic and congestion, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to access to key services, however the policy is focused on Mass Transit Phase 1 Delivery.	The policy could be enhanced by making explicit reference to how Phase 1 will help to promote accessibility to key services and facilities.	Partially	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users, which could make spaces and facilities more accessible by sustainable transport modes. Therefore, the scoring has increased to positive.	The policy could be further enhanced by making explicit reference to how Phase 1 will help to promote accessibility to key services and facilities.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to active travel, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to active travel and green and blue infrastructure, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as it references the Phase 1 Delivery which focuses on new tram lines for Leeds and Bradford.	The policy could be enhanced by making explicit reference to what Phase One of the Mass Transit Network is (new tram lines) and how it will be achieved.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to what Phase One of the Mass Transit Network is (new tram lines) and how it will be achieved.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low emission vehicle infrastructure, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to housing and employment areas, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on Mass Transit Phase 1 Delivery.	The policy could be enhanced by making explicit reference to how Phase 1 will help to promote accessibility to employment and skills development opportunities.	Partially	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users, which could make spaces and facilities more accessible by sustainable transport modes. Therefore, the scoring has increased to positive.	The policy could be enhanced by making further explicit reference to how Phase 1 will help to promote accessibility to employment and skills development opportunities.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on Mass Transit Phase 1 Delivery.	The policy could be enhanced by making explicit reference to how Phase 1 will help to promote accessibility to services, facilities, and amenities.	Partially	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users, which could make spaces and facilities more accessible by sustainable transport modes. Therefore, the scoring has increased to positive.	The policy could be enhanced by making further explicit reference to how Phase 1 will help to promote accessibility to employment and skills development opportunities.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on Mass Transit Phase 1 Delivery.	The policy could be enhanced by making explicit reference to how Phase 1 will help to improve travel convenience.	N	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how Phase 1 will help to improve travel convenience.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on Mass Transit Phase 1 Delivery.	The policy could be enhanced by making explicit reference to how Phase 1 will help to ensure accessibility by tram to Leeds and Bradford, which are two of West Yorkshire's largest economies.	Partially	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users, which could make spaces and facilities more accessible by sustainable transport modes. Therefore, the scoring has increased to positive.	The policy could be enhanced by making explicit reference to how Phase 1 will help to ensure accessibility by tram to Leeds and Bradford, which are two of West Yorkshire's largest economies.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users, which could make spaces and facilities more accessible by sustainable transport modes. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if the new tramlines do not help to connect diverse populations and deprived locations.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it references connecting communities, however, it does not make explicit reference to inclusion within the Mass Transit Phase 1 Delivery and to ensuring diverse communities are connected.	The policy could be enhanced by making explicit reference to how EDI has been considered within the Phase 1 Delivery, and how it will connect diverse communities across West Yorkshire.	Partially	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	++	The policy has been amended to refer to taking into account the needs of vulnerable users as part of the integrated Weaver Network. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if the new tramlines do not help to connect diverse populations and deprived locations.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it references connecting communities, however, it does not make explicit reference to accessibility and inclusion within the Mass Transit Phase 1 Delivery and to ensuring diverse communities are connected, particularly disabled and low mobility users.	The policy could be enhanced by making explicit reference to how EDI has been considered within the Phase 1 Delivery, and how it will connect diverse communities across West Yorkshire, particularly disabled and low mobility users.	Partially	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	++	The policy has been amended to refer to taking into account the needs of vulnerable users as part of the integrated Weaver Network. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if the new tramlines do not help to connect diverse populations and deprived locations.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it references connecting communities, however, it does not make explicit reference to affordability and how this contributes to promoting and sustaining connections between communities, particularly for low income residents.	The policy could be enhanced by making explicit reference to affordability and how this contributes to promoting and sustaining connections between communities, particularly for low income residents.	Partially	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users as part of the integrated Weaver Network. Therefore, the scoring has increased to positive.	The policy could be enhanced by making explicit reference to affordability and how this contributes to promoting and sustaining connections between communities, particularly for low income residents.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	++	++	++	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if the new tramlines do not help to connect diverse populations and deprived locations.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references the Phase 1 Delivery which focuses on new tram lines for Leeds and Bradford, which in turn, will help to connect communities within and between these areas.	The policy could be enhanced to making explicit reference to the types of communities it will be connecting e.g. deprived communities, to ensure equitable outcomes. It could also draw out examples from the Mass Transit Vision to provide a clearer picture of what the Phase 1 Delivery entails and the approach for delivery.	Partially	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	++	++	++	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	+	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if the new tramlines do not help to connect diverse populations and deprived locations.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references the Phase 1 Delivery which focuses on new tram lines for Leeds and Bradford, which in turn, will help to connect communities within and between these areas.	The policy could be enhanced by integrating active travel schemes into the Mass Transit Phase 1 Delivery, particularly in deprived areas of Leeds and Bradford.	Y	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	++	The policy has been amended to refer to taking into account the needs of vulnerable users as part of the integrated Weaver Network, which includes active travel. Therefore, the scoring has increased to very positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if the new tramlines do not help to connect diverse populations and deprived locations.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it references connecting communities, however, it does not make explicit reference to access to information and how this contributes to promoting reliable connections between communities.	The policy could be enhanced by making explicit reference to how travel information on the new Leeds and Bradford lines will be promoted to ensure reliable connectivity between communities.	Partially	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users as part of the integrated Weaver Network, which includes improvements to information systems. Therefore, the scoring has increased to positive.	The policy could be enhanced by making explicit reference to how travel information on the new Leeds and Bradford lines will be promoted to ensure reliable connectivity between communities.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on Mass Transit Phase 1 Delivery.	The policy could be enhanced by making explicit reference to ensuring safety is embedded within Phase 1 of the Mass Transit Network, particularly through natural surveillance.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on Mass Transit Phase 1 Delivery.	The policy could enhanced by making explicit reference to ensuring safety is embedded within Phase 1 of the Mass Transit Network.	N	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	+	+	The policy has been amended to refer to taking into account the needs of vulnerable users as part of the integrated Weaver Network, which could include safety needs. Therefore, the scoring has increased to positive.	The policy could enhanced by making explicit reference to ensuring safety is embedded within Phase 1 of the Mass Transit Network.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on Mass Transit Phase 1 Delivery.	The policy could be enhanced by making explicit reference to ensuring the Leeds and Bradford tram lines are developed considering pedestrian/cyclist safety.	Partially.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	++	++	The policy has been amended to refer to taking into account the needs of vulnerable users as part of the integrated Weaver Network, which could include safety needs. Therefore, the scoring has increased to very positive.	The policy could be enhanced by making explicit reference to ensuring the Leeds and Bradford tram lines are developed considering pedestrian/cyclist safety.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming in residential areas, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	Y	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	++	++	The policy has been amended to refer to taking into account the needs of vulnerable users as part of the integrated Weaver Network, which could include safety needs. Therefore, the scoring has increased to very positive.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	Y	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	+	++	++	The policy has been amended to refer to taking into account the needs of vulnerable users as part of the integrated Weaver Network. Therefore, the scoring has increased to very positive.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on Mass Transit Phase 1 Delivery.	None identified.	No mitigation identified in 2025.	The policy now references taking into account the needs of vulnerable users as part of the integrated Weaver Network.	o	o	o	Although the policy has been amended by referencing taking into account the needs of vulnerable users as part of the integrated Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	I12																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	+	The policy has been amended to refer to increasing accessibility to spaces and services through sustainable transport, which will help to reduce air pollution. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	+	The policy has been amended to refer to increasing accessibility to spaces and services through sustainable transport, which will help to reduce air pollution. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	I	T	Regional	Transport network, road network, road users, air quality	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to aligning developments with transport infrastructure, which could promote greater carbon efficiency by reducing travel distances.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport which will contribute to achieving Net Zero. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to road traffic and congestion, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	N/A	The policy has negative effects as it does not reference access to opportunities, and does not explore the synergies between sustainable growth and sustainable transport modes.	The policy could be enhanced by making explicit reference to improving accessibility to opportunities through sustainable transport.	Y	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to active travel, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	N/A	The policy has negative effects as it does not reference access to opportunities, and does not explore the synergies between sustainable growth and sustainable transport modes.	The policy could be enhanced by making explicit reference to improving accessibility to opportunities through sustainable transport.	Y	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low emission vehicle infrastructure, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	N/A	The policy has positive effects as it references integrating development and land use across West Yorkshire.	The policy could be enhanced by making explicit reference to improving accessibility to opportunities through sustainable transport. It could also be enhanced by referencing types of development e.g. housing and employment.	Y	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	++	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	-	-	-	D	P	Local	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference access to opportunities, and does not explore the synergies between sustainable growth and sustainable transport modes. It also does not reference ensuring growth in areas of deprivation and those with high levels of unemployment.	The policy could be enhanced by making explicit reference to improving accessibility to opportunities through sustainable transport. It could also be enhanced by referencing the delivery of sustainable growth in areas of deprivation and those with high levels of unemployment.	Partially	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	The policy could be enhanced by referencing the delivery of sustainable growth in areas of deprivation and those with high levels of unemployment.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference access to services, facilities and amenities, and does not explore the synergies between sustainable growth and sustainable transport modes.	The policy could be enhanced by making explicit reference to improving accessibility to services, facilities and amenities through sustainable transport.	Y	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	+	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has positive effects as there is reference to aligning developments with transport infrastructure, which could reduce the distance and overall journey times between destinations.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	+	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references delivering sustainable growth, which will have positive economic outcomes for West Yorkshire.	The policy could be enhanced by making explicit reference to sustainable transport and decarbonisation.	Y	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	++	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references delivering sustainable growth, which can be achieved through increased investment.	The policy could be enhanced by making explicit reference to improving accessibility to opportunities through sustainable, effective, and resilient transport.	Y	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	++	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	-	-	-	D	P	Local	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference access to opportunities, and does not explore the synergies between sustainable growth and sustainable transport modes. It also does not reference ensuring growth in major employment and residential growth areas.	The policy could be enhanced by making explicit reference to improving accessibility to opportunities through sustainable transport, and to major employment and residential growth areas..	Y	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	++	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however, however the policy is focused on transport and land use planning.	The policy could be enhanced by making explicit reference to connecting development with healthcare services and education facilities by sustainable transport.	Y	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	++	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however, however the policy is focused on transport and land use planning.	The policy could be enhanced by making explicit reference to connecting development with open space, recreational activities and employment locations.	Y	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	++	++	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare through sustainable transport. Therefore, the scoring has increased to very positive.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference inclusive growth and opportunities for all.	The policy could be enhanced by making explicit reference to inclusive growth and access to opportunities for all.	N	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	+	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare opportunities through sustainable transport. Therefore, the scoring has increased to positive.	The policy could be enhanced by making explicit reference to inclusive growth and access to opportunities for all.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference inclusive growth and opportunities for all. It also makes no reference to sustainable modes of transport.	The policy could be enhanced by making explicit reference to inclusive growth and access to opportunities for all through sustainable modes of transport.	Partially	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	+	The policy has been amended to refer to increasing accessibility to employment, housing, education, and healthcare opportunities through sustainable transport. Therefore, the scoring has increased to positive.	The policy could be enhanced by making explicit reference to inclusive growth and access to opportunities for all.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as integrated development and transport improves connections between communities.	The policy could be enhanced by making explicit reference to affordability and inclusive access.	N	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	-	-	-	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to affordability and inclusive access.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	+	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference improving connecting between diverse communities through integrating development with transport.	The policy could be enhanced by making explicit reference to improving connections between diverse communities through integrating new development with transport infrastructure.	N	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	+	+	+	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to improving connections between diverse communities through integrating new development with transport infrastructure.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference inclusive growth and opportunities for all, particularly for those in deprived areas. It also makes no reference to sustainable modes of transport.	The policy could be enhanced by making explicit reference to improving connections between diverse communities through integrating new development with transport infrastructure, particularly in the most deprived areas.	N	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	-	-	-	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to improving connections between diverse communities through integrating new development with transport infrastructure, particularly in the most deprived areas.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference sustainable modes of transport and improving access to information to support opportunities for growth.	The policy could be enhanced by making explicit reference to sustainable modes of transport and improving access to information to support opportunities for growth.	N	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	-	-	-	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to sustainable modes of transport and improving access to information to support opportunities for growth.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references increasing accessibility through sustainable transport to housing and employment opportunities, and to services such as education and healthcare.	o	o	o	Although the policy has been amended by referencing increasing accessibility to spaces and services through sustainable transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name		113																		
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on transit-oriented development	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	+	The policy has been amended to refer to the franchised bus network and rail, both of which will contribute to lowering air pollution emissions. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	D	T	Regional	Air quality, vulnerable communities	Cumulative reduction in greenhouse gas emissions and air pollutants over time	The combined use of sustainable modes can amplify the reduction in emissions, leading to faster improvements in air quality	The policy has positive effects as it could enable a modal shift away from the car.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	++	The policy has been amended to refer to the franchised bus network and rail, both of which will contribute to lowering air pollution emissions. Therefore, the scoring has increased to very positive.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	+	+	+	D	T	Regional	Air quality, vulnerable communities	Cumulative reduction in greenhouse gas emissions and air pollutants over time	The combined use of sustainable modes can amplify the reduction in emissions, leading to faster improvements in air quality	The policy has positive effects as it references ensuring wider placemaking benefits through green infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	+	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	+	+	++	D	P	Local	Local communities, green infrastructure, blue infrastructure	Green and blue infrastructure deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	Provide recreational spaces whilst improving health.	The policy has positive effects as it references opportunities to promote active travel through green infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	++	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	++	The policy has been amended to refer to the franchised bus network and rail, the promotion of which will reduce private car use. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Coordinating transport infrastructure with placemkaing ensures that new developments complement the existing character and aesthetics of the area	The policy has positive effects as there is reference to aligning developments with the transport network, which could reduce travel time and encourage carbon efficiency in travel.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	+	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to innovative technologies, however the policy is focused on transit-oriented development.	The policy could be enhanced by making explicit reference to new and low zero carbon transport technologies.	N	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to new and low zero carbon transport technologies.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Coordinating transport infrastructure with placemkaing ensures that new developments complement the existing character and aesthetics of the area	The policy has positive effects as it references the integration of mass transit and the rest of the public transport network and active travel improvements.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	+	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Coordinating transport infrastructure with placemkaing ensures that new developments complement the existing character and aesthetics of the area	The policy has positive effects as it supports the provision of a high capacity, low carbon mode of transport.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	++	The policy has been amended to refer to the franchised bus network and rail, the promotion of which will contribute to achieving Net Zero. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Regional	Transport network, road network, road users, utility network, construction industry	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Coordinating transport infrastructure with placemkaing ensures that new developments complement the existing character and aesthetics of the area	The policy has positive effects as it supports the provision of a high capacity, low carbon mode of transport.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	++	The policy has been amended to refer to the franchised bus network and rail. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	-	-	-	D	P	Regional	Built environment, protected landscapes	Landscape and townscape may be eroded over time as development comes forward	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	The policy has negative effects as it does not explicitly reference the design, construction, repair, and maintenance of transport infrastructure when talking about placemaking.	The policy could be enhanced by making explicit reference to the design, construction, repair, and maintenance of transport infrastructure when talking about placemaking.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to the design, construction, repair, and maintenance of transport infrastructure when talking about placemaking.

9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	+	+	++	D	T	Regional	Built environment, protected landscapes, blue and green infrastructure	Landscape and townscape may be eroded over time as development comes forward	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	The policy has positive effects as it references ensuring wider placemaking benefits through green infrastructure.	The policy could be enhanced by making additional reference to blue infrastructure.	N	The policy now references the franchised bus network and rail.	+	+	++	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making additional reference to blue infrastructure.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	D	T	Regional	Built environment, protected landscapes, public rights of way	Landscape and townscape may be eroded over time as development comes forward	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	The policy has negative effects as it does not explicitly reference public rights of way when talking about promoting active travel.	The policy could be enhanced by making explicit reference to public rights of way when talking about promoting active travel.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to public rights of way when talking about promoting active travel.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	-	-	-	D	P	Local	Built environment, protected landscapes	Landscape and townscape may be eroded over time as development comes forward	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	The policy has negative effects as it does not explicitly reference protecting and enhancing locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place, especially when talking about ensuring wider placemaking matters.	The policy could be enhanced by making explicit reference to protecting and enhancing locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place, especially when talking about ensuring wider placemaking matters.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to protecting and enhancing locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place, especially when talking about ensuring wider placemaking matters.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	-	-	-	D	T	Regional	Built environment, protected landscapes	Landscape and townscape may be eroded over time as development comes forward	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	The policy has negative effects as it does not explicitly reference removing unnecessary clutter, especially when talking about ensuring wider placemaking matters.	The policy could be enhanced by making explicit reference to removing unnecessary clutter, especially when talking about ensuring wider placemaking matters.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to removing unnecessary clutter, especially when talking about ensuring wider placemaking matters.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to road traffic and congestion, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Coordinating transport infrastructure with placemaking ensures that new developments complement the existing character and aesthetics of the area	The policy has negative effects as it does not reference access to key services in terms of growth and development, and does not explore the synergies between sustainable growth and sustainable transport modes.	The policy could be enhanced by making explicit reference to improving access to key services through sustainable transport.	N	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Coordinating transport infrastructure with placemaking ensures that new developments complement the existing character and aesthetics of the area	The policy has positive effects as it references promoting active travel infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	++	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Coordinating transport infrastructure with placemaking ensures that new developments complement the existing character and aesthetics of the area	The policy has positive effects as it references promoting active travel infrastructure and using green infrastructure to achieve this.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	++	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Coordinating transport infrastructure with placemaking ensures that new developments complement the existing character and aesthetics of the area	The policy has negative effects as it does not reference how the mass transit will be integrated with the wider transit network e.g. through improvements in accessibility and affordability.	The policy could be enhanced by making explicit reference to how the mass transit will be integrated with the wider transit network e.g. through improvements in accessibility and affordability.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how the mass transit will be integrated with the wider transit network e.g. through improvements in accessibility and affordability.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Coordinating transport infrastructure with placemaking ensures that new developments complement the existing character and aesthetics of the area	The policy has neutral effects as there is no reference to low emission vehicle infrastructure, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Coordinating transport infrastructure with placemaking ensures that new developments complement the existing character and aesthetics of the area	The policy has positive effects as it references integrating transport and land use planning.	The policy could be enhanced by making explicit reference to types of development e.g. housing and employment.	N	The policy now references the franchised bus network and rail.	+	+	++	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to types of development e.g. housing and employment.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	+	D	P	Local	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it improved transport systems can improve access to opportunities.	The policy could be enhanced by making explicit reference to employment and skills development opportunities, and the delivery of sustainable growth in areas of deprivation and those with high levels of unemployment.	N	The policy now references the franchised bus network and rail.	+	+	+	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to employment and skills development opportunities, and the delivery of sustainable growth in areas of deprivation and those with high levels of unemployment.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it improved transport systems can improve access to opportunities.	The policy could be enhanced by making explicit reference to improving accessibility to services, facilities and amenities through land use planning.	N	The policy now references the franchised bus network and rail.	+	+	+	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to improving accessibility to services, facilities and amenities through land use planning.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	+	I	P	Regional	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to aligning developments with the transport network, which could reduce journey times.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	+	+	+	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references maximising growth opportunities, which will have positive economic outcomes for West Yorkshire.	The policy could be enhanced by making explicit reference to sustainable transport and decarbonisation.	Y	The policy now references the franchised bus network and rail.	+	++	++	The policy has been amended to refer to the franchised bus network and rail, which are forms of sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references maximising growth opportunities, which can be achieved through increased investment.	The policy could be enhanced by making explicit reference to improving growth through sustainable, effective, and resilient transport.	N	The policy now references the franchised bus network and rail.	+	+	++	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to improving growth through sustainable, effective, and resilient transport.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	-	-	-	D	P	Local	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference major employment and residential growth areas in relation to growth opportunities.	The policy could be enhanced by making explicit reference to ensuring growth in major employment and residential growth areas.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to ensuring growth in major employment and residential growth areas.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on transport and land use planning.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travelers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference inclusive growth and placemaking.	The policy could be enhanced by making explicit reference to inclusive growth and placemaking.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to inclusive growth and placemaking.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference inclusive placemaking.	The policy could be enhanced by making explicit reference to inclusive placemaking.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to inclusive placemaking.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference inclusive integration with the wider transit network.	The policy could be enhanced by making explicit reference to inclusive integration with the wider transit network.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to inclusive integration with the wider transit network.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	-	-	-	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference improving connecting between diverse communities through placemaking.	The policy could be enhanced by making explicit reference to improving connections between diverse communities through placemaking.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to improving connections between diverse communities through placemaking.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it references it does not reference access within/to/from deprived areas.	The policy could be enhanced by making explicit reference to promoting active travel in the most deprived areas.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to promoting active travel in the most deprived areas.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference improving access to information to support opportunities for growth.	The policy could be enhanced by making explicit reference to improving access to information to support opportunities for growth.	N	The policy now references the franchised bus network and rail.	-	-	-	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to improving access to information to support opportunities for growth.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on transit-oriented development.	The policy could be enhanced by making explicit reference to embedding safety in placemaking, for example, through improvements of public realm and levels of natural surveillance.	N	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to embedding safety in placemaking, for example, through improvements of public realm and levels of natural surveillance.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on transit-oriented development.	The policy could be enhanced by making explicit reference to embedding safety in placemaking.	N	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to embedding safety in placemaking.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on transit-oriented development.	The policy could be enhanced by making explicit reference to embedding safety in placemaking.	N	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to embedding safety in placemaking.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on transit-oriented development.	The policy could be enhanced by making explicit reference to embedding safety in placemaking.	N	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to embedding safety in placemaking.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on transit-oriented development.	The policy could be enhanced by making explicit reference to embedding safety in placemaking.	N	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to embedding safety in placemaking.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on transit-oriented development.	None identified.	No mitigation identified in 2025.	The policy now references the franchised bus network and rail.	o	o	o	Although the policy has been amended by referencing the franchised bus network and rail, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	I14																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	D	T	Regional	Air quality, vulnerable communities	Cumulative reduction in greenhouse gas emissions and air pollutants over time	The combined use of sustainable modes can amplify the reduction in emissions, leading to faster improvements in air quality	The policy has positive effects as it supports a modal shift to sustainable modes of transport by prioritising access by sustainable modes to new development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Cumulative reduction in emissions over time	Improved mass transit can lead to long-term changes in travel behavior, with more people opting for public transport over private vehicles. This shift can significantly reduce overall emissions	The policy has negative effects as it could be more aligned with its purpose to deliver sustainable development.	The policy could be enhanced by making explicit reference to measures that enhance public transport availability, affordability, and accessibility in relation to promotion of bus and mass transit.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to measures that enhance public transport availability, affordability, and accessibility in relation to promotion of bus and mass transit.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Cumulative reduction in emissions over time	Improved mass transit can lead to long-term changes in travel behavior, with more people opting for public transport over private vehicles. This shift can significantly reduce overall emissions	The policy has positive effects as it promotes greater carbon efficiency in the movement of people through providing accessibility by public transport and active travel to new developments.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Cumulative reduction in emissions over time	Improved mass transit can lead to long-term changes in travel behavior, with more people opting for public transport over private vehicles. This shift can significantly reduce overall emissions	The policy has positive effects as it prioritises accessibility by sustainable transport modes in new developments.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Cumulative reduction in emissions over time	Improved mass transit can lead to long-term changes in travel behavior, with more people opting for public transport over private vehicles. This shift can significantly reduce overall emissions	The policy has positive effects as it promotes accessibility by sustainable modes.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Regional	Transport network, road network, road users, utility network, construction industry	As fuel consumption decreases, there is a corresponding reduction in greenhouse gas emissions, contributing to better air quality and mitigating climate change	Promoting sustainable transport can encourage behavioral changes, such as increased use of public transport and active transport, leading to a collective reduction in fuel consumption	The policy has positive effects as it promotes a modal shift to sustainable modes by prioritising these in new developments.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to reducing road traffic and congestion, which will help to promote sustainable transport modes.	The policy could be enhanced by making explicit reference to reducing road traffic and congestion in order to further promote sustainable transport.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to reducing road traffic and congestion in order to further promote sustainable transport.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as it references ensuring new developments are accessible and that they promote active travel and public transport.	The policy could be enhanced by making explicit reference to access to key services.	N	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to access to key services.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as it references ensuring new developments promote active travel.	The policy could be enhanced by making explicit reference to improving the quality and availability of active travel infrastructure.	N	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to improving the quality and availability of active travel infrastructure.

10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to promoting active travel through enhancing green and blue infrastructure.	The policy could be enhanced by making explicit reference to promoting active travel through enhancing green and blue infrastructure.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to promoting active travel through enhancing green and blue infrastructure.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as it references promoting sustainable forms of transport.	The policy could be enhanced by making explicit reference to how sustainable transport will be promoted e.g. through convenience, accessibility, and affordability.	N	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to how sustainable transport will be promoted e.g. through convenience, accessibility, and affordability.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to providing low emission vehicle infrastructure as a way of delivery sustainable development.	The policy could be enhanced by making explicit reference to providing low emission vehicle infrastructure as a way of delivery sustainable development.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to providing low emission vehicle infrastructure as a way of delivery sustainable development.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as it references ensuring new developments are accessible and that they promote active travel and public transport.	The policy could be enhanced by making explicit reference to types of development e.g. housing and employment.	N	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to types of development e.g. housing and employment.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	+	D	P	Local	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to active travel and public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities, and ensuring sustainable development.	The policy has positive effects as it will improve sustainable access to opportunities by connecting new developments with the existing network.	The policy could be enhanced by making explicit reference to ensuring access to new developments and opportunities in areas of deprivation and those with high levels of unemployment.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to ensuring access to new developments and opportunities in areas of deprivation and those with high levels of unemployment.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to active travel and public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities, and ensuring sustainable development.	The policy has positive effects as new developments will be accessible to all users.	The policy could be enhanced by making explicit reference to ensuring access to services, facilities, and amenities for all users.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to ensuring access to services, facilities, and amenities for all users.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	-	-	-	I	P	Regional	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to active travel and public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities, and ensuring sustainable development.	The policy has negative effects as it does not make the connection between access and travel convenience and reliability.	The policy could be enhanced by making explicit reference to how access can improve travel convenience and reliability.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to how access can improve travel convenience and reliability.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to decarbonisation of transport, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to increasing investment, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	-	-	-	D	P	Local	Lower socio-economic groups and deprived areas	Could have cumulative effects with other local development schemes	Improved connectivity to active travel and public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities, and ensuring sustainable development.	The policy has negative effects as it does not reference access to major employment and residential growth areas.	The policy could be enhanced by making explicit reference to improving access to major employment and residential growth areas.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to improving access to major employment and residential growth areas.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved accessibility to transport, especially active transport options like walking and cycling, can lead to increased physical activity.	Combining improved transport accessibility with health initiatives can amplify benefits. For example, creating safe, accessible walking and cycling paths can encourage more people to engage in physical activity, further enhancing public health	The policy has positive effects as promoting sustainable travel also promotes active and healthy lifestyles.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved connectivity to active travel and public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities, and ensuring sustainable development.	The policy has negative effects as there is no reference to ensuring new developments are accessible for everyone.	The policy could be enhanced by making explicit reference to ensuring new development are accessible for everyone and how this will be achieved.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to ensuring new development are accessible for everyone and how this will be achieved.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved connectivity to active travel and public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities, and ensuring sustainable development.	The policy has negative effects as there is no reference to ensuring new developments are accessible for everyone, particularly disabled and low mobility users.	The policy could be enhanced by making explicit reference to ensuring new developments are accessible for everyone and how this will be achieved, particularly for disabled and low mobility users.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to ensuring new developments are accessible for everyone and how this will be achieved, particularly for disabled and low mobility users.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved connectivity to active travel and public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities, and ensuring sustainable development.	The policy has neutral effects as there is no reference to ensuring new developments are accessible in terms of affordability, however, the policy is focused on delivering sustainable development.	The policy could be enhanced by making explicit reference to ensuring new developments are accessible in terms of affordability.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to ensuring new developments are accessible in terms of affordability.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	-	-	-	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved connectivity to active travel and public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities, and ensuring sustainable development.	The policy has negative effects as there is no reference to accessibility improving connections between communities.	The policy could be enhanced by making explicit reference to accessibility improving connections between communities.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to accessibility improving connections between communities.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Inequalities could be exacerbated if new developments and transport infrastructure are not well connected, particularly in deprived communities.	Improved connectivity to active travel and public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities, and ensuring sustainable development.	The policy has negative effects as there is no reference to improving active travel within/to/from the most deprived areas.	The policy could be enhanced by making explicit reference to promoting active travel and sustainable transport in the most deprived areas.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to promoting active travel and sustainable transport in the most deprived areas.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has negative effects as there is no reference to improving access to information when ensuring new developments are accessible.	The policy could be enhanced by making explicit reference to improving access to information when ensuring new developments are accessible.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to improving access to information when ensuring new developments are accessible.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on delivering sustainable development.	The policy could be enhanced by making explicit reference to promoting active travel and sustainable transport through improving safety.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by promoting active travel and sustainable transport through improving safety.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on delivering sustainable development.	The policy could be enhanced by making explicit reference to promoting active travel and sustainable transport through improving safety.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to promoting active travel and sustainable transport through improving safety.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on delivering sustainable development.	The policy could be enhanced by making explicit reference to promoting active travel and sustainable transport through improving safety.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to promoting active travel and sustainable transport through improving safety.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on delivering sustainable development.	The policy could be enhanced by making explicit reference to promoting active travel and sustainable transport through improving safety.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by promoting active travel and sustainable transport through improving safety.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however, however the policy is focused on delivering sustainable development.	The policy could be enhanced by making explicit reference to promoting active travel and sustainable transport through improving safety.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to promoting active travel and sustainable transport through improving safety.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however, however the policy is focused on delivering sustainable development.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

Policy Name	I15																			
Ref	Objective	Assessment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	?	?	?	D	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has uncertain effects as it references helping to unlock autonomous vehicles which contradicts reducing road traffic.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	?	?	?	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable modes of transport, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable modes of transport, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable modes of transport, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable modes of transport, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable modes of transport, however the policy is focused on future mobility and technology.	The policy could be enhanced by making explicit reference to using low emission vehicle infrastructure to unlock future the potential of mobility.	N	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to using low emission vehicle infrastructure to unlock future the potential of mobility.

10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable modes of transport, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	The integration of electric vehicles (EVs), autonomous driving, and smart traffic management systems, for example, can collectively reduce traffic congestion, lower emissions, and improve fuel efficiency	N/A	The policy has positive effects as technological innovations and strong connectivity will attract investment.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	+	+	++	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, low income and unemployed people, different sex and sexual orientation groups?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on future mobility and technology.	None identified.	No mitigation identified in 2025.	The policy text has been amended slightly, however, the intention remains the same.	o	o	o	Although the policy has been amended by rephrasing the text, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	I16																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	++	D	T	Local	Air quality, vulnerable communities	Reduction in air pollution.	Higher parking costs can encourage people to switch to public transportation, cycling, or walking, further reducing vehicle emissions	The policy has positive effects as it references tackling congestion and supporting a mode shift, which will support the minimisation of air pollution.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	++	D	T	Regional	Air quality, vulnerable communities	Reduction in air pollution.	Higher parking costs can encourage people to switch to public transportation, cycling, or walking, further reducing vehicle emissions	The policy has positive effects as it references tackling congestion and supporting a mode shift, which will support the minimisation of air pollution.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	+	+	++	I	T	Regional	Air quality, vulnerable communities	The cumulative pollution from vehicles using parking spaces can degrade local ecosystems and harm wildlife.	The conversion of redundant spaces into green areas, which can enhance urban biodiversity.	The policy has positive effects as parking levies can reduce the number of parking spaces, allowing for the conversion of these spaces into green areas.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	+	+	++	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	The cumulative pollution from vehicles using parking spaces can degrade local ecosystems and harm wildlife.	Higher parking costs can encourage people to switch to public transportation, cycling, or walking, further reducing vehicle emissions	The policy has positive effects as it references tackling congestion and supporting a mode shift, which will support the minimisation of air pollution and have an indirect positive effect on the environment.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	+	+	++	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	The cumulative pollution from vehicles using parking spaces can degrade local ecosystems and harm wildlife.	Higher parking costs can encourage people to switch to public transportation, cycling, or walking, further reducing vehicle emissions	The policy has positive effects as it references tackling congestion and supporting a mode shift, which will support the minimisation of air pollution and have an indirect positive effect on the environment.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as it does not reference biodiversity,geodiversity, and green and blue infrastructure, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	+	+	++	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	The cumulative pollution from vehicles using parking spaces can degrade local ecosystems and harm wildlife.	Higher parking costs can encourage people to switch to public transportation, cycling, or walking, further reducing vehicle emissions	The policy has positive effects as it references reinvesting in major transport investments, which will result in more high quality design.	The policy could be enhanced by making explicit reference to investing in the good design of transport infrastructure, through best practice wildlife friendly approaches.	N	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to investing in the good design of transport infrastructure, through best practice wildlife friendly approaches.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as it does not reference biodiversity,geodiversity, and green and blue infrastructure, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	+	+	++	D	P	Local	Local communities, green infrastructure, blue infrastructure	The cumulative pollution from vehicles using parking spaces can degrade local ecosystems and harm wildlife.	Higher parking costs can encourage people to switch to public transportation, cycling, or walking, further reducing vehicle emissions	The policy has positive effects as reinvesting in transport will improve access and connectivity across Tameside by sustainable transport modes.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to investing in the good design of transport infrastructure, through best practice wildlife friendly approaches.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as it does not reference biodiversity,geodiversity, and green and blue infrastructure, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as the levy will discourage private car use, encourage a mode shift, and support reinvestment in major transport investments which promote sustainable movement.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as the levy will discourage private car use, encourage a mode shift, and support reinvestment in major transport investments which promote sustainable movement.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	++	I	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as it references encouraging a mode shift and reinvesting in major transport investments which promote sustainable movement, encouraging greater carbon efficiency.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	+	+	++	I	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as the levy will discourage private car use, encourage a mode shift, and support reinvestment in major transport investments which promote sustainable movement. This could include investing in low and zero carbon transport technologies.	The policy could be enhanced by making explicit reference to investing in low and zero carbon transport technologies.	N	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to investing in low and zero carbon transport technologies.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as it references encouraging a mode shift and reinvesting in major transport investments which promote sustainable movement.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as it references tackling congestion and supporting a mode shift, which will support the mitigation of climate change impacts.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference low carbon energy generation, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as it references exploring equitable options at appropriate and accessible locations.	The policy could be enhanced by making explicit reference to provision in rural locations.	N	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to provision in rural locations.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference low carbon construction materials and techniques, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as it references tackling congestion, which will reduce emissions.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as the levy will discourage private car use, encourage a mode shift, and support reinvestment in major transport investments which promote sustainable movement; all of which will help to achieve the 2038 net zero target.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as it does not reference waste, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as it does not reference waste, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as it does not reference waste, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	++	D	P	Regional	Transport network, road network, road users, utility network, construction industry	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Reduced demand for parking can lead to less congestion and smoother traffic flow, which can decrease fuel consumption as vehicles spend less time idling	The policy has positive effects as the levy will discourage private car use, encourage a mode shift, and support reinvestment in major transport investments which promote sustainable movement.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as it does not reference waste, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference soil, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference soil, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference soil, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference soil, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference soil, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	+	+	++	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	Vehicle emissions and runoff from parking areas can contribute to environmental degradation, affecting the preservation of heritage sites	Parking levies can support broader urban planning initiatives that prioritise the conservation of heritage sites and their surroundings	The policy has positive effects as tackling congestion will reduce damage to heritage assets caused by pollution.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	+	+	++	D	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	Implementing parking levies can reduce traffic congestion around heritage sites, making them more accessible and enjoyable for visitors	Parking levies can support broader urban planning initiatives that prioritise the conservation of heritage sites and their surroundings	The policy has positive effects as reinvesting in transport will improve access and connectivity across Tameside by sustainabe transport modes.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	+	+	++	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	Vehicle emissions and runoff from parking areas can contribute to environmental degradation, affecting the preservation of heritage sites	Parking levies can support broader urban planning initiatives that prioritise the conservation of heritage sites and their surroundings	The policy has positive effects as tackling congestion will reduce damage to heritage assets caused by pollution.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	+	+	++	D	P	Regional	Built environment, protected landscapes	Vehicle emissions and runoff from parking areas can contribute to environmental degradation, affecting the preservation of heritage sites	Parking levies can support broader urban planning initiatives that prioritise the conservation of heritage sites and their surroundings	The policy has positive effects as reinvesting in transport will present opportunities to ensure the design respects and enhances the landscape and townscape character.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	+	+	++	I	P	Regional	Built environment, protected landscapes	Vehicle emissions and runoff from parking areas can contribute to environmental degradation, affecting the preservation of heritage sites	Parking levies can support broader urban planning initiatives that prioritise the conservation of heritage sites and their surroundings	The policy has positive effects as tackling congestion will reduce damage to heritage assets caused by pollution.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	+	+	++	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	Vehicle emissions and runoff from parking areas can contribute to environmental degradation, affecting the preservation of heritage sites	Parking levies can support broader urban planning initiatives that prioritise the conservation of heritage sites and their surroundings	The policy has positive effects as it references tackling congestion and supporting a mode shift, which will have an indirect positive effect on the environment.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	D	T	Regional	Built environment, protected landscapes, public rights of way	Vehicle emissions and runoff from parking areas can contribute to environmental degradation, affecting the preservation of heritage sites	Parking levies can support broader urban planning initiatives that prioritise the conservation of heritage sites and their surroundings	The policy has negative effects as it references supporting a mode shift, which means more people may begin to use Public Rights of Way and they will therefore require further protection.	The policy could be enhanced by making explicit reference to the protection and enhancement of active travel routes to support the reduced reliance on vehicles.	N	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	-	-	-	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to the protection and enhancement of active travel routes to support the reduced reliance on vehicles.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	+	+	++	I	P	Regional	Built environment, protected landscapes	Vehicle emissions and runoff from parking areas can contribute to environmental degradation, affecting the preservation of heritage sites	Parking levies can support broader urban planning initiatives that prioritise the conservation of heritage sites and their surroundings	The policy has positive effects as tackling congestion will reduce damage to heritage assets caused by pollution.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as it does not reference landscape and townscape, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as the levy will discourage private car use, encourage a mode shift, and support reinvestment in major transport investments which promote sustainable movement.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as the levy will discourage private car use, encourage a mode shift, and support reinvestment in major transport investments which promote sustainable movement and increased access to key sites and facilities.	The policy be enhanced by making explicit reference to where the most accessible locations are and if they include key services, employment sites, and open space.	N	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy be enhanced by making explicit reference to where the most accessible locations are and if they include key services, employment sites, and open space.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as the levy will discourage private car use, and encourage a mode shift.	The policy could be enhanced by making explicit reference to a mode shift to active travel.	N	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to a mode shift to active travel.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference green and blue infrastructure, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has positive effects as the levy will discourage private car use, encourage a mode shift, and support reinvestment in major transport investments which promote sustainable movement.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference low emission vehicle infrastructure, however the policy is focused on a Workplace Parking Levy.	The policy could be enhanced by combining the levy with low emission vehicle infrastructure in workplace car parks.	N	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by combining the levy with low emission vehicle infrastructure in workplace car parks.

10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	0	0	0	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference land use planning, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	0	0	0	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	++	D	P	Local	Lower socio-economic groups and deprived areas	Revenue generated from parking levies can be used to enhance public transportation systems, making it easier for people to access job opportunities, education, and services	Parking levies can be designed to ensure equitable access to transportation options, benefiting underserved communities and improving access to opportunities for all residents	The policy has positive effects as reinvesting in transport will improve access and connectivity across Tameside by sustainabe transport modes.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Revenue generated from parking levies can be used to enhance public transportation systems, making it easier for people to access job opportunities, education, and services	Parking levies can be designed to ensure equitable access to transportation options, benefiting underserved communities and improving access to opportunities for all residents	The policy has positive effects as reinvesting in transport will improve access and connectivity across Tameside by sustainabe transport modes.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Revenue generated from parking levies can be used to enhance public transportation systems, making it easier for people to access job opportunities, education, and services	Parking levies can be designed to ensure equitable access to transportation options, benefiting underserved communities and improving access to opportunities for all residents	The policy has positive effects as reinvesting in transport will improve travel convenience and reliability.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Revenue generated from parking levies can be used to enhance public transportation systems, making it easier for people to access job opportunities, education, and services	Parking levies can be designed to ensure equitable access to transportation options, benefiting underserved communities and improving access to opportunities for all residents	The policy has positive effects as it references raising new funding through the workplace parking levy and reinvesting in major transport investments.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Revenue generated from parking levies can be used to enhance public transportation systems, making it easier for people to access job opportunities, education, and services	Parking levies can be designed to ensure equitable access to transportation options, benefiting underserved communities and improving access to opportunities for all residents	The policy has positive effects as it references raising new funding through the workplace parking levy and reinvesting in major transport investments.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Revenue generated from parking levies can be used to enhance public transportation systems, making it easier for people to access job opportunities, education, and services	Parking levies can be designed to ensure equitable access to transportation options, benefiting underserved communities and improving access to opportunities for all residents	The policy has positive effects as reinvesting in transport will improve access and connectivity across Tameside by sustainabe transport modes.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Higher parking costs can encourage people to walk, cycle, or use public transportation, promoting physical activity and reducing sedentary lifestyles	Revenue from parking levies can be allocated to public health programs, further enhancing community health and wellbeing	The policy has positive effects as it references tackling congestion and supporting a mode shift, which will support the minimisation of pollution and have an positive effect on public health. A mode shift to active travel will also promote active, healthy lifestyles.	The policy could be enhanced by making explicit reference to a mode shift to active travel.	N	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to a mode shift to active travel.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Higher parking costs can encourage people to walk, cycle, or use public transportation, promoting physical activity and reducing sedentary lifestyles	Revenue from parking levies can be allocated to public health programs, further enhancing community health and wellbeing	The policy has positive effects as it references tackling congestion and supporting a mode shift, which will support the minimisation of pollution and have an positive effect on public health. A mode shift to active travel will also promote active, healthy lifestyles.	The policy could be enhanced by making explicit reference to a mode shift to active travel.	N	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to a mode shift to active travel.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	+	+	++	D	P	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Higher parking costs can encourage people to walk, cycle, or use public transportation, promoting physical activity and reducing sedentary lifestyles	Revenue from parking levies can be allocated to public health programs, further enhancing community health and wellbeing	The policy has positive effects as reinvesting in transport will improve access and connectivity across West Yorkshire by sustainabe transport modes.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Higher parking costs can encourage people to walk, cycle, or use public transportation, promoting physical activity and reducing sedentary lifestyles	Revenue from parking levies can be allocated to public health programs, further enhancing community health and wellbeing	The policy has positive effects as reinvesting in transport will improve access and connectivity across West Yorkshire by sustainabe transport modes.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Higher parking costs can encourage people to walk, cycle, or use public transportation, promoting physical activity and reducing sedentary lifestyles	Revenue from parking levies can be allocated to public health programs, further enhancing community health and wellbeing	The policy has neutral effects as it does not reference severance, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Revenue generated from parking levies can be used to enhance public transportation systems, making it easier for people from all socioeconomic backgrounds to access job opportunities, education, and services	Parking levies can be designed to ensure equitable access to transportation options, benefiting underserved communities and improving access to opportunities for all residents	The policy has positive effects as it references exploring equitable options at appropriate and accessible locations. This will ensure parking continues to be available at less accessible locations, which will benefit those who are disabled or less mobile.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Revenue generated from parking levies can be used to enhance public transportation systems, making it easier for people from all socioeconomic backgrounds to access job opportunities, education, and services	Parking levies can be designed to ensure equitable access to transportation options, benefiting underserved communities and improving access to opportunities for all residents	The policy has positive effects as it references exploring equitable options at appropriate and accessible locations. This will ensure parking continues to be available at less accessible locations, which will benefit those who are disabled or less mobile.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Revenue generated from parking levies can be used to enhance public transportation systems, making it easier for people from all socioeconomic backgrounds to access job opportunities, education, and services	Parking levies can be designed to ensure equitable access to transportation options, benefiting underserved communities and improving access to opportunities for all residents	The policy has negative effects as it references a workplace parking levy which will increase the cost of parking, and could result in an uplift in public transport costs following an increase in users.	The policy could be enhanced by making reference to ensuring reference to affordability across sustainable modes of transport.	N	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	-	-	-	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making reference to ensuring reference to affordability across sustainable modes of transport.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	++	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Revenue generated from parking levies can be used to enhance public transportation systems, making it easier for people from all socioeconomic backgrounds to access job opportunities, education, and services	Parking levies can be designed to ensure equitable access to transportation options, benefiting underserved communities and improving access to opportunities for all residents	The policy has positive effects as reinvesting in transport will improve access and connectivity across Tameside by sustainabe transport modes.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	++	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Revenue generated from parking levies can be used to enhance public transportation systems, making it easier for people from all socioeconomic backgrounds to access job opportunities, education, and services	Parking levies can be designed to ensure equitable access to transportation options, benefiting underserved communities and improving access to opportunities for all residents	The policy has positive effects as the levy will discourage private car use, and encourage a mode shift.	The policy could be enhanced by making explicit reference to a mode shift to active travel in the most deprived areas.	N	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to a mode shift to active travel in the most deprived areas.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as it does not reference access to information, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	+	+	++	I	P	Local	Transport network, road network, road users, local communities	Reduction in crime rates.	Funds from parking levies can be allocated to safety initiatives, such as better street lighting and traffic calming measures, further enhancing overall safety	The policy has positive effects as encouraging a model shift to active travel will result in more people using streets and spaces, increasing levels of natural surveillance.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	+	+	++	I	P	Regional	Transport network, road network, road users, local communities	Reduction in crime rates.	Funds from parking levies can be allocated to safety initiatives, such as better street lighting and traffic calming measures, further enhancing overall safety	The policy has positive effects as funds from parking levies can be allocated to safety initiatives, such as better street lighting and traffic calming measures, further enhancing overall safety	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	++	I	P	Local	Transport network, road network, road users, local communities	Reduction in vehicle accidents.	Revenue from parking levies can be used to improve public transportation infrastructure, reducing the reliance on private vehicles and decreasing the likelihood of traffic incidents	The policy has positive effects as funds from parking levies can be allocated to improve public transportation infrastructure, reducing the reliance on private vehicles and decreasing the likelihood of traffic incidents	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	+	+	++	I	P	Local	Transport network, road network, road users, local communities	Reduction in vehicle accidents.	Revenue from parking levies can be used to improve public transportation infrastructure, reducing the reliance on private vehicles and decreasing the likelihood of traffic incidents	The policy has positive effects as funds from parking levies can be allocated to improve public transportation infrastructure, reducing the reliance on private vehicles and decreasing the likelihood of traffic incidents	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	+	+	++	I	P	Local	Transport network, road network, road users, local communities	Reduction in vehicle accidents.	Revenue from parking levies can be used to improve public transportation infrastructure, reducing the reliance on private vehicles and decreasing the likelihood of traffic incidents	The policy has positive effects as funds from parking levies can be allocated to improve public transportation infrastructure, reducing the reliance on private vehicles and decreasing the likelihood of traffic incidents	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	+	+	++	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Reduction in air pollution.	Higher parking costs can encourage people to switch to public transportation, cycling, or walking, further reducing vehicle emissions	The policy has positive effects as it references tackling congestion and supporting a mode shift, which will support the minimisation of air pollution.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	+	+	++	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference practices, equipment, and materials, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference practices, equipment, and materials, however the policy is focused on a Workplace Parking Levy.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	++	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Reduction in air pollution.	Higher parking costs can encourage people to switch to public transportation, cycling, or walking, further reducing vehicle emissions	The policy has positive effects as it references tackling congestion and supporting a mode shift, which will support the minimisation of air pollution.	None identified.	No mitigation identified in 2025.	The policy now references greater uptake of sustainable transport options and changed reference to exploring equitable options into developig.	o	o	o	Although the policy has been amended by referencing the greater uptake of sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to improving air quality, however the policy is focused on developing a city centre movement strategy.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing areas with low air quality.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to improving air quality, however the policy is focused on developing a city centre movement strategy.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	+	+	+	The policy has been amended to refer to supporting the wider Mass Transit delivery, which enables reduced traffic levels and public transport use. Therefore, the scoring has increased to positive.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to habitats, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to wildlife-friendly approaches, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?"	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to Local Nature Recovery Strategies, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to sustainable forms of transport, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to reducing private car use, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to encouraging carbon efficiency in movement, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to innovative technologies, however the policy is focused on developing a city centre movement strategy.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to promoting a wider choice of passenger travel, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low carbon energy generation, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to rural communities, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing needs of rural communities in relation to Corridors of Opportunity.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to construction, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to new transport infrastructure, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to net zero, however the policy is focused on developing a city centre movement strategy.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risk adaptation, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risk adaptation, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risk adaptation, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to new infrastructure, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to waste management and recycling, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to waste management and recycling, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	-	-	-	D	P	Regional	Transport network, road network, road users, utility network, construction industry	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to promoting sustainable transport, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to flood risk adaptation, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to surfacing, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to blue infrastructure, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to drainage, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to land use planning, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing benefits of focusing on the Corridors of Opportunity wherever aligns with the assessment objective.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soils, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing benefits of focusing on the Corridors of Opportunity wherever aligns with the assessment objective.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soils, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing benefits of focusing on the Corridors of Opportunity wherever aligns with the assessment objective.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soils, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscapes, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscapes, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscapes or townscape, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	D	T	Regional	Built environment, protected landscapes, public rights of way	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to protecting public rights of ways, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to buildings or townscape, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	-	-	-	D	T	Regional	Built environment, protected landscapes	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to removing unnecessary clutter, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to disincentives for private car use, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to improving accessibility, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on developing a city centre movement strategy.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on developing a city centre movement strategy.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to promoting sustainable transport, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on developing a city centre movement strategy.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to land use planning, however the policy is focused on developing a city centre movement strategy.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	-	-	-	D	P	Local	Lower socio-economic groups and deprived areas	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to improving accessibility, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing benefits of focusing on the Corridors of Opportunity wherever aligns with the assessment objective.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to improving accessibility, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to reducing journey times, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to decarbonisation of transport, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to establishing an effective and resilient transport network, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to improving accessibility, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing benefits of focusing on the Corridors of Opportunity wherever aligns with the assessment objective.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to open space, recreational activities, and employment locations, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing benefits of focusing on the Corridors of Opportunity wherever aligns with the assessment objective.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to severance issues, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, low income and unemployed people, different sex and sexual orientation groups?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to improving accessibility and inclusive designs, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to improving accessibility by affordable transport options, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing benefits of focusing on the Corridors of Opportunity wherever aligns with the assessment objective.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to deprived areas, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	None identified.	No mitigation identified in 2025.	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing benefits of focusing on the Corridors of Opportunity wherever aligns with the assessment objective.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to access to information, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to improving public realm and natural surveillance, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	-	-	-	D	P	Local	Transport network, road network, road users, local communities	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to the risks of vehicles, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	-	-	-	D	P	Local	Transport network, road network, road users, local communities	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to traffic calming measures, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	-	-	-	D	P	Local	Transport network, road network, road users, local communities	Development of a movement strategy could guide developments within the area and promote a shift in movement patterns in the long-term.	May be synergistic effects when combined with other schemes that promote sustainable travel.	The policy has negative effects as there is no reference to enhancing road safety and reducing accidents, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	-	-	-	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to transport impacts, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to health, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to health, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to transport impacts, however the policy is focused on developing a movement strategy and support the delivery of Mass Transit.	The policy could make more explicit reference to the proposed content of the Leeds city centre movement strategy wherever aligns with the assessment objective.	N	The policy now references a focus on the Corridors of Opportunity and support of the delivery of Mass Transit across West Yorkshire, on top of Phase 1.	o	o	o	Although the policy has been amended by referencing Corridors of Opportunity and support of the wider Mass Transit delivery, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could make more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.

Policy Name	I18												
Ref	Objective	Assesement Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAS) and where this pollution disproportionately affects vulnerable populations?	+	+	++	I	T	Local	Air quality, vulnerable communities	Each new zero-emission bus reduces tailpipe pollutants; replacing hundreds compounds into significant NOx and PM reductions.	Coordinated services reduce traffic; less congestion makes buses faster, reinforcing mode shift away from cars.	The policy has positive effects as bus franchising will help to minimise air pollution from transport.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	++	I	T	Regional	Air quality, vulnerable communities	Each new zero-emission bus reduces tailpipe pollutants; replacing hundreds compounds into significant NOx and PM reductions.	Coordinated services reduce traffic; less congestion makes buses faster, reinforcing mode shift away from cars.	The policy has positive effects as bus franchising will help to minimise air pollution from transport.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference blue and green infrastructure, however, the policy is focused on bus franchising.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	O	O	D	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as it does not reference blue and green infrastructure, however, the policy is focused on bus franchising.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	D	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as it does not reference blue and green infrastructure, however, the policy is focused on bus franchising.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as it does not reference blue and green infrastructure, however, the policy is focused on bus franchising.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as it does not reference blue and green infrastructure, however, the policy is focused on bus franchising.	None identified.

2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as it does not reference blue and green infrastructure, however, the policy is focused on bus franchising.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	+	+	+	D	P	Local	Local communities, green infrastructure, blue infrastructure	Franchising allows transport authorities to align bus routes with green corridors, ensuring access to parks and green spaces, which cumulatively boosts public health.	Bus routes designed to connect people to parks increase use of green spaces, which in turn builds public support for sustainable transport and environmental investment.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	O	O	O	I	P	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as it does not reference blue and green infrastructure, however, the policy is focused on bus franchising.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Integrated fares and timetables increase bus use. More passengers per bus means fewer car trips, cumulatively lowering transport sector emissions.	Reduced car traffic frees space for cycling, walking, and green infrastructure, which further supports low-carbon mobility.	The policy has positive effects as bus franchising will improve availability and accessibility.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Integrated fares and timetables increase bus use. More passengers per bus means fewer car trips, cumulatively lowering transport sector emissions.	Reduced car traffic frees space for cycling, walking, and green infrastructure, which further supports low-carbon mobility.	The policy has positive effects as bus franchising will improve availability and accessibility, encouraging a reduction in private car use.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Integrated fares and timetables increase bus use. More passengers per bus means fewer car trips, cumulatively lowering transport sector emissions.	Reduced car traffic frees space for cycling, walking, and green infrastructure, which further supports low-carbon mobility.	The policy has positive effects as bus franchising will improve availability and accessibility, enabling greater efficiency of movement.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference low carbon technology, however, the policy is focused on bus franchising.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Integrated fares and timetables increase bus use. More passengers per bus means fewer car trips, cumulatively lowering transport sector emissions.	Reduced car traffic frees space for cycling, walking, and green infrastructure, which further supports low-carbon mobility.	The policy has positive effects as bus franchising will improve availability and accessibility, integration of services, and flexibility.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference climate change, however, the policy is focused on bus franchising.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference low carbon energy, however, the policy is focused on bus franchising.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	+	+	+	I	P	Regional	Transport network, road network, road users, air quality	Integrated fares and timetables increase bus use. More passengers per bus means fewer car trips, cumulatively lowering transport sector emissions.	Reduced car traffic frees space for cycling, walking, and green infrastructure, which further supports low-carbon mobility.	The policy has positive effects as rural communities are likely to travel by car due to lack of sustainable transport infrastructure, and so promoting this in rural areas will support more sustainable movement.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference low carbon construction however, the policy is focused on bus franchising.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference embedded emissions, however, the policy is focused on bus franchising.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	Public control enables authorities to embed climate targets into contracts, ensuring emissions reductions accumulate year after year	Reduced car traffic frees space for cycling, walking, and green infrastructure, which further supports low-carbon mobility.	The policy has positive effects as bus franchising will will contribute to achieving Net Zero by reducing emissions from private vehicles.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however, the policy is focused on bus franchising.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however, the policy is focused on bus franchising.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however, the policy is focused on bus franchising.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however, the policy is focused on bus franchising.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however, the policy is focused on bus franchising.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however, the policy is focused on bus franchising.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as it does not reference natural resources, however, the policy is focused on bus franchising.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as it does not reference natural resources, however, the policy is focused on bus franchising.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as it does not reference natural resources, however, the policy is focused on bus franchising.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	++	D	P	Regional	Transport network, road network, road users, utility network, construction industry	Shifting commuters and freight to rail reduces road traffic, lowering cumulative fuel consumption and emissions from idling and congestion.	Smart scheduling, predictive maintenance, and AI-driven energy management synergise with rail's inherent efficiency, reducing wasted energy and extending asset life.	The policy has neutral effects as bus franchising will promote the use of sustainable transport.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as it does not reference natural resources, however, the policy is focused on bus franchising.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on bus franchising.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on bus franchising.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on bus franchising.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on bus franchising.	None identified.

6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on bus franchising.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on bus franchising.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference the soil resources, however, the policy is focused on bus franchising.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference the soil resources, however, the policy is focused on bus franchising.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference the soil resources, however, the policy is focused on bus franchising.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference the soil resources, however, the policy is focused on bus franchising.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference the soil resources, however, the policy is focused on bus franchising.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	+	+	++	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	Coordinated bus networks reduce car dependency, lowering congestion and emissions around heritage sites.	Reliable franchised buses make heritage sites more accessible; increased visitation strengthens the case for further investment in both transport and heritage conservation.	The policy has positive effects as coordinated bus networks reduce car dependency, lowering congestion and emissions around heritage sites, reducing the impact.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	+	+	++	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	Coordinated bus networks reduce car dependency, lowering congestion and emissions around heritage sites.	Reliable franchised buses make heritage sites more accessible; increased visitation strengthens the case for further investment in both transport and heritage conservation.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	+	+	++	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	Coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes.	Reliable franchised buses make landscapes more accessible; increased visitation strengthens the case for further investment in both transport and landscape conservation.	The policy has positive effects as coordinated bus networks reduce car dependency, lowering congestion and emissions around heritage sites, reducing the impact.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	+	+	++	I	P	Regional	Built environment, protected landscapes	Coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes.	Reliable franchised buses make landscapes more accessible; increased visitation strengthens the case for further investment in both transport and landscape conservation.	The policy has positive effects as coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes, reducing the impact.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	+	+	++	I	P	Regional	Built environment, protected landscapes	Coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes.	Reliable franchised buses make landscapes more accessible; increased visitation strengthens the case for further investment in both transport and landscape conservation.	The policy has positive effects as coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes, reducing the impact.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	+	+	++	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	Coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes.	Reliable franchised buses make landscapes more accessible; increased visitation strengthens the case for further investment in both transport and landscape conservation.	The policy has positive effects as coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes, reducing the impact.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	+	+	++	D	T	Regional	Built environment, protected landscapes, public rights of way	Coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes.	Reliable franchised buses make landscapes more accessible; increased visitation strengthens the case for further investment in both transport and landscape conservation.	The policy has positive effects as coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes, reducing the impact.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	+	+	++	I	P	Regional	Built environment, protected landscapes	Coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes.	Reliable franchised buses make landscapes more accessible; increased visitation strengthens the case for further investment in both transport and landscape conservation.	The policy has positive effects as coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes, reducing the impact.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	D	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as it does not reference landscape and townscape, however, the policy is focused on bus franchising.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	D	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference disincentivising car use however, the policy is focused on bus franchising.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Franchising contracts can mandate zero-emission buses, accelerating the transition to electric fleets.	Cleaner fleets, better ridership, and congestion management each reduce emissions; together they deliver substantial climate benefits.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference active travel, however, the policy is focused on bus franchising.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference active travel, however, the policy is focused on bus franchising.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Franchising contracts can mandate zero-emission buses, accelerating the transition to electric fleets.	Cleaner fleets, better ridership, and congestion management each reduce emissions; together they deliver substantial climate benefits.	The policy has positive effects as bus franchising will improve availability and accessibility, integration of services, and flexibility.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference low emission vehicles, however, the policy is focused on bus franchising.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	Franchising contracts can mandate zero-emission buses, accelerating the transition to electric fleets.	Cleaner fleets, better ridership, and congestion management each reduce emissions; together they deliver substantial climate benefits.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	++	D	P	Local	Lower socio-economic groups and deprived areas	Better connectivity reduces commuting times, expanding the effective labour pool for employers.	More reliable buses bring more people into city centres; thriving businesses justify further investment in transport.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Better connectivity reduces commuting times, expanding the effective labour pool for employers.	More reliable buses bring more people into city centres; thriving businesses justify further investment in transport.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Better connectivity reduces commuting times, expanding the effective labour pool for employers.	More reliable buses bring more people into city centres; thriving businesses justify further investment in transport.	The policy has positive effects as bus franchising will improve availability and accessibility, integration of services, and flexibility.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	O	O	O	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as it does not reference economic prosperity, however, the policy is focused on bus franchising.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	O	O	O	D	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as it does not reference economic prosperity, however, the policy is focused on bus franchising.	None identified.

11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Better connectivity reduces commuting times, expanding the effective labour pool for employers.	More reliable buses bring more people into city centres; thriving businesses justify further investment in transport.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Franchising allows transport authorities to align bus routes with green corridors, ensuring access to parks and green spaces, which cumulatively boosts public health.	Bus routes designed to connect people to parks increase use of green spaces, which in turn builds public support for sustainable transport and environmental investment.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities, including active travel facilities and green infrastructure.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Franchising allows transport authorities to align bus routes with green corridors, ensuring access to parks and green spaces, which cumulatively boosts public health.	Bus routes designed to connect people to parks increase use of green spaces, which in turn builds public support for sustainable transport and environmental investment.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities, including active travel facilities and green infrastructure.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	+	+	++	I	P	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Franchising allows transport authorities to align bus routes with green corridors, ensuring access to parks and green spaces, which cumulatively boosts public health.	Bus routes designed to connect people to parks increase use of green spaces, which in turn builds public support for sustainable transport and environmental investment.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Franchising allows transport authorities to align bus routes with green corridors, ensuring access to parks and green spaces, which cumulatively boosts public health.	Bus routes designed to connect people to parks increase use of green spaces, which in turn builds public support for sustainable transport and environmental investment.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	O	O	O	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as it does not reference health and wellbeing however, the policy is focused on bus franchising.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as it does not reference equality of opportunity, however, the policy is focused on bus franchising.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Integrated ticketing and fare caps reduce travel costs, cumulatively widening access for low-income groups.	Better bus access increases participation in education and employment; greater participation strengthens the case for further investment in transport equity.	The policy has positive effects as bus franchising will improve availability and accessibility.	The policy could be enhanced by specifically referencing inclusivity and the benefits of bus franchising for all citizens.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Integrated ticketing and fare caps reduce travel costs, cumulatively widening access for low-income groups.	Better bus access increases participation in education and employment; greater participation strengthens the case for further investment in transport equity.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	++	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Integrated ticketing and fare caps reduce travel costs, cumulatively widening access for low-income groups.	Better bus access increases participation in education and employment; greater participation strengthens the case for further investment in transport equity.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and communities.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	++	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Integrated ticketing and fare caps reduce travel costs, cumulatively widening access for low-income groups.	Better bus access increases participation in education and employment; greater participation strengthens the case for further investment in transport equity.	The policy has positive effects as an improved bus system will increase accessibility to different spaces and facilities.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Integrated ticketing and fare caps reduce travel costs, cumulatively widening access for low-income groups.	Better bus access increases participation in education and employment; greater participation strengthens the case for further investment in transport equity.	The policy has positive effects as bus franchising will improve availability and accessibility, integration of services, and flexibility.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as it does not reference safety, however, the policy is focused on bus franchising.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	+	+	++	I	P	Regional	Transport network, road network, road users, local communities	Franchising enables faster adoption of zero-emission and modern buses, which come with advanced safety features (collision avoidance, CCTV, better lighting).	Reliable, safe buses attract more passengers; higher ridership increases “eyes on the street,” reinforcing perceptions of safety.	The policy has positive effects as bus franchising will improve availability and accessibility, which in turn, can help with feelings of safety.	The policy could be enhanced by specifically referencing safety and the benefits of bus franchising in terms of safety.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	++	D	P	Local	Transport network, road network, road users, local communities	Coordinated routes reduce congestion and bus bunching, lowering accident risk.	Safer bus corridors reduce car traffic; fewer cars make streets safer for walking and cycling, reinforcing sustainable mobility.	The policy has positive effects as bus franchising will reduce the number of cars on the road and therefore limit risk.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	D	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as it does not reference safety, however, the policy is focused on bus franchising.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	D	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as it does not reference safety, however, the policy is focused on bus franchising.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference construction and operation, however, the policy is focused on bus franchising.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference construction and operation, however, the policy is focused on bus franchising.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	O	O	O	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference construction and operation, however, the policy is focused on bus franchising.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	O	O	O	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference construction and operation, however, the policy is focused on bus franchising.	None identified.

Policy Name	I19												
Ref	Objective	Assesement Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAS) and where this pollution disproportionately affects vulnerable populations?	+	+	++	I	T	Local	Air quality, vulnerable communities	Electrification and modernisation of rail align with air quality goals by reducing diesel train emissions.	Coordinated strategies ensure that investments in rail infrastructure deliver maximum air quality improvements.	The policy has positive effects as prioritising rail will help to minimise air pollution from transport.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	++	I	T	Regional	Air quality, vulnerable communities	Electrification and modernisation of rail align with air quality goals by reducing diesel train emissions.	Coordinated strategies ensure that investments in rail infrastructure deliver maximum air quality improvements.	The policy has positive effects as prioritising rail will help to minimise air pollution from transport.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference opportunities for blue and green infrastructure, however, the policy is focused on strategic rail.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	-	-	-	D	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	Rail expansion, electrification, and station upgrades can disrupt habitats and species.	Aligning the Rail Strategy with biodiversity policies ensures infrastructure projects include ecological safeguards.	The policy has negative effects as new rail infrastructure may impact on species and habitats.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	-	-	-	D	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	Rail expansion, electrification, and station upgrades can disrupt habitats and species.	Aligning the Rail Strategy with biodiversity policies ensures infrastructure projects include ecological safeguards.	The policy has negative effects as new rail infrastructure may result in the severance of habitats.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as it does not reference opportunities for blue and green infrastructure, however, the policy is focused on strategic rail.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as it does not reference good design, however, the policy is focused on strategic rail.	None identified.

2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on strategic rail.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	+	+	+	D	P	Local	Local communities, green infrastructure, blue infrastructure	Rail expansion, electrification, and station upgrades can disrupt habitats and species.	Aligning the Rail Strategy with biodiversity policies ensures infrastructure projects include ecological safeguards.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	O	O	O	I	P	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to LNRS, however the policy is focused on strategic rail.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Moving passengers and freight from cars and trucks to trains reduces cumulative CO ₂ emissions from road transport.	Electrified rail powered by renewable energy multiplies emission reductions.	The policy has positive effects as it makes reference to the Railways Reform Bill which aims to simplify the railway system and reduce costs, promoting greater use.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Moving passengers and freight from cars and trucks to trains reduces cumulative CO ₂ emissions from road transport.	Electrified rail powered by renewable energy multiplies emission reductions.	The policy has positive effects as it makes reference to the Railways Reform Bill which aims to simplify the railway system and reduce costs, promoting greater use.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Moving passengers and freight from cars and trucks to trains reduces cumulative CO ₂ emissions from road transport.	Electrified rail powered by renewable energy multiplies emission reductions.	The policy has positive effects as it makes reference to the Railways Reform Bill which aims to simplify the railway system which will improve efficiency.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference low carbon technology, however, the policy is focused on strategic rail.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Moving passengers and freight from cars and trucks to trains reduces cumulative CO ₂ emissions from road transport.	Electrified rail powered by renewable energy multiplies emission reductions.	The policy has positive effects as it makes reference to the Railways Reform Bill which aims to simplify the railway system and invest in new services.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference climate change, however, the policy is focused on strategic rail.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference energy gengeration, however, the policy is focused on strategic rail.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	+	+	+	I	P	Regional	Transport network, road network, road users, air quality	Moving passengers and freight from cars and trucks to trains reduces cumulative CO ₂ emissions from road transport.	Electrified rail powered by renewable energy multiplies emission reductions.	The policy has positive effects as rural communities are likely to travel by car due to lack of sustainable transport infrastructure, and so promoting this in rural areas will support more sustainable movement.	The policy could be enhanced by specifically referencing target areas for investment, such as rural areas.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	+	+	+	I	T	Regional	Transport network, road network, road users, air quality	Moving passengers and freight from cars and trucks to trains reduces cumulative CO ₂ emissions from road transport.	Electrified rail powered by renewable energy multiplies emission reductions.	The policy has positive effects as the provision of new rail infrastructure and services will enable opportunities for low carbon construction.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	+	+	+	I	P	Regional	Transport network, road network, road users, air quality	Moving passengers and freight from cars and trucks to trains reduces cumulative CO ₂ emissions from road transport.	Electrified rail powered by renewable energy multiplies emission reductions.	The policy has positive effects as the provision of new rail infrastructure and services will enable opportunities to minimise emissions .	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	Moving passengers and freight from cars and trucks to trains reduces cumulative CO ₂ emissions from road transport.	Electrified rail powered by renewable energy multiplies emission reductions.	The policy has positive effects as the provision of new rail infrastructure will contribute to achieving Net Zero.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference climate change, however, the policy is focused on strategic rail.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference opportunities for blue and green infrastructure, however, the policy is focused on strategic rail.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	-	-	-	I	P	Regional	Transport network, road network, road users, vulnerable communities	Repeated flood events accumulate into significant reliability issues, economic costs, and passenger dissatisfaction.	Coordinating transport planning with climate adaptation strategies ensures rail investments also reduce floodplain vulnerability.	The policy has negative effects as new rail infrastructure may impact on floodplains, and repeated flood events result in reliability issues.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	-	-	-	I	T	Regional	Transport network, road network, road users, vulnerable communities	Repeated flood events accumulate into significant reliability issues, economic costs, and passenger dissatisfaction.	Coordinating transport planning with climate adaptation strategies ensures rail investments also reduce floodplain vulnerability.	The policy has negative effects as new rail infrastructure may impact on floodplains, and repeated flood events result in reliability issues.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference opportunities for blue and green infrastructure, however, the policy is focused on strategic rail.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	-	-	-	I	P	Regional	Transport network, road network, road users, vulnerable communities	Repeated flood events accumulate into significant reliability issues, economic costs, and passenger dissatisfaction.	Coordinating transport planning with climate adaptation strategies ensures rail investments also reduce floodplain vulnerability.	The policy has negative effects as new rail infrastructure may impact on floodplains, and repeated flood events result in reliability issues.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	-	-	-	I	P	Regional	Utility network, construction industry	Shifting commuters and freight to rail reduces road traffic, lowering cumulative fuel consumption and emissions from idling and congestion.	Smart scheduling, predictive maintenance, and AI-driven energy management synergise with rail's inherent efficiency, reducing wasted energy and extending asset life.	The policy has negative effects as it does not reference energy efficiency in new rail infrastructure.	The policy could be improved by providing reference to ensuring energy efficiency in new rail infrastructure.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as it does not reference waste, however, the policy is focused on strategic rail.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as it does not reference waste, however, the policy is focused on strategic rail.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	++	D	P	Regional	Transport network, road network, road users, utility network, construction industry	Shifting commuters and freight to rail reduces road traffic, lowering cumulative fuel consumption and emissions from idling and congestion.	Smart scheduling, predictive maintenance, and AI-driven energy management synergise with rail's inherent efficiency, reducing wasted energy and extending asset life.	The policy has positive effects as it makes reference to the Railways Reform Bill which aims to simplify the railway system and reduce costs, promoting greater use.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as it does not reference waste, however, the policy is focused on strategic rail.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on strategic rail.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on strategic rail.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on strategic rail.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on strategic rail.	None identified.

6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on strategic rail.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as it does not reference the water environment, however, the policy is focused on strategic rail.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference soil resources, however, the policy is focused on strategic rail.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference soil resources, however, the policy is focused on strategic rail.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference soil resources, however, the policy is focused on strategic rail.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference soil resources, however, the policy is focused on strategic rail.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as it does not reference soil resources, however, the policy is focused on strategic rail.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	-	-	-	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	Repeated rail expansions can cumulatively erode heritage landscapes if not managed sensitively.	Rail services amplify heritage tourism by making sites more accessible, which in turn funds conservation.	The policy has negative effects as new rail infrastructure may impact on heritage assets.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	+	+	++	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	Repeated rail expansions can cumulatively erode heritage landscapes if not managed sensitively.	Rail services amplify heritage tourism by making sites more accessible, which in turn funds conservation.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	-	-	-	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	Repeated rail expansions can cumulatively erode heritage landscapes if not managed sensitively.	Rail services amplify heritage tourism by making sites more accessible, which in turn funds conservation.	The policy has negative effects as new rail infrastructure may impact heritage assets.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	-	-	-	I	P	Regional	Built environment, protected landscapes	Repeated rail expansions can cumulatively alter rural character, but also reduce long-term road encroachment.	Decarbonised rail synergises with landscape and townscape preservation by reducing environmental stressors.	The policy has negative effects as new rail infrastructure may impact landscapes.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	-	-	-	I	P	Regional	Built environment, protected landscapes	Repeated rail expansions can cumulatively alter rural character, but also reduce long-term road encroachment.	Decarbonised rail synergises with landscape and townscape preservation by reducing environmental stressors.	The policy has negative effects as new rail infrastructure may impact landscapes.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	-	-	-	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	Repeated rail expansions can cumulatively alter rural character, but also reduce long-term road encroachment.	Decarbonised rail synergises with landscape and townscape preservation by reducing environmental stressors.	The policy has negative effects as new rail infrastructure may impact landscapes.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	D	T	Regional	Built environment, protected landscapes, public rights of way	Repeated rail expansions can cumulatively alter rural character, but also reduce long-term road encroachment.	Decarbonised rail synergises with landscape and townscape preservation by reducing environmental stressors.	The policy has negative effects as new rail infrastructure may impact landscapes and result in severance.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.

9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	-	-	-	I	P	Regional	Built environment, protected landscapes	Repeated rail expansions can cumulatively alter rural character, but also reduce long-term road encroachment.	Decarbonised rail synergises with landscape and townscape preservation by reducing environmental stressors.	The policy has negative effects as new rail infrastructure may impact landscapes.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	D	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as it does not reference streetscapes, however, the policy is focused on strategic rail.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	D	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference disincentivising private car use, however, the policy is focused on strategic rail.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Rail consistently lowers transport sector emissions, helping meet net-zero targets.	Integrated ticketing and timetables create seamless journeys, reinforcing modal shift.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference active travel, however, the policy is focused on strategic rail.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference active travel, however, the policy is focused on strategic rail.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Rail consistently lowers transport sector emissions, helping meet net-zero targets.	Integrated ticketing and timetables create seamless journeys, reinforcing modal shift.	The policy has positive effects as it makes reference to the Railways Reform Bill which aims to simplify the railway system and reduce costs, promoting greater use.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference EV charging infrastructure, however, the policy is focused on strategic rail.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	Rail consistently lowers transport sector emissions, helping meet net-zero targets.	Integrated ticketing and timetables create seamless journeys, reinforcing modal shift.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	++	D	P	Local	Lower socio-economic groups and deprived areas	Rail investment cumulatively strengthens local economies by connecting towns and cities.	Seamless multimodal networks synergise to expand reach into areas rail alone cannot serve.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Rail investment cumulatively strengthens local economies by connecting towns and cities.	Seamless multimodal networks synergise to expand reach into areas rail alone cannot serve.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Rail investment cumulatively strengthens local economies by connecting towns and cities.	Seamless multimodal networks synergise to expand reach into areas rail alone cannot serve.	The policy has positive effects as it references the Railways Reform Bill which aims to simplify the network to improve convenience.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	++	I	P	Regional	Lower socio-economic groups and deprived areas	Rail investment cumulatively strengthens local economies by connecting towns and cities.	Seamless multimodal networks synergise to expand reach into areas rail alone cannot serve.	The policy has positive effects as it references the Railways Reform Bill which aims to focus on growth and investment.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Rail investment cumulatively strengthens local economies by connecting towns and cities.	Seamless multimodal networks synergise to expand reach into areas rail alone cannot serve.	The policy has positive effects as it references the Railways Reform Bill which aims to focus on growth and investment.	None identified.

11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Rail investment cumulatively strengthens local economies by connecting towns and cities.	Seamless multimodal networks synergise to expand reach into areas rail alone cannot serve.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Sustained rail access supports long-term wellbeing by connecting people to opportunities.	Stations linked with cycling and walking routes amplify health benefits.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities, including active travel facilities and green infrastructure.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Sustained rail access supports long-term wellbeing by connecting people to opportunities.	Stations linked with cycling and walking routes amplify health benefits.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities, including active travel facilities and green infrastructure.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	+	+	++	I	P	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Sustained rail access supports long-term wellbeing by connecting people to opportunities.	Stations linked with cycling and walking routes amplify health benefits.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Sustained rail access supports long-term wellbeing by connecting people to opportunities.	Stations linked with cycling and walking routes amplify health benefits.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	-	-	-	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Sustained rail access supports long-term wellbeing by connecting people to opportunities.	Stations linked with cycling and walking routes amplify health benefits.	The policy has negative effects as new rail infrastructure may result in severance issues.	The policy could be improved by providing reference to mitigation associated with new rail infrastructure.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as it does not reference equality of opportunity, however, the policy is focused on strategic rail.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as it does not reference equality of opportunity, however, the policy is focused on strategic rail.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Continuous investment in rail reduces long-term inequalities between urban and rural areas.	Discounted fares amplify equality by making rail accessible to low-income groups.	The policy has positive effects as an Policy I1	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	++	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Continuous investment in rail reduces long-term inequalities between urban and rural areas.	Discounted fares amplify equality by making rail accessible to low-income groups.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and communities.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	+	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Continuous investment in rail reduces long-term inequalities between urban and rural areas.	Discounted fares amplify equality by making rail accessible to low-income groups.	The policy has positive effects as an improved railway system will increase accessibility to different spaces and facilities.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Continuous investment in rail reduces long-term inequalities between urban and rural areas.	Discounted fares amplify equality by making rail accessible to low-income groups.	The policy has positive effects as it references the Railways Reform Bill which aims to simplify the network through a new app, enabling access to information.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as it does not reference to public realm however, the policy is focused on strategic rail.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	+	+	++	I	P	Regional	Transport network, road network, road users, local communities	Continuous safety investment (signalling upgrades, barriers, CCTV) reduces incidents over decades.	Awareness films and police collaboration amplify safety compliance at crossings and stations.	The policy has positive effects as it references the Railways Reform Bill which aims to promote a passenger watchdog to advocate for improvements.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	O	O	O	D	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as it does not reference to vehicle safety, however, the policy is focused on strategic rail.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	D	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as it does not reference to vehicle safety, however, the policy is focused on strategic rail.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	D	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as it does not reference to vehicle safety, however, the policy is focused on strategic rail.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference to construction and operation, however, the policy is focused on strategic rail.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference to construction and operation, however, the policy is focused on strategic rail.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	O	O	O	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference to construction and operation, however, the policy is focused on strategic rail.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	O	O	O	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as it does not reference to construction and operation, however, the policy is focused on strategic rail.	None identified.

Policy Name	RR1																				
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts	
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	O	O	O	I	P	Regional	Air quality, local communities, vulnerable populations	The prioritisation of public transport may improve air quality in the long term.	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	I	T	Regional	Air quality, local communities, transport network, Road network	The prioritisation of public transport on roads may constrain road spaces for active travel.	N/A	The policy has positive effects as the prioritisation of public transport supports a modal shift away from private car use and would improve air quality.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	-	-	-	I	T	Regional	Air quality, green and blue infrastructure, habitat	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has negative effects as there is no reference to considerations of the locations and opportunities for green and blue infrastructure, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to the considerations for green and blue infrastructure opportunities when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for green and blue infrastructure opportunities when reallocating road spaces.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has neutral effects as ther eis no reference to designated sites, however the policy is focused on reallocating road space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	o	o	o	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	-	-	-	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has negative effects as there is no reference to considerations of the locations and opportuniteis for other types of spaces, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	-	-	-	I	T	Regional	Green and blue infrastrurcture	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has negative effects as there is no reference to considerations of the locations and opportuniteis for other types of spaces, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	N/A	N/A	The policy has neutral effects as there is no reference to wildlife-friendly approaches, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to carbon sinks approaches, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	D	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has negative effects as there is no reference to accessibility and considerations for locations, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to the considerations for the connectivity between spaces when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the connectivity between spaces when reallocating road spaces.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to local nature recovery, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	++	++	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as improving bus reliability and journey time, as well as prioritising public transport could promote modal shift to more sustainable forms of transport.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.	N	The policy now refereces the delivery of bus franchising.	+	++	++	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.	
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as improving public transport directly encourages reduction in private car use.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	

3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	++	D	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as improving bus reliability and journey time, as well as prioritising public transport could promote modal shift to more sustainable forms of transport and improve carbon efficiency.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.	N	The policy now refereces the delivery of bus franchising.	+	+	++	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport technologies, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	++	++	D	P	Regional	Transport network, air quality, local communities	The prioritisation of public transport on roads may constrain road spaces for active travel.	N/A	The policy has positive effects as the policy aims to improve the public transport network as well as bus reliability and journey times, which provide wider choice of low-carbon passenger travel.	Policy could make more explicit reference to considerations for other sustainable transport modes in relation to reallocating road space.	N	The policy now refereces the delivery of bus franchising.	+	++	++	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for other sustainable transport modes in relation to reallocating road space.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment	The improvement of public transport may encourage a modal shift away from private car and assist with climate change mitigation.	N/A	The policy has neutral effects as there is no reference to climate change mitigation and adaptation, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	+	+	+	D	T	Regional	Transport infrastructure, energy infrastructure	The prioritisation of public transport on roads may constrain road spaces for active travel.	N/A	The policy has positive effects as the improvement of public transport services directly encourages use of the transport estate for low carbon energy generation.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.	N	The policy now refereces the delivery of bus franchising.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	O	O	O	I	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to the specific needs of rural communities, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to considerations for the specific needs of rural communities in relation to reallocating space for public transport.	N	The policy now refereces the delivery of bus franchising.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for the specific needs of rural communities in relation to reallocating space for public transport.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to low carbon materials and techniques, however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to exploring opportunities for low carbon construction materials and techniques where the reallocation of space involved construction works of road infrastructure.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to exploring opportunities for low carbon construction materials and techniques where the reallocation of space involved construction works of road infrastructure.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	+	+	+	D	T	Regional	Air quality, transport infrastructure	The prioritisation of public transport on roads may constrain road spaces for active travel.	N/A	The policy has positive effects as improving public transport services by reallocating road space could promote modal shift to more sustainable forms of transport and minimise embedded emissions.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.	N	The policy now refereces the delivery of bus franchising.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	T	Regional	Air quality, transport infrastructure, local communities	The prioritisation of public transport on roads may constrain road spaces for active travel.	N/A	The policy has positive effects as improving public transport services by reallocating road space could promote modal shift to more sustainable forms of transport and support West Yorkshire's net zero target by 2038.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.	N	The policy now refereces the delivery of bus franchising.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has neutral effects as there is no reference to extreme climate events, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to extreme climate events, however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to extreme climate events, however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces and not constitute inappropriate development.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces and not constitute inappropriate development.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	-	-	-	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy is has negative effects as there is no reference to compensatory measures for floodplain land take, whereas ther policy aims to reallocate space which could have potential impacts on other land uses.	Policy could make more explicit reference to the compensatory measures in relation to potential land take from flood plain when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the compensatory measures in relation to potential land take from flood plain when reallocating road spaces.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Wider	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to climatic effects, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	-	-	-	I	T	Regional	Flood risk, transport network	N/A	The reallocation of space need to consider the contexts and constriants to avoid the constitution of inappropriate development from reallocation of road space.	The policy has negative effects as there is no reference to the considerations of the potential flood risks of locations for reallocating space for public transport.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to flood risks when reallocating road spaces and not constitute inappropriate development.	N	The policy now refereces the delivery of bus franchising.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to flood risks when reallocating road spaces and not constitute inappropriate development.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Wider	Transport network, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to new infrastructure, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to recycling, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	++	D	P	Regional	Transport infrastructure, energy infrastructure	The prioritisation of public transport on roads may constrain road spaces for active travel.	N/A	The policy has positive effects as improving bus reliability and journey time, as well as prioritising public transport could promote modal shift to more sustainable forms of transport.	Policy could make more explicit reference to considerations for other sustainable transport modes in relation to reallocating road space.	N	The policy now refereces the delivery of bus franchising.	+	+	++	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for other sustainable transport modes in relation to reallocating road space.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to the water environment however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to incorporating sustainable road drainage in relation to reallocating road space when opportunitels arise.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to incorporating sustainable road drainage in relation to reallocating road space when opportunitels arise.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	D	P	Regional	Road infrasturcture	N/A	N/A	The policy has neutral effects as there is no reference to the water environment however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to minimising the use of impermeable hard surfacing in relation to reallocating road space whenever needs for road construction work arise.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to minimising the use of impermeable hard surfacing in relation to reallocating road space whenever needs for road construction work arise.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on reallocation of road spaces for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	N/A	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to considerations for the resilience of road drainage systems in relation to reallocating road space whenever needs for road construction work arise.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for the resilience of road drainage systems in relation to reallocating road space whenever needs for road construction work arise.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resource, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to agricultural soils, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	D	T	Regional	Mineral safeguarding areas	N/A	The reallocation of space need to consider location and interrelated effects with other types of land use.	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to contaminated land, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	-	-	-	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has negative effects as there is no reference to considerations of the locations and opportunities on other types of spaces, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to the considerations for the locations and opportunities in relation to other types of spaces when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the locations and opportunities in relation to other types of spaces when reallocating road spaces.

9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	-	-	-	I	T	Regional	Landscape, natural environment	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has negative effects as there is no reference to considerations of the locations and impacts on other types of spaces, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to other types of spaces when reallocating road spaces.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	-	-	-	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has negative effects as there is no reference to considerations of the locations and opportunities on other types of spaces, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to the considerations for the locations and opportunities in relation to other types of spaces when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the locations and opportunities in relation to other types of spaces when reallocating road spaces.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	D	T	Regional	Public rights of way	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has negative effects as there is no reference to protecting public rights of way, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to protecting public rights of way when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to protecting public rights of way when reallocating road spaces.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to buildings and townscaps, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	D	T	Regional	Built environment	N/A	N/A	The policy has neutral effects as there is no reference to clutter, however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to removing unnecessary clutters in relation to reallocating road space whenever needs arise.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to removing unnecessary clutters in relation to reallocating road space whenever needs arise.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	N/A	N/A	The policy has neutral effects as there is no reference to disincentives for private car use, however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to introducing disincentives for private car use in relation to reallocating road space for public transport.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to introducing disincentives for private car use in relation to reallocating road space for public transport.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	+	D	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has positive effects as there is reference to improving the reliability and journey times of public transport, which promotes the accessibility of public transport.	Policy could make more explicit reference to enhancing accessibility to key services and locations in relation to reallocating space for public transport priority.	N	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to enhancing accessibility to key services and locations in relation to reallocating space for public transport priority.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	--	--	--	D	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has negative effects as the prioritisation of public transport will constrain space for active travel on road spaces.	Policy could make more explicit reference to considerations for other modes of sustainable transport when reallocating road space.	N	The policy now refereces the delivery of bus franchising.	--	--	--	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for other modes of sustainable transport when reallocating road space.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to active travel, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	++	++	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as improving bus reliability and journey time, as well as prioritising public transport could promote modal shift to more sustainable forms of transport.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.	N	The policy now refereces the delivery of bus franchising.	+	++	++	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could include more general reference to the mass transit scheme rather than focusing on Phase 1.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to charging points, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	-	-	-	D	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has negative effects as there is no reference to considerations of the appropriate locations, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to coordination with land use planning in relation to selecting the suitable locations when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to coordination with land use planning in relation to selecting the suitable locations when reallocating road spaces.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to employment and skills development, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has positive effects as there is reference to improving the reliability and journey times of public transport, which promotes the accessibility of public transport.	Policy could make more explicit reference to improving accessibility and connectivity for all users to services in relation to reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to improving accessibility and connectivity for all users to services in relation to reallocating road spaces.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	++	D	T	Regional	Local communities, transport network	N/A	N/A	The policy has positive effects as there is reference to improve bus reliability and journey times.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as the reallocation of road space is unlikely to encourage the optimisation of potential economic outcomes.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	?	?	?	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has uncertain effects as there is no direct reference to increasing investment, however the policy could encourage investments by improving the resilience of public trnaspot network.	Policy could make more explicit reference to measures for creating a resilient public transport network through e.g. segregated transport infrastructure.	Y	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can enhance the resilient of the transport network. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as ther eis no reference to employment and residential growth areas, however the policy is focused on reallocating road space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	I	P	Regional	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has positive effects as reducing journey times would improve wellbeing for all users.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	I	P	Regional	Air quality, local communities	N/A	N/A	The policy has positive effects as reducing journey times would improve wellbeing for all users.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to heathicare services and educational facilities by sustainable modes of transport?	-	-	-	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has negative effects as there is no reference to accessibility and considerations for locations, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to the considerations for the connectivity between spaces when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to the considerations for the connectivity between spaces when reallocating road spaces.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	-	-	-	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has negative effects as there is no reference to accessibility and considerations for locations, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to the considerations for the connectivity between spaces when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to the considerations for the connectivity between spaces when reallocating road spaces.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	-	-	-	I	T	Regional	Local communities, transport network	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has negative effects as there is no reference to considerations of the locations and impacts on severance issues, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to severance issues when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the locations and impacts in relation to severance issues when reallocating road spaces.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to inclusive design, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	+	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has positive effects as prioritising and improving public transport promote affordable transport options to access various places.	Policy could make more explicit reference to the considerations for the connectivity between spaces when reallocating road spaces. Policy could also include more general reference to the mass transit scheme rather than focusing on Phase 1.	N	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to the considerations for the connectivity between spaces when reallocating road spaces. Policy could also include more general reference to the mass transit scheme rather than focusing on Phase 1.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	The prioritisation of public transport on roads may constrain road spaces for active travel.	The reallocation of space need to consider synergy and interrelated effects with other types of land use.	The policy has negative effects as there is no reference to considerations of the needs for deprived areas and active travel, whereas the policy aims to reallocate space for public transport.	Policy could make more explicit reference to the considerations for the needs of deprived areas and for other modes of sustainable transport when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	+	++	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to the considerations for the needs of deprived areas and for other modes of sustainable transport when reallocating road spaces.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to access to information, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to the considerations for the locations and opportunities in relation to public realms when reallocating road spaces.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the considerations for the locations and opportunities in relation to public realms when reallocating road spaces.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to considerations for other modes of sustainable transport when reallocating road space.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for other modes of sustainable transport when reallocating road space.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming measure, however the policy is focused on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on reallocating space for public transport.	Policy could make more explicit reference to considerations for other modes of sustainable transport when reallocating road space.	N	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for other modes of sustainable transport when reallocating road space.

15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Local community, air quality, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to construction impacts. however the policy is focused on reallocating existing road spaces.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Local community, noise level	N/A	N/A	The policy has neutral effects as there is no reference to helth impacts. however the policy is focused on reallocating existing road spaces.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	I	T	Regional	Local community, air quality, transport infrastructure	The prioritisation of public transport on roads may constrain road spaces for active travel.	N/A	The policy has positive effects as the prioritisation of public transport supports a modal shift away from private car use and would improve air quality.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	O	O	O	I	P	Regional	Local community, air quality, green and blue infrastructure, built environment	N/A	N/A	The policy has neutral effects as there is no reference of improving impact of transport, however the policy is focued on reallocating space for public transport.	None identified.	No mitigation identified in 2025.	The policy now refereces the delivery of bus franchising.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name		RR2																		
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	+	I	P	Regional	Air quality, local communities, vulnerable populations	The improvement of public transport network encourages a modal shift to sustainable modes of transport and could improve air quality.	N/A	The policy has positive effects as the improvement of the public transport network could improve travel efficiency and enhance air quality.	Policy could make more explicit reference to considerations for areas with low air quality in relation to minimising disruption of the transport network.	N	The policy now refereces improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which could increase the use of public transport and reduce air pollution emissions. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to considerations for areas with low air quality in relation to minimising disruption of the transport network.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	I	T	Regional	Air quality, local communities, transport network, Road network	The improvement of public transport network encourages a modal shift to sustainable modes of transport and could improve air quality.	N/A	The policy has positive effects as the improvement of the public transport network could encourage a modal shift to sustainable transport and reduce private car use, which supports an improvement in air quality.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which could increase the use of public transport and reduce air pollution emissions. Therefore, the scoring has increased to very positive.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	N/A	N/A	The policy has neutral effects as there is no reference to the development of new infrastructure, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	-	-	-	D	T	Regional	Air quality, habitats, protected species, biological and geological sites	A focus or prioritisation of the bus network could have negative impacts on the environment.	N/A	The policy has negative effects as there is no reference to avoiding impacts on habitats and important sites, whereas the policy aims to manage disruption of the transport network.	Policy could make more explicit reference to the impacts on habitats and important sites as well as mitigation measures in relation to improving management of disruption.	N	The policy now refereces improving network safety.	-	-	-	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the impacts on habitats and important sites as well as mitigation measures in relation to improving management of disruption.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of infrastructure, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the development of new infrastructure, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of infrastructure, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of infrastructure, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	-	-	-	D	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to improve efficiency of the transport network.	Policy could make more explicit reference to improving accessibility and connectivity to specific key destinations in relation to improving network efficiency.	N	The policy now refereces improving network safety.	-	-	-	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving accessibility and connectivity to specific key destinations in relation to improving network efficiency.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to nature recovery, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accesssibility?	+	+	+	D	T	Regional	Transport network, transport infrastructure, local communities	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of sustainable transport.	N/A	The policy has positive effects as there is reference to improving network management and efficiency, which promotes the use of sustainable forms of transport.	Policy could make more explicit reference to considerations for other modes of sustainable tranpsort in relation to managing the public transport network.	N	The policy now refereces improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which makes public transport more accessible. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to considerations for other modes of sustainable tranpsort in relation to managing the public transport network.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as the improvement of the public transport network could encourage a modal shift to sustainable transport and reduce private car use.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which makes public transport more accessible. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	++	++	D	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as the improvement of the network efficiency could encourage a modal shift to sustainable transport and promote carbon efficiency through transport movements.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	+	++	++	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	+	+	++	D	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as there is reference to investment in technology to manage disruption of transport.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	+	+	++	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	++	++	D	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as there is reference to improving network management and efficiency, which promotes low-carbon passenger travel.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	+	++	++	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to prioritising climate change mitigation and adaptation, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	+	+	+	D	T	Regional	Transport infrastructure, energy infrastructure	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of transport.	N/A	The policy has positive effects as the improvement of the network efficiency could encourage a modal shift to sustainable transport and promote low carbon energy generation through transport estates.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	+	+	+	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	-	-	-	D	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to the specific needs of rural communities, whereas the policy aims to deliver a consistent network offer.	Policy could make more explicit reference to the specific needs of rural communities in relation to delivering a consistent network offer.	N	The policy now refereces improving network safety.	-	-	-	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the specific needs of rural communities in relation to delivering a consistent network offer.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to construction, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Regional	Air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of infrastructure, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has positive effects as the improvement of the public transport network could encourage a modal shift to sustainable transport and support West Yorkshire's net zero target by 2038.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which could increase the use of public transport and contribute to achieving Net Zero. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	-	-	-	I	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has negative effects as there is no reference to the consideration of extreme weather events, whereas the policy aims to improve the public transport network through network management mechanisms.	Policy could make more explicit reference to plans for extreme weather events in reation to the management of the transport network.	Partially	The policy now refereces improving network safety.	+	+	+	The policy has been amended by referencing improving network safety which could include include safety from extreme weather events. Therefore, the scoring has increased to positive.	Policy could make more explicit reference to plans for extreme weather events in reation to the management of the transport network.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of infrastructure, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood risk and floodplains, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood risk and floodplains, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	-	-	-	I	P	Wider	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to the consideration of the uncertainties in climatic effects, whereas the policy aims to improve the public transport network through network management mechanisms.	Policy could make more explicit reference to plans for extreme weather events in reation to the management of the transport network.	Partially	The policy now refereces improving network safety.	+	+	+	The policy has been amended by referencing improving network safety which could include include safety from extreme weather events. Therefore, the scoring has increased to positive.	Policy could make more explicit reference to plans for extreme weather events in reation to the management of the transport network.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risk and floodplains, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Wider	Transport network, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of infrastructure, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to recycling, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	++	++	D	P	Regional	Transport infrastructure, energy infrastructure	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of sustainable transport.	N/A	The policy has positive effects as the improvement of the network efficiency could encourage a modal shift to sustainable transport and reduces fuel consumption.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	+	++	++	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to construction, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to water quality, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of infrastructure, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of infrastructure, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	N/A	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of infrastructure, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to the drainage systems, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to the land use, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resources, however the policy is focused on network management.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to soil resources, however the policy is focused on network management.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on network management.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to contaminated land and soil resources, however the policy is focused on network management.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on network management.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to improving accessibility to key destinations, however the policy is focused on improving the management of the transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of cultural or heritage assets, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance landscape or townscapes, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance landscape or townscapes, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance landscape or townscapes, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	D	T	Regional	Public rights of way	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of transport, especially active travel users.	N/A	The policy has negative effects as there is no reference to protecting public rights of ways, whereas the policy aims to manage the transport network.	Policy could make more explicit reference to protecting public rights of ways in relation to managing the transport network.	N	The policy now refereces improving network safety.	-	-	-	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to protecting public rights of ways in relation to managing the transport network.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of cultural or heritage assets, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	-	-	-	D	T	Regional	Built environment	N/A	N/A	The policy has negative effects as there is no reference to removing unnecessary clutter, whereas the policy aims to improve efficiency and manage the public transport network.	Policy could make more explicit reference to removing unnecessary clutter in relation to managing transport network.	N	The policy now refereces improving network safety.	-	-	-	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to removing unnecessary clutter in relation to managing transport network.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of transport.	N/A	The policy has negative effects as there is no reference to disincentives for private car use, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to improving accessibility to key destinations, however the policy is focused on improving the management of the transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Local communities, road infrastructure, transport network	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of sustainable transport.	N/A	The policy has neutral effects as there is no reference to active travel, however the policy is focused on improving the public transport network.	Policy could make more explicit reference to considerations for other modes of sustainable tranpsort in relation to managing the public transport network.	N	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for other modes of sustainable tranpsort in relation to managing the public transport network.

10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of sustainable transport.	N/A	The policy has neutral effects as there is no reference to active travel, however the policy is focused on improving the public transport network.	Policy could make more explicit reference to considerations for other modes of sustainable transport in relation to managing the public transport network.	N	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for other modes of sustainable transport in relation to managing the public transport network.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	T	Regional	Transport network, transport infrastructure, local communities	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of sustainable transport.	N/A	The policy has positive effects as the improvement of the network efficiency could encourage a modal shift to sustainable transport.	Policy could make more explicit reference to considerations for other modes of sustainable transport in relation to managing the public transport network.	N	The policy now references improving network safety.	+	++	++	The policy has been amended by referencing improving network safety which makes public transport more accessible. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to considerations for other modes of sustainable transport in relation to managing the public transport network.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to charging points, however the policy is focused on improving the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to coordination with other land uses, however the policy is focused on improving network management.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to improving access, however the policy is focused on improving network management.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which could increase the use of public transport and improve access to opportunities. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	O	O	O	I	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to improving access, however the policy is focused on improving network management.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which could increase the use of public transport and improve access to opportunities. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	++	++	D	T	Regional	Local communities, transport network	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of transport, especially active travel users.	N/A	The policy has positive effects as the improvement of the network efficiency could reduce overall journey times for passengers.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	+	++	++	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	+	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has positive effects as the improvement of the network efficiency could encourage a modal shift to sustainable transport and promote decarbonisation through transport, which has the potential to optimise economic outcomes.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	+	+	+	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	+	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has positive effects as there is reference to strengthening partnership approach, which could increase investments in transport schemes.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	+	+	+	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as there is no reference to improving access, however the policy is focused on improving network management.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which could increase the use of public transport and improve access to opportunities. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	O	O	O	I	P	Regional	Air quality, local communities, vulnerable population, air quality	The improvement of public transport network encourages a modal shift to sustainable modes of transport and could improve air quality, which promotes the health of residents.	N/A	The policy has neutral effects as there is no reference to promoting health and wellbeing, however the policy is focused on improving the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	O	O	O	I	P	Regional	Air quality, local communities	The improvement of public transport network encourages a modal shift to sustainable modes of transport and could improve air quality, which promotes the health of residents.	N/A	The policy has neutral effects as there is no reference to promoting health and wellbeing, however the policy is focused on improving the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to improving access, however the policy is focused on improving network management.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has neutral effects as there is no reference to improving access, however the policy is focused on improving network management.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which could increase the use of public transport and improve access to opportunities. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	-	-	-	D	T	Regional	Local communities, transport network	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of transport, especially active travel users.	N/A	The policy has negative effects as there is no reference to severance issues, whereas the policy aims to improve network efficiency and manage disruption of the public transport network.	Policy could make more explicit reference to improving severence issues in relation to network management.	N	The policy now refereces improving network safety.	-	-	-	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving severence issues in relation to network management.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	-	-	-	D	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to considerations of the specific needs of vulnerable groups, whereas the policy aims to deliver a consistent offer through the public transport network.	Policy could make more explicit reference to the specific needs of vulnerable groups in relation to network management.	Partially	The policy now refereces improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which could increase the use of public transport and improve access to opportunities. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to the specific needs of vulnerable groups in relation to network management.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to inclusive design, however the policy is focused on network management.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to improving access, however the policy is focused on improving network management.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to improving connectivity, however the policy is focused on improving network management.	Policy could make more explicit reference to improving accessibility and connectivity between communities in relation to improving network efficiency.	N	The policy now refereces improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which could increase the use of public transport and improve connections between communities. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to improving accessibility and connectivity between communities in relation to improving network efficiency.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	O	O	O	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to improving access, however the policy is focused on improving network management.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	+	+	++	The policy has been amended by referencing improving network safety which could increase the use of public transport and improve access to opportunities. Therefore, the scoring has increased to very positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to access to information, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public realm and natural surveillance, however the policy is focused on managing the public transport network.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	+	++	++	The policy has been amended by referencing improving network safety. Therefore, the scoring has increased to very positive.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	-	-	-	D	T	Regional	Local community, built environment, service and facility	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of transport.	N/A	The policy has negative effects as there is no reference to transport safety, whereas the policy aims to improve network efficiency and manage disruption of the public transport network.	Policy could make more explicit reference to improving transport safety in relation to network management.	Y	The policy now refereces improving network safety.	+	++	++	The policy has been amended by referencing improving network safety. Therefore, the scoring has increased to very positive.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	-	-	-	D	T	Regional	Local community, built environment, service and facility	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of transport.	N/A	The policy has negative effects as there is no reference to reducing risks imposed by bus services through network management, whereas the policy aims to improve management of disruption.	Policy could make more explicit reference to impacts and considerations for other modes of sustainable tranpsort in relation to managing the public transport network.	N	The policy now refereces improving network safety.	+	++	++	The policy has been amended by referencing improving network safety. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to impacts and considerations for other modes of sustainable tranpsort in relation to managing the public transport network.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	-	-	-	D	T	Regional	Local community, built environment, service and facility	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of transport.	N/A	The policy has negative effects as there is no reference to traffic calming measures, whereas the policy aims to improve network efficiency and manage disruption of the public transport network.	Policy could make more explicit reference to traffic calming measure schemes in relation to network management.	N	The policy now refereces improving network safety.	+	++	++	The policy has been amended by referencing improving network safety. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to traffic calming measure schemes in relation to network management.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	-	-	-	D	T	Regional	Local community, built environment, service and facility	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of transport.	N/A	The policy has negative effects as there is no reference to road safety, whereas the policy aims to improve network efficiency and manage disruption of the public transport network.	Policy could make more explicit reference to improving road safety in relation to network management.	Y	The policy now refereces improving network safety.	+	++	++	The policy has been amended by referencing improving network safety. Therefore, the scoring has increased to very positive.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	+	+	+	I	T	Regional	Local community, air quality, vulnerable population	N/A	N/A	The policy has positive effects as there is reference to improving the efficiency of the transport network, which could reduce pollution.	Policy could make more explicit reference to measures that reduce specific types of pollutions in relation to improving the management of disruption.	N	The policy now refereces improving network safety.	+	+	+	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to measures that reduce specific types of pollutions in relation to improving the management of disruption.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Local community, noise level	N/A	N/A	The policy has neutral effects as there is no reference to vibration, however the policy is focused on public transport network management.	None identified.	No mitigation identified in 2025.	The policy now refereces improving network safety.	O	O	O	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	I	T	Regional	Local community, air quality, transport infrastructure	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of transport.	N/A	The policy has positive effects as the improvement of network efficiency could reduce emissions and improve air quality.	Policy could make more explicit reference to impacts and considerations for other modes of sustainable tranport on top of managing the public transport network.	N	The policy now refereces improving network safety.	+	+	+	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to impacts and considerations for other modes of sustainable tranport on top of managing the public transport network.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	+	D	P	Regional	Local community, air quality, green and blue infrastructure, built environment	A focus or prioritisation of the bus network could have negative impacts on the safety and convenience of other modes of transport.	N/A	The policy has positive effects as there are references to improvement of the public transport network and management of disruption.	Policy could make more explicit reference to impacts and considerations for other modes of sustainable tranpsort in relation to managing the public transport network.	N	The policy now refereces improving network safety.	+	+	+	Although the policy has been amended by referencing improving network safety, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to impacts and considerations for other modes of sustainable tranpsort in relation to managing the public transport network.

Policy Name	RR3																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAS) and where this pollution disproportionately affects vulnerable populations?	-	-	-	I	P	Regional	Air quality, local communities, vulnerable populations	Increasing car park locations may encourage private car use and increase air pollution.	N/A	The policy has negative effects as there is no reference to areas with low air quality, whereas the policy aims to improve car parking and should consider impacts of private cars on air quality.	Policy could make more explicit reference to areas with low air quality in relation to the management of car parks.	N	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to areas with low air quality in relation to the management of car parks.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	-	-	-	D	T	Regional	Air quality, local communities, transport network, Road network	Increasing car park locations may encourage private car use and increase air pollution.	N/A	The policy has negative effects as there is no reference to enabling modal shift away from private car use, whereas the policy aims to improve car parking and should consider impacts of private cars on air quality.	Policy could make more explicit reference to encouraging modal shift away from private car use in relation to the management of car parks.	N	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to encouraging modal shift away from private car use in relation to the management of car parks.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	-	-	-	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	Increasing car park locations may encourage private car use and increase air pollution and may pose impact on protected sites.	N/A	The policy has negative effects as there is no reference to protected sites or habitats whereas the policy aims to improve car parking and should consider impacts of private cars on vulnerable receptors.	Policy could make more explicit reference to impacts on protected sites in relation to the management of car parks.	N	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to impacts on protected sites in relation to the management of car parks.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	-	-	-	I	P	Regional	Carbon sinks, transport infrastructure	N/A	Locating carbon sinks close to car parks could absorb the adverse impact of private cars on air quality.	The policy has negative effects as there is no reference to carbon sinks, whereas the policy aims to improve car parking and should consider synergy with carbon sinks to reduce the impact of private cars on air quality.	Policy could make more explicit reference to synergies with carbon sinks in relation to planning for car parking.	N	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to synergies with carbon sinks in relation to planning for car parking.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	+	+	+	The policy has been amended by referencing an inclusive approach to parking which could increase accessibility to different spaces. Therefore, the scoring has increased to positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to local nature recovery, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	?	?	?	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has uncertain effects as the effects of developing a regionally consistent and proportionate to public transport accessibility levels car parking could potentially increase or reduce private car uses.	Policy could make more explicit reference to disincentives for private car use in relation to management of car parking.	N	The policy now references an inclusive approach to car parking.	?	?	?	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to disincentives for private car use in relation to management of car parking.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	?	?	?	I	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has uncertain effects as the effects of developing a regionally consistent and proportionate to public transport accessibility levels car parking could potentially increase or reduce carbon efficiency.	Policy could make more explicit reference to disincentives for private car use in relation to management of car parking.	N	The policy now references an inclusive approach to car parking.	?	?	?	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to disincentives for private car use in relation to management of car parking.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to technologies, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	O	O	O	I	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment	Increasing car park locations may encourage private car use and increase air pollution and may contribute to climate change.	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to energy generation, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	-	-	-	D	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to the specific needs of rural communities, where as the policy aims to adopt a regionally consistent place-based approach to car parking management.	Policy could make more explicit reference to considerations for the specific needs of rural communities in relation to managing car parking.	N	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for the specific needs of rural communities in relation to managing car parking.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to construction materials or techniques, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Regional	Air quality, transport infrastructure	Increasing car park locations may encourage private car use and increase emissions and air pollutions.	N/A	The policy has neutral effects as there is no reference to embedded emissions, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	?	?	?	I	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	Increasing car park locations may encourage private car use and increase air pollution and may contribute to climate change.	N/A	The policy has uncertain effects as the effects of developing a regionally consistent and proportionate to public transport accessibility levels car parking could potentially increase or reduce air pollution.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	?	?	?	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment, built environment	Increasing car park locations may encourage private car use and increase air pollution and may contribute to climate change.	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to flood risks or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood risks or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood risks or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Wider	natural environment, built environment, local communities, transport network	Increasing car park locations may encourage private car use and increase air pollution and may contribute to climate change.	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Wider	Transport network, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to construction materials or techniques, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	?	?	?	D	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has uncertain effects as the effects of developing a regionally consistent and proportionate to public transport accessibility levels car parking could potentially increase or reduce private car uses.	Policy could make more explicit reference to disincentives for private car use in relation to management of car parking.	N	The policy now references an inclusive approach to car parking.	?	?	?	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to disincentives for private car use in relation to management of car parking.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to flood risk or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	-	-	-	I	P	Regional	Road infrastructure	N/A	N/A	The policy has no reference to surfacing, whereas the policy aims to improve car parking and car parks, which contributes to large use of impermeable hard surfacing.	Policy could make more explicit reference to minimising the use of impermeable hard surfacing in relation to managing existing and developing new car parking spaces.	N	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to minimising the use of impermeable hard surfacing in relation to managing existing and developing new car parking spaces.

6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	N/A	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to flood risk or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	-	-	-	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has negative effects as there is no reference to considerations for land use, whereas the policy aims to develop regionally consistent and proportionate to public transport accessibility levels car parking and could involve planning for new car park locations.	Policy could make more explicit reference to land use considerations in relation to planning for new car park locations.	N	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to land use considerations in relation to planning for new car park locations.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contamination, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contamination, however the policy is focused on car parking.	N/A	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contamination, however the policy is focused on car parking.	N/A	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contamination, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	+	+	+	The policy has been amended by referencing an inclusive approach to parking which could increase accessibility to different spaces. Therefore, the scoring has increased to positive.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	+	+	+	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	Increasing car park locations may encourage private car use and impact the character of townscapes.	N/A	The policy has positive effects as there is reference to considering town centre regeneration and development objectives.	Policy could make more explicit reference to respecting and enhancing the townscape character.	N	The policy now references an inclusive approach to car parking.	+	+	+	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to respecting and enhancing the townscape character.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscape, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	I	T	Regional	Public rights of way	N/A	N/A	The policy has negative effects as there is no reference to public rights of ways, whereas the policy aims to improve car parking which could impose an impact on them.	Policy could make more explicit reference to protecting public rights of ways in relation to managing car parking.	N	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to protecting public rights of ways in relation to managing car parking.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	+	+	+	I	P	Regional	Cultural and heritage asset, built environment	Increasing car park locations may encourage private car use and impact the character of townscapes.	N/A	The policy has positive effects as there is reference to considering town centre regeneration and development objectives.	Policy could make more explicit reference to respecting and enhancing the local distinctiveness of townscapes.	N	The policy now references an inclusive approach to car parking.	+	+	+	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to respecting and enhancing the local distinctiveness of townscapes.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	-	-	-	I	T	Regional	Built environment	N/A	N/A	The policy has neutral effects as there is no reference to removing unnecessary clutter, however the policy is focused on improving car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	?	?	?	D	T	Regional	Road network, transport network	N/A	N/A	The policy has uncertain effects as the effects of developing a regionally consistent and proportionate to public transport accessibility levels car parking could potentially increase or reduce private car uses.	Policy could make more explicit reference to disincentives for private car use in relation to management of car parking.	N	The policy now references an inclusive approach to car parking.	?	?	?	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to disincentives for private car use in relation to management of car parking.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The has neutral effects as there is no reference to improving accessibility to specific destinations, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	?	?	?	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has uncertain effects as the effects of developing a regionally consistent and proportionate to public transport accessibility levels car parking could potentially increase or reduce private car uses.	Policy could make more explicit reference to disincentives for private car use in relation to management of car parking.	N	The policy now references an inclusive approach to car parking.	?	?	?	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to disincentives for private car use in relation to management of car parking.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	-	-	-	D	P	Regional	Transport infrastructure, energy infrastructure	N/A	Planning for electric vehicle charging points at car parking spaces could encourage a shift to low carbon vehicle modals.	The policy has negative effects as there is no reference to considerations for charging points, whereas the policy aims to develop regionally consistent and proportionate to public transport accessibility levels car parking.	Policy could make more explicit reference to planning for electric vehicle charging points at car parking locations.	N	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to planning for electric vehicle charging points at car parking locations.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	O	O	O	I	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The has neutral effects as there is no reference to improving accessibility to specific destinations, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	+	+	+	The policy has been amended by referencing an inclusive approach to parking which could increase accessibility to different spaces. Therefore, the scoring has increased to positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	+	D	T	Regional	Local communities, transport network	N/A	N/A	The policy has positive effects as there is reference to developing regionally consistent car parking, which improves travel convenience for passenger and freight.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	+	+	+	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to decarbonisation, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to increasing investments, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	O	O	O	I	P	Regional	Air quality, local communities, vulnerable population, air quality	Increasing car park locations may encourage private car use and increase emissions and air pollutions, which will have impacts on health levels.	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	+	+	+	The policy has been amended by referencing an inclusive approach to parking which could increase accessibility to different spaces, including health facilities. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	O	O	O	I	P	Regional	Air quality, local communities	Increasing car park locations may encourage private car use and increase emissions and air pollutions, which will have impacts on health levels.	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of tranport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The has neutral effects as there is no reference to improving accessibility to specific destinations, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	+	+	+	The policy has been amended by referencing an inclusive approach to parking which could increase accessibility to different spaces. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to severance issues, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	-	-	-	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to considerations for the specific needs of vulnerable groups, whereas the policy aims to develop a fair and equitable approach to car parking.	Policy could make more explicit reference to considerations for the specific needs of vulnerable groups including disabled car parking, inn relation to managing and planning for car parking spaces.	Partially	The policy now references an inclusive approach to car parking.	+	+	++	The policy has been amended by referencing an inclusive approach to parking. Therefore, the scoring has increased to positive.	Policy could make more explicit reference to considerations for the specific needs of vulnerable groups including disabled car parking, inn relation to managing and planning for car parking spaces.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of tranport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	+	+	++	The policy has been amended by referencing an inclusive approach to parking. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The has neutral effects as there is no reference to improving accessibility to specific destinations, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The has neutral effects as there is no reference to improving connectiviey, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	O	O	O	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of tranport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	+	+	+	The policy has been amended by referencing an inclusive approach to parking which could increase accessibility to different spaces. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of tranport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	-	-	-	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has negative effects as the improvement of car parking could encourage an increase in private car use and should potential impacts on vulnerable transport users.	Policy could make more explicit reference to reducing impacts of cars on other transport users in realtion to managing car parking.	Partially	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to reducing impacts of cars on other transport users in realtion to managing car parking.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on managing car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	-	-	-	I	T	Regional	Local community, air quality, vulnerable population	N/A	N/A	The policy has negative effects as the improvement of car parking could encourage an increase in private car use and may increase pollutions.	Policy could make more explicit reference to reducing impacts of cars on vulnerable users in realtion to managing car parking.	Partially	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to reducing impacts of cars on vulnerable users in realtion to managing car parking.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	-	-	-	I	P	Regional	Local community, noise level	N/A	N/A	The policy has negative effects as the improvement of car parking could encourage an increase in private car use and may increase vibration.	Policy could make more explicit reference to reducing impacts of cars including vibrations in realtion to managing car parking.	N	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to reducing impacts of cars including vibrations in realtion to managing car parking.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	-	-	-	I	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has negative effects as the improvement of car parking could encourage an increase in private car use and may increase air pollutions.	Policy could make more explicit reference to reducing impacts of cars including air pollutions in realtion to managing car parking.	N	The policy now references an inclusive approach to car parking.	-	-	-	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to reducing impacts of cars including air pollutions in realtion to managing car parking.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	O	O	O	I	P	Regional	Local community, air quality, green and blue infrastructure, built environment	N/A	N/A	The policy has neutral effects as there is no reference to creating amenable areas, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy now references an inclusive approach to car parking.	O	O	O	Although the policy has been amended by referencing an inclusive approach to car parking, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	O	O	O	I	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has neutral effects as there is no reference to areas with low air quality, however the policy is focused on on street car paking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	D	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has positive effects as the restriction of on street car parking could reduce traffic level and congestion.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	O	O	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	N/A	N/A	The policy has neutral effects as there is no reference to habitats or important sites. however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?'	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to local nature recovery, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as there is reference to reallocating road space for public transport to enhance public transport accessibility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as there is reference to limiting on street parking, which could reduce private car use.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	O	O	O	I	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to carbon efficiency, however the policy is focused on on street car paking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to technologies, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as there is reference to improving active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to low carbon energy generation, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	O	O	O	I	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to the specific needs of rural communities, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to construction materials or techniques, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	D	T	Regional	Air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the emissions, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	I	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has positive effects as there is reference to improving active travel, which could support net zero.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to flood risks or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood risks or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood risks or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Wider	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Wider	Transport network, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to construction materials or techniques, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Regional	Transport infrastructure, energy infrastructure	Restricting on street car parking and leaving the kerb space for public transport could enhance public transport services and encourage active travel.	N/A	The policy has positive effects as there is reference to improving active travel, which could promote a modal shift to sustainable transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to flood risk or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastrucrture	N/A	N/A	The policy has neutral effects as there is no reference to surfacing, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	N/A	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to flood risk or drainage schemes, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contamination, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contamination, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contamination, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscape, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscape, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	O	O	O	I	T	Regional	Public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of way, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscape, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	+	+	+	D	T	Regional	Built environment	N/A	N/A	The policy has positive effects as the restriction of on street car parking could improve the streetscape by removing unnecessary clutter.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	N/A	N/A	The policy has neutral effects as there is no reference to disincentives for private car use, however the policy is focused on on street car paking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The has neutral effects as there is no reference to improving accessibility to specific destinations, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	+	I	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has positive effects as the restriction of on street car parking could reduce constraints on active travel on kerb space.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure unrelated to car parking, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as the restriction of on street car parking could create more convenience for public transport and active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to charging points, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to enhancing sustainable modes of transport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to enhancing sustainable modes of transport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	O	O	O	I	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The has neutral effects as there is no reference to improving accessibility to specific destinations, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The has neutral effects as there is no reference to reducing journey times, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to decarbonisation, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to increasing investments, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as there is no reference to enhancing sustainable modes of tranport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	O	O	O	I	P	Regional	Air quality, local communities, vulnerable population, air quality	Restricting on street car parking in residential areas could improve streetscapes , enhance safety, and have positive effects on the health and wellbeing of local residents.	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	O	O	O	I	P	Regional	Air quality, local communities	Restricting on street car parking in residential areas could improve streetscapes , enhance safety, and have positive effects on the health and wellbeing of local residents.	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to enhancing sustainable modes of tranport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The has neutral effects as there is no reference to improving accessibility to specific destinations, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	+	+	+	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has positive effects as the restriction of on street car parking could improve the streetscape and reduce severance issues.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	?	?	?	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has uncertain effects as it references serving the community for wheeling, however, it does not reference retaining on-street parking for disabled people.	This policy could be enhanced by explicitly stating that on street car parking for disabled people will be retained and provided where possible.	N	The policy has not changed.	?	?	?	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by explicitly stating that on street car parking for disabled people will be retained and provided where possible.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	?	?	?	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has uncertain effects as it references serving the community for wheeling, however, it does not reference retaining on-street parking for disabled people.	This policy could be enhanced by explicitly stating that on street car parking for disabled people will be retained and provided where possible.	N	The policy has not changed.	?	?	?	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by explicitly stating that on street car parking for disabled people will be retained and provided where possible.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The has neutral effects as there is no reference to improving accessibility to specific destinations, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The has neutral effects as there is no reference to improving connectivity, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	O	O	O	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	Restricting on street car parking and leaving the kerb space for public transport could enhance public transport services and encourage active travel.	N/A	The policy has neutral effects as there is no reference to enhancing sustainable modes of tranport, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to access to information, however the policy is focused on car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	Restricting on street car parking in residential areas could improve streetscapes , enhance safety, and have positive effects on the health and wellbeing of local residents.	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	+	D	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has positive effects as the restriction of on street car parking could reduce constraints and improve safety for active travel on kerb space.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	-	-	-	D	T	Regional	Local community, built environment, service and facility	Restricting on street car parking in residential areas could improve streetscapes , enhance safety, and have positive effects on the health and wellbeing of local residents.	N/A	The policy has negative effects as there is no reference to residential areas or deprived areas, whereas the policy aims to better serve the community by restricting on street car parking.	Policy could make more explicit reference to residential areas and deprived areas in relation to the important locations for the management of on street car parking.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to residential areas and deprived areas in relation to the important locations for the management of on street car parking.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	+	+	+	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has positive effects as the restriction of on street car parking could reduce constraints and improve safety for active travel on kerb space.	Policy could make more explicit reference to residential areas and deprived areas in relation to the important locations for the management of on street car parking.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to residential areas and deprived areas in relation to the important locations for the management of on street car parking.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Local community, air quality, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to construction or operation impacts, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Local community, noise level	N/A	N/A	The policy has neutral effects as there is no reference to construction or operation impacts, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	O	O	O	I	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to construction or operation impacts, however the policy is focused on on street car parking.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	+	I	P	Regional	Local community, air quality, green and blue infrastructure, built environment	N/A	N/A	The policy has positive effects as the restriction of on street car parking could create more convenience for public transport and active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

Policy Name	RR5																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAS) and where this pollution disproportionately affects vulnerable populations?	+	+	+	I	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has positive effects as reducing the need for travel could reduce emissions from transport and support the minimisation of air pollutants.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	++	++	I	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has positive effects as reducing the need for travel could reduce traffic levels and emissions from transport, which support the minimisation of air pollutants.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	++	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	+	+	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	Reducing the need for travel could contribute to enhancing air quality, and therefore avoid impacts on habitats.	N/A	The policy has positive effects as reducing the need for travel could reduce impacts of transport on habitats and important sites.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	N/A	N/A	The policy has neutral effects as there is no reference to transport infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	N/A	Enhancing accessibility of local communities to key services and facilities alongside improving digital connectivity could greatly reduce demand for long-distanced travel.	The policy has neutral effects as there is no reference to transport infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to local nature recovery, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport facilities, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	++	++	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as reducing the need for travel could encourage a reduction in private car use.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	++	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	O	O	O	I	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport movements, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport technologies, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	O	O	O	I	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport facilities, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment	Extreme weather events could have an adverse impact on the digital network.	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on digital connectivity,	Policy could make more explicit reference to improving the resilience of the digital network in relation to enabling home working during extreme weather events.	N	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to improving the resilience of the digital network in relation to enabling home working during extreme weather events.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to transport facilities, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	O	O	O	I	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to transport movements, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to low carbon materials and techniques, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Regional	Air quality, transport infrastructure	Reducing the need for travel could contribute to minimising embedded emissions.	N/A	The policy has neutral effects as there is no reference to transport infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	++	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has positive effects as reducing the need for travel could reduce emissions from transport and support the net zero target.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment, built environment	Extreme weather events could have an adverse impact on the digital network.	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on digital connectivity,	Policy could make more explicit reference to improving the resilience of the digital network in relation to enabling home working during extreme weather events.	N	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to improving the resilience of the digital network in relation to enabling home working during extreme weather events.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood adaptation, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood adaptation, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Wider	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on digital connectivity,	Policy could make more explicit reference to improving the resilience of the digital network in relation to enabling home working during extreme weather events.	N	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to improving the resilience of the digital network in relation to enabling home working during extreme weather events.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood adaptation, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Wider	Transport network, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to recycling, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to transport movements, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to supplier, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to water quality, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to surfacing, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	N/A	N/A	The policy has neutral effects as there is no reference to water quality, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	Reducing the need for travel could contribute to enhancing air quality, and therefore avoid impacts on habitats.	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to blue infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	Periods of intense rainfall could have adverse impacts on the digital network.	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on digital connectivity,	Policy could make more explicit reference to improving the resilience of the digital network in relation to enabling home working during extreme weather events.	N	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to improving the resilience of the digital network in relation to enabling home working during extreme weather events.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contaminated land, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contaminated land, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding area, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contaminated land, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable transport, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to transport infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to transport infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to towncape or landscape, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to towncape or landscape, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	O	O	O	I	T	Regional	Public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of way, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to towncape or landscape, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	I	T	Regional	Built environment	N/A	N/A	The policy has neutral effects as there is no reference to streetscape, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	N/A	N/A	The policy has neutral effects as there is no reference to transport movements, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to transport accessibility, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has neutral effects as there is no reference to transport infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to sustainable transport, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to transport infrastructure, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable transport, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	+	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has positive effects as the improvement of digital connectivity could increase access to online education opportunities and job search.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has positive effects as the improvement of digital connectivity improves accessibility to online services.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to transport journey times, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to economic outcomes, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to transport network, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as there is no reference to transport accessibility, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	O	O	O	I	P	Regional	Air quality, local communities, vulnerable population, air quality	N/A	The policy could have synergistic effects with policies that promote active travel, to reduce impacts of transport and improve health levels, particularly in residential areas.	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	O	O	O	I	P	Regional	Air quality, local communities	N/A	The policy could have synergistic effects with policies that promote active travel, to reduce impacts of transport and improve health levels, particularly in residential areas.	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to transport accessibility, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has neutral effects as there is no reference to transport accessibility, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	+	+	+	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has positive effects as reducing the need for travel could reduce traffic levels and impacts of transport, including severance issues.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to transport accessibility, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to transport accessibility, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	O	O	O	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to transport accessibility, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to transport information accessibility, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	The policy could have synergistic effects with policies that promote active travel, to reduce impacts of transport and create safer environments, particularly in residential areas.	The policy has neutral effects as there is no reference to public safety, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	The policy could have synergistic effects with policies that promote active travel, to reduce impacts of transport and create safer environments, particularly in residential areas.	The policy has neutral effects as there is no reference to transport scheme, however the policy is focused on digital connectivity,	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	++	D	T	Regional	Local community, built environment, service and facility	N/A	The policy could have synergistic effects with policies that promote active travel, to reduce impacts of transport and create safer environments, particularly in residential areas.	The policy has positive effects as reducing the need for travel could reduce traffic levels and reduce the risks imposed by cars and other vehicles.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	+	++	++	D	T	Regional	Local community, service and facility	Improving digital connectivity and enabling home working will have more effects on traffic calming in residential areas.	N/A	The policy has positive effects as reducing the need for travel could reduce traffic levels and calm traffic, especially in residential areas.	Policy could make more explicit reference to deprived areas in terms of improving digital connectivity.	N	The policy has not changed.	+	++	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to deprived areas in terms of improving digital connectivity.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	+	+	++	D	T	Regional	Local community, built environment, service and facility	N/A	The policy could have synergistic effects with policies that promote active travel, to reduce impacts of transport and create safer environments, particularly in residential areas.	The policy has positive effects as reducing the need for travel could reduce traffic levels and enhance road safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	+	+	+	I	T	Regional	Local community, air quality, vulnerable population	Improving digital connectivity and enabling home working will have more effects on reducing traffic impacts in residential areas.	The policy could have synergistic effects with policies that promote active travel, to reduce impacts of transport and create safer environments, particularly in residential areas.	The policy has positive effects as reducing the need for travel could reduce traffic levels and the impacts of transport, particularly in residential areas.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	+	+	+	I	P	Regional	Local community, noise level	Improving digital connectivity and enabling home working will have more effects on reducing traffic impacts in residential areas.	The policy could have synergistic effects with policies that promote active travel, to reduce impacts of transport and improve health levels, particularly in residential areas.	The policy has positive effects as reducing the need for travel could reduce traffic levels and the impacts of transport, including vibration.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	I	T	Regional	Local community, transport infrastructure	Improving digital connectivity and enabling home working will have more effects on reducing traffic impacts in residential areas.	The policy could have synergistic effects with policies that promote active travel, to reduce impacts of transport and improve health levels, particularly in residential areas.	The policy has positive effects as reducing the need for travel could reduce traffic levels and the impacts of transport, including air pollution.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	+	I	P	Regional	Local community, air quality, green and blue infrastructure, built environment	Improving digital connectivity and enabling home working will have more effects on reducing traffic impacts in residential areas.	The policy could have synergistic effects with policies that promote active travel, to reduce impacts of transport and create safer environments, particularly in residential areas.	The policy has positive effects as reducing the need for travel could reduce traffic levels and the impacts of transport and create more amenable areas.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

Policy Name	RR6																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	+	I	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has positive effects as the improvement of traffic efficiency could improve air quality.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	++	++	The policy has been amended by referencing reducing congestion, which will also reduce air pollution emissions. Therefore, the scoring has increased to very positive.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	I	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has positive effects as the improvement of traffic efficiency could improve air quality.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	++	++	The policy has been amended by referencing reducing congestion, which will also reduce air pollution emissions. Therefore, the scoring has increased to very positive.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	O	O	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	N/A	N/A	The policy has neutral effects as there is no reference to habitats or important sites, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	N/A	N/A	The policy has neutral effects as there is no reference to wildlife-friendly approach, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to nature recovery, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to enhancing or promoting sustainable modes of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to reducing private car use, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, air quality, local communities	Focusing on the movement of private vehicles and public transport might have negative impacts on active travel users on the main road.	N/A	The policy has positive effects as improving traffic efficiency through traffic signal network could also encourage carbon efficiency in transport movements.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	+	+	+	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as there is reference encouraging innovation and best use of technology, which could promote low carbon transport practice.	Policy could make more explicit reference to the low carbon technologies in relation to new concepts and innovation.	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the low carbon technologies in relation to new concepts and innovation.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as there is reference to optimising the movement of public transport through network management.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access on key routes. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to climate change mitigation, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing reducing congestion. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to low carbon energy generation, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	-	-	-	D	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to the specific transport needs of rural communities, whereas the policy aims to deliver a consistent high quality traffic signal network.	Policy could make more explicit reference to the specific needs of rural communities in relation to traffic management.	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the specific needs of rural communities in relation to traffic management.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to low carbon construction, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Regional	Air quality, transport infrastructure	Managing traffic through the traffic signal network could have a positive effect on reducing road traffic and reduce emissions.	N/A	The policy has neutral effects as there is no reference to emissions, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	I	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	Managing traffic through the traffic signal network could have a positive effect on reducing road traffic and reduce emissions, which supports the net zero target in the long term.	N/A	The policy has positive effects as the improvement of traffic efficiency could reduce emissions and support net zero.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing reducing congestion. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	-	-	-	D	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has negative effects as it does not reference managing traffic during extreme weather events.	Policy could make more explicit reference to eviction plans before and during extreme weather events in relation to improving traffic signal network.	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to eviction plans before and during extreme weather events in relation to improving traffic signal network.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood adaptation schemes, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood adaptation schemes, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	-	-	-	D	P	Wider	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to the uncertainties of climatic effects, whereas the policy aims to improve traffic through the traffic signal network.	Policy could make more explicit reference to eviction plans before and during extreme weather events in relation to improving traffic signal network.	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to eviction plans before and during extreme weather events in relation to improving traffic signal network.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood adaptation schemes, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Wider	Transport network, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to recycling, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to enhancing or promoting sustainable modes of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which will promote greater public transport use. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to water quality, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastrucrture	N/A	N/A	The policy has neutral effects as there is no reference to surfacing, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	N/A	N/A	The policy has neutral effects as there is no reference to water quality, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	N/A	N/A	The policy has neutral effects as there is no reference to habitats, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to blue infrastructure, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to drainage systems, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contaminated land, however the policy is focused on traffic signal network,	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contaminated land, however the policy is focused on traffic signal network,	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on traffic signal network,	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to soil resource or contaminated land, however the policy is focused on traffic signal network,	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to enhancing or promoting sustainable modes of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access to different spaces. Therefore, the scoring has increased to very positive.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscapes, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscapes, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	I	T	Regional	Public rights of way	N/A	N/A	The policy has negative effects as there is no reference to the consideration for impacts on public rights of ways, whereas the policy aims to improve the efficiency of transport movements.	Policy could make more explicit reference to protecting movements on public rights of ways in relation to manaing their junctions with main road traffic.	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to protecting movements on public rights of ways in relation to manaing their junctions with main road traffic.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to townscape, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	+	+	++	D	T	Regional	Built environment	N/A	N/A	The policy has positive effects as improving traffic efficiency through traffic signal network could calm traffic and remove unnecessary clutter.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	Managing traffic through the traffic signal network could have a positive effect on reducing road traffic.	N/A	The policy has neutral effects as there is no reference to improving private car use, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing reducing congestion. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	Focusing on the movement of private vehicles and public transport might have negative impacts on active travel users on the main road.	N/A	The policy has neutral effects as there is no reference to accessibility to key destinations, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access to different spaces. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	+	I	P	Regional	Local communities, road infrastructure, transport network	Focusing on the movement of private vehicles and public transport might have negative impacts on active travel users on the main road.	N/A	The policy has positive effects as improving traffic efficiency through traffic signal network could improve safety and convenience for active travel on roads.	Policy could make more explicit reference to considerations for active travel management in relation to urban traffic management.	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for active travel management in relation to urban traffic management.

10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to enhancing or promoting sustainable modes of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access to different spaces. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to charging points, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to enhancing or promoting sustainable modes of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to enhancing or promoting sustainable modes of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access to different spaces. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	O	O	O	I	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to accessibility to key destinations, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access to different spaces. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	++	++	D	T	Regional	Local communities, transport network	N/A	N/A	The policy has positive effects as improving traffic efficiency through traffic signal network could calm traffic and reduce the overall journey time for passengers and freight.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	++	++	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to decarbonisation, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	++	D	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has positive effects as there is reference to encouraging investments in data and technology.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as there is no reference to enhancing or promoting sustainable modes of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access to different spaces. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	O	O	O	I	P	Regional	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing reducing congestion, which can reduce air pollution emissions and promote better health outcomes. Therefore, the scoring has increased to very positive.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	O	O	O	I	P	Regional	Air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing reducing congestion, which can reduce air pollution emissions and promote better health outcomes. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to enhancing or promoting sustainable modes of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access to different spaces. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has neutral effects as there is no reference to accessibility to key destinations, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access to different spaces. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	+	+	+	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has positive effects as improving traffic efficiency through traffic signal network could calm traffic and reduce severance issues.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to enhancing or promoting sustainable modes of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to accessibility to key destinations, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	O	O	O	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to enhancing or promoting sustainable modes of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	++	The policy has been amended by referencing bus franchising which can tailor routes to match demand, carry more passengers and improve access to different spaces. Therefore, the scoring has increased to very positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	-	-	-	I	T	Regional	Local communities, transport network	N/A	Coordinating the data and technology used by the traffic signal network with real time public transport information could improve the reliability of public transport and promote the use of sustainable transport modes.	The policy has negative effects as there is no reference to access of information, whereas the policy aims to improve urban traffic through traffic signal network.	Policy could make more explicit reference to collaborating with the public transport system to improve access to more accurate information in relation to urban traffic management.	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	-	-	-	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to collaborating with the public transport system to improve access to more accurate information in relation to urban traffic management.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	Focusing on the movement of private vehicles and public transport might have negative impacts on active travel users on the main road.	N/A	The policy has neutral effects as there is no reference to public realm and public safety, however the policy is focused on traffic signal network.	Policy could make more explicit reference to considerations for active travel management in relation to urban traffic management.	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for active travel management in relation to urban traffic management.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	+	+	+	D	T	Regional	Local community, built environment, service and facility	Focusing on the movement of private vehicles and public transport might have negative impacts on active travel users on the main road.	N/A	The policy has positive effects as improving traffic efficiency through traffic signal network could enhance road safety for all users.	Policy could make more explicit reference to considerations for active travel management in relation to urban traffic management.	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for active travel management in relation to urban traffic management.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	+	D	T	Regional	Local community, built environment, service and facility	Focusing on the movement of private vehicles and public transport might have negative impacts on active travel users on the main road.	N/A	The policy has positive effects as improving traffic efficiency through traffic signal network could enhance road safety for all users.	Policy could make more explicit reference to considerations for active travel management in relation to urban traffic management.	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for active travel management in relation to urban traffic management.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	+	+	+	D	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has positive effects as improving traffic efficiency through traffic signal network could calm traffic.	Policy could make more explicit reference to considerations for residential areas and deprived areas in relation to traffic management.	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for residential areas and deprived areas in relation to traffic management.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	+	+	+	D	T	Regional	Local community, built environment, service and facility	Focusing on the movement of private vehicles and public transport might have negative impacts on active travel users on the main road.	N/A	The policy has positive effects as improving traffic efficiency through traffic signal network could enhance road safety.	Policy could make more explicit reference to considerations for residential areas and deprived areas in relation to traffic management. Policy could also make more explicit reference to considerations for active travel management	N	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	+	+	+	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for residential areas and deprived areas in relation to traffic management. Policy could also make more explicit reference to considerations for active travel management
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Local community, air quality, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to the environmental impacts of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Local community, noise level	N/A	N/A	The policy has neutral effects as there is no reference to the environmental impacts of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	O	O	O	I	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the environmental impacts of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	O	O	O	I	P	Regional	Local community, air quality, green and blue infrastructure, built environment	N/A	N/A	The policy has neutral effects as there is no reference to the environmental impacts of transport, however the policy is focused on traffic signal network.	None identified.	No mitigation identified in 2025.	The policy now references the delivery of bus franchising and reducing congestion. The policy no longer references 'benefitting private vehicles'.	O	O	O	Although the policy has been amended by referencing the delivery of bus franchising and reducing congestion, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	O	O	O	I	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has neutral effects as there is no reference to the environmental impacts of transport, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the reviewing the KRN in line with the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will reduce air pollution emissions. Therefore, the scoring has increased to very positive.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	-	-	-	D	T	Regional	Air quality, local communities, transport network, Road network	Improving the efficiency of movements and making sustainable modes of transport more convenient on the Key Route Network could help to reduce emission and improve air quality.	N/A	The policy has negative effects as there is no reference to reducing traffic levels and congestion, whereas the policy is focused on reviewing Key Route Network.	Policy could make more explicit reference to reducing traffic levels and congestion in relation to reviewing and integrating the Key Route Network.	Partially	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will reduce air pollution emissions. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to reducing traffic levels and congestion in relation to reviewing and integrating the Key Route Network.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	N/A	N/A	The policy has neutral effects as there is no reference to the green and blue infrastructure, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	O	O	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	Improving the efficiency of movements and making sustainable modes of transport more convenient on the Key Route Network could help to reduce emission and improve air quality, which could reduce impacts on habitats and important sites.	N/A	The policy has neutral effects as there is no reference to the environmental impacts of transport, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to avoiding impacts on habitats and important sites in relation to reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to avoiding impacts on habitats and important sites in relation to reviewing and integrating the Key Route Network.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	N/A	N/A	The policy has neutral effects as there is no reference to the green and blue infrastructure, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the green and blue infrastructure, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	N/A	N/A	The policy has neutral effects as there is no reference to the nature recovery, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the carbon sinks, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the green and blue infrastructure, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will improve access to different spaces, infrastructure, and facilities. Therefore, the scoring has increased to very positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to the nature recovery, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	-	-	-	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside policies that promotes modal shift to sustainable modes of transport, the policy could significantly contribute to promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to enhancing public transport availability and accessibility, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to enhancing the efficiency and convenience of public transport and active travel through reviewing and integrating the Key Route Network.	Y	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport. Therefore, the scoring has increased to very positive.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	-	-	-	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside disincentives for private car use, the policy could significantly contribute to enhancing and promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to encouraging a reduction in private car use, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to disincentives for private car use through reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to disincentives for private car use through reviewing and integrating the Key Route Network.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	-	-	-	D	T	Regional	Transport network, air quality, local communities	Enhancing and integrating the route networks could greatly enhance efficiency in transport movements.	N/A	The policy has negative effects as there is no reference to encouraging greater carbon efficiency in transport movement, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to encouraging carbon efficiency in relation to integrating the Key Route Network.	Partially	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to encouraging carbon efficiency in relation to integrating the Key Route Network.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to the technologies, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	?	?	?	D	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has uncertain effects as the policy promoted quality integrated route network, however there is no reference to enhancing or providing low-carbon passenger travel.	Policy could make more explicit reference to promoting low-carbon passenger travel through reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to promoting low-carbon passenger travel through reviewing and integrating the Key Route Network.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to the climate change mitigation, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the low carbon energy generation, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	-	-	-	D	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has negative effects, as there is no reference to considerations for the specific transport needs of rural communities, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to the specific transport needs of rural communities in relation to integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the specific transport needs of rural communities in relation to integrating the Key Route Network.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the low carbon construction, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Regional	Air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to reducing emissions through development or maintenance of infrastructure, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	O	O	O	I	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to reducing emissions through development or maintenance of infrastructure, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will contribute to achieving Net Zero. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	-	-	-	D	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has negative effects as there is no reference to considerations for extreme weather events, whereas the policy aims to improve and integrate the Key Route Network.	Policy could make more explicit reference to eviction plans before and during extreme weather events in relation to reviewing the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to eviction plans before and during extreme weather events in relation to reviewing the Key Route Network.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to the flood risk adaptations, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to the flood risk adaptations, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to the flood risk adaptations, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	-	-	-	D	P	Wider	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to considerations for climatic effects, whereas the policy aims to improve and integrate the Key Route Network.	Policy could make more explicit reference to eviction plans before and during extreme weather events in relation to reviewing the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to eviction plans before and during extreme weather events in relation to reviewing the Key Route Network.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to the flood risk adaptations, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Wider	Transport network, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the resource efficiency, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to the waste management, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to the recycling, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	-	-	-	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside policies that promotes modal shift to sustainable modes of transport, the policy could significantly contribute to promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to enhancing the quality of public transport service or active travel, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to enhancing the efficiency and convenience of public transport and active travel through reviewing and integrating the Key Route Network.	Y	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will help to reduce fuel consumption. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to the suppliers, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to the water quality, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the surfacing, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	N/A	N/A	The policy has neutral effects as there is no reference to the green and blue infrastructure, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	N/A	N/A	The policy has neutral effects as there is no reference to the nature-based solutions, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to the blue infrastructure, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to the flood risk adaptations, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to the land use, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil or land contaminations, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to soil or land contaminations, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to soil or land contaminations, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	-	-	-	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside policies that promotes modal shift to sustainable modes of transport, the policy could significantly contribute to promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to enhancing the accessibility of public transport service or active travel, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to enhancing the efficiency and accessibility of public transport and active travel through reviewing and integrating the Key Route Network.	Y	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will improve access to different spaces, infrastructure, and facilities. Therefore, the scoring has increased to very positive.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscapes, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscapes, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to the green and blue infrastructure, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	I	T	Regional	Public rights of way	Movements on the Key Route Network could pose constraints for users of the public rights of way when they meet the main road users at junctions.	N/A	The policy has negative effects as there is no reference to protecting users of public rights of ways, whereas the policy aims to improve and integrate the Key Route Network.	Policy could make more explicit reference to protecting users of public rights of ways through reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to protecting users of public rights of ways through reviewing and integrating the Key Route Network.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscapes, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	I	T	Regional	Built environment	N/A	N/A	The policy has neutral effects as there is no reference to streetscapes, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	-	-	-	D	T	Regional	Road network, transport network	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside disincentives for private car use, the policy could significantly contribute to enhancing and promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to encouraging a reduction in private car use, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to disincentives for private car use through reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to disincentives for private car use through reviewing and integrating the Key Route Network.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	-	-	-	D	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside policies that promotes modal shift to sustainable modes of transport, the policy could significantly contribute to promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to enhancing the accessibility of public transport service or active travel, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to enhancing the efficiency and accessibility of public transport and active travel through reviewing and integrating the Key Route Network.	Y	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will improve access to different spaces, infrastructure, and facilities. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	-	-	-	D	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving active travel infrastructure, whereas the policy aims to improve and integrate the Key Route Network.	Policy could make more explicit reference to enhancing the quality and availability of active travel infrastructure through reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	+	The policy has been amended by referencing ensuring the efficiency and accessibility of public transport along with other modes, which could include active travel. Therefore, the scoring has increased to positive.	Policy could make more explicit reference to enhancing the quality and availability of active travel infrastructure through reviewing and integrating the Key Route Network.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the green and blue infrastructure, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	-	-	-	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside policies that promotes modal shift to sustainable modes of transport, the policy could significantly contribute to promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to promoting public transport or active travel, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to enhancing the efficiency, accessibility, and convenience of public transport and active travel through reviewing and integrating the Key Route Network.	Y	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the charging points, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside policies that promotes modal shift to sustainable modes of transport, the policy could significantly contribute to promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to enhancing the accessibility of public transport service or active travel, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to enhancing the efficiency and accessibility of public transport and active travel through reviewing and integrating the Key Route Network.	Y	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	-	-	-	D	P	Regional	Local communities, employment sites, vulnerable population	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside policies that promotes modal shift to sustainable modes of transport, the policy could significantly contribute to promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to enhancing the accessibility of public transport service or active travel, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to enhancing the efficiency and accessibility of public transport and active travel through reviewing and integrating the Key Route Network.	Y	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will improve access to different spaces, infrastructure, and facilities. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	-	-	-	D	P	Wider	Local communities, built environment, services and facilities	N/A	N/A	The policy has negative effects as there is no reference to enhancing the accessibility to key services and facilities, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to enhancing the accessibility to key destinations through reviewing and integrating the Key Route Network.	Y	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will improve access to different spaces, infrastructure, and facilities. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	-	-	-	D	T	Wider	Local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to reducing journey times for passengers and freight, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to reducing journey times for passengers and freight through reviewing and integrating the Key Route Network.	Y	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing ensuring the efficiency and accessibility of public transport along with other modes, which could include reducing journey times. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to decarbonisation, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to investments, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	-	-	-	D	P	Wider	Air quality, employment site, housing site, transport network	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside policies that promotes modal shift to sustainable modes of transport, the policy could significantly contribute to promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to enhancing the accessibility of public transport service or active travel, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to enhancing the efficiency and accessibility of public transport and active travel through reviewing and integrating the Key Route Network.	Y	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will improve access to different spaces, infrastructure, and facilities. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	O	O	O	I	P	Regional	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	O	O	O	I	P	Regional	Air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	-	-	-	D	P	Wider	Built environment, service and facility, transport network	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside policies that promotes modal shift to sustainable modes of transport, the policy could significantly contribute to promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to enhancing the accessibility of public transport service or active travel, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to enhancing the efficiency and accessibility of public transport and active travel through reviewing and integrating the Key Route Network.	Y	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will improve access to different spaces, infrastructure, and facilities. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has neutral effects as there is no reference to accessibility within local communities, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will improve access to different spaces, infrastructure, and facilities. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	-	-	-	D	T	Wider	Local communities, transport network	Movements on the Key Route Network could pose constraints for vulnerable users when they meet the main road users at crossings, which could introduce severance issues.	N/A	The policy has negative effects as there is no reference to reducing severance issues, whereas the policy aims to improve and integrate the Key Route Network.	Policy could make more explicit reference to reducing severance issues through reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing ensuring the efficiency and accessibility of public transport along with other modes, which could include active travel, helping to reduce severance. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to reducing severance issues through reviewing and integrating the Key Route Network.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to inclusive designs, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to affordability, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	+	D	P	Wider	Local communities, transport network	N/A	N/A	The policy has positive effects as integration of the Key Route Network could improve connections between communities across the wider region.	Policy could make more explicit reference to improving connectivity through the integrations of the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will improve connections between communities. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to improving connectivity through the integrations of the Key Route Network.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	I	P	Wider	Transport network, transport infrastructure, local communities, vulnerable population	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside policies that promotes modal shift to sustainable modes of transport, the policy could significantly contribute to promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to enhancing the accessibility of public transport service or active travel, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to enhancing the efficiency and accessibility of public transport and active travel through reviewing and integrating the Key Route Network. The policy could also make more explicit considerations to the specific needs of deprived areas in terms of reviewing the network.	Partially	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	+	+	++	The policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, which will improve access to different spaces, infrastructure, and facilities. Therefore, the scoring has increased to very positive.	The policy could also make more explicit considerations to the specific needs of deprived areas in terms of reviewing the network.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	-	-	-	I	T	Wider	Local communities, transport network	N/A	Through integrating the Key Route Network with the Strategic Route Network, alongside providing updated information to all users, the policy could significantly contribute to enhancing and promoting the use of sustainable forms of transport.	The policy has negative effects as there is no reference to enhancing access to information for sustainable transport options, whereas the policy aims to integrate the Key Route Network with the Strategic Route Network.	Policy could make more explicit reference to improving access to information for public transport service and active travel users through reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving access to information for public transport service and active travel users through reviewing and integrating the Key Route Network.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to the public realm, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	-	-	-	D	T	Wider	Local community, built environment, service and facility	Movements on the Key Route Network could pose constraints for vulnerable users when they meet the main road users at crossings.	N/A	The policy has negative effects as there is no reference to enhancing safety and reducing impacts on vulnerable users, whereas the policy aims to review and integrate the Key Route Network.	Policy could make more explicit reference to measures that calm traffic and reduce risks on vulnerable users through reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to measures that calm traffic and reduce risks on vulnerable users through reviewing and integrating the Key Route Network.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	-	-	-	D	T	Regional	Local community, built environment, service and facility	Movements on the Key Route Network could pose constraints for vulnerable users when they meet the main road users at crossings.	N/A	The policy has negative effects as there is no reference to enhancing safety and reducing impacts on vulnerable users, whereas the policy aims to review and integrate the Key Route Network.	Policy could make more explicit reference to measures that calm traffic and reduce risks on vulnerable users through reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to measures that calm traffic and reduce risks on vulnerable users through reviewing and integrating the Key Route Network.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	-	-	-	D	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has negative effects as there is no reference to traffic calming measures, whereas the policy aims to review and integrate the Key Route Network.	Policy could make more explicit reference to measures that calm traffic and reduce risks on vulnerable users through reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to measures that calm traffic and reduce risks on vulnerable users through reviewing and integrating the Key Route Network.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	-	-	-	D	T	Regional	Local community, built environment, service and facility	Movements on the Key Route Network could pose constraints for vulnerable users when they meet the main road users at crossings.	N/A	The policy has negative effects as there is no reference to enhancing safety and reducing impacts on vulnerable users, whereas the policy aims to review and integrate the Key Route Network.	Policy could make more explicit reference to measures that calm traffic and reduce risks on vulnerable users through reviewing and integrating the Key Route Network.	N	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to measures that calm traffic and reduce risks on vulnerable users through reviewing and integrating the Key Route Network.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Local community, air quality, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to the environmental impacts of transport, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Local community, noise level	N/A	N/A	The policy has neutral effects as there is no reference to the environmental impacts of transport, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	O	O	O	I	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the environmental impacts of transport, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	O	O	O	I	P	Regional	Local community, air quality, green and blue infrastructure, built environment	N/A	N/A	The policy has neutral effects as there is no reference to the environmental impacts of transport, however the policy is focused on integrating the Key Route Network with the Strategic Route Network.	None identified.	No mitigation identified in 2025.	The policy now references the public transport network and ensuring the efficiency and accessibility of public transport alongside other modes.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	RR8																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	-	-	-	I	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has negative effects as there is no reference to reducing air pollutions, whereas the policy aims to reduce negative impacts on communities and the environment.	Policy could make more explicit reference to reducing air pollutants near areas with low air quality in relation to reducing negative impacts of freight and logistics on communitieis and the environment.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	+	The policy has been amended by referencing investigating options for modal shift of freight traffic, which will reduce air pollution emissions. Therefore, the scoring has increased to positive.	Policy could make more explicit reference to reducing air pollutants near areas with low air quality in relation to reducing negative impacts of freight and logistics on communitieis and the environment.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	-	-	-	I	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has negative effects as there is no reference to reducing air pollutions, whereas the policy aims to reduce negative impacts on communities and the environment.	Policy could make more explicit reference to reducing air pollutants in relation to reducing negative impacts of freight and logistics on communitieis and the environment.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	+	The policy has been amended by referencing investigating options for modal shift of freight traffic, which will reduce air pollution emissions. Therefore, the scoring has increased to positive.	Policy could make more explicit reference to reducing air pollutants in relation to reducing negative impacts of freight and logistics on communitieis and the environment.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	-	-	-	D	T	Regional	Air quality, habitats, protected species, biological and geological sites	N/A	N/A	The policy has negative effects as there is no reference to avoiding impacts on habitats and important sites, whereas the policy aims to reduce negative impacts on communities and the environment.	Policy could make more explicit reference to avoiding impacts on habitats and importnat sites in relation to reducing negative impacts of freight and logistics on communitieis and the environment.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to avoiding impacts on habitats and importnat sites in relation to reducing negative impacts of freight and logistics on communitieis and the environment.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to carbon sinks, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to nature recovery, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to public transport, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	+	The policy has been amended by referencing investigating options for modal shift of freight traffic. Therefore, the scoring has increased to positive.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to private car use, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	-	-	-	D	T	Regional	Transport network, air quality, local communities	Improving the reliability and efficiency of freight and logistics could promote greater carbon efficiency in the movement of goods.	N/A	The policy has negative effects as there is no reference to encouraging greater carbon efficiency, whereas the policy aims to reduce negative impacts on communities and the environment.	Policy could make more explicit reference to encouraging greater carbon efficiency in relation to reducing negative impacts of freight and logistics on communities and the environment.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to encouraging greater carbon efficiency in relation to reducing negative impacts of freight and logistics on communities and the environment.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	-	-	-	I	P	Wider	Transport network, air quality, local communities	N/A	Exploring opportunities of using low carbon technologies in freight and logistics alongside the policy could promote more sustainability within the sector.	The policy has negative effects as there is no reference to low carbon technologies, whereas the policy aims to reduce negative impacts on communities and the environment.	Policy could make more explicit reference to encouraging the use of low carbon technologies in relation to reducing negative impacts of freight and logistics on communities and the environment.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to encouraging the use of low carbon technologies in relation to reducing negative impacts of freight and logistics on communities and the environment.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	O	O	O	I	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to low carbon passenger travel, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to climate change, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	-	-	-	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	Exploring opportunities of using low carbon technologies in freight and logistics alongside the policy could promote more sustainability within the sector.	The policy has negative effects as there is no reference to low carbon energy generation, whereas the policy aims to reduce negative impacts on communities and the environment.	Policy could make more explicit reference to encouraging low carbon energy generation in relation to reducing negative impacts of freight and logistics on communities and the environment.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to encouraging low carbon energy generation in relation to reducing negative impacts of freight and logistics on communities and the environment.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	O	O	O	I	P	Regional	Local communities, rural communities, transport network	N/A	Exploring opportunities of using low carbon technologies in freight and logistics alongside the policy could promote more sustainability within the sector.	The policy has negative effects as there is no reference to transport needs, whereas the policy aims to reduce negative impacts on communities and the environment.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	Exploring opportunities of using low carbon technologies in freight and logistics alongside the policy could promote more sustainability within the sector.	The policy has negative effects as there is no reference to low carbon construction, whereas the policy aims to reduce negative impacts on communities and the environment.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Regional	Air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	O	O	O	I	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to net zero target, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	+	The policy has been amended by referencing investigating options for modal shift of freight traffic, which will contribute to achieving Net Zero. Therefore, the scoring has increased to positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	-	-	-	D	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has negative effects as there is no reference to extreme weather events, whereas the policy aims to improve the resilience of the freight and logistics sector.	Policy could make more explicit reference to plans for extreme weather events in relation to resilience of the freight and logistics sector.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	+	The policy has been amended by referencing improving safety, which could include during extreme weather events. Therefore, the scoring has increased to positive.	Policy could make more explicit reference to plans for extreme weather events in relation to resilience of the freight and logistics sector.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	-	-	-	I	P	Wider	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to climatic effects, whereas the policy aims to improve the resilience of the freight and logistics sector.	Policy could make more explicit reference to plans for extreme weather events in relation to resilience of the freight and logistics sector.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	+	The policy has been amended by referencing improving safety, which could include during extreme weather events. Therefore, the scoring has increased to positive.	Policy could make more explicit reference to plans for extreme weather events in relation to resilience of the freight and logistics sector.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	-	-	-	I	T	Wider	Transport network, energy infrastructure	Improved freight and logistics can promote resource efficiency through efficient packaging and transportation, supporting the recycling and reuse of materials.	N/A	The policy has negative effects as there is no reference to promoting resource efficiency, whereas the policy aims to deliver sustainable freight and logistics and reduce negative impacts on communities and the environment.	Policy could make more explicit reference to plans to support circular economy in relation to improving the sustainability of freight and logistics practices.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to plans to support improving the sustainability of freight and logistics practices.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	-	-	-	I	T	Regional	Waste management infrastructure, local communities	Improved logistics operations can help to reduce waste and optimise the efficiency in waste transportation.	N/A	The policy has negative effects as there is no reference to waste management practices, whereas the policy aims to deliver sustainable freight and logistics and reduce negative impacts on communities and the environment.	Policy could make more explicit reference to plans to support sustainable waste management practices in relation to improving the sustainability of freight and logistics practices.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to plans to support sustainable waste management practices in relation to improving the sustainability of freight and logistics practices.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	-	-	-	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	Improved freight and logistics can promote resource efficiency through efficient packaging and transportation, supporting the recycling and reuse of materials.	N/A	The policy has negative effects as there is no reference to promoting recycling materials, whereas the policy aims to deliver sustainable freight and logistics and reduce negative impacts on communities and the environment.	Policy could make more explicit reference to plans to support circular economy in relation to improving the sustainability of freight and logistics practices.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to plans to support circular economy in relation to improving the sustainability of freight and logistics practices.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	++	++	The policy has been amended by referencing investigating options for modal shift of freight traffic. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	-	-	-	I	T	Regional	Supply chain, construction industry	N/A	Promoting the use of local suppliers could reduce the necessary distance for freight and logistics travels, hence help to improve sustainability of the sector.	The policy has negative effects as there is no reference to promoting the use of local suppliers, whereas the policy aims to improve the resilience of the freight and logistics sector.	Policy could make more explicit reference to plans to promote the use of local suppliers in relation to improving the sustainability of freight and logistics practices.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to plans to promote the use of local suppliers in relation to improving the sustainability of freight and logistics practices.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to drainage, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to surfacing, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	N/A	N/A	The policy has neutral effects as there is no reference to nature-based solutions, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to drainage, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to land use, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil or contaminated land, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to soil or contaminated land, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to soil or contaminated land, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g. locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural or heritage assets, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to cultural or heritage assets, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to landscapes or townscapes, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	O	O	O	I	T	Regional	Public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of way, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to buildings or townscapes, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	+	+	+	D	T	Regional	Built environment	N/A	N/A	The policy has positive effects as there is reference to removing barriers.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	+	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	N/A	N/A	The policy has neutral effects as there is no reference to private car use, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	++	++	The policy has been amended by referencing investigating options for modal shift of freight traffic. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	-	-	-	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	Exploring opportunities of using low carbon technologies in freight and logistics alongside the policy could promote more sustainability within the sector.	The policy has negative effects as there is no reference to low carbon technologies, whereas the policy aims to reduce negative impacts on communities and the environment.	Policy could make more explicit reference to encouraging a shift to low emission vehicles and providing charging points for the freight and logistics sector.	Y	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	O	O	O	I	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	-	-	-	D	T	Regional	Local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to reducing the overall journey times, whereas the policy aims to improve the reliability and competitiveness of the freight and logistics sector.	Policy could make more explicit reference to measures that reduce the overall journey times for freight and logistics in relation to improving their reliability and competitiveness.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to measures that reduce the overall journey times for freight and logistics in relation to improving their reliability and competitiveness.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	?	?	?	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has uncertain effects as there is no reference to decarbonisation, but improving the competitiveness of the freight and logistics sector could bring positive economic outcomes.	Policy could make more explicit reference to encouraging decarbonisation of the freight and logistics in terms of improving the sustainability of the industry.	Partially	The policy now references investigating options for modal shift of freight traffic and improving safety.	?	?	?	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to encouraging decarbonisation of the freight and logistics in terms of improving the sustainability of the industry.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	+	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has positive effects as there is reference to improving resilience and competitiveness of the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	+	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	I	P	Regional	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has positive effects as there is reference to reducing negative impacts on communities, which would promote health and wellbeing.	Policy could make more explicit reference to measures that promotes health and wellbeing in relation to reducing negative impacts on communities.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	++	The policy has been amended by referencing investigating options for modal shift of freight traffic, which will reduce air pollution emissions and improve health outcomes. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to measures that promotes health and wellbeing in relation to reducing negative impacts on communities.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	I	P	Regional	Air quality, local communities	N/A	N/A	The policy has positive effects as there is reference to reducing negative impacts on communities, which would promote health and wellbeing.	Policy could make more explicit reference to measures that promotes health and wellbeing in relation to reducing negative impacts on communities.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	++	The policy has been amended by referencing investigating options for modal shift of freight traffic, which will reduce air pollution emissions and improve health outcomes. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to measures that promotes health and wellbeing in relation to reducing negative impacts on communities.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to severance issues, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to equality, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to affordability, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	O	O	O	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to sustainable modes of transport, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety and security, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety and security, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	O	O	O	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	-	-	-	D	T	Regional	Local community, built environment, service and facility	Freight and logistics vehicles could impose larger treat to vulnerable transport users if not managed property.	N/A	The policy has negative effects as there is no reference to reducing the risks imposed by freight and logistics vehicles on vulnerable transport users, whereas the policy aims to reduce negative impacts on communities.	Policy could make more explicit reference to measures to reduce risks of large vehicles on vulnerable transport users in relation to reducing negative impacts on communities.	Y	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	++	The policy has been amended by referencing improving safety. Therefore, the scoring has increased to very positive.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming measures, whereas the policy aims to improve the freight and logistics sector.	None identified.	No mitigation identified in 2025.	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	++	The policy has been amended by referencing improving safety. Therefore, the scoring has increased to very positive.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	-	-	-	I	T	Regional	Local community, built environment, service and facility	Freight and logistics vehicles could impose larger treat to vulnerable transport users if not managed property.	N/A	The policy has negative effects as there is no reference to reducing the risks imposed by freight and logistics vehicles on vulnerable transport users, whereas the policy aims to reduce negative impacts on communities.	Policy could make more explicit reference to measures to reduce risks of large vehicles on vulnerable transport users in relation to reducing negative impacts on communities.	Y	The policy now references investigating options for modal shift of freight traffic and improving safety.	+	+	++	The policy has been amended by referencing improving safety. Therefore, the scoring has increased to very positive.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	-	-	-	D	T	Regional	Local community, air quality, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to measures that reduces specific types of pollutions, whereas the policy aims to reduce negative impacts on communities.	Policy could make more explicit reference to measures that reduces specific types of pollutions in relation to reducing negative impacts on communities.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to measures that reduces specific types of pollutions in relation to reducing negative impacts on communities.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	-	-	-	D	P	Regional	Local community, noise level	N/A	N/A	The policy has negative effects as there is no reference to measures that reduces vibrations, whereas the policy aims to reduce negative impacts on communities.	Policy could make more explicit reference to measures that reduces vibrations in relation to reducing negative impacts on communities.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to measures that reduces vibrations in relation to reducing negative impacts on communities.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	-	-	-	D	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has negative effects as there is no reference to measures that reduces air pollutions, whereas the policy aims to reduce negative impacts on communities.	Policy could make more explicit reference to measures that reduces air pollutions in relation to reducing negative impacts on communities.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to measures that reduces air pollutions in relation to reducing negative impacts on communities.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	-	-	-	D	P	Regional	Local community, air quality, green and blue infrastructure, built environment	N/A	N/A	The policy has negative effects as there is no reference to improving impact of freight and logistics on the local environment, whereas the policy aims to reduce negative impacts on communities and the environment.	Policy could make more explicit reference to improving impact of freight and logistics on the local environment in relation to reducing negative impacts.	N	The policy now references investigating options for modal shift of freight traffic and improving safety.	-	-	-	Although the policy has been amended by referencing alignment with the public transport network and ensuring the efficiency and accessibility of public transport, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving impact of freight and logistics on the local environment in relation to reducing negative impacts.

Policy Name		RR9																		
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	O	O	O	I	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure in mind; all of which will help to reduce air pollution. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	O	O	O	I	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure in mind; all of which will help to reduce air pollution. Therefore, the scoring has increased to very positive.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	++	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with blue green infrastructure and supporting natural habitats in mind. Therefore, the scoring has increased to very positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	O	O	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	N/A	N/A	The policy has neutral effects as there is no reference to habitats and important sites, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	++	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with blue green infrastructure and supporting natural habitats in mind. Therefore, the scoring has increased to very positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	++	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with blue green infrastructure and supporting natural habitats in mind. Therefore, the scoring has increased to very positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	++	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with blue green infrastructure and supporting natural habitats in mind. Therefore, the scoring has increased to very positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	-	-	-	I	P	Regional	Transport infrastructure, wildlife, biodiversity	A focus on managing assets without considerations for climate change and surrounding areas could have negative effects on the resilience of the transport network and biodiversity.	N/A	The policy has negative effects as there is no reference to good design to promote nature recovery, whereas the policy aims to improve resilience of the existing assets and should consider the sustainability and impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to biodiversity net gain and wildlife friendly approaches in relation to asset management to enhance resilience of the estate.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	++	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with blue green infrastructure and supporting natural habitats in mind. Therefore, the scoring has increased to very positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	-	-	-	I	P	Regional	Carbon sinks, transport infrastructure	N/A	Considerations for implementing carbon sinks could help to mitigate the adverse impact brought by transport on climate change and contribute to improvement of the resilience of existing and new assets.	The policy has negative effects as there is no reference to carbon sinks, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures such as carbon sinks in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure in mind; all of which will help to reduce air pollution. Therefore, the scoring has increased to very positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility to specific locations, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	++	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with blue green infrastructure and supporting natural habitats in mind. Therefore, the scoring has increased to very positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to nature recovery, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	++	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with blue green infrastructure and supporting natural habitats in mind. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to promotion of sustainable transport, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to private car use, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	O	O	O	I	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to promotion of carbon efficiency, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport technologies, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	O	O	O	I	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to promotion of sustainable transport, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	-	-	-	D	T	Wider	Transport network, natural environment	A focus on managing assets without considerations for climate change and surrounding areas could have negative effects on the resilience of the transport network.	N/A	The policy has negative effects as there is no reference to climate change mitigation and adaptation, whereas the policy aims to improve resilience of the existing assets.	Policy could make more explicit reference to climate change mitigation and adaptation measures in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	-	-	-	I	T	Wider	Transport infrastructure, energy infrastructure	A focus on managing assets without considerations for low carbon energy generation could have negative effects on the resilience of the transport network.	Promoting active travel alongside asset management could contribute positively to climate change mitigation, and improve the resilience of the transport network.	The policy has negative effects as there is no reference to low energy generation through transport estates, whereas the policy aims to improve resilience of the existing assets and should consider the sustainability and impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures including low carbon energy generations in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	-	-	-	D	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to considerations for the specific needs of rural communities, whereas the policy aims to deliver a consistency of offer across the regions.	Policy could make more explicit reference to considerations for the specific needs of rural communities in relation to delivering a consistent offer across the transport network.	N	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	-	-	-	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for the specific needs of rural communities in relation to delivering a consistent offer across the transport network.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	-	-	-	I	T	Wider	Transport infrastructure, energy infrastructure	A focus on managing assets without considerations for low carbon energy construction could have negative effects on the resilience of the transport network.	N/A	The policy has negative effects as there is no reference to low carbon materials and techniques, whereas the policy aims to improve resilience of the existing assets and should consider the sustainability and impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures including low carbon construction materials and techniques in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	-	-	-	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Wider	Air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to promotion of sustainable transport, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	-	-	-	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has negative effects as there is no reference to supporting net zero targets, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	-	-	-	D	T	Wider	Transport network, natural environment, built environment	A focus on managing assets without considerations for climate change and surrounding areas could have negative effects on the resilience of the transport network.	N/A	The policy has negative effects as there is no reference to extreme weather events, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	-	-	-	D	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	A lack of consideration for flood risks and drainage schemes through asset management could have negative impacts on the resilience of the existing and new assets.	N/A	The policy has negative effects as there is no reference to flood risks, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures including flood adaptation schemes in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	-	-	-	D	T	Regional	Flood risk, built environment	A lack of consideration for flood risks and drainage schemes through asset management could have negative impacts on the resilience of the existing and new assets.	N/A	The policy has negative effects as there is no reference to floodplains, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures including flood adaptation schemes in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	–	–	–	D	T	Regional	Flood risk, built environment	A lack of consideration for flood risks and drainage schemes through asset management could have negative impacts on the resilience of the existing and new assets.	N/A	The policy has negative effects as there is no reference to floodplains, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures including flood adaptation schemes in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	–	–	–	D	P	Wider	natural environment, built environment, local communities, transport network	A focus on managing assets without considerations for climate change and surrounding areas could have negative effects on the resilience of the transport network.	N/A	The policy has negative effects as there is no reference to uncertainties in climatic effects, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes do not increase flood risk to others?	–	–	–	D	T	Regional	Flood risk, transport network	A lack of consideration for flood risks and drainage schemes through asset management could have negative impacts on the resilience of the existing and new assets.	N/A	The policy has negative effects as there is no reference to flood risks, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	–	–	–	I	T	Wider	Transport network, energy infrastructure	N/A	N/A	The policy has negative effects as there is no reference to resource efficiency, whereas the policy aims to improve resilience of the existing assets and should consider the sustainability and impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures including sustainable and circular practices in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	–	–	–	I	T	Wider	Waste management infrastructure, local communities	N/A	N/A	The policy has negative effects as there is no reference to waste management practices, whereas the policy aims to improve resilience of the existing assets and should consider the sustainability and impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures including sustainable and circular practices including waste management in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	–	–	–	I	T	Wider	Waste management infrastructure, local communities, supply chain, construction industry	N/A	N/A	The policy has negative effects as there is no reference to resource efficiency, whereas the policy aims to improve resilience of the existing assets and should consider the sustainability and impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures including sustainable and circular practices including waste management in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	O	O	O	I	P	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to promotion of sustainable transport, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Wider	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g. SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to water quality, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to surfacing, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	N/A	N/A	The policy has neutral effects as there is no reference to water quality, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	N/A	N/A	The policy has neutral effects as there is no reference to habitats, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	-	-	-	I	T	Regional	Green and blue infrastructure, habitats, flood risk	A lack of consideration for flood risks and adaptation schemes through asset management could have negative impacts on the resilience of the existing and new assets.	N/A	The policy has negative effects as there is no reference to flood risks, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures including flood adaptation schemes in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	++	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with blue green infrastructure and supporting natural habitats in mind. Therefore, the scoring has increased to very positive.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	-	-	-	D	P	Regional	Drainage system, flood risk	A lack of consideration for flood risks and drainage schemes through asset management could have negative impacts on the resilience of the existing and new assets.	N/A	The policy has negative effects as there is no reference to resilience of drainage system, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures including drainage in relation to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	-	-	-	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has negative effects as there is no reference to soil resource management, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures in relation to protecting soil resources.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	-	-	-	I	T	Regional	Soil resource	N/A	N/A	The policy has negative effects as there is no reference to soil resource management, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures in relation to protecting soil resources.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has negative effects as there is no reference to avoiding mineral safeguarding areas, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	-	-	-	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has negative effects as there is no reference to land contamination, whereas the policy aims to improve resilience of the existing assets and should consider the impacts of climate change as well as mitigation measures.	Policy could make more explicit reference to climate change mitigation and adaptation measures including remediation of contaminated land to enhancing resilience of existing and new assets.	Y	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures in mind. Therefore, the scoring has increased to very positive.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	-	-	-	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has negative effects as there is no reference to protecting and enhancing cultural and heritage assets, whereas the policy aims to recognise the importance of existing assets and improve, which may include historic or culturally important transport infrastructure.	Policy could make more explicit reference to the protection and enhancement of historic or culturally important assets in relation to asset management.	N	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	-	-	-	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the protection and enhancement of historic or culturally important assets in relation to asset management.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility to specific locations, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	-	-	-	D	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has negative effects as there is no reference to appropriate management of designated heritage assets which are transport infrastructure, whereas the policy aims to recognise the importance of existing assets and improve management.	Policy could make more explicit reference to the protection and enhancement of historic or culturally important assets in relation to asset management of transport infrastructure.	N	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	-	-	-	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the protection and enhancement of historic or culturally important assets in relation to asset management of transport infrastructure.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	-	-	-	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has negative effects as there is no reference to considerations for impacts on the surrounding contexts, whereas the policy aims to manage assets with a regional approach.	Policy could make more explicit reference to considerations for the potential impacts on surrounding contexts in relation to managing existing and new assets.	N	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	-	-	-	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for the potential impacts on surrounding contexts in relation to managing existing and new assets.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	-	-	-	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has negative effects as there is no reference to considerations for impacts on the surrounding contexts, whereas the policy aims to manage assets with a regional approach.	Policy could make more explicit reference to considerations for the potential impacts on surrounding landscapes in relation to managing existing and new assets.	N	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	-	-	-	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to considerations for the potential impacts on surrounding landscapes in relation to managing existing and new assets.

9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to protecting and enhancing green and blue infrastructure, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	++	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with blue green infrastructure and supporting natural habitats in mind. Therefore, the scoring has increased to very positive.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	–	-	-	D	T	Regional	Public rights of way	N/A	N/A	The policy has negative effects as there is no reference to considerations for public rights of way, whereas the policy aims to manage assets with a regional approach.	Policy could make more explicit reference to protecting public rights of way in relation to asset management.	N	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	–	-	-	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to protecting public rights of way in relation to asset management.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	–	-	-	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has negative effects as there is no reference to considerations for impacts on important buildings and townscapes, whereas the policy aims to recognise the importance of assets and manage assets with a regional approach.	Policy could make more explicit reference to the protection and enhancement of important buildings and townscapes in relation to asset management of transport infrastructure.	N	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	–	-	-	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the protection and enhancement of important buildings and townscapes in relation to asset management of transport infrastructure.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	–	-	-	I	T	Regional	Built environment	N/A	N/A	The policy has negative effects as there is no reference to removing unnecessary clutter, whereas the policy aims to manage and improve the resilience of assets.	Policy could make more explicit reference to removing unnecessary clutter in relation to managing transport assets.	N	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	–	-	-	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to removing unnecessary clutter in relation to managing transport assets.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	N/A	N/A	The policy has neutral effects as there is no reference to disincentives for private car use, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility to specific locations, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	–	-	-	I	P	Regional	Local communities, road infrastructure, transport network	N/A	Promoting active travel alongside asset management could contribute positively to climate change mitigation, and improve the resilience of the transport network.	The policy has negative effects as there is no reference to improving infrastructure, whereas the policy aims to manage and improve resilience of the existing assets.	Policy could make more explicit reference to improving the quality and availability of existing active travel infrastructure in relation to asset management.	N	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	–	-	-	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving the quality and availability of existing active travel infrastructure in relation to asset management.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	++	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with blue green infrastructure and supporting natural habitats in mind. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	O	O	O	I	T	Regional	Transport network, infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to promotion of sustainable transport, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to promotion of sustainable transport, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to the provision of new infrastructure, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility to specific locations, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	O	O	O	I	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility to specific locations, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to journey times, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to decarbonisation or economic outcomes, however the policy is focused on managing assets and improve resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	?	?	?	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has uncertain effects as there is reference to improving resilience of the transport network, however there is no clear indication for the measures to achieve that and the effect on investments is uncertain.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	?	?	?	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility to specific locations, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	O	O	O	I	P	Regional	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting health and wellbeing, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with climate change mitigation and adaptation, and blue green infrastructure in mind, which will have a positive impact on health outcomes. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	O	O	O	I	P	Regional	Air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to promoting health and wellbeing, however the policy is focused on asset management and resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	++	The policy has been amended by referencing that assets and supporting infrastructure will be designed with climate change mitigation and adaptation, and blue green infrastructure in mind, which will have a positive impact on health outcomes. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility to specific locations, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility to specific locations, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to severance issues, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups??	+	+	+	D	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has positive effects as there is reference to delivering a consistency of offer across the region's transport network, which promotes equality.	Policy could make more explicit reference to the specific needs of various vulnerable groups in relation to delivering a consistent transport network.	N	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	+	+	+	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the specific needs of various vulnerable groups in relation to delivering a consistent transport network.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to inclusive designs, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility to specific locations, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to improving connectivity, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	N/A	Promoting active travel alongside asset management could contribute positively to climate change mitigation, and improve the resilience of the transport network.	The policy has negative effects as there is no reference to the specific needs of deprived areas, whereas the policy aims to deliver a consistency of offer across the transport network.	Policy could make more explicit reference to the specific needs of deprived areas in relation to delivering a consistent transport network.	N	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	-	-	-	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the specific needs of deprived areas in relation to delivering a consistent transport network.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to access to information, however the policy is focused on managing existing assets across the region.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on managing assets and improve resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy is focused on managing assets and improve resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on managing assets and improve resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy is focused on managing assets and improve resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on managing assets and improve resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Local community, air quality, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to construction impacts, however the policy is focused on managing assets and improve resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Local community, noise level	N/A	N/A	The policy has neutral effects as there is no reference to impacts on health, however the policy is focused on managing assets and improve resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	O	O	O	I	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to impacts on health, however the policy is focused on managing assets and improve resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	O	O	O	I	P	Regional	Local community, air quality, green and blue infrastructure, built environment	N/A	N/A	The policy has neutral effects as there is no reference to transport impacts on local environment, however the policy is focused on managing assets and improve resilience.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind.	O	O	O	Although the policy has been amended by referencing the Weaver Network, and that assets and supporting infrastructure will be designed with climate change mitigation and adaptation measures, blue green infrastructure, and supporting natural habitats in mind., It is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	S1																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAS) and where this pollution disproportionately affects vulnerable populations?	+	+	+	I	T	Local	Air quality, vulnerable communities	Lower accident-related pollution spikes	Mode shift amplifies both safety and air quality gains	The policy has positive effects as although there is no direct reference to air quality, it is considered that embedding safety in design will increase the number of people using public transport and active travel routes.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind, which will support a reduction in air pollution. Therefore, the scoring has increased to very positive.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	I	T	Regional	Air quality, vulnerable communities	Lower accident-related pollution spikes	Mode shift amplifies both safety and air quality gains	The policy has positive effects as although there is no direct reference to air quality, it is considered that embedding safety in design will increase the number of people using public transport and active travel routes.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind, which will support a reduction in air pollution. Therefore, the scoring has increased to very positive.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind, which will support a reduction in air pollution. Therefore, the scoring has increased to positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Regional	Green spaces, green infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind, which will support nature recovery. Therefore, the scoring has increased to positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it references delivering safe walking, wheeling and cycling infrastructure, as well as bus, rail, and mass transit networks.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it references delivering safe walking, wheeling and cycling infrastructure, as well as bus, rail, and mass transit networks.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it references delivering safe walking, wheeling and cycling infrastructure, as well as bus, rail, and mass transit networks.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it references delivering safe walking, wheeling and cycling infrastructure, as well as bus, rail, and mass transit networks.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	++	++	++	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind. Therefore, the scoring has increased to positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Local	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it references delivering safe walking, wheeling and cycling infrastructure, as well as bus, rail, and mass transit networks.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on embedding safety in design.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	+	+	+	D	T	Local	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on embedding safety in design.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to protecting floodplains from inappropriate development, however the policy is focused on improving perceptions of safety.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	+	+	+	D	T	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on embedding safety in design.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on embedding safety in design.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on embedding safety in design.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	The policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, which will help to promote a modal shift to sustainable transport. Therefore, the scoring has increased to positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	Discouraging the use of high emission vehicles in city centres will increase the use of sustainable and active travel modes, reducing traffic congestion and improving air quality.	This policy has positive effects as there is mention of promoting the use of sustainable forms of transport.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	++	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The accessibility of public transport, in combination with other safety measures, will result in a more reliable service, improving perceptions of safety through reduced waiting times, real time information, and proximity to end destination.	This policy has positive effects as there is mention of promoting the use of sustainable forms of transport.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	++	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The availability of public transport, in combination with other safety measures, will result in a more reliable service, improving perceptions of safety through reduced waiting times, real time information, and proximity to end destination.	This policy has positive effects as there is mention of promoting the use of sustainable forms of transport.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	++	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	The increased number of people using active travel infrastructure may reduce the quality of green infrastructure, reducing perceived safety, unless proper maintenance is put in place.	Improving the feel of active travel routes with features like green walls and integrated lighting can enhance perceptions of safety.	This policy has positive effects as there is mention of promoting the use of sustainable forms.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	++	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The accessibility and convenience of public transport, in combination with other safety measures, will result in a more reliable service, improving perceptions of safety through reduced waiting times, real time information, and proximity to end destination.	This policy has positive effects as there is mention of promoting the use of sustainable forms.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	++	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low emission vehicles, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The accessibility and convenience of public transport, in combination with other safety measures, will result in a more reliable service, improving perceptions of safety through reduced waiting times, real time information, and proximity to end destination.	This policy has positive effects as there is mention of promoting the use of sustainable forms.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	++	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Enhanced transport safety measures, such as better road design, traffic management, and vehicle safety standards, can lead to a steady decrease in accidents and injuries over time	Improved transport safety can encourage more people to use active transport options like walking and cycling, leading to increased physical activity and better overall health	The policy has positive effects as it aims to create a safer environment, which will reduce accidents and improve health.	The policy could be enhanced by making explicit reference to vulnerable groups.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended by referencing taking into account vulnerable road users. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Enhanced transport safety measures, such as better road design, traffic management, and vehicle safety standards, can lead to a steady decrease in accidents and injuries over time	Improved transport safety can encourage more people to use active transport options like walking and cycling, leading to increased physical activity and better overall health	The policy has positive effects as it aims to create a safer environment, which will reduce accidents and improve health.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has positive effects as it mentions delivering wheeling infrastructure.	This policy could be enhanced by making more explicit reference to designing for vulnerable groups, such as disabled people, older people, and women.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended by referencing taking into account vulnerable road users. Therefore, the scoring has increased to very positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has positive effects as it mentions delivering wheeling infrastructure.	This policy could be enhanced by making more explicit reference to designing for vulnerable groups, such as disabled people, older people, and women.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended by referencing taking into account vulnerable road users. Therefore, the scoring has increased to very positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Affordable transport options can reduce transportation costs for individuals, leading to long-term economic benefits	Combining safety initiatives with affordable transport options can create a more comprehensive and effective transport system, amplifying benefits for users	The policy has positive effects as it provides affordable transport options (public transport and active travel).	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	+	+	+	D	P	Regional	Transport network, road network, road users, local communities	The presence of multiple surveillance measures, such as an active community, clear sightlights, and good lighting, can collectively enhance the actual and perceived safety of an area.	A well designed and active public realm will not only deter crime, but also encourage more people to use the space, further enhancing natural surveillance.	This policy has positive effects as it focuses on transport safety, reducing crime, and promoting community safety.	This policy could be enhanced by making explicit reference to the approaches that will be used to enhanced safety across interchanges for all modes and across bus, rail and mass transit networks, for example, natural surveillance.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan. Therefore, the scoring has increased to very positive.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	+	+	+	D	P	Regional	Transport network, road network, road users, local communities	The increased number of people using active travel infrastructure will put pressure on existing services and may reduce quality and safety of services unless more are provided.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on transport safety, reducing crime, and promoting community safety.	This policy could be enhanced by making explicit reference to how embedding safety in design can improve access of opportunity for all.	N	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to how embedding safety in design can improve access of opportunity for all.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	+	D	P	Regional	Transport network, road network, road users, local communities	The increased number of people using active travel infrastructure will put pressure on existing services and may reduce quality and safety of services unless more are provided.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on transport safety, reducing crime, and promoting community safety.	This policy could be enhanced by making explicit reference to the approaches that will be used to enhanced safety across interchanges for all modes and across bus, rail and mass transit networks.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan. Therefore, the scoring has increased to very positive.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	+	+	+	D	P	Local	Transport network, road network, road users, local communities	Reduction in average vehicle speeds in residential and commercial areas, as well as reduction in the volume of traffic, leading to fewer accidents.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on transport safety, reducing crime, and promoting community safety.	This policy could be enhanced by making explicit reference to the approaches that will be used to enhanced safety across interchanges for all modes and across bus, rail and mass transit networks, for example, traffic calming measures.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan. Therefore, the scoring has increased to very positive.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	+	+	+	D	P	Local	Transport network, road network, road users, local communities	Reduction in average vehicle speeds in residential and commercial areas, as well as reduction in the volume of traffic, leading to fewer accidents.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on transport safety, reducing crime, and promoting community safety.	This policy could be enhanced by making explicit reference to the approaches that will be used to enhanced safety across interchanges for all modes and across bus, rail and mass transit networks.	Y	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	++	++	The policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan. Therefore, the scoring has increased to very positive.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	The policy has been amended by referencing taking into account vulnerable road users. Therefore, the scoring has increased to positive.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	o	o	o	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	D	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Safer environments encourage more people to engage in active travel, such as walking and cycling, leading to increased physical activity and improved public health	Improved transport safety can encourage more people to use active transport options, leading to increased physical activity and better overall health	The policy has positive effects as it promotes active travel by providing safe environments for walking, wheeling, and cycling.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	Although the policy has been amended by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users', as well as designing with climate adaptation in mind, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on embedding safety in design.	None identified.	No mitigation identified in 2025.	The policy now references 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, and 'taking into account vulnerable road users'. It also references designing with climate adaptation in mind.	+	+	+	The policy has been amended to refer to designing active travel infrastructure with climate adaptation in mind. Therefore, the scoring has increased to positive.	None identified.

Policy Name	S2																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on giving people the time and space to move safely.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Green spaces, green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has positive effects as there is reference to embedding best practice across the transport network.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Local	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on giving people the time and space to move safely. .	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on giving people the time and space to move safely. .	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on giving people the time and space to move safely. .	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on giving people the time and space to move safely. .	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on giving people the time and space to move safely. .	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The increased number of people using active travel infrastructure will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The availability of active travel routes, in combination with other safety measures, will result in a more reliable service, allowing people the time and space to move safely.	The policy has positive effects as it references availability of transport.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	++	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	The increased number of people using active travel infrastructure may reduce the quality of green infrastructure, reducing perceived safety, unless proper maintenance is put in place.	Improving the feel of active travel routes with features like green walls and integrated lighting can enhance perceptions of safety.	The policy has positive effects as it references improving street design.	The policy could be enhanced by making explicit reference to green and blue infrastructure.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	++	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to green and blue infrastructure.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The availability and accessibility of travel routes, in combination with other safety measures, will result in a more reliable service, allowing people the time and space to move safely.	The policy has positive effects as it focuses on making sustainable forms ore convenient through providing the time and space to move freely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	++	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	D	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	The policy has been amended by referencing suitable signal timings. Therefore, the scoring has increased to positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Enhanced transport safety measures, such as better road design, traffic management, and vehicle safety standards, can lead to a steady decrease in accidents and injuries over time	Improved transport safety can encourage more people to use active transport options like walking and cycling, leading to increased physical activity and better overall health	The policy has positive effects as it aims to create a safer environment for at risk groups.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Enhanced transport safety measures, such as better road design, traffic management, and vehicle safety standards, can lead to a steady decrease in accidents and injuries over time	Improved transport safety can encourage more people to use active transport options like walking and cycling, leading to increased physical activity and better overall health	The policy has positive effects as it aims to create a safer environment for at risk groups.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Enhanced transport safety measures, such as better road design, traffic management, and vehicle safety standards, can lead to a steady decrease in accidents and injuries over time	Improved transport safety can encourage more people to use active transport options like walking and cycling, leading to increased physical activity and better overall health	The policy has positive effects as it focuses on reducing severance caused by traffic issues.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The accessibility of travel routes, in combination with other safety measures, will result in a more reliable service, allowing people the time and space to move safely.	The policy has positive effects as it references focusing on at risk groups.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The accessibility of travel routes, in combination with other safety measures, will result in a more reliable service, allowing people the time and space to move safely.	This policy has positive effects as there is reference to ensuring all users can move safely in the right locations.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The accessibility of travel routes, in combination with other safety measures, will result in a more reliable service, allowing people the time and space to move safely.	This policy has positive effects as there is reference to ensuring all users can move safely in the right locations.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The accessibility of travel routes, in combination with other safety measures, will result in a more reliable service, allowing people the time and space to move safely.	This policy has positive effects as there is reference to ensuring all users can move safely in the right locations.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The accessibility of travel routes, in combination with other safety measures, will result in a more reliable service, allowing people the time and space to move safely.	This policy has positive effects as there is reference to ensuring streets users can move safely in the right locations.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	+	+	+	D	P	Regional	Transport network, road network, road users, local communities	Improvements to public realm, such as signals, street design, and markings can collectively enhance the actual and perceived safety of an area.	A well designed public realm will not only deter crime, but also encourage more people to use the space, further enhancing safety.	This policy has positive effects as it focuses on safety.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	+	+	+	D	P	Regional	Transport network, road network, road users, local communities	Improvements to the security of transport schemes can collectively enhance the actual and perceived safety of an area.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on safety.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	+	D	P	Regional	Transport network, road network, road users, local communities	The increased number of people using active travel infrastructure will put pressure on existing services and may reduce quality and safety of services unless more are provided.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on safety.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	+	+	+	D	P	Local	Transport network, road network, road users, local communities	Reduction in average vehicle speeds in residential and commercial areas, as well as reduction in the volume of traffic, leading to fewer accidents.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on safety.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	+	+	+	D	P	Local	Transport network, road network, road users, local communities	Reduction in average vehicle speeds in residential and commercial areas, as well as reduction in the volume of traffic, leading to fewer accidents.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on safety.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.	N	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	+	+	+	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on giving people the time and space to move safely.	None identified.	No mitigation identified in 2025.	The policy now references 'suitable signal timings' rather than just 'signals', and reference to 'in the right locations' has been removed.	o	o	o	Although the policy has been amended by referencing 'suitable signal timings' but removing 'in the right locations', it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on improving perceptions of safety.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	o	o	o	I	T	Local	Green spaces, green infrastructure, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it improving perceptions of safety can be achieved through reducing vehicular traffic, and improving the availability and accessibility of other options which in turn, will reduce greenhouse gas emissions.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it improving perceptions of safety can be achieved through reducing vehicular traffic, and improving the availability and accessibility of other options which in turn, will reduce greenhouse gas emissions.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it improving perceptions of safety can be achieved through reducing vehicular traffic, and improving the availability and accessibility of other options which in turn, will reduce greenhouse gas emissions.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it improving perceptions of safety can be achieved through reducing vehicular traffic, and improving the availability and accessibility of other options which in turn, will reduce greenhouse gas emissions.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Local	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it improving perceptions of safety can be achieved through reducing vehicular traffic, and improving the availability and accessibility of other options which in turn, will reduce greenhouse gas emissions.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on improving perceptions of safety and security.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on improving perceptions of safety and security.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to protecting floodplains from inappropriate development, however the policy is focused on improving perceptions of safety.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on improving perceptions of safety and security.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on improving perceptions of safety and security.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on improving perceptions of safety and security.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The availability and accessibility of travel routes, in combination with other safety measures, will result in a more reliable service, allowing people the time and space to move safely.	The policy has positive effects as improving the safety of different transport modes will result in a modal shift.	The policy could be enhanced by making explicit reference to encouraging sustainable modes as a result of improved safety levels.	N	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to encouraging sustainable modes as a result of improved safety levels.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Safer transport systems can make it easier for people to access essential services like healthcare, education, and employment	Combining safety initiatives with improved access to services can create a more comprehensive and effective transport system, amplifying benefits for users	The policy has positive effects as it improving safety will help to improve accessibility to services, facilities, and amenities which previously may have been avoided.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Enhanced transport safety measures, such as better road design, traffic management, and vehicle safety standards, can lead to a steady decrease in accidents and injuries over time	Improved transport safety can encourage more people to use active transport options like walking and cycling, leading to increased physical activity and better overall health	The policy has positive effects as by improving safety, the policy promotes health and wellbeing, particular for the most vulnerable groups.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Enhanced transport safety measures, such as better road design, traffic management, and vehicle safety standards, can lead to a steady decrease in accidents and injuries over time	Improved transport safety can encourage more people to use active transport options like walking and cycling, leading to increased physical activity and better overall health	The policy has positive effects as by improving safety, the policy promotes health and wellbeing, particular for the most vulnerable groups.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on improving perceptions of safety.	The policy could be enhanced by making explicit reference to reducing severance issues in relation to improving perceptions of safety.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to reducing severance issues in relation to improving perceptions of safety.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	The increased number of people using public transport/sustainable travel methods will put pressure on existing services and may reduce quality and safety of services unless more are provided.	The accessibility of travel routes, in combination with other safety measures, will result in a more reliable service, allowing people the time and space to move safely.	The policy has positive effects as it references focusing on at risk groups.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	++	++	++	D	P	Regional	Transport network, road network, road users, local communities	Improvements to public realm, such as signals, street design, and markings can collectively enhance the actual and perceived safety of an area.	A well designed public realm will not only deter crime, but also encourage more people to use the space, further enhancing safety.	This policy has positive effects as it focuses on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	++	++	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	++	++	++	D	P	Regional	Transport network, road network, road users, local communities	Improvements to the security of transport schemes can collectively enhance the actual and perceived safety of an area.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	++	++	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	++	++	++	D	P	Regional	Transport network, road network, road users, local communities	The increased number of people using active travel infrastructure will put pressure on existing services and may reduce quality and safety of services unless more are provided.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	++	++	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	++	++	++	D	P	Local	Transport network, road network, road users, local communities	Reduction in average vehicle speeds in residential and commercial areas, as well as reduction in the volume of traffic, leading to fewer accidents.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	++	++	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	++	++	++	D	P	Local	Transport network, road network, road users, local communities	Reduction in average vehicle speeds in residential and commercial areas, as well as reduction in the volume of traffic, leading to fewer accidents.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it focuses on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	++	++	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAS) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?'	o	o	o	I	T	Local	Green spaces, green infrastructure, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as promoting sustainable transport is part of the Vision Zero Strategy.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as promoting sustainable transport and reducing private car use is part of the Vision Zero Strategy.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as promoting sustainable transport is part of the Vision Zero Strategy.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as promoting sustainable transport is part of the Vision Zero Strategy.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Local	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as promoting sustainable transport is part of the Vision Zero Strategy.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. .	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. ..	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. ..	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. ...	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. ...	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility. ...	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	++	D	T	Local	Vulnerable groups, lower socio-economic groups and deprived areas	Improved health and reduced health inequalities through the promotion of healthy travel options	Encouraging walking and cycling through improved infrastructure (e.g., bike lanes, pedestrian paths) not only promotes physical activity but also reduces traffic congestion and pollution	This policy has positive effects as it makes reference to increasing healthy mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	++	D	T	Regional	Vulnerable groups, lower socio-economic groups and deprived areas, tourists, commuters	Improved health and reduced health inequalities through the promotion of healthy travel options	Encouraging walking and cycling through improved infrastructure (e.g., bike lanes, pedestrian paths) not only promotes physical activity but also reduces traffic congestion and pollution	This policy has positive effects as it makes reference to increasing healthy mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Vulnerable groups, lower socio-economic groups and deprived areas, tourists, commuters	N/A	N/A	The policy has neutral effects as there is no reference to connecting to healthcare services, however, the policy is focused on delivering vision zero.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	P	Regional	Vulnerable groups, lower socio-economic groups and deprived areas, tourists, commuters	N/A	N/A	The policy has neutral effects as there is no reference to connecting to healthcare services, however, the policy is focused on delivering vision zero.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	+	+	++	D	P	Regional	Vulnerable groups, lower socio-economic groups and deprived areas, tourists, commuters	Improved health and reduced health inequalities through improving connectivity and reducing severance.	Encouraging walking and cycling through improved infrastructure (e.g., bike lanes, pedestrian paths) not only promotes physical activity but also reduces traffic congestion and pollution	This policy has positive effects as it makes reference to increasing healthy mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	++	D	T	Regional	The older population and younger travellers, disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups	Potential link to other initiatives which seek to integrate communities.	Reduced economic disparities and increased social inclusion.	This policy has positive effects as it makes reference to increasing equitable mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	++	D	P	Regional	The older population and younger travellers, disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups	Potential link to other initiatives which seek to integrate communities.	Reduced economic disparities and increased social inclusion.	This policy has positive effects as it makes reference to increasing equitable mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	++	D	T	Regional	The older population and younger travellers, disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups	Potential link to other initiatives which seek to integrate communities.	Reduced economic disparities and increased social inclusion.	This policy has positive effects as it makes reference to increasing equitable mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	++	D	T	Regional	The older population and younger travellers, disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups	Potential link to other initiatives which seek to integrate communities.	Reduced economic disparities and increased social inclusion.	This policy has positive effects as it makes reference to increasing equitable mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	++	D	T	Regional	The older population and younger travellers, disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups	Potential link to other initiatives which seek to integrate communities.	Reduced economic disparities and increased social inclusion.	This policy has positive effects as it makes reference to increasing equitable mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	The older population and younger travellers, disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups	N/A	N/A	The policy has neutral effects as there is no reference to access to information, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	+	+	++	D	P	Regional	Transport network, road network, road users, local communities	Improvements to public realm, such as signals, street design, and markings can collectively enhance the actual and perceived safety of an area.	A well designed public realm will not only deter crime, but also encourage more people to use the space, further enhancing safety.	This policy has positive effects as it makes reference to increasing safe mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	+	+	++	D	P	Regional	Transport network, road network, road users, local communities	Improvements to the security of transport schemes can collectively enhance the actual and perceived safety of an area.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it makes reference to increasing safe mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	++	D	P	Regional	Transport network, road network, road users, local communities	The increased number of people using active travel infrastructure will put pressure on existing services and may reduce quality and safety of services unless more are provided.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it makes reference to increasing safe mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	+	+	++	D	P	Local	Transport network, road network, road users, local communities	Reduction in average vehicle speeds in residential and commercial areas, as well as reduction in the volume of traffic, leading to fewer accidents.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it makes reference to increasing safe mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	+	+	++	D	P	Local	Transport network, road network, road users, local communities	Reduction in average vehicle speeds in residential and commercial areas, as well as reduction in the volume of traffic, leading to fewer accidents.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it makes reference to increasing safe mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on achieving no serious injury or death on our roads by 2040, whilst increasing safe, healthy, and equitable mobility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

Policy Name	S5																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on personal safety and security.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on personal safety and security.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on personal safety and security.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.	N	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on personal safety and security.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on personal safety and security.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on personal safety and security.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on personal safety and security.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.	N	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on personal safety and security.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	-	-	-	I	P	Local	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on personal safety and security.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.	N	The policy now references the Weaver Network.	-	-	-	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by addressing safety around blue and green infrastructure, including parks and along canals.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?'	o	o	o	I	T	Local	Green spaces, green infrastructure, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to air quality or blue and green infrastructure, however the policy is focused on personal safety and security.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as safe and secure sustainable transport will promote its use.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as safe and secure sustainable transport will promote its use, reducing reliance on private vehicles.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as safe and secure sustainable transport will promote its use, reducing reliance on private vehicles.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as safe and secure sustainable transport will promote its use, reducing reliance on private vehicles.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Local	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on improving perceptions of safety.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as safe and secure sustainable transport will promote its use, reducing reliance on private vehicles.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on improving personal safety and security through design, infrastructure, and service interventions.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	N	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on improving personal safety and security through design, infrastructure, and service interventions.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	N	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to protecting floodplains from inappropriate development, however the policy is focused on improving perceptions of safety.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	N	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on improving personal safety and security through design, infrastructure, and service interventions.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	N	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on improving personal safety and security through design, infrastructure, and service interventions.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	N	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	+	+	+	D	P	Regional	Transport network, road network, road users, vulnerable communities	Increased vehicle usage leads to higher road traffic, which can result in more accidents and fatalities. Extreme weather conditions, influenced by climate change, can exacerbate these risks by damaging road infrastructure and impairing driving conditions	Integrated policies that address both road safety and environmental impact can create synergistic benefits. For example, promoting electric vehicles reduces emissions and can also improve road safety by reducing noise pollution and improving air quality	The policy has positive effects as it focuses on improving personal safety and security through design, infrastructure, and service interventions.	The policy could be enhanced by making explicit reference to safety and resilience from climate impacts.	N	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on personal safety and security	The policy could be enhanced by making explicit reference to improving the quality and availability of active travel infrastructure.	Partially	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on personal safety and security	The policy could be enhanced by making explicit reference to promoting a modal shift to sustainable forms of transport.	Partially	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Safer transport systems can make it easier for people to access essential services like healthcare, education, and employment	Combining safety initiatives with improved access to services can create a more comprehensive and effective transport system, amplifying benefits for users	The policy has positive effects as it improving safety will help to improve accessibility to services, facilities, and amenities which previously may have been avoided.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through the promotion of healthy travel options	Encouraging walking and cycling through improved infrastructure (e.g., bike lanes, pedestrian paths) not only promotes physical activity but also reduces traffic congestion and pollution	The policy has positive effects as it improving safety for the most at risk groups promotes health for all.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through the promotion of healthy travel options	Encouraging walking and cycling through improved infrastructure (e.g., bike lanes, pedestrian paths) not only promotes physical activity but also reduces traffic congestion and pollution	The policy has positive effects as it improving safety for the most at risk groups promotes health for all.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities.	Reduced economic disparities and increased social inclusion.	The policy has positive effects as improvements in safety can encourage groups who wouldn't typically use public transport and active modes to travel using these methods, therefore improving access to opportunity for all.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities.	Reduced economic disparities and increased social inclusion.	The policy has positive effects as improvements in safety can encourage groups who wouldn't typically use public transport and active modes to travel using these methods, therefore improving access to opportunity for all.	The policy could be enhanced by making explicit reference to promoting accessibility and inclusive design for disabled and low mobility users.	N	The policy now references the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to connections between communities, however the policy is focused on personal safety and security	The policy could be enhanced by making explicit reference to connecting different communities within the policy text.	N	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	+	+	++	D	P	Regional	Transport network, road network, road users, local communities	Improvements to public realm, such as signals, street design, and markings can collectively enhance the actual and perceived safety of an area.	A well designed public realm will not only deter crime, but also encourage more people to use the space, further enhancing safety.	This policy has positive effects as it makes reference to increasing safe mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	++	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	+	+	++	D	P	Regional	Transport network, road network, road users, local communities	Improvements to the security of transport schemes can collectively enhance the actual and perceived safety of an area.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it makes reference to increasing safe mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	++	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	++	D	P	Regional	Transport network, road network, road users, local communities	The increased number of people using active travel infrastructure will put pressure on existing services and may reduce quality and safety of services unless more are provided.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it makes reference to increasing safe mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	++	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	+	+	++	D	P	Local	Transport network, road network, road users, local communities	Reduction in average vehicle speeds in residential and commercial areas, as well as reduction in the volume of traffic, leading to fewer accidents.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it makes reference to increasing safe mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	++	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	+	+	++	D	P	Local	Transport network, road network, road users, local communities	Reduction in average vehicle speeds in residential and commercial areas, as well as reduction in the volume of traffic, leading to fewer accidents.	Improved safety for pedestrians and cyclists, enhancing community livability.	This policy has positive effects as it makes reference to increasing safe mobility for all in West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	+	+	++	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on personal safety and security	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	ZE1																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanant	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	+	D	P	Regional	Air quality, local communities, vulnerable populations	N/A	The policy could significantly contribute to air quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will directly contribute to the minimisation of air pollutant emissions and air quality enhancement.	Policy could make more explicit reference to areas with low air quality such as AQMAs in relation to air pollutant emissions controls.	N	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	The policy has been amended to refer to fully zero emission bus fleet by 2036. Therefore, the scoring has increased to very positive in the long term.	Policy could make more explicit reference to areas with low air quality such as AQMAs in relation to air pollutant emissions controls.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	D	T	Regional	Air quality, local communities, transport network, Road network	N/A	The policy could significantly contribute to air quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as the transition to publicly owned bus fleet has great potential in controlling bus fares, which in turn promotes modal shift towards public transport use and improves air quality.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	+	I	T	Regional	Air quality, green and blue infrastructure, habitat	The policy contributes to air quality enhancement which provides better conditions for the creation and enhancement of green and blue infrastructures and habitats over time.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure or habitats, however the policy is focused on emission control of the public transport system. In the long term, the policy could positively contribute to creating better conditions for these sites by managing emissions from public transport.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	O	+	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	The policy contributes to air quality enhancement which reduces adverse impacts on designated habitats and important sites from the transport network over time.	N/A	The policy has neutral effects as there is no reference to designated habitats, protected species, or important biological and geological sites, however the policy is focused on emission control of the public transport system. In the long term, the policy could positively contribute to reducing impacts on these sites by managing emissions from public transport.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	+	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	The policy contributes to air quality enhancement which would support the protection and enhancement of green and blue infrastructure over time.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, habitats, or wildlife corridors and networks, however the policy is focused on emission control of the public transport system. In the long term, the policy could positively contribute to reducing impacts on these sites by managing emissions from public transport.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	The policy would reduce constraints on identifying suitable locations for green and blue infrastructure by improving air quality over time.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure connectivity, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	+	+	+	D	P	Regional	Transport infrastructure, wildlife, biodiversity	The policy contributes to air quality enhancement which helps to secure biodiversity net gain and supports nature recovery over time.	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail are good design in relation to transport infrastructure, which helps to secure biodiversity net gain and support nature recovery.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	The policy reduces CO2 emissions which would cease imposing additional pressure on the need for new carbon sinks over time.	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	The policy could improve accessibility of public transport through the transition to publicly owned bus fleets and the potential to control bus fares. This can in turn increase accessibility of local communities to various destinations, including green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to accessibility to green and blue infrastructure, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	The policy contributes to air quality enhancement which would support Local Nature Recovery Strategies over time.	N/A	The policy has neutral effects as there is no reference to Local Nature Recovery Strategies or local nature recovery groups, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, transport infrastructure, local communities	The policy could promote the use of buses through the transition to publicly owned bus fleets and the potential to control bus fares over time.	The policy could contribute to modal shift from private car use to public transport through the transition to publicly owned bus fleets and potential to control bus fares, alongside other policies that improves availability and accessibility of buses.	The policy has positive effects as the transition to publicly owned bus fleet has potential in controlling bus fares, which in turn promotes the use of sustainable forms of transport through enhanced affordability.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	I	T	Regional	Transport network, transport infrastructure, local communities	The policy could encourage a reduction in private car use through the transition to publicly owned bus fleets and the potential to control bus fares over time.	The policy could contribute to modal shift from private car use to public transport through the transition to publicly owned bus fleets and potential to control bus fares, alongside other policies that improves availability and accessibility of buses.	The policy has positive effects as the transition to publicly owned bus fleet has potential in controlling bus fares, which in turn promotes the use of buses and encourages a reduction in private car use.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	++	D	T	Regional	Transport network, air quality, local communities	The policy aims for zero emission bus fleet by 2036, which will maximise carbon efficiency of buses in the long term.	The policy could significantly contribute to carbon efficiency in movements alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will directly contribute to the maximisation of carbon efficiency in the movement of goods and people.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	+	+	++	D	P	Regional	Transport network, air quality, local communities	The policy promotes the transition to zero emission bus fleet and electrification of rail, which may encourage use of other innovative new low and zero carbon transport technologies over time.	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will directly encourage use of innovative new low and zero carbon transport technologies to reduce emissions.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, air quality, local communities	N/A	The policy could significantly contribute to increased low-carbon passenger travel alongside policies that encourage modal shift from private car use to public transport.	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will turn existing transport facilities into low-carbon travel options, which in turn promotes a wider choice of low-carbon passenger travel.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	++	I	T	Wider	Transport network, natural environment	The policy aims for zero emission bus fleet by 2036 and electrification of rail, which will promote other climate change mitigation and adaptation measures in the long term and influence wider areas.	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will encourage the prioritisation of climate change mitigation and adaptation.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	+	+	++	D	T	Wider	Transport infrastructure, energy infrastructure	The policy aims for zero emission bus fleet by 2036 and electrification of rail, which will promote the use of low carbon energy generation methods in other transport estates over time and influence wider areas.	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will directly encourage use of the transport estate for low carbon energy generation	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	O	O	O	I	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to rural communities, however the policy is focused on emission control of the public transport system.	Policy could make more explicit reference to rural communities in relation to specific transport needs.	N	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to rural communities in relation to specific transport needs.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to construction techniques, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Wider	Air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to embedded emissions from developments, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	++	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will directly support West Yorkshire's target of achieving net zero by 2038.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has neutral effects as there is no reference to climate mitigation and adaptation, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	+	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	The policy contributes to air quality enhancement which would support the creation of green and blue infrastructure over time.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, habitats, or climate change, however the policy is focused on emission control of the public transport system. In the long term, the policy could positively contribute to these aspects by managing emissions from public transport.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to floodplains, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to compensatory measures, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Regional	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to adaptive management and design, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	+	+	++	D	T	Regional	Transport network, energy infrastructure	N/A	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will directly contribute to modal shift in energy use and enable resource efficiency during operations, which reduce the need for extraction.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastrcture, local communities	N/A	N/A	The policy has neutral effects as there is no reference to waste management practices, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastrcture, local communities, supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to the use of recycled or secondary materials, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	++	D	P	Wider	Transport infrastructure, energy infrastructure	The policy aims for zero emission bus fleet by 2036 and electrification of rail, which will promote sustainable transport and fuel consumption in other trasnport estates over time and influence wider areas.	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will directly promote a modal shift to sustainable tranport and reduce fuel consumption.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to the use of local suppliers and locally-produced materials, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to sustainable road drainage, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to surfacing, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	+	I	T	Regional	Green and blue infrastructure, water quality	The policy contributes to air quality enhancement which would support the protection and enhancement of green and blue infrastructure over time.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure or surface water, however the policy is focused on emission control of the public transport system. In the long term, the policy could positively contribute to protecting and enhancing these elements by managing emissions from	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Wider	Habitats, water quality	The policy contributes to air quality enhancement which would support the use of nature-based solutions over time.	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	The policy contributes to air quality enhancement which would support the enhancement of blue infrastructure over time.	N/A	The policy has neutral effects as there is no reference to blue infrastructure, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to drainage systems, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to previously developed land, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resources or peatlands, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to agricultural soils, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to land or soil contamination, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	The policy could improve accessibility of public transport through the transition to publicly owned bus fleets and the potential to control bus fares. This can in turn increase accessibility to various destinations, including historic and culturally important sites.	N/A	The policy has neutral effects as there is no reference to accessibility to historic and culturally important sites, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to designated heritage assets, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape characters, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	+	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	The policy contributes to air quality enhancement which would support the protection and enhancement of green and blue infrastructure over time.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, landscape, or townscape, however the policy is focused on emission control of the public transport system. In the long term, the policy could positively contribute to protecting and enhancing these elements by managing emissions from public transport.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	O	O	O	I	T	Regional	Public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of way, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to locally important buildings and townscape, or local distinctiveness, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	I	T	Regional	Built environment	N/A	N/A	The policy has neutral effects as there is no reference to streetscapes, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	N/A	N/A	The policy has neutral effects as there is no reference to disincentives for private car use, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	The policy could promote the use of public transport through the transition to publicly owned bus fleets and the potential to control bus fares. This can in turn increase accessibility to various destinations, including key services and facilities, employment sites and open spaces.	N/A	The policy has neutral effects as there is no reference to key services and facilities, employment sites, or open spaces, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has neutral effects as there is no reference to active travel, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	+	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	The policy contributes to air quality enhancement which would support green and blue infrastructure proposals and encourage active travel over time.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure or active travel routes, however the policy is focused on emission control of the public transport system. In the long term, the policy could positively contribute to supporting these elements by managing emissions from	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Regional	Transport network, transport infrastructure, local communities	The policy could promote the use of buses through the transition to publicly owned bus fleets and the potential to control bus fares over time.	The policy could contribute to modal shift from private car use to public transport through the transition to publicly owned bus fleets and potential to control bus fares, alongside other policies that improves availability and accessibility of buses.	The policy has positive effects as the transition to publicly owned bus fleet has great potential in controlling bus fares, which in turn promotes modal shift to more sustainable forms of transport.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	The policy has been amended to refer to fully zero emission bus fleet by 2036. Therefore, the scoring has increased to very positive in the long term.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	The policy encourages shift to low emission vehicles, which will foster the need and provision for charging points and supporting infrastructure over time.	N/A	The policy has neutral effects as there is no reference to charging points and supporting infrastructure, however the policy is focused on emission control of the public transport system.	Policy could make more explicit reference to charging points and supporting infrastructure in relation to zero emission public transport.	N	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to charging points and supporting infrastructure in relation to zero emission public transport.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to land use planning, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	The policy could promote the use of public transport through the transition to publicly owned bus fleets and the potential to control bus fares. This can in turn increase accessibility to various destinations, including employment sites.	N/A	The policy has neutral effects as there is no reference to employment, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	O	O	O	I	P	Regional	Local communities, built environment, services and facilities	The policy could promote the use of public transport through the transition to publicly owned bus fleets and the potential to control bus fares. This can in turn increase accessibility to various destinations, including services, facilities, and	N/A	The policy has neutral effects as there is no reference to services, facilities, and amenities, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to journey times, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	++	D	T	Regional	Local economy, transport network, transport infrastructure	The policy contributes to decarbonisation of the public transport system, which has the potential to bring economic benefits with modal shift in energy and fuel usage over time.	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail decarbonises the public transport system, which supports the optimisation of potential economic outcomes	Policy could make more explicit reference to opportunities in optimising potential economic outcomes in relation to decarbonising public transport.	Partially	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly reference optimising potential economic outcomes through franchising of public transport.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	++	D	T	Regional	Local economy, transport network, transport infrastructure	The policy contributes to building efficiency and resilience of the public transport system by modal shift in fuel usage, which has the potential to bring investments over time.	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will support the establishment of an effective and resilient transport network, which has the potential to increase	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	The policy could promote the use of public transport through the transition to publicly owned bus fleets and the potential to control bus fares. This can in turn increase accessibility to various destinations, including expected major employment	N/A	The policy has neutral effects as there is no reference to expected major employment or residential areas, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	I	P	Regional	Air quality, local communities, vulnerable population	The policy contributes to air quality enhancement which supports the health and wellbeing of vulnerable groups over time.	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will improve air quality and promote the health and wellbeing of vulnerable groups.	Policy could make more explicit reference to areas with high concentration of vulnerable population (e.g. hospitals, care homes) in relation to air pollutant emissions controls.	N	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	The policy has been amended to refer to fully zero emission bus fleet by 2036. Therefore, the scoring has increased to very positive in the long term.	Policy could make more explicit reference to areas with high concentration of vulnerable population (e.g. hospitals, care homes) in relation to air pollutant emissions controls.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	I	P	Wider	Air quality, local communities	The policy contributes to air quality enhancement which supports the health and wellbeing of the wider population over time.	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will improve air quality and promote the health and wellbeing of the wider population.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	The policy has been amended to refer to fully zero emission bus fleet by 2036. Therefore, the scoring has increased to very positive in the long term.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to healthcare services and educational facilities, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	The policy could promote the use of public transport through the transition to publicly owned bus fleets and the potential to control bus fares. This can in turn increase accessibility to various destinations, including open space, recreational activities, and employment locations.	N/A	The policy has neutral effects as there is no reference to open space, recreational activities, or employment locations, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to physical and perceived impacts of the transport network, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to inclusive designs, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	+	D	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	The policy could improve the accessibility and affordability of bus services through the transition to publicly owned bus fleets and the potential to control bus fares over time.	N/A	The policy has positive effects as the transition to publicly owned bus fleet has potential in controlling bus fares, which in turn enhances affordability and accessibility to key destinations for all users.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connection between communities, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	+	i	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	The policy could improve the accessibility and affordability of bus services through the transition to publicly owned bus fleets and the potential to control bus fares over time.	N/A	The policy has positive effects as the transition to publicly owned bus fleet has potential in controlling bus fares, which in turn enhances affordability and accessibility for uses in deprived areas.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to access to information, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to transport safety, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to transport safety, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to transport safety, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	+	+	++	D	T	Regional	Local community, air quality, vulnerable population	N/A	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will reduce air pollution during operation.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Local community, noise level	N/A	N/A	The policy has neutral effects as there is no reference to vibration, however the policy is focused on emission control of the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	O	O	O	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	++	D	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will reduce air pollution to assist in improving health levels.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	++	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	+	D	P	Regional	Local community, air quality, green and blue infrastructure, built environment	The policy contributes to air quality enhancement which improves impact of transport on the local environment over time.	N/A	The policy has positive effects as the transition to zero emission bus fleet and electrification of rail will improve impact of transport on the local environment and could support the creation of more amenable areas.	None identified.	No mitigation identified in 2025.	The policy now references franchising and fully zero emission bus fleet by 2036.	+	+	+	Although the policy has been amended by referencing franchising and fully zero emission bus fleet, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanant	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAS) and where this pollution disproportionately affects vulnerable populations?	+	+	+	D	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has positive effects as there is reference to the improvement of air quality.	Policy could make more explicit reference to areas with low air quality such as AQMAS in relation to air pollutant emissions controls.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	++	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options, which could help to improve air quality in the long term. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to areas with low air quality such as AQMAS in relation to air pollutant emissions controls.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	D	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has positive effects as there is reference to the improvement of air quality.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to traffic levels, congestions, and modal shift.	Y	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	++	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options, which could help to improve air quality in the long term. Therefore, the scoring has increased to very positive.	It is considered that the policy could be further enhanced by including targets set in the World Health Organisation (WHO) Global Air Quality Guidelines.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	The policy contributes to air quality enhancement and noise level reduction which provides better conditions for the creation and enhancement of green and blue infrastructures and habitats over time.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure or habitats, however the policy is focused on reducing harmful impacts of the transport system.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to green and blue infrastructure.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to green and blue infrastructure.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	+	+	+	D	T	Regional	Air quality, habitats, protected species, biological and geological sites	N/A	N/A	The policy has positive effects as there is reference to the reduction of harmful impacts of transport.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation designated habitats and protected species, and important biological and geologiccal sites.	Partially	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	++	The policy has been amended to refer to reducing damage to natural environments, supported by sustainable mode shift and improving access to sustainable transport options, which could help to reduce indirect effects on habitats in the long term. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to protection for designated habitats and protected species, and important biological and geologiccal sites.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	The policy contributes to air quality enhancement and noise level reduction which would support the protection and enhancement of green and blue infrastructure over time.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, habitats, or wildlife corridors and networks, however the policy is focused on reducing harmful impacts of the transport system.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to green and blue infrastructure.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to green and blue infrastructure.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	-	-	-	I	T	Regional	Green and blue infrastructure	The policy would reduce constraints on identifying suitable locations for green and blue infrastructure by reducing the harmful impacts of transport over time.	N/A	The policy has negative effects as there is no reference to green and blue infrastructure connectivity, whereas the policy aims to reduce the harmful impacts of the transport system including air quality and aims to improve the health and wellbeing of local communities.	Policy could make more explicit reference to the promotion of green and blue infrastructure connectivity in relation to reducing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	The policy has been amended to refer to reducing damage to natural environments with no explicit reference to green and blue infrastructure. Therefore, the scoring has changed to 'O'.	Policy could make more explicit reference to the promotion of green and blue infrastructure connectivity in relation to reducing the harmful impacts of transport.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	N/A	N/A	The policy has neutral effects as there is no reference to best practice wildlife-friendly approaches, however the policy is focused on reducing harmful impacts of the transport system.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to biodiversity net gain and nature recovery.	Partially	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to best practice wildlife-friendly approaches in relation to reducing damage to natura environments.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	-	-	-	I	P	Regional	Carbon sinks, transport infrastructure	The policy reduces CO2 emissions which would cease imposing additional pressure on the need for new carbon sinks over time.	N/A	The policy has negative effects as there is no reference to carbon sinks, whereas the policy aims to reduce the harmful impacts of the transport system including air quality and aims to improve the health and wellbeing of local communities	Policy could make more explicit reference to the protection and creation of carbon sinks in relation to reducing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the protection and creation of carbon sinks in relation to reducing the harmful impacts of transport.

2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	The policy could improve accessibility of public transport by reducing constraints for local communities to utilise public transport and reach various destinations over time.	N/A	The policy has neutral effects as there is no reference to accessibility to green and blue infrastructure, however the policy is focused on reducing harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	The policy contributes to air quality enhancement which would support Local Nature Recovery Strategies over time.	N/A	The policy has neutral effects as there is no reference to Local Nature Recovery Strategies or local nature recovery groups, however the policy is focused on reducing harmful impacts of the transport system.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to Local Nature Recovery Strategies and working with local nature recovery groups.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to Local Nature Recovery Strategies and working with local nature recovery groups.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	-	-	-	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has negative effects as there is no reference to promoting sustainable transport use, whereas the policy aims to reduce the harmful impacts of the transport system including air quality and aims to improve the health and wellbeing of local communities.	Policy could make more explicit reference to the promotion of sustainable forms of transport in relation to reducing the harmful impacts of transport.	Y	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing public transport availability, affordability, and accessibility.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	-	-	-	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has negative effects as there is no reference to reduction in private car use, whereas the policy aims to reduce the harmful impacts of the transport system including air quality and aims to improve the health and wellbeing of local communities.	Policy could make more explicit reference to the reduction in private car use in relation to reducing the harmful impacts of transport.	Y	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing measures to prioritise sustainable transport options.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	-	-	-	I	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has negative effects as there is no reference to carbon efficiency, whereas the policy aims to reduce the harmful impacts of the transport system including air quality and aims to improve the health and wellbeing of local communities.	Policy could make more explicit reference to encouraging greater carbon efficiency in relation to reducing the harmful impacts of transport.	Y	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing measures to prioritise sustainable transport options.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	-	-	-	I	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has negative effects as there is no reference to innovative new low and zero carbon transport technologies, whereas the policy aims to reduce the harmful impacts of the transport system including air quality and aims to improve the health and wellbeing of local communities.	Policy could make more explicit reference to encouraging the use of innovative new low and zero carbon transport technologies in relation to reducing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to encouraging the use of innovative new low and zero carbon transport technologies in relation to reducing the harmful impacts of transport.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	-	-	-	I	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has negative effects as there is no reference to low-carbon passenger travel, whereas the policy aims to reduce the harmful impacts of the transport system including air quality and aims to improve the health and wellbeing of local communities.	Policy could make more explicit reference to the promotion of low-carbon passenger travel in relation to reducing the harmful impacts of transport.	Y	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing measures to prioritise sustainable transport options.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	-	-	-	D	T	Wider	Transport network, natural environment	N/A	N/A	The policy has negative effects as there is no reference to climate change impacts and greenhouse gas emissions, whereas the policy aims to reduce harmful impacts of transport.	Policy could make more explicit reference to adaptation and mitigation methods of transport in relation to the climate change.	Y	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to reducing damage to natural environments, sustainable mode shift and improving access to sustainable transport options. Therefore, the scoring has increased to positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	-	-	-	D	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has negative effects as there is no reference to the use of the transport estate for low carbon energy generation, whereas the policy aims to reduce the harmful impacts of the transport system including air quality and aims to improve the health and wellbeing of local communities.	Policy could make more explicit reference to the use of low carbon energy generation in transport estates.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the use of low carbon energy generation in transport estates.

3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	O	O	O	I	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to rural communities, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	-	-	-	D	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has negative effects as there is no reference to low carbon construction materials and techniques, whereas the policy aims to reduce the harmful impacts of the transport system including air quality and aims to improve the health and wellbeing of local communities.	Policy could make more explicit reference to low carbon construction materials and techniques in relation to reducing the harmful impacts of transport in relation to	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to low carbon construction materials and techniques in relation to reducing the harmful impacts of transport in relation to
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	-	-	-	D	T	Wider	Air quality, transport infrastructure	N/A	N/A	The policy has negative effects as there is no reference to reducing emissions from transport infrastructure development and maintenance, whereas the policy aims to reduce the harmful impacts of the transport system including air quality and aims to improve the health and wellbeing of local communities.	Policy could make more explicit reference to methods to minimise emissions of transport in relation to the development and maintenance of transport infrastructure.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to methods to minimise emissions of transport in relation to the development and maintenance of transport infrastructure.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	-	-	-	I	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has negative effects as there is no reference to greenhouse gas emissions, whereas the policy aims to reduce harmful impacts of transport.	Policy could make more explicit reference to reducing greenhouse gas emissions in relation to reducing harmful impacts of transport in West Yorkshire.	Y	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	++	The policy has been amended to refer to reducing damage to natural environments, sustainable mode shift and improving access to sustainable transport options. Therefore, the scoring has increased to positive and very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has neutral effects as there is no reference to climate mitigation and adaptation, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to methods to manage the transport network in relation to extreme weather events.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to methods to manage the transport network in relation to extreme weather events.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to reducing flood risks through green and blue infrastructure, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to green and blue infrastructure.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to green and blue infrastructure.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to floodplains, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to compensatory measures, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Regional	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to uncertainties in climate effects and scheme requirements, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to adaptive management and design of the transport network in relation to uncertainties in climate effects.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to adaptive management and design of the transport network in relation to uncertainties in climate effects.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Regional	Transport network, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to resource efficiency.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to resource efficiency.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to resource efficiency.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastrcture, local communities	N/A	N/A	The policy has neutral effects as there is no reference to waste management practices, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastrcture, local communities, supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to the use of recycled or secondary materials, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	-	-	-	I	P	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has negative effects as there is no reference to modal shift to sustainable transport.	Policy could make more explicit reference to modal shift to sustainable transport in relation to reducing the harmful impacts of transport.	Y	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	++	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options. Therefore, the scoring has increased to positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to the use of local suppliers and locally-produced materials, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	-	-	-	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has negative effects as there is no reference to sustainable road drainage, where as the policy aims to reduce the harmful impacts of transport.	Policy could make more explicit reference to incorporating sustainable road drainage in relation to reducing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to incorporating sustainable road drainage in relation to reducing the harmful impacts of transport.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	-	-	-	I	P	Regional	Road infrastructure	N/A	N/A	The policy has negative effects as there is no reference to surfacing, whereas the policy aims to reduce the harmful impacts of transport.	Policy could make more explicit reference to minimising the use of impermeable hard surfacing in relation to reducing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to minimising the use of impermeable hard surfacing in relation to reducing the harmful impacts of transport.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	-	-	-	I	T	Regional	Green and blue infrastructure, water quality	N/A	N/A	The policy has negative effects as there is no reference to green and blue infrastructure or surface water, whereas the policy aims to reduce the harmful impacts of transport.	Policy could make more explicit reference to the protection and enhancement of green and blue infrastructure in relation to reducing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the protection and enhancement of green and blue infrastructure in relation to reducing the harmful impacts of transport.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Wider	Habitats, water quality	N/A	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to nature-based solutions.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to methods to reduce the harmful impacts of transport in relation to nature-based solutions.

6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to blue infrastructure or flood risks, however the policy is focused on reducing the harmful impacts of the ransport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to drainage systems, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to previously developed land, however the policy is focused on emission control of the transport system.	Policy could make more explicit reference to the use of previously developed land in relation to the future location choice for transport infrastructure.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the use of previously developed land in relation to the future location choice for transport infrastructure.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resources or peatlands, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to agricultural soils, however the policy is focused on reducing harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to land or soil contamination, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to accessibility to histoeci and culturally important sites, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to designated heritage assets, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to the impacts upon designated heritage assets in relation to the management of transport infrastructure.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the impacts upon designated heritage assets in relation to the management of transport infrastructure.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape characters, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to the impact upon landscape and townscape characters in relation to the design, construction, repair, and maintenance of transport infrastructure.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the impact upon landscape and townscape characters in relation to the design, construction, repair, and maintenance of transport infrastructure.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to nationally designated landscapes, however the policy is focused on reducing harmful impacts of the transport system.	Policy could make more explicit reference to the impact upon nationally designated landscapes in relation to managing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the impact upon nationally designated landscapes in relation to managing the harmful impacts of transport.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	+	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, landscape, or townscape, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to the provision of green and blue infrastructure in relation to managing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	+	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the provision of green and blue infrastructure in relation to managing the harmful impacts of transport.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	O	O	O	I	T	Regional	Public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of way, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to locally important buildings and townscape, or local distinctiveness, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	-	-	-	D	T	Regional	Built environment	N/A	N/A	The policy has negative effects as there is no reference to removing unnecessary clutter, whereas the policy aim to reduce the harmful impacts of transport on communities.	Policy could make more explicit reference to the removing unnecessary clutter in relation to managing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the removing unnecessary clutter in relation to managing the harmful impacts of transport.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	-	-	-	D	T	Regional	Road network, transport network	N/A	N/A	The policy has negative effects as there is no reference to disincentives for private car use, whereas the policy aim to reduce the harmful impacts of passengers.	Policy could make more explicit reference to disincentives for private car use in relation to managing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to disincentives for private car use in relation to managing the harmful impacts of transport.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to the accessibility of key services and facilities, employment sites, or open spaces, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options, which could help to improve accessibility to active travel and public transport options. Therefore, the scoring has increased to positive.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has neutral effects as there is no reference to active travel, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to promoting modal shift to more sustainable forms of transport such as active travel in relation to managing the harmful impacts of transport.	Partially	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options, which could include provision for active travel infrastructure. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing improvements to active travel infrastructure in support of sustainable mode shift.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	-	-	-	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	N/A	The policy has negative effects as there is no reference to green and blue infrastructure or active travel routes, whereas the policy aim to reduce the harmful impacts of the transport system on air quality and local communities.	Policy could make more explicit reference to the provision of green and blue infrastructure in relation to managing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	The policy has been amended to refer to reducing damage to natural environments and sustainable mode shift with no explicit reference to green and blue infrastructure. Therefore, the scoring has changed to 'O'.	Policy could make more explicit reference to the provision of green and blue infrastructure in relation to managing the harmful impacts of transport.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	-	-	-	D	P	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has negative effects as there is no reference to modal shift to more sustainable forms of transport, whereas the policy aim to reduce the harmful impacts of the transport system on air quality and local communities.	Policy could make more explicit reference to promoting modal shift to more sustainable forms of transport such as active travel in relation to managing the harmful impacts of transport.	Partially	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing making sustainable modes more convenient, accessible, and affordable.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to charging points and supporting infrastructure, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to charging points and supporting infrastructure in relation to managing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to charging points and supporting infrastructure in relation to managing the harmful impacts of transport.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to land use planning, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to coordinating with land use planning in relation to managing the harmful impacts of transport through introducing new sustainable transport options.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to coordinating with land use planning in relation to managing the harmful impacts of transport through introducing new sustainable transport options.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to employment, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to improving sustainable transport access in relation to managing the harmful impacts of transport.	Y	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options, which could help to improve sustainable access. Therefore, the scoring has increased to positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	O	O	O	I	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to services, facilities, and amenities, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to journey times, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to economic outcomes, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to promoting decarbonisation of transport such as in relation to managing the harmful impacts of transport and optimise potential economic outcomes.	Y	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options, which could help to optimise potential economic outcomes. Therefore, the scoring has increased to positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to increasing investments, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	-	-	-	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has negative effects as there is no reference to sustainable forms of transport, whereas the policy aims to reduce harmful impacts of the transport system on air quality and local communities.	Policy could make more explicit reference to promoting modal shift to more sustainable forms of transport in relation to managing the harmful impacts of transport.	Y	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options, which could help to improve sustainable access to different areas. Therefore, the scoring has increased to positive.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	P	Regional	Air quality, local communities, vulnerable population, air quality, noise level	The policy contributes to air quality enhancement which supports the health and wellbeing of vulnerable groups over time.	N/A	The policy has positive effects as there is reference to a focus on areas that have high impacts on health and wellbeing, which directly promote the health and wellbeing of the vulnerable groups.	Policy could make more explicit reference to methods to protect vulnerable groups in relation to managing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	++	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options, which reduces air pollution and promotes health and wellbeing. Therefore, the scoring has increased to very positive.	Policy could make more explicit reference to methods to protect vulnerable groups in relation to managing the harmful impacts of transport.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	P	Wider	Air quality, noise level, local communities	N/A	N/A	The policy has positive effects as there is reference to a focus on areas that have high impacts on health and wellbeing, which directly promote the health and wellbeing of the wider population.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	++	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options, which reduces air pollution and promotes health and wellbeing. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to healthcare services and educational facilities, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving active travel connectivity and accessibility to key services and locations in support of local health and wellbeing improvements.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	The policy could promote accessibility of local communities to key locations by clearing out impacts and obstacles introduced through transport over time.	N/A	The policy has neutral effects as there is no reference to open space, recreational activities, or employment locations, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving active travel connectivity and accessibility to key services and locations in support of local health and wellbeing improvements.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	+	+	+	D	T	Regional	Local communities, transport network	N/A	N/A	The policy has positive effects as there is reference to reducing severance of transport.	Policy could make more explicit reference to methods that reduce the physical and perceived impact of the transport network.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to methods that reduce the physical and perceived impact of the transport network.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to inclusive designs to sustainable modes of transport, whereas the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to improving sustainable transport access in relation to managing the harmful impacts of transport.	Partially	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing promotion of inclusive design in support of sustainable mode shift.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to affordability transport options, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connection between communities, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to sustainable modes of transport, whereas the policy is aimed to reduce the harmful impacts of the transport system on air quality and local communities.	Policy could make more explicit reference to promoting modal shift to more sustainable forms of transport such as active travel routes and public transport in relation to managing the harmful impacts of transport.	Partially	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	The policy has been amended to refer to sustainable mode shift and improving access to sustainable transport options. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing enhancing access to active travel and public transport provision in the most deprived areas.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to access to information, however the policy is focused on reducing harmful impacts of transport.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to improvements of public realm and natural surveillance, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	D	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to safety and security issues, however the policy is focused on reducing the harmful impacts of the transport system.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	O	O	O	D	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to reducing car risks, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to reducing risks imposed by cars and other vehicles in relation to managing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to reducing risks imposed by cars and other vehicles in relation to managing the harmful impacts of transport.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	D	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to traffic calming measures in relation to managing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to traffic calming measures in relation to managing the harmful impacts of transport.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on reducing the harmful impacts of the transport system.	Policy could make more explicit reference to reducing risks imposed by cars and other vehicles in relation to managing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to reducing risks imposed by cars and other vehicles in relation to managing the harmful impacts of transport.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	+	+	+	D	T	Regional	Local community, air quality, noise level, vulnerable population	N/A	N/A	The policy has positive effects as there is reference to reducing impacts on air quality and noise pollution, with regards to vulnerable groups.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	O	O	O	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	-	-	-	D	P	Regional	Local community, noise level	N/A	N/A	The policy has negative effects as there is no reference to specific practices, equipment, and materials to reduce vibration, whereas the policy aims to reduce the harmful impacts of the transport system on noise pollution.	Policy could make more explicit reference to specific practices, equipment, and materials to reduce vibration in relation to reducing noise pollution.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to specific practices, equipment, and materials to reduce vibration in relation to reducing noise pollution.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	-	-	-	D	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has negative effects as there is no reference to specific practices, equipment, and materials to reduce air pollution, whereas the policy aims to reduce the harmful impacts of the transport system on air pollution.	Policy could make more explicit reference to specific practices, equipment, and materials to reduce air pollution in relation to managing the harmful impacts of transport.	N	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	-	-	-	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to specific practices, equipment, and materials to reduce air pollution in relation to managing the harmful impacts of transport.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	+	D	P	Regional	Local community, air quality, green and blue infrastructure, built environment		N/A	The policy has positive effects as there is reference to reducing the impacts of transport including air pollution, severance, and noise pollution.	None identified.	No mitigation identified in 2025.	The policy now references reducing damage to natural environments, sustainable mode shift, and improving access to sustainable transport options.	+	+	+	Although the policy has been amended by referencing reducing damage to natural environment, sustainable mode shift and improving access to sustainable transport options, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	ZE3																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanant	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	+	I	P	Wider	Air quality, local communities, vulnerable populations	The shift to alternative fuel usage may increase need for existing and new renewable energy generation infrastructure over time. The construction of new fuel infrastructure and disposal of traditional vehicles may pose challenge on the environment and recycling strategies.	N/A	The policy has positive effects as the development of alternative fuels infrastructure would support the minimisation of air pollutant emissions.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	I	T	Regional	Air quality, local communities, transport network, Road network	The shift to alternative fuel usage may increase need for existing and new renewable energy generation infrastructure over time. The construction of new fuel infrastructure and disposal of traditional vehicles may pose challenge on the environment and recycling strategies.	N/A	The policy has positive effects as the development of alternative fuels infrastructure would support the minimisation of air pollutant emissions.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	The shift to alternative fuel usage would improve air quality and support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	O	O	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	The shift to alternative fuel usage would improve air quality and avoid impacts on green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	The shift to alternative fuel usage would improve air quality and support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	The shift to alternative fuel usage would improve air quality and support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	The shift to alternative fuel usage would improve air quality and support the wildlife-friendly approaches in the long term.	N/A	The policy has neutral effects as there is no reference to best practice wildlife-friendly approaches, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	The policy reduces CO2 emissions which would cease imposing additional pressure on the need for new carbon sinks over time.	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	+	+	+	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has positive effects as the development of alternative fuels infrastructure would improve air quality and support local nature recovery.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to enhancing public transport affordability, availability or accessibility, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to reduction in private car use, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, air quality, local communities	N/A	The policy could significantly contribute to improvements in carbon efficiency alongside other policies that promotes a modal shift to public transport.	The policy has positive effects as the development of alternative fuels in heavy vehicles directly encourages greater carbon efficiency in the movement of goods and people.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	+	+	+	D	P	Regional	Transport network, air quality, local communities	N/A	The policy could significantly contribute to improvements in carbon efficiency alongside other policies that promotes a modal shift to public transport.	The policy has positive effects as the development of alternative fuels infrastructure directly encourages use of innovative new low and zero carbon transport technologies.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	I	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as there is reference to decarbonisation of buses, which promotes a wider choice of low-carbon passenger travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	+	I	T	Regional	Transport network, natural environment	N/A	N/A	The policy has positive effects as there is reference to decarbonisation of buses, which encourages the prioritisation of climate change mitigation and adaptation.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	+	+	+	D	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has positive effects as there is reference to decarbonisation of heavy vehicles and development, which directly encourages the low carbon energy generation with transport estates.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	O	O	O	I	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to the needs of rural communities, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to construction techniques, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Wider	Air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to embedded emissions from developments, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	++	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	The shift to alternative fuel usage may increase need for existing and new renewable energy generation infrastructure over time. The construction of new fuel infrastructure and disposal of traditional vehicles may pose challenge on the environment and recycling strategies.	N/A	The policy has positive effects as the development of alternative fuels infrastructure directly supports West Yorkshire's net zero target by 2038.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment, built environment	The shift to alternative fuel usage could contribute to climate mitigation and adaptation in the long term.	N/A	The policy has neutral effects as there is no reference to climate mitigation and adaptation, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	The shift to alternative fuel usage would improve air quality and support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure or flood risks, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to floodplains, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to compensatory measures for floodplain land take, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Wider	natural environment, built environment, local communities, transport network	The shift to alternative fuel usage could contribute to climate mitigation and adaptation in the long term.	N/A	The policy has neutral effects as there is no reference to uncertainties in climate effects, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	+	+	+	D	T	Wider	Transport network, energy infrastructure	The shift to alternative fuel usage may increase need for existing and new renewable energy generation infrastructure over time. The construction of new fuel infrastructure and disposal of traditional vehicles may pose challenge on the environment and recycling strategies.	N/A	The policy has positive effects as the development of alternative fuels infrastructure directly promotes resource efficiency and reduces need for extraction.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	The shift to alternative fuel usage may largely replace existing vehicles and create large wastes and recycling challenges.	N/A	The policy has neutral effects as there is no reference to waste management practices, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	The shift to alternative fuel usage may largely replace existing vehicles and create large wastes and recycling challenges.	N/A	The policy has neutral effects as there is no reference to waste management practices, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	++	D	P	Wider	Transport infrastructure, energy infrastructure	The shift to alternative fuel usage may increase pressure on the need for renewable energy or fuels over time.	N/A	The policy has positive effects as the development of alternative fuels infrastructure directly promotes a modal shift to sustainable transport and reduce fuel consumption.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to local suppliers, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to sustainable road drainage, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to surfacing, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	The shift to alternative fuel usage would improve air quality and support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	The shift to alternative fuel usage would improve air quality and support the development of nature-based solutions.	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	The shift to alternative fuel usage would improve air quality and support the development of blue infrastructure.	N/A	The policy has neutral effects as there is no reference to blue infrastructure, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to drainage systems, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	The shift to alternative fuel usage may increase the need for new renewable energy infrastructure, which will need to be located in appropriate locations.	N/A	The policy has neutral effects as there is no reference to use of land, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resources, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to agricultural soils, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to contaminated land and soils, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscapes, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to designated landscapes, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	The shift to alternative fuel usage would improve air quality and support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	O	O	O	I	T	Regional	Public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of way, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to locally important buildings and townscapes, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	I	T	Regional	Built environment	N/A	N/A	The policy has neutral effects as there is no reference to removing unnecessary clutter, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has neutral effects as there is no reference to active travel infrastructure, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	The shift to alternative fuel usage would improve air quality and support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to active travel infrastructure, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Wider	Transport network, transport infrastructure, local communities	N/A	The policy could significantly contribute to the promotion of sustainable transport alongside other policies that improves the convenience, accessibility, and affordability of public transport.	The policy has positive effects as the development of alternative fuels in buses directly promotes modal shift to more sustainable forms of transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	-	-	-	D	P	Regional	Transport infrastructure, energy infrastructure	The shift to alternative fuel use could impose a strong demand on renewable energy facilities including charging points, which would require significantly more planning and installations of such facilities.	N/A	The policy has negative effects as there is no reference to charging points, whereas the policy aims to promote electrification of heavy vehicles.	Policy could make more explicit reference to charging points and supporting infrastructure in relation to the development of alternative fuels infrastructure.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to charging points and supporting infrastructure in relation to the development of alternative fuels infrastructure.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	The shift to alternative fuel usage may increase the need for new renewable energy infrastructure, which will need to be located in appropriate locations.	N/A	The policy has neutral effects as there is no reference to land use planning, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	+	D	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has positive effects as the development of alternative fuels in buses directly promotes sustainable forms of transport to various locations.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	O	O	O	I	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to journey times, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	+	D	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has positive effects as there is reference to decarbonisation of heavy vehicles, which could encourage the optimisation of potential economic outcomes for West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	+	D	T	Regional	Local economy, transport network, transport infrastructure	The shift to alternative fuel usage could contribute to building an effective and resilient transport network in the long term.	N/A	The policy has positive effects as the development of alternative fuels infrastructure has the potential to attract investments,	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as there is no reference to employment and residential growth areas, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	I	P	Wider	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has positive effects as the decarbonisation of heavy vehicles can reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	I	P	Wider	Air quality, local communities	N/A	N/A	The policy has positive effects as the decarbonisation of heavy vehicles can reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to severance issues, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to inclusive designs, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	O	O	O	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to active travel routes, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	+	+	+	I	T	Wider	Local community, air quality, vulnerable population	N/A	N/A	The policy has positive effects as the development of alternative fuels infrastructure reduces air pollution for all local communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Local community, noise level	N/A	N/A	The policy has neutral effects as there is no reference to vibration, however the policy is focused on alternative fuel usage.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	I	T	Wider	Local community, air quality, transport infrastructure	N/A	N/A	The policy has positive effects as the development of alternative fuels infrastructure reduces air pollution and improve health levels for all local communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	+	I	P	Regional	Local community, air quality, green and blue infrastructure, built environment	The shift to alternative fuel usage could reduce the level of air pollution from the transport system, which could support the creation of more amenable areas in the open air.	N/A	The policy has positive effects as the development of alternative fuels could improve the impact of pollution on the local environment and create more amenable areas for all users.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

Policy Name	ZE4																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	+	I	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has positive effects as the implementation of charging facilities will encourage a modal shift to zero emission vehicals and reduce air pollution emissions.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	?	?	?	I	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has uncertain effects as the implementation of charging facilities will encourage a modal shift to zero emission vehicals and improve air quality, however the policy also supports the use of zero emission cars and does not enable modal shift away from private car use.	Policy could make more explicit statement that private car use will not be encouraged through the introduction of this policy.	N	The policy now references public investment on top of private investment to charging infrastructure.	?	?	?	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit statement that private car use will not be encouraged through the introduction of this policy.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	The implementation of charging infrastructure would encourage alternative fuel usage and improve air quality, which could support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	O	O	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	The implementation of charging infrastructure would encourage alternative fuel usage and improve air quality, which could reduce impacts on habitats and important sites.	N/A	The policy has neutral effects as there is no reference to habitats or important sites, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	The implementation of charging infrastructure would encourage alternative fuel usage and improve air quality, which could support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	The implementation of charging infrastructure would encourage alternative fuel usage and improve air quality, which could support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	The implementation of charging infrastructure would encourage alternative fuel usage and improve air quality, which could support wildlife-friendly approaches.	N/A	The policy has neutral effects as there is no reference to best practice wildlife-friendly approaches, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	The policy reduces CO2 emissions which would cease imposing additional pressure on the need for new carbon sinks over time.	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	+	+	+	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has positive effects as the implementation of charging infrastructure would improve air quality and support local nature recovery.	Policy could make more explicit reference to local nature recovery groups in relation to working with industry.	N	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as the development of alternative fuels infrastructure would improve air quality and support local nature recovery.	Policy could make more explicit reference to the promotion of sustainable forms of public transport in relation to charging infrastructure planning and implementation.	N	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the promotion of sustainable forms of public transport in relation to charging infrastructure planning and implementation.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	-	-	-	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has negative effects as the policy encourages transition to zero emission cars, with no reference to reduction in private car use.	Policy could make more explicit statement that private car use will not be encouraged through the introduction of this policy.	N	The policy now references public investment on top of private investment to charging infrastructure.	-	-	-	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit statement that private car use will not be encouraged through the introduction of this policy.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as the implementation of charging facilities directly encourages greater carbon efficiency in transport movements.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	+	+	+	D	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as the implementation of charging facilities directly encourages the use of innovative new low and zero carbon transport technologies.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	I	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as the implementation of charging facilities directly promotes a wider choice of low carbon passenger travel.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	+	I	T	Regional	Transport network, natural environment	N/A	N/A	The policy has positive effects as the implementation of charging facilities encourages the prioritisation of climate mitigation and adaptation.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	+	+	+	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has positive effects as the implementation of charging facilities encourages low carbon energy generation in transport estates.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	O	O	O	I	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to the specific needs of rural communities, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	+	+	++	D	T	Regional	Transport infrastructure, energy infrastructure	The shift to zero emission cars may significantly increase demand for electricity and pose challenge to renewable energy generation infrastructure.	N/A	The policy has positive effects as the implementation of charging facilities directly promotes the use of low carbon techniques.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	++	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	+	+	++	D	T	Regional	Air quality, transport infrastructure	The shift to zero emission cars may significantly increase demand for electricity and pose challenge to renewable energy generation infrastructure.	N/A	The policy has positive effects as the implementation of charging facilities directly reduces emissions from the development of new transport infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	++	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	The shift to zero emission vehicles may significantly increase demand for electricity and pose challenge to renewable energy generation infrastructure.	N/A	The policy has positive effects as the implementation of charging facilities directly support West Yorkshire's net zero target by 2038.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment, built environment	The shift to zero emission vehicles could contribute to climate mitigation and adaptation in the long term.	N/A	The policy has neutral effects as there is no reference to climate mitigation and adaptation, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	The shift to zero emission vehicles would improve air quality and support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure or flood risks, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to floodplains, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to compensatory measures for floodplain land take, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Wider	natural environment, built environment, local communities, transport network	The shift to zero emission vehicles could contribute to climate mitigation and adaptation in the long term.	N/A	The policy has neutral effects as there is no reference to uncertainties in climatic effects, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Wider	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	+	+	+	D	T	Wider	Transport network, energy infrastructure	The shift to zero emission vehicles may significantly increase demand for electricity and pose challenge to renewable energy generation infrastructure.	N/A	The policy has positive effects as the implementag directly promotes resource efficiency and reduces need for extraction.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastrcture, local communities	The shift to zero emission vehicles may largely replace existing vehicles and create large wastes and recycling challenges.	N/A	The policy has neutral effects as there is no reference to waste management practices, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastrcture, local communities, supply chain, construction industry	The shift to zero emission vehicles may largely replace existing vehicles and create large wastes and recycling challenges.	N/A	The policy has neutral effects as there is no reference to waste management practices, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Regional	Transport infrastructure, energy infrastructure	The shift to zero emission vehicles may increase pressure on the need for renewable energy or fuels over time.	N/A	The policy has positive effects as the implementation of charging facilities directly promotes a modal shift to sustainable fuel consumption.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to road drainage, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to road surfacing, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	The shift to zero emission vehicles would improve air quality and support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	The shift to zero emission vehicles would improve air quality and support the development of nature-based solutions.	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	The shift to zero emission vehicles would improve air quality and support the development of blue infrastructure.	N/A	The policy has neutral effects as there is no reference to blue infrastructure, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to drainage systems, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	The shift to zero emission vehicles may increase the need for new renewable energy infrastructure, which will need to be located in appropriate locations.	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resources, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to agricultural soils, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to contaminated land, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to designated heritage assets, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscapes, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscapes, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	The shift to zero emission vehicles would improve air quality and support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to landscape or townscapes, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	O	O	O	I	T	Regional	Public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of way, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to buildings or townscapes, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	I	T	Regional	Built environment	N/A	N/A	The policy has neutral effects as there is no reference to streetscapes, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	N/A	N/A	The policy has neutral effects as there is no reference to disincentives for private car use, however the policy is focused on charging infrastructure.	Policy could make more explicit statement that private car use will not be encouraged through the introduction of this policy.	N	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit statement that private car use will not be encouraged through the introduction of this policy.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has neutral effects as there is no reference to active travel, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	The shift to zero emission vehicles would improve air quality and support the development of green and blue infrastructure.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Wider	Transport network, transport infrastructure, local communities	N/A	The policy could significantly contribute to the promotion of sustainable transport alongside other policies that improves the convenience, accessibility, and affordability of public transport.	The policy has positive effects as the implementation of charging facilities directly promotes modal shift to more sustainable forms of transport.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	+	++	++	D	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has positive effects as there is reference to provision of charging points.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	++	++	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	-	-	-	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	The shift to zero emission vehicles may increase the need for new renewable energy infrastructure, which will need to be located in appropriate locations.	N/A	The policy has negative effects as there is no reference to coordination with land use planning, whereas the policy aims for regional coverage of charging infrastructure.	Policy could make more explicit reference to coordination with land use planning in relation to locating the charging infrastrcture.	N	The policy now references public investment on top of private investment to charging infrastructure.	-	-	-	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to coordination with land use planning in relation to locating the charging infrastrcture.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	+	D	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has positive effects as the implementation of charging facilities directly promotes sustianable forms of transport to various locations.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	O	O	O	I	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to journey times, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	+	D	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has positive effects as the implementation of charging facilities will support decarbonisation, which could encourage the optimisation of potential economic outcomes for West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	++	++	D	T	Regional	Local economy, transport network, transport infrastructure	The shift to zero emission vehicles could contribute to buidling an effective and resilient transport network in the long term.	N/A	The policy has positive effects as there is reference to supporting private investment charging infrastrcture.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	++	++	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	+	+	+	D	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has positive effects as the implementation of charging facilities directly promotes sustianable forms of transport to various locations.	Policy could make more explicit reference to coordination with land use planning in relation to locating the charging infrastrcture.	N	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to coordination with land use planning in relation to locating the charging infrastrcture.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	I	P	Wider	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has positive effects as the implementation of charging facilities promotes decarbonisation, which can reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	I	P	Wider	Air quality, local communities	N/A	N/A	The policy has positive effects as the implementation of charging facilities promotes decarbonisation, which can reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to severance issues, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	+	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has positive effects as there is reference to inclusive designs in infrastructure.	Policy could make more explicit reference to specific designs in relation to inclusive infrastructure implementation.	N	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to specific designs in relation to inclusive infrastructure implementation.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to affordability, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	O	O	O	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to active travel routes, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to access to information, however the policy is focused on charging infrastructure.	Policy could make more explicit reference to improving access to information in relation to implementing charging infrastructure.	N	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving access to information in relation to implementing charging infrastructure.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy is focused on charging infrastructure..	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	+	+	+	I	T	Wider	Local community, air quality, vulnerable population	N/A	N/A	The policy has positive effects as the implementation of charging facilities reduces air pollution for all local communities.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Local community, noise level	N/A	N/A	The policy has neutral effects as there is no reference to vibration, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	I	T	Wider	Local community, air quality, transport infrastructure	N/A	N/A	The policy has positive effects as the implementation of charging facilities reduces air pollution and improve health levels for all local communities.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	+	+	+	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	O	O	O	I	P	Regional	Local community, air quality, green and blue infrastructure, built environment	The shift to zero emission vehicles could reduce the level of air pollution from the transport system, which could support the creation of more amenable areas in the open air.	N/A	The policy has neutral effects as there is no reference to amenable areas, however the policy is focused on charging infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references public investment on top of private investment to charging infrastructure.	O	O	O	Although the policy has been amended by referencing public investment, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

A.4 Assessment of Infrastructure Intervention Types

Infrastructure Type	A. Infrastructure improvements (physical interventions)							
Ref	Objective	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	+	+	++	D	P	The infrastructure type has positive effects as the improvement of physical transport infrastructure will encourage sustainable transport use / discourage less sustainable modes and therefore, will enhance air quality over time.	None identified
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to biodiversity or geodiversity, however the infrastructure type is focused on delivering high quality healthy places.	Infrastructure type could make more explicit reference to enhancing biodiversity through integration of green and blue infrastructure into transport improvements.
3	Reduce greenhouse gas emissions from transport	+	++	++	D	P	The infrastructure type has positive effects as it makes direct reference to the decarbonisation of the public transport system and heavy vehicles.	None identified
4	Increase resilience of the transport network to climate change and associated extreme weather events	-	-	-	D	P	The infrastructure type has negative effects as there is no reference to climate change or resilience, however the infrastructure type is focused on physical improvements and could result in negative climate impacts.	Infrastructure type could make explicit reference to climate change mitigation and adaptation measures to ensure resilience of the physical improvements.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to use of resources, however the infrastructure type is focused on delivering high quality healthy places.	Infrastructure type could make more explicit reference to sustainable and circular waste practices to implement during physical improvements to the transport network.
6	Protect and enhance the water environment	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to the water environment, however the infrastructure type is focused on delivering high quality healthy places.	Infrastructure type could make more explicit reference to enhancing the water environment through integration of green and blue infrastructure into transport improvements.
7	Conserve soil resources and quality and seek to remediate contaminated land	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to contaminated land, however the infrastructure type is focused on delivering high quality healthy places.	Infrastructure type could make more explicit reference to conserving soil resources through land remediation during transport improvements.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to heritage assets, however the infrastructure type is focused on delivering high quality healthy places.	None identified
9	Protect and enhance the character and quality of landscape and townscape	+	+	++	D	P	The infrastructure type has positive effects as it makes direct reference to improvements to village, town and city centres.	None identified
10	Promote sustainable modes of transport, including public transport and active travel	+	++	++	D	P	The infrastructure type has positive effects as it makes direct reference to the improvements to public transport and active travel provision.	None identified

11	Enhance economic prosperity and access to opportunities	+	+	++	D	P	The infrastructure type has positive effects as it focuses on improvements to public transport, interchanges and hubs which will increase access to opportunities.	None identified
12	Improve health and wellbeing for all citizens and reduce inequalities in health	+	+	+	I	P	The infrastructure type has positive effects as it focuses on improvements to public transport, interchanges and hubs which will enhance connectivity and increase access to health services and other opportunities.	None identified
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	+	+	+	I	P	The infrastructure type has positive effects as it focuses on improvements to public transport, interchanges and hubs which will enhance access to opportunities.	Infrastructure type could make more explicit reference to equitable improvements of the physical transport infrastructure.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to safety or crime, however it does focus on physical improvements of the network.	None identified
15	Reduce environmental impacts of transport including air, noise and light pollution	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to pollution, however the infrastructure type is focused on delivering high quality healthy places which are not dominated by non-local through traffic.	Infrastructure type could make more explicit reference to reducing pollution impacts of transport through integration of green and blue infrastructure and other measures into transport improvements.

Infrastructure Type	B. Policy and regulation measures							
Ref	Objective	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	+	+	+	I	P	The infrastructure type has positive effects as transit-oriented policy and regulation measures will generally encourage sustainable transport use / discourage less sustainable modes and therefore, will enhance air quality.	None identified
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to biodiversity or geodiversity, however the infrastructure type is focused on aligning development with transport infrastructure.	Infrastructure type could make more explicit reference to enhancing biodiversity through integration of green and blue infrastructure into transport infrastructure and land use planning.
3	Reduce greenhouse gas emissions from transport	+	+	+	I	P	The infrastructure type has positive effects as transit-oriented policy and regulation measures will generally encourage sustainable transport use / discourage less sustainable modes and therefore, reduce emissions.	None identified
4	Increase resilience of the transport network to climate change and associated extreme weather events	-	-	-	I	P	The infrastructure type has negative effects as there is no reference to climate change or resilience, however the infrastructure type is focused a transit-oriented approach to development and could result in negative climate impacts.	Infrastructure type could make explicit reference to climate change mitigation and adaptation to ensure resilience as a result of policy and regulation measures.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to use of resources, however the infrastructure type is focused on a place-based approach.	Infrastructure type could make more explicit reference to sustainable and circular waste practices to embed throughout the transport network.
6	Protect and enhance the water environment	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to the water environment, however the infrastructure type is focused on aligning development with transport infrastructure.	Infrastructure type could make more explicit reference to enhancing the water environment through integration of green and blue infrastructure into transport infrastructure.
7	Conserve soil resources and quality and seek to remediate contaminated land	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to contaminated land, however the infrastructure type is focused on aligning development with transport infrastructure.	Infrastructure type could make more explicit reference to conserving soil resources into transport infrastructure policy and regulation measures.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to heritage assets, however the infrastructure type is focused on land use planning.	None identified
9	Protect and enhance the character and quality of landscape and townscape	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to landscape and townscape, however the infrastructure type is focused on land use planning.	None identified
10	Promote sustainable modes of transport, including public transport and active travel	+	+	++	D	P	The infrastructure type has positive effects as it makes direct reference to aligning development with transport infrastructure.	None identified

11	Enhance economic prosperity and access to opportunities	+	+	+	D	P	The infrastructure type has positive effects as it makes direct reference to aligning development with transport infrastructure, which will increase access to opportunities.	None identified
12	Improve health and wellbeing for all citizens and reduce inequalities in health	+	+	+	I	P	The infrastructure type has positive effects as it is focused on land use planning and promoting active travel, which will integrate development with transport infrastructure and promote walking, cycling, etc.	None identified
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	+	+	+	I	P	The infrastructure type has positive effects as it is focused on equitable parking, land use planning and promoting active travel, which will integrate development with transport infrastructure and promote walking, cycling, etc.	Infrastructure type could make more explicit reference to promoting opportunities through equitable integration of transport infrastructure with existing and proposed development.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to safety or crime, however it does focus on a fair and equitable approach to car parking.	None identified
15	Reduce environmental impacts of transport including air, noise and light pollution	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to environmental impacts, however it does focus on a fair and equitable approach to car parking and land use planning.	None identified

Infrastructure Type	C. Maintenance and asset management; network management and operations							
Ref	Objective	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	?	?	?	D	P	The infrastructure type has uncertain effects as improvement to the management of the highways network could encourage private car use and worsen air quality. However, public transport asset management could improve air quality through encouraging sustainable transport use.	Infrastructure type could make more explicit reference to improving air quality through the sustainable management of highways and public transport. Could also reference integration of green and blue infrastructure into assets.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	0	0	0	I	P	The infrastructure type has neutral effects as there is no reference to biodiversity or geodiversity, however the infrastructure type is focused on highways and public transport asset management.	Infrastructure type could make more explicit reference to enhancing biodiversity through integration of green and blue infrastructure into maintenance improvements.
3	Reduce greenhouse gas emissions from transport	+	+	+	I	P	The infrastructure type has positive effects as improved traffic management and supporting bus reform will contribute to reducing emissions.	None identified
4	Increase resilience of the transport network to climate change and associated extreme weather events	-	-	-	I	P	The infrastructure type has negative effects as there is no reference to climate change resilience, whereas the infrastructure type focuses on asset management and maintenance improvements.	Infrastructure type could make more explicit reference to adaptation measures and plans for extreme weather events in relation to the management of the transport network.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to use of resources, however the infrastructure type is focused on highways and public transport asset management.	Infrastructure type could make more explicit reference to sustainable and circular waste practices to embed throughout the transport network.
6	Protect and enhance the water environment	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to the water environment, however the infrastructure type is focused on highways and public transport asset management.	None identified
7	Conserve soil resources and quality and seek to remediate contaminated land	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to the soil or contaminated land, however the infrastructure type is focused on highways and public transport asset management.	Infrastructure type could make more explicit reference to conserving soil resources to embed throughout network asset management.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to heritage assets, however the infrastructure type is focused on highways and public transport asset management.	None identified
9	Protect and enhance the character and quality of landscape and townscape	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to landscape and townscape, however the infrastructure type is focused on highways and public transport asset management.	None identified
10	Promote sustainable modes of transport, including public transport and active travel	+	+	+	D	P	The infrastructure type has positive effects as it is focused on delivering a consistent transport offer across the network, including supporting bus reform, which will promote sustainable modes of transport.	Infrastructure type could make more explicit reference to enhancing active travel assets.

11	Enhance economic prosperity and access to opportunities	o	o	o	I	P	The infrastructure type has neutral effects as it is focused on highways and public transport asset management and does not focus on economic prosperity or access to opportunities.	None identified
12	Improve health and wellbeing for all citizens and reduce inequalities in health	o	o	o	I	P	The infrastructure type has neutral effects as it is focused on highways and public transport asset management and does not focus on improving health and wellbeing for the public.	None identified
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	+	+	+	D	P	The infrastructure type has positive effects as it is focused on delivering a consistent transport offer across the network, which will promote greater equality of opportunity.	None identified
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to safety or crime, however it does focus on highways and public transport asset management.	Infrastructure type could make more explicit reference to enhancing active travel assets and the promotion of community safety as part of network operations.
15	Reduce environmental impacts of transport including air, noise and light pollution	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to environmental impacts, however it does focus on highways and public transport asset management.	None identified

Infrastructure Type	D. Transport service improvements and passenger offer							
Ref	Objective	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	+	++	++	D	P	The infrastructure type has positive effects as there is direct reference to measures to address noise, severance and air quality impacts on local communities.	None identified
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to biodiversity or geodiversity, however the infrastructure type is focused on measures to address noise, severance and air quality impacts on local communities.	Infrastructure type could make more explicit reference to enhancing biodiversity through integration of green and blue infrastructure into its mitigation of environmental impacts.
3	Reduce greenhouse gas emissions from transport	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to emissions, however the infrastructure type is focused on transport service improvements and passenger offer.	None identified
4	Increase resilience of the transport network to climate change and associated extreme weather events	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to climate change, however the infrastructure type is focused on transport service improvements and passenger offer.	None identified

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to use of resources, however the infrastructure type is focused on transport service improvements and passenger offer.	None identified
6	Protect and enhance the water environment	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to the water environment, however the infrastructure type is focused on measures to address noise, severance and air quality impacts on local communities.	Infrastructure type could make more explicit reference to enhancing water environment through integration of green and blue infrastructure into its mitigation of environmental impacts.
7	Conserve soil resources and quality and seek to remediate contaminated land	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to the soil or contaminated land, however the infrastructure type is focused on measures to address noise, severance and air quality impacts on local communities.	None identified
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to heritage assets, however the infrastructure type is focused on transport service improvements and passenger offer.	None identified
9	Protect and enhance the character and quality of landscape and townscape	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to landscape and townscape, however the infrastructure type is focused on transport service improvements and passenger offer.	None identified
10	Promote sustainable modes of transport, including public transport and active travel	+	+	++	D	P	The infrastructure type has positive effects as it is focused on strengthening bus services, affordable fares, and improvements to transports services to address isolation, all of which will promote sustainable modes of transport.	None identified

11	Enhance economic prosperity and access to opportunities	+	+	+	D	P	The infrastructure type has positive effects as it is focused on strengthening bus services, affordable fares, and improvements to transports services to address isolation, all of which will enhance access to opportunities.	None identified
12	Improve health and wellbeing for all citizens and reduce inequalities in health	+	+	+	I	P	The infrastructure type has positive effects as it is focused on strengthening bus services, affordable fares, and improvements to transports services to address isolation, all of which will indirectly reduce health inequalities by increasing access to opportunities and reducing isolation.	None identified
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	+	+	++	D	P	The infrastructure type has positive effects as it is focused on strengthening bus services, affordable fares, improvements to transports services to address isolation, and ensuring the network meets the needs of children, all of which will enhance access to opportunities.	None identified
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to safety or crime, however it does focus on improvements to transport services to address urban and rural isolation.	None identified
15	Reduce environmental impacts of transport including air, noise and light pollution	+	++	++	D	P	The infrastructure type has positive effects as there is direct reference to measures to address noise, severance and air quality impacts on local communities.	Infrastructure type could make more explicit reference to measures to address light pollution from transport infrastructure.

Infrastructure Type	E. Behaviour change, engagement, education and consultation							
Ref	Objective	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	+	+	++	I	P	The infrastructure type has positive effects as behaviour change and engagement initiatives will increase sustainable transport use and enhance air quality over time.	None identified
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to biodiversity or geodiversity, however the infrastructure type is focused on behaviour change programmes and community consultation.	None identified
3	Reduce greenhouse gas emissions from transport	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to emissions, however the infrastructure type is focused on behaviour change programmes to enable more use of sustainable travel.	None identified
4	Increase resilience of the transport network to climate change and associated extreme weather events	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to climate change, however the infrastructure type is focused on behaviour change programmes to enable more use of sustainable travel.	Infrastructure type could make more explicit reference to climate change impacts as part of its focus on behaviour change.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to use of resources, however the infrastructure type is focused on behaviour change programmes to enable more use of sustainable travel.	None identified
6	Protect and enhance the water environment	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to the water environment, however the infrastructure type is focused on behaviour change programmes to enable more use of sustainable travel.	None identified
7	Conserve soil resources and quality and seek to remediate contaminated land	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to soil resources or contaminated land, however the infrastructure type is focused on behaviour change programmes and community consultation.	None identified
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to heritage assets, however the infrastructure type is focused on behaviour change programmes and community consultation.	None identified
9	Protect and enhance the character and quality of landscape and townscape	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to landscape or townscape, however the infrastructure type is focused on behaviour change programmes and community consultation.	None identified
10	Promote sustainable modes of transport, including public transport and active travel	+	++	++	D	P	The infrastructure type has positive effects as behaviour change and engagement initiatives seek to encourage and enable more sustainable transport use over time.	None identified

11	Enhance economic prosperity and access to opportunities	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to economic prosperity or access to opportunities, however the infrastructure type is focused on behaviour change programmes and community consultation.	None identified
12	Improve health and wellbeing for all citizens and reduce inequalities in health	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to health and wellbeing, however the infrastructure type is focused on behaviour change programmes and community consultation.	None identified
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	+	+	+	D	P	The infrastructure type has positive effects as there is reference to behaviour change programmes and community consultation, which will enable an inclusive approach to engagement.	None identified
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	+	+	+	D	P	The infrastructure type has positive effects as there is reference to improving road safety and drive behaviour.	None identified
15	Reduce environmental impacts of transport including air, noise and light pollution	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to environmental impacts of transport, however the infrastructure type is focused on behaviour change programmes and community consultation.	None identified

Infrastructure Type	F. Data, technology and innovation							
Ref	Objective	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to air quality, however the infrastructure type is focused on enhancements to data and information.	None identified
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to biodiversity or geodiversity, however the infrastructure type is focused on enhancements to data and information.	None identified
3	Reduce greenhouse gas emissions from transport	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to emissions, however the infrastructure type is focused on enhancements to data and information.	Infrastructure type could make more explicit reference to reducing transport emissions as part of its focus on access to travel information.
4	Increase resilience of the transport network to climate change and associated extreme weather events	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to climate change, however the infrastructure type is focused on enhancements to data and information.	None identified

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to use of resources, however the infrastructure type is focused on enhancements to data and information.	None identified
6	Protect and enhance the water environment	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to the water environment, however the infrastructure type is focused on enhancements to data and information.	None identified
7	Conserve soil resources and quality and seek to remediate contaminated land	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to soil resources or contaminated land, however the infrastructure type is focused on enhancements to data and information.	None identified
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to heritage assets, however the infrastructure type is focused on enhancements to data and information.	None identified
9	Protect and enhance the character and quality of landscape and townscape	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to landscape or townscape, however the infrastructure type is focused on enhancements to data and information.	None identified
10	Promote sustainable modes of transport, including public transport and active travel	+	+	+	D	P	The infrastructure type has positive effects as data and information initiatives seek to provide travel information regarding buses, which will encourage use of sustainable transport.	None identified

11	Enhance economic prosperity and access to opportunities	+	+	+	I	P	The infrastructure type has positive effects as data and information initiatives seek to provide travel information regarding buses, which will encourage use of sustainable transport and increase access to opportunities.	None identified
12	Improve health and wellbeing for all citizens and reduce inequalities in health	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to health and wellbeing, however the infrastructure type is focused on data and information initiatives.	None identified
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	+	+	+	I	P	The infrastructure type has positive effects as data and information initiatives seek to provide travel information regarding buses, which will encourage use of sustainable transport and increase access to opportunities.	None identified
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to safety, however the infrastructure type is focused on data and information initiatives.	Infrastructure type could make more explicit reference to improving safety and reducing crime as part of its focus on access to travel information.
15	Reduce environmental impacts of transport including air, noise and light pollution	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to environmental impacts of transport, however the infrastructure type is focused on data and information initiatives.	Infrastructure type could make more explicit reference to reducing environmental impacts of transport as part of its focus on access to travel information.

Infrastructure Type	G. Cross-cutting and enabling interventions; capacity and capability improvements							
Ref	Objective	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	+	+	++	I	P	The infrastructure type has positive effects as it references embedding principles to support a climate-resilient and nature-rich transport network and region, which will enhance air quality over time.	None identified
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	+	++	++	D	P	The infrastructure type has positive effects as it references embedding principles to support a climate-resilient and nature-rich transport network and region, which will enhance biodiversity and geodiversity over time.	None identified
3	Reduce greenhouse gas emissions from transport	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to emissions, however the infrastructure type is focused on growing the market for sustainable travel.	None identified
4	Increase resilience of the transport network to climate change and associated extreme weather events	+	++	++	D	P	The infrastructure type has positive effects as it references embedding principles to support a climate-resilient and nature-rich transport network and region, which will increase resilience to climate change over time.	None identified

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to use of resources, however the infrastructure type is focused on embedding principles to support a climate-resilient and nature-rich network and region.	Infrastructure type could make more explicit reference to sustainable and circular waste practices as part of its focus on climate and nature.
6	Protect and enhance the water environment	+	+	+	I	P	The infrastructure type has positive effects as it references embedding principles to support a climate-resilient and nature-rich transport network and region, however it doesn't directly reference the water environment.	Infrastructure type could make more explicit reference to enhancing the water environment as part of its focus on climate and nature.
7	Conserve soil resources and quality and seek to remediate contaminated land	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to soil resources or contaminated land, however the infrastructure type is focused on embedding principles to support a climate-resilient and nature-rich network and region.	Infrastructure type could make more explicit reference to conserving soil resources and remediating contaminated land as part of its focus on climate and nature.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to heritage assets, however the infrastructure type is focused on embedding principles to support a climate-resilient and nature-rich network and region.	None identified
9	Protect and enhance the character and quality of landscape and townscape	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to landscape or townscape, however the infrastructure type is focused on embedding principles to support a climate-resilient and nature-rich network and region.	None identified
10	Promote sustainable modes of transport, including public transport and active travel	+	+	+	D	P	The infrastructure type has positive effects as it focuses on growing the market for sustainable travel, which will encourage use of sustainable transport.	None identified

11	Enhance economic prosperity and access to opportunities	+	+	++	D	P	The infrastructure type has positive effects it prioritises investment in education and training to create a diverse, skilled workforce.	None identified
12	Improve health and wellbeing for all citizens and reduce inequalities in health	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to health and wellbeing, however the infrastructure type is focused on education, training and skills development.	None identified
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	+	++	++	D	P	The infrastructure type has positive effects it prioritises investment in education and training to create a diverse, skilled workforce. It also seeks to continue and improve partnership working and investing in partners' capacity and capability.	None identified
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to safety, however the infrastructure type is focused on cross-cutting and enabling interventions.	Infrastructure type could make more explicit reference to improving safety and reducing crime as part of its focus partnership working, training, and skills development.
15	Reduce environmental impacts of transport including air, noise and light pollution	o	o	o	I	P	The infrastructure type has neutral effects as there is no reference to environmental impacts of transport, however the infrastructure type is focused on cross-cutting and enabling interventions.	None identified

A.5 Amendments to the Main Report Following the Consultation

Consultation comments and amendments

Consultation on the ISA at the Regulation 18 stage is a key requirement under the Environmental Assessment of Plans and Programmes Regulations 2004 (SEA Regulations). These regulations require that statutory environmental bodies, alongside the public and other stakeholders, are given the opportunity to comment on the likely significant effects of the plan and reasonable alternatives identified through the ISA. This helps to ensure environmental, social, and economic considerations are fully integrated into the plan-making process from an early stage.

The ISA was subject to consultation during the 12-week Regulation 18 consultation on the draft LTP, which took place between 29th July and 21st October 2025. The ISA Main Report (i.e. this report) has been updated subsequently to reflect relevant feedback received. A summary of ISA-related consultation responses and associated actions has been included in the table below.

Key:

Underlined text – new text added

Strikethrough text – text removed

Table 5 Consultee Comments and Actions

Consultee	Consultee Comments	Action
Historic England	In terms of our area of interest, we would broadly endorse the evaluation of the likely impact which the policies and proposals of the Local Transport Plan might have upon the historic environment. However, given the strategic nature of the plan we would like to highlight that the broadly neutral appraisal of policies and proposals is not necessarily a reflection of the potential environmental effects of individual transport projects that could be brought forward under LTP policies. For example, Infrastructure intervention type A: Infrastructure improvements relating to LTP policies I1, I10, I11, I12 and I14 could, depending on the details of the project, design, location, implementation and operation, result in negative effects upon the historic environment under ISA Objective 8 which may or may not be capable of mitigation.	Comment noted. The ISA of infrastructure intervention types considered detail provided by WYCA at the time of writing. Project design and other details of specific transport interventions have yet to be developed by WYCA.
Transport for the North (TfN)	TfN will be able to provide data, analysis and support in relation to the suggested enhancements and mitigation for a number of the ISA objectives, including: ISA Objective 4 (resilience to climate change and extreme weather events): TfN is able to currently provide climate vulnerability data in relation to a number of climate hazards, including flood risk, for strategic transport networks across the North (i.e. the SRN and heavy rail network). By April 2026, this will have been extended to local road networks, with this data available for our constituent authorities to use when carrying out climate change risk assessments and prioritising maintenance and management spend.	Comment noted. Data on climate change and extreme weather events is contained in the ISA scoping report under Section 5.2, which informed the development of the ISA objectives, and thereby the assessment.
	ISA Objective 10 (promoting sustainable modes of transport) and ISA Objective 12 (improving health and wellbeing): TfN's Community Severance tool can help constituent authorities identify existing areas of poor active travel connectivity to key services, including healthcare facilities.	Comment noted. Data on sustainable modes of transport and health and wellbeing is contained in the ISA scoping report under Section 5.4, which informed the development of the ISA objectives, and thereby the assessment.

	ISA Objective 14 (improving transport safety and fear of crime): TfN's recent published research into perceptions of safety on public transport, provides useful evidence for constituent authorities looking to develop measures to improve both real and perceived safety on public transport, particularly buses.	Comment noted. Data on transport safety and crime is contained in the ISA scoping report under Section 5.4, which informed the development of the ISA objectives, and thereby the assessment. No action required.
White Rose Forest	Policy RR9 Asset management and resilience Recognising the strategic and economic importance of our assets in the region, we will take a proactive and coherent regional approach to asset management across our Weaver Network to ensure reliability and resilience including the utilisation of climate adaptation measures, delivering a consistency of offer across our leading transport network. Highlighting the role of climate adaptation measures is consistent with the comment made under Objective 4 of the ISA Framework which states, "Policies RR2 and RR6 to RR8 also fell short as more considerations could be given to adaptation measures for infrastructure in response to extreme weather events. Additionally, Policy RR9 was considered particularly weak, as it makes no reference to climate change adaptation despite its aim of improving the resilience of transport assets."	Comment noted.
	Policy A5 – Extending our active travel network WRF support the ambition to extend active travel routes in association with the Weaver Network. This will deliver opportunities for enhancing the environmental quality of the network, improving the experience and enjoyment for the user as well as offering opportunities for habitat connectivity in line with the LNRS. In this respect, the policy does not go far enough in overtly stating this ambition. Additional wording proposed:	This is a matter for the LTP to consider.

	We will deliver high quality walking, wheeling and cycling routes...integrating with public transport infrastructure, and within a framework of street trees and blue green infrastructure to maximise the opportunities for biodiversity and user enjoyment. The ISA Framework Objective 2 comments on the opportunity to enhance Policies A1, A2 and A5 in relation to their impact on protecting and enhancing biodiversity, geodiversity and the green and blue infrastructure network by stating, “It is recommended that these policies include considerations for enhancing green and blue infrastructure and avoid impacts on habitats to help creating more enjoyable and accessible active travel experiences.”	
	Policy A3 – Encouraging walking, cycling and wheeling Achieving behaviour change requires more than training, marketing campaigns and events alone. It is far more likely if the option to walk, cycle or wheel is closer to nature, and alongside street trees, especially where trees provide separation from busy traffic. Greening our streets is vital to encourage active travel by improving safety, amenity, biodiversity and shade/shelter from urban heat island effects, noise and airborne pollutants. This policy should be amended to reflect this: We will encourage and support people to walk, wheel and cycle for short and medium-distance journeys through a range of interventions including training, marketing campaigns and events. We will favour high amenity routes with street trees and placemaking elements to offer a positive experience for users. The ISA Framework Objective 1 is in close alignment with this approach stating “Policy A3 could benefit from incorporating synergies with green	This is a comment for the LTP to consider.

	and blue infrastructure alongside active travel routes to provide more attractive and connected active travel routes”.	
Q12: If you have any comments on the Integrated Sustainability Assessment, please tell us here		
Individuals	It is not sustainable! Merely a fantasy. Much like Network 2 !! It will just be words !!	Comment noted.
	Stop it non Of it makes sense It is now known that the Mayor likes to spend money on her silly ideas when it could be spent on actually repairing the roads we have. Who will use new tram system in Leeds and Bradford. not people living in Halifax, Huddersfield, Wakefield, But they will be paying for it in the long run through west Yorkshire CA .	Comment noted.
	What isn't factored in is the sustained maintenance and upkeep of schemes brought forward. ICC and other do not have the resources to maintain the current network nor the poorly designed additions. We are creating tomorrow's maintenance problems and endangering people by sticking to poor policy based designs. E.g city square where level changes result In countless injuries to pedestrians. A huge amount of infrastructure is also punitive to disabled members of society.	This is a matter for the LTP to consider.
	Be ambitious! I am willing to pay more tax to ensure that transport is environmentally sustainable.	This is a matter for the LTP to consider.
	I don't see, in your at risk groups, any mention of people with disabilities which seems quite a big group to leave out (just to be clear, my particular interest in visual impairment and I am happy to give more information if that is helpful. It is a large group, but frequently gets left out of consideration.	This is a matter for the LTP to consider. Disability is considered through the EqIA Screening Statement and its inclusion of protected characteristics.
	Ensure the network is climate resilient from the affects of climate change ie. extreme heat, droughts, flooding etc. Design it in at concept.	This is a matter for the LTP to consider. Through ISA Objective 4, the effects of climate change and resilience of the transport network are considered.
	Please also determine whether those locations on the borders of West Yorkshire feel adequately connected to their adjoining non-West Yorkshire areas.	This is a matter for the LTP to consider.
	No access to the internet!!	Comment noted.

	Not very flattering conclusions, are they?	Comment noted.
	Waste of time and money dreamt up by the poor crop of Labour Concillors	Comment noted.
	If Leeds were in France who like Britain had vandals in charge of urban public transport who destroyed nearly every urban rail line outside of the capital, who different would things look! 30 cities in France have now either a tram or underground network of both and systems are growing. That is integrated sustainability! Compare notes at https://www.urbanrail.net/eu/euromet.htm	This is a matter for the LTP to consider.
	With electrifying rails and buses, that should be enough.	This is a matter for the LTP to consider.
	Stourton interchange cycle lane connecting Valley Park to Hunslet	This is a matter for the LTP to consider.
	Agree with the assessment	Comment noted.
	Can't find this in info provided, but get more frequent train and bus services on ALL routes, meaning people don't use cars, then you may be on to a winner.	This is a matter for the LTP to consider.
	I eventually found the document, via google. From a quick read, it would appear that not quite enough attention has yet been paid to making the transport network(s) resilient against the effects of climate change (floods, heatwaves etc). Though I appreciate some of this, for example management of river catchments, or creating 'sponge city' areas, falls beyond the remit of transport alone.	This is a matter for the LTP to consider. Through ISA Objective 4, the effects of climate change and resilience of the transport network are considered.
	As a cyclist and bus user, I would like to see expansion of safe green options to travel.	This is a matter for the LTP to consider.
	Better to keep the present Metro brand and work on the real problems of actual bus services, particular those of Arriva and their over pricing	This is a matter for the LTP to consider.
	as past question. not accessible.	Comment noted.
	Totally support.	Comment noted.
	Sounds positive.	Comment noted.
	Gosh. That is a hefty report. I can't go through it all unfortunately. However I fundamentally disagree with your assessment of thematic policies. Page 95. the first line referring to Policy S1 " Design our roads and public transport to improve safety, including walking, wheeling and cycling facilities. People should feel and be safe using public transport	The ISA Main Report is supplemented with a Non-Technical Summary (NTS) which summarises key points and conclusions for accessibility. The thematic policies have been assessed with the ISA objectives as

	at every stage of their journey (Policy S1). The first objective is: "Protect and enhance local air quality" Then you say in Explanation Against Objective column that "The policy has neutral effects as there is no reference to air quality, however the policy is focused on embedding safety in design." This is wrong. When it is made safer to walk, wheel, ride or take public transport more people use these options, less drive and air quality will increase - that at the very least is the aim? Surely? If you don't include this then safe design won't end up prioritised. I might have misunderstood though as later on some of the objectives do seem to be met by this policy.	developed and set out in the Scoping Report, with the methodology for assessment being detailed in the ISA Main Report. Assessment scoring for Policy S1 has been changed to positive (+) in regards to "Protect and enhance local air quality" - ISA Objective 1 against the relevant criteria. 'Explanation against the objective' text has been replaced with: <u>"The policy has positive effects as although there is no direct reference to air quality, it is considered that embedding safety in design will increase the number of people using public transport and active travel routes."</u> Text added to Section 4.1.1 in the Main Report: <u>"Policy S1, however, scored positively as although there is no direct reference to air quality, it is considered that embedding safety in design will increase the number of people using public transport and active travel routes"</u>.
	I could not locate the ISA at the link provided	Comment noted.
	Please, I would like for the paths next to the canal between Walsden to Mytholmroyd to be improved for wheeling and cycling. This would require two main changes: 1) for the cobbled overflows to have decent bridges put across them that can be traversed easily, and 2) for the pathway to be better paved for wheels. The paths could also be segregated for foot and wheels at key areas, as necessary. This would allow better intergration between public transport with walking, wheeling and cycling.	This is a matter for the LTP to consider.
	Forgot Trams & Reintroduce Trolleybuses Prioritise Buses and Trains	This is a matter for the LTP to consider.

	This relies on the Mass Transit system. We have been promised this for many years. What guarantee have you got that this will actually happen this time?	
	How to make transport singular and distant	This is a matter for the LTP to consider.
	Most people are not going to want to open and read long documents, especially in a summarised questionnaire	Comment noted.
	CHEAPER TRAIN PLEASE IT WOULD BE MORE SUSTAINABLE	This is a matter for the LTP to consider.
	I like the electric buses.	This is a matter for the LTP to consider.
	LCC are charging for car parks now so public transport is needed even more thus relieving some congestion which with all the new builds is getting extremely bad	This is a matter for the LTP to consider.
	I am disabled and cannot use the bus to Leeds from my home to get where I want to go - I have to get taxi's to the train station, hospital appointments, doctors and local supermarkets as the buses are so unreliable & infrequent. Check the times on the app and they are different to the times on WYPTE site which are different to the First site and then again different to what is listed in the bus shelters. No wonder people won't leave their cars at home as they never know whether a bus might or might not arrive!	This is a matter for the LTP to consider.
	Adequate drop off areas for disabled passengers travelling by private car without a blue badge	This is a matter for the LTP to consider.
	You need to focus on connecting the suburbs. There are no issues with getting from the suburb in to the city, but it is IMPOSSIBLE to travel around the suburbs without going in to the city and changing transport and it is such a pain!! I don't drive and it is impossible to get anywhere without it taking hours on end and having to make sure connections line up and timetables run to the same end. We don't need a metro to connect suburbs to the city, we need a metro to connect the suburbs. That's why people are using their cars!!! There is no other option!	This is a matter for the LTP to consider.
	I have only briefly skimmed over the document, but it's references to including children and young people in the target demographics stand out to me - it is important that our transit system works for them and gives young people autonomy that they otherwise wouldn't have. Part of	This is a matter for the LTP to consider.

	this will include educational talks and demonstrations in schools, as the children are our future and need to be an active part of the solution. The report also references circular economics and adaptations to climate change. The former, to me, mainly looks at the impact of battery-electric buses and what happens at the end of their life. Additionally, recycling initiatives can be a part of the transit infrastructure, at stations and on public transit vehicles. As for adaptations to climate change, ensuring that the vehicles procured for the transit network are able to hold up to increasingly polarised weather conditions is incredibly important to ensure the transit network is robust. Additionally, the infrastructure itself, from tarmac to station insulation, should be as resilient as possible. I don't know enough to suggest anything more specific, as this is not my area of expertise.	
	Waste of time, more uncessecery red tape	No action required.
	Anything is good for the enviroment.	No action required.
	I think it is important to use green energy wherever possible. The solar panels at the car park at Stourton park and ride are a clear visible practical example. By using solar at shelters it all cuts costs in the long run. Eco friendly electric buses are quieter and cleaner, electrifying all rail services all helps. When building the tram lines and bus lanes tree planting and green spaces should be used to all help the feel of the areas.	This is a matter for the LTP to consider.
	connectivity and reducing the number of connections to get to key hubs for workers and visitors (eg hospitals) needs to be a factor	This is a matter for the LTP to consider.
	Please just make I happen before I pass away	No action required.
	I think Tracy Brabin and her team really need to listen to the people of Leeds, as many are worried by her plans and have a distinct lack of faith in them being able to deliver even the simplest of projects because of the shocking planning and implementation of the road 'improvements' projects within the city. We are sick and tired of living within a road work nightmare and that has a big impact in our lives due to the traffic chaos it creates. Please improve the current bus and train fleets and replace them with new ones, as they are susceptible to breaking down. Leeds	This is a matter for the LTP to consider.

	has so many disused train stations, that they could be utilised before undertaking the monumental task of implementing a tram system, something the majority of us aren't keen on, as we don't want to live in amongst road works and construction for the next 20 years, at least with the disused train stations they won't directly affect the roads and cause even more traffic chaos. Tracy Brabin and the team have a long way to go before they win round the good people of Leeds, and this is down to Leeds city councils many failings within recent times.	
	Of course an integrated approach is important but there appears to be a complete lack of detail dates or spending plans.	This is a matter for the LTP to consider.
	Too focuses on trams and cycle lanes. Both unnecessary	Comment noted.
	I hope it can work it would be great to have a range of options to travel also it would be good to have more trains to go to Leeds and further for people that don't drive it can be hard and I personally don't feel safe in taxis	Comment noted. This is a matter for the LTP to consider.
	I was going to write a long piece here about the trials and tribulations of bus users in Todmorden, especially the aged living in the here and now who will not get to live in your envisioned utopia. Also there are too many occasions to recall that I have stood at bus stops and the bus has either been cancelled or is very late, everyone whinges but when I asked them if they have complained or contacted any local authorities, etc, I get the same old tired reply- 'they never listen to us'.	This is a matter for the LTP to consider.
	SCam	Comment noted.
	More traffic free routes, but more disabled parking spaces and better access to them.	This is a matter for the LTP to consider.
	See previous comments. If you want to help I think the following are needed . Stop hating the car until you provide a better options. Reduce the number of bus stops by half. They are too close. This would make people more active and speed up journeys. A bus journey to Leeds from my Village (Menston) takes 3.5 longer than the train. I can't get to Bradford ! Finally Leeds need to be connected to the airport (realistically within a mile with a shuttle bus)	This is a matter for the LTP to consider.

	"The conclusion in the ISA (3.3) states, 'Despite positive sustainability contributions, none sufficiently prioritise green and blue infrastructure.' This critical oversight could be significantly addressed by prioritising Greenways like the Wharfedale Greenway, which inherently provide biodiverse green/blue corridors perfectly suited for carbon-free travel."	This is a matter for the LTP to consider.
	Yes but keep it economical and efficient. People need to see change taking place which will improve their circumstances and offer opportunity or they become demoralised and disillusioned with the plan	This is a matter for the LTP to consider.
	The conclusion in the ISA (3.3) states, 'Despite positive sustainability contributions, none sufficiently prioritise green and blue infrastructure.' This critical oversight could be significantly addressed by prioritising Greenways like the Wharfedale Greenway, which inherently provide biodiverse green/blue corridors perfectly suited for carbon-free travel.	This is a matter for the LTP to consider.
	The conclusion in the ISA (3.3) states, 'Despite positive sustainability contributions, none sufficiently prioritise green and blue infrastructure.' This critical oversight could be significantly addressed by prioritising Greenways like the Wharfedale Greenway, which inherently provide biodiverse green/blue corridors perfectly suited for carbon-free travel.	This is a matter for the LTP to consider.
	This is obvious. This is where real consultation is required. Current feedback from users shows that the system is broke.	Comment noted.
	The conclusion of the ISA states that it overlooks the impact of climate change and does not sufficiently prioritise blue and green infrastructure. This could be addressed by prioritising in the first five and 10 years Greenways like Wharfedale Greenway, which provide biodiverse blue/green corridors enabling carbon-free travel.	This is a matter for the LTP to consider.
	I think cycle routes should firstly be planned for areas where there are already cyclist using routes which are unsafe due to sharing roads with traffic such as the Wharfe Valley which is popular with cyclist and there is a need for safer cycling and where the number of cyclists could easily increase if this were provided. It's disappointing that Bradford prioritized putting cycle lanes in a hilly part of Bradford which was infrequently used by anyone not in a car. The new cycle lanes in this area won't	This is a matter for the LTP to consider.

	encourage cyclists as the route is too impractical and hilly for most people.	
	It's essential to keep reviewing this and checking for unintended consequences. Also working carefully to ensure that hubs and junctions of different types of transport are fit for purpose - such as adequate provision for pedestrian crossings, safe junctions for cyclists and space for mobility scooters and wheelchairs.	This is a matter for the LTP to consider.
	"The conclusion in the ISA (3.3) states, 'Despite positive sustainability contributions, none sufficiently prioritise green and blue infrastructure.' This critical oversight could be significantly addressed by prioritising Greenways like the Wharfedale Greenway, which inherently provide biodiverse green/blue corridors perfectly suited for carbon-free travel."	This is a matter for the LTP to consider.
	It's important, shouldn't just be a tick box exercise	No action required.
	There is no goodwill towards the bus lane in Oakenshaw. You have imposed destruction on our village and excluded the residents from any involvement and we feel only animosity and anger for what you have done. For one minute gain 97 trees are being felled. A beautiful archway of greenery, much admired is being removed. Shameful.	This is a matter for the LTP to consider.
	making the air cleaner	This is a matter for the LTP to consider.
	WYCA should clarify if the design of any proposed mass transit scheme would also permit a traffic-free walking, wheeling, and cycling route to be built alongside it, and provide potential timescales for doing so. Co-location offers incredible efficiencies and benefits.	This is a matter for the LTP to consider.
	Make sure that the Queensbury tunnel is safeguarded to ensure that future sustainable transport opportunities are maintained.	This is a matter for the LTP to consider.
	It's a joke, millions are being spent in an area where it is not needed, ie putting a bus lane from oakenshaw to chain bar is a total waste of money, even the bus company say it isn't required	This is a matter for the LTP to consider.
	Please allow motorcycles in more of the bus lanes. It is dangerous to disallow them and contradicts national government guidelines and puts us at odds with other cities. I have limited public transport options, it is too far to cycle and I hate to use the car and contribute to traffic.	This is a matter for the LTP to consider.

	Motorcycles are highly efficient, produce negligible emissions and reduce traffic.	
	This feels like a needless side show to the LTP.	Comment noted.
	can we have long Enviro 200 on smaller bus routes as because of school kids	This is a matter for the LTP to consider.
	This is a most laudable proposition- more power to your elbow! I have every faith in you- although I am lamentably gullible.	Comment noted.
	The assessment needs to be ongoing in line with the project development. Its no good for something to be done and then assessed not to be right	Comment noted. The ISA is an iterative process and assesses the policies in the draft LTP to ensure their robustness. WYCA is developing implementation plans to support the delivery of the LTP.
	I am glad all these noble ideas are being meted out but I would like to see a quick, simple solution to my local degraded bus service.	This is a matter for the LTP to consider.
	The new station in Bradford: will this allow through transit between, say, Shipley and Halifax?	This is a matter for the LTP to consider.
	This plan does not integrate with anything much outside your authority. The peripheral areas are forgotten and have poor connectivity- a lack of inclusion.	This is a matter for the LTP to consider.
	All good :)	Comment noted.
	Cart before horse. See my comments earlier in this book. I'll have to leave this to the "experts". I'm just a "worker" trying to get from A to B without being late. I have no choice beyond use "public" transport and walk a lot (in all weathers), a work from home doesn't suit me/is an option	This is a matter for the LTP to consider.
	Again cutting down trees to put in a bus lane makes no sense, especially on a road carrying heavy good vehicles from an industrial estate recently placed in the middle of a village, passing a primary school. We need all the vegetation possible help filter noise and air pollution.	This is a matter for the LTP to consider.
	That bus stops are made more accessible by having free space around them. As sometimes buses have been unable to reach the path and	This is a matter for the LTP to consider.

On behalf of a group, business, or organisation	people have to go on the road to get to the bus or go on the road to get to the path. Allocating more free space would make it accessible for all.	
	Crap	Comment noted.
	As q8	Comment noted.
	Not Had time to read all the information. Hope big projects involve local people to best site them unlike HS2.	Comment noted.
	Businesses have to be on the fore front of zero emission agenda	Comment noted.
	Roads are already congested, buses are delayed, and even £2.50 fares feel steep. Why commit to trams, a nineteenth century solution. Cities of the future should embrace advanced mobility innovations such as elevated sky buses, automated rapid transit, and intelligent systems that cause less disruption. What we need are direct routes with flyovers and express corridors rather than detours that slow everyone down. This should not be another fragmented project but instead a holistic plan that integrates artificial intelligence, data insights, and green infrastructure. Trams risk worsening congestion and duplicating current bus routes. Rather than repeating Manchester, let us learn from Dubai, Shanghai, Germany, and Tokyo, where sky trains, autonomous shuttles, and integrated hubs already define global best practice. Trams will also weaken the existing bus network. I remain unconvinced that this project addresses the long-term needs of the city. Commuters and younger generations will be inspired only if mobility systems match their expectations. This solution feels outdated and unlikely to succeed.	This is a matter for the LTP to consider.
	More training to be inclusive	Comment noted.
	This must cover both bus and rail.	This is a matter for the LTP to consider.
	3.3 Conclusion states "Despite positive sustainability contributions, none sufficiently prioritise green and blue infrastructure". This could be partially addressed by prioritising Greenways which can provide biodiverse green/blue corridors for carbon-free travel.	This is a matter for the LTP to consider.
	By the time this is finally implemented it will be too late for communities like ours as the majority of people will have chosen to switch to using cars and this will be irreversible which is not in line with the "Weaver" plans. The remainder of the population up here will be suffering high	This is a matter for the LTP to consider.

	levels of isolation and depression with a huge impact on medical services as a result.	
Q11: If you have any comments on whether the ISA has adequately assessed the potential environmental, social, and economic impacts of the proposed policies within the Local Transport Plan, please tell us here.		
Q12: Are there any sections of the ISA that require further explanation or clarification?		
Individuals	Improving support during extreme weather events as recommended in the ISA would be very beneficial for passengers, especially children and disabled	Comment noted.
	Very much so. Those that need it the most are having to wait and may not see any improvement. Bradford to Leeds is an example of putting the cart in front of the horse. It is just vanity for Leeds while everyone else continues to struggle and loses hope of getting anything.	This is a matter for the LTP to consider.
	Given no reasonable alternatives 'sufficiently prioritise green and blue infrastructure' in addition to mass transit and rail electrification prioritisation, attention should be paid on areas of these lines that are vulnerable to flood risk, and research into preventions of rail track warping in high heat.	This is a matter for the LTP to consider.
	You seem to have failed to assess the airport impact	Comment noted. The ISA is an iterative process and assesses the policies in the draft LTP to ensure their robustness. WYCA is developing implementation plans to support the delivery of the LTP.
	Look after the people who work!!!!	Comment noted.
	providing cycle routes at the cost of road space is diabolical - take dudley hill in bradford as a prime example - what a failure and waste of our money - the specialists have not got a clue and live in cuckoo land	This is a matter for the LTP to consider.
	No positive thoughts given to motorists	Comment noted
	Residents must have a say on bus routes through their area, especially when those routes don't serve the local amenities of those residents. Some routes need changing to incorporate residents needs. Eg. My local bus route no longer serves my nearby doctors or shops, that are approximately ¾mile away in Lockwood, meaning I a disabled person have to go into town and catch 2 buses just to access these local	This is a matter for the LTP to consider.

	services and amenities. This journey now takes 10xs longer than it should have, if the route actually went it's old route through Lockwood like it used to.	
	You Need park & ride in the more affluent areas to get 2 vehicle familise to utilise efficient public transport more offten	This is a matter for the LTP to consider.
	Please do things and stop with all the handwringing - meet the legal reqs first and get on with it	Comment noted.
	The Information provided is the correct one.	Comment noted.
	Link above doesnt take you to ISA!	Comment noted.
	My main concern with the light transit (tram) proposals is that all the work having been done and still being done in such as Leeds centre will be undone again by ripping it up to accomodate a new tram system. The days when we should have had a tram system (or light transit) are long gone. It should have happened years ago. It's too late now with everywhere more built up and the upheaval it would cause (as well as the cost) to build it now. Concentrate on getting a relable bus service linking into train services. The alterations in Leeds centre have actually done the opposite, meaning a treck with luggage from the station to buses, wheras before the buses used to come in front of the station. So much for integration.	This is a matter for the LTP to consider.
	It is difficult to comment due to the language used which is often very high level and non specific. I worry this impacts on the validity of the ISA. When it comes to assessing priorities and the impact on, say, Halifax, I doubt this assessment will help.	Comment noted. The ISA is an iterative process and assesses the policies in the draft LTP to ensure their robustness. WYCA is developing implementation plans to support the delivery of the LTP. Individual projects per the Implementation Plan will be subject to their own assessments.
	Happy with it	Comment noted.
	No	Comment noted.
	The road route through dawsons corner for the mass transit route should be utilised as it reaches more residents and does not cut through the green corridor of Pudsey.	This is a matter for the LTP to consider.

	Give equal priority to all types of travel, not everybody can walk or cycle even short distances	This is a matter for the LTP to consider.
	Our money on a scheme we don't want or need	Comment noted.
	There is very little by way of consideration to roads runoff and urban diffuse pollution impacting on our water environment and downstream communities.	This is a matter for the LTP to consider. Through ISA Objective 6, surface water run-off and protection of water resources are considered.
	Net Stupid Zero - don't waste taxpayers money on it.	Comment noted.
	More money wasted that's all this is	Comment noted.
	It doesn't .	Comment noted.
	Just scrap the horrible idear	Comment noted.
	All good.	Comment noted.
	Please listen to all comments both negative and positive and not be selecting what you want to hear as in previous consultations	Comment noted.
	What thought has been given to the potential usage of the Leeds Liverpool canal for transportation purposes?	This is a matter for the LTP to consider.
	Needs to less ableist	ISA Objective 12 covers health and wellbeing (HIA specific Objective) and ISA Objective 13 promotes the greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society (EqIA specific Objective). Equality considerations have been included within the ISA objectives and throughout the Integrated Sustainability Appraisal of the Plan. It is important to note that a number of the policies in the assessment table are scored as having a neutral impact against the protected characteristics. This is due to the holistic, strategic nature of the plan - with

		the delivery partners and transport authorities providing further detail in the future regarding the design and implementation of transport schemes within the plan area as appropriate. Individual schemes will then be subject to more detailed assessment at later stages.
	I have not had time to assess this - but I have never yet seen a transport model which suggests that mode shift at this scale in a world where motoring is getting cheaper.	This is a matter for the LTP to consider.
	As long as we are actively moving to zero carbon, and not simply 'net zero', then the plan should work	This is a matter for the LTP to consider.
	ISA is too technical for lay person input. Lack of resilience to climate change is worrying.	Comment noted. A Non-Technical Summary has been provided in the suite of documentation to set forth a high-level, more accessible summary of the assessment process and conclusions. ISA Objective 4 covers considerations to increase resilience of the transport network to climate change and associated extreme weather events.
	Yes	Comment noted.
	The EQIA appears to have failed to assess / take into account various factors. By way of example, there are no impacts anticipated upon disabled persons by the removal of parking places or change of road use - this appears bizarre.	ISA Objective 12 covers health and wellbeing (HIA specific Objective) and ISA Objective 13 promotes the greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society (EqIA specific Objective). Equality considerations have been included within the ISA objectives and throughout the Integrated Sustainability Appraisal of the Plan.

		For example, within the ISA Main Report assessment tables, Policy RR3 (Destination Parking), despite stating that it will take ‘a fair and equitable place-based approach to car parking’ previously included ISA mitigation to ‘make more explicit reference to considerations for the specific needs of vulnerable groups including disabled car parking, in relation to managing and planning for car parking spaces’. The following mitigation has now been added to Policy IA2 (Delivering high quality and healthy places for people): <u>“This policy could be enhanced by explicitly stating that removal of certain types of vehicle traffic and parking does not include disabled drivers and parking”</u>. The following mitigation has now been added to Policy RR4 (On street car parking): <u>“This policy could be enhanced by explicitly stating that on street car parking for disabled people will be retained and provided where possible”</u>. Scoring has also been amended to uncertain for two assessment criteria against ISA objective 13, because although the policy references utilising kerb space for wheeling, it does not reference safeguarding provision of disabled parking spaces. Additionally, the

		following text has been added to the EqIA Screening Statement: <u>“Policy RR4, however, received uncertain scores against age and disability as it refers to better serving the community for wheeling, however, does not reference retaining on-street parking for disabled people.”</u> It is important to note that a number of the policies in the EqIA screening appendix assessment table are scored as having a neutral impact against the protected characteristics. This is due to the holistic, strategic nature of the plan with the delivery partners and transport authorities providing further detail in the future regarding the design and implementation of transport schemes within the plan area as appropriate.
	The ISA states that little has been identified in the way of enhancing and protecting biodiversity, which is incredibly important, especially with the expansion of the travel network inevitably taking more land. It would be important to integrate biodiversity and ecology within the project, especially due to the 10% BNG requirements. This is often left as a begrudging last minute attempt, however this is a great opportunity to integrate BNG into the project, having mixed land use. The research is already out there about what you need to do and there are examples of good practice elsewhere you can use as guidance. Just get on with it!	This is a matter for the LTP to consider.
	The ISA has not considered risks associated with electrification.	The ISA objectives were developed and set out in the Scoping Report, which was subject to its own 5-week statutory consultation. The ISA is a strategic

		assessment of the draft LTP. Once schemes (to implement the plan) have been developed by the Combined Authority and transport partners, these will be subject to more detailed assessment.
	As per my previous answer regarding Edinburgh Trams, the disruption and cost, both to the city and businesses was far higher than it needed to have been. Please ensure that rigorous, indeed aggressive, cost and project management are budgeted for with real teeth against late or under-performing suppliers during the inevitable disruption caused by building new infrastructure.	This is a matter for the LTP to consider.
	Not at all integrated with other LA areas	This is a matter for the LTP to consider.
	unsure	Comment noted.
	A. It is actually called the Integrated Sustainability Appraisal, not Assessment and B. It is 724 pages long! No offence to those that were involved in writing what is clearly a detailed analysis but does this survey really expect people to have to go to the lengths of reading the whole report as well as the very lengthy IPT documentation etc etc? I suspect the report states that of course you need to try and assess impacts of all the policies (I call that common sense) but in reality, this report is indicative of the unnecessary expense of consultation to state the obvious.	Comment noted. A Non-Technical Summary has been provided in the suite of documentation to set forth a high level summary of the assessment process and conclusions.
	key road network map is outdated eg shows Leeds old ring road B6902 but not ELOR A6120	This is a matter for the LTP to consider.
	Insufficient focus on the needs and wants of the majority of road users - private vehicles, There is nothing wrong with the ISA as such but it would be optimistic (!) to expect many lay consultees to wade through over 700 pages of it. Many of the policy objectives are stated as beneficial either by improving [public] safety or health and wellbeing, by encouraging a change in lifestyle that would lessen physical degradation such as obesity, and by promoting cardiac health and so forth.	A Non-Technical Summary has been provided in the suite of documentation to set forth a high level summary of the assessment process and conclusions.

	I Don't see any improvements in accessibility and availability of public transport so far.	This is a matter for the LTP to consider.
	Not a clue	Comment noted.
	It will be wonderful if we can finally have a public transport network similar to many places in Europe and the rest of the world. I look forward to a better, greener transport system for our small country and I believe your plans can help us towards this future.	Comment noted.
	Ensure young people can get to college	This is a matter for the LTP to consider.
	Not all elderly people can use buses trains and cycle or indeed walk far. Do not forget them in your plans.	This is a matter for the LTP to consider.
	I think it was a reasonable assessment	Comment noted.
	Im pleased to see some issues addressed such as ownership of the buses but i would like to see more. Public control of the train network. Ease of ticketing across all networks.	This is a matter for the LTP to consider.
	Yes how ever road users shouldn't be punished in order to try and persuade them to use public transport the existing public transport should be improved to become cheaper and more reliable to incentivise those that normally drive.	This is a matter for the LTP to consider.
	No	Comment noted.
	Just seems like they want to turn Leeds centre into a bus and bike only location. This won't work for anyone	This is a matter for the LTP to consider.
	Wildlife cannot be the one to suffer for expansion plans. Going green can't then mean wildlife suffers	This is a matter for the LTP to consider.
	Get more roots in more areas. Get the buses more frequent and get more drivers. Please and newer buses on all the routes	This is a matter for the LTP to consider.
	Heard it all before and was lies then so how can we trust you now. Monday needs spending in better ways than wasting it on things that we had once and YOU removed or allowed the removal off	Comment noted.
	Gobbledegook	Comment noted.
	Have to strike right balance but not spend vast amounts in committee meetings	Comment noted.
	My comments are that it should consider alternative, e.g. post-growth economics, doughnut economics, ecological economics. I'm a bit	This is a matter for the LTP to consider.

	disappointed/apathetic that the overarching vision of the Weaver network is to grow the economy when evidence indicates that not everyone benefits from economic growth and that it exacerbates inequality, and that economic growth is associated with environmental degradation. Furthermore, I'm not sure if other people relate to or are excited about growing the economy too - community and nature may be more easy to relate to (e.g. children are unlikely to understand what the economy is, but know about friends/family and animals). The overarching vision/mission of the Weaver network should be to build community and to regenerate natural environment. As a side note, the ISA is a really long and technically worded doc which may not be accessible for everyone to understand.	A Non-Technical Summary has been provided in the suite of documentation to set forth a high level summary of the assessment process and conclusions.
	As mentioned, reducing road lanes to increase the number of cycle lanes only increases pollution, people are not ready to give up their cars and all that is happening is queuing traffic spewing out exhaust fumes. We need a true balanced and realistic approach	This is a matter for the LTP to consider.
	Not much on cycling	This is a matter for the LTP to consider.
	I agree with all recommendations given on ISA Framework Objective 12, 13 and 14 especially.	Comment noted.
	It is quite clear that Hinchcliffe, who heads up your Transport Committee, has had a hand in drafting this! One look at the network map shows how she has influenced the major concentration of the network upon the Bradford cesspit, while totally ignoring the outlying areas of both the Bradford District and other outlying areas. Areas that equally deserve, if not more fully deserve passenger transport improvements!	This is a matter for the LTP to consider.
	The plans need to prioritise cycling, walking and minimise car use and car parking . More parks larger parks and trees are needing the city centre	This is a matter for the LTP to consider.
	As per previous comments I do not think that all areas have been addressed and the shortfalls will have a major impact on the economy/climate	Comment noted.

	Ensure affordable, reliable public transport for all in the city while reducing emissions to zero	This is a matter for the LTP to consider.
	These are public services that should be run for the good of the public, not for select few who will extract as much money as possible out of the public. Evidence based proof that ongoing assessments are being conducted by independent and competent individuals.	Comment noted.
	More cheap parkings in the city centre. Open more lines for cars. Close all cycle lanes as they are only for deliveroo riders and nobody is using them.	This is a matter for the LTP to consider.
	Could be an issue with plans for new Bus lines on existing witnessed busy roads ie Possibly Westgate Bradford seam	This is a matter for the LTP to consider.
	Looks good	Comment noted.
	Priority should be given to cycle greenway projects this reduces congestion congestion on local areas and improves health	This is a matter for the LTP to consider.
	Important to assess the right questions to ask potential customers prior to any surveys. Encourage current public transport users to input.	Comment noted.
	Rural areas are already behind in services + quality + need priority to even catch up with towns + cities.	This is a matter for the LTP to consider.
	You haven't thought about the danger of bikes in pedestrian areas and the fact that people want cars	This is a matter for the LTP to consider.
	Its a had read and nearly impossible to understand the point of it or its recommendations	A Non-Technical Summary has been provided in the suite of documentation to set forth a high level summary of the assessment process and conclusions.
	Phase 2 of the A638 Dewsbury - Cleckheaton Sustainable Travel Corridor (STC) is an utter disgrace. Millions overspent before it even started, multiple rounds of consultation with residents saying no every single time, a complete farce in execution by Kirklees Council, a failed road safety audit, yet as recently as last week Tracy decides to give them more millions for a cycle lane that runs directly parallel with the Spen Valley Greenway that no cyclist will ever use and a 24 hour bus lane being construction with devastation to the environment for a bus	This is a matter for the LTP to consider.

	service that runs twice per hour if you're lucky and isn't a 24/7 service. As long as Tracy thinks she looks good, that's all that seems to matter.	
	The bus lane for the small part of Kirklees beyond chain bar roundabout is absolutely ridiculous. Yes it's about the trees but it's also stupid. There are barely any buses. Nobody wants it and you don't care. You have ring fenced money and you plough on regardless. But oh yes you have to cancel another strip of this development as you'd run out of money but you won't cancel this big after local objection just to be bloody minded. Had anyone who voted ever been anywhere near the area, I doubt it.	This is a matter for the LTP to consider.
	This is too long a consultation. In the past when I have contributed to forms like this, I feel it is a tick box exercise as the decisions have already been made before consultation. There were many comments made on the plans of the local council on things that people were not happy with but they are still implemented.	This is a matter for the LTP to consider.
	It's not been adequately assessed. The main road from Oakenshaw to the chain bar roundabout has failed road safety audit!	Comment noted. The ISA is an iterative process and assesses the policies in the draft LTP to ensure their robustness. WYCA is developing implementation plans to support the delivery of the LTP. Individual projects per the Implementation Plan will be subject to their own assessments.
	Its all very general, with long lead times. I am not convinced that the issues around LONE will be taken into account.	A Non-Technical Summary has been provided in the suite of documentation to set forth a high level summary of the assessment process and conclusions.
	I just want to get on the bus that comes on time.	This is a matter for the LTP to consider.
	I believe the money spent on the mass transit scheme would be better spent, in this area, on education, training and skills. I have never seen a £for £ comparison of the impact.	This is a matter for the LTP to consider.
	It is heavily biased towards Leeds and Bradford.	This is a matter for the LTP to consider.

On behalf of a group, business, or organisation	There is no need for very ambitious plans, Just basic realistic, practice and affordable ones. Get the basics right and the rest will follow on.	Comment noted.
	Pretty irrelevant, all this is box-ticking and no action	Comment noted.
	You do not discuss or communicate with local areas. You do not care	Comment noted..
	I've not seen the assessments yet, but when they are published, they should be made freely available in the interests of transparency.	ISA documents were provided as part of the LTP consultation process.
	The impact of removing businesses by compulsory purchase and thereby reducing local employment is not mentioned. This can lead to those who use public transport being forced to find alternate employment as well as impacting the local communities and charities which these Companies support.	This is a matter for the LTP to consider.
	None	Comment noted.
	- We note that the strategy itself refers to a very narrow set of health impacts associated with transport in objective 4 . The public health impacts of driving include road crashes, air and noise pollution, physical inactivity, the health consequences of global warming caused by greenhouse gas emissions, mental health impacts of highly car dependent systems, as well as the social and economic isolation faced by millions who live in car-dependent settings. We recommend that the policy make explicit the wider health benefits to be gained from improvements in the availability of accessible, sustainable integrated transport. - We are surprised to see the plan score so positively in terms of improved air quality given that the targets for the plan do not aim to improve air quality beyond current levels. We recommend that the plan increase ambition by including WHO air quality targets. - It is a surprise that the plan has scored so positively in terms of zero emissions given that the targets for VKT are so unambitious. - We support ISA recommendation that the policy could be enhanced by making more explicit reference to designing for vulnerable groups.	Through ISA Objectives 1, 3, and 5, air pollution and impacts from greenhouse gas emissions, as well as other amenity impacts including noise, are considered. Objective 10 considers factors that promote the shift towards sustainable transport, including measures to improve mental health level for active travel users. Road safety, severance issues, physical activity, and socioeconomic effects are considered through Objectives 12 and 14. Text added in ISA Main Report under Section 4.1.1 Objective 10: “Explore additional opportunities to enhance public transport and active travel infrastructure as a measure to further reduce the harmful impacts of transport <u>and bring wider health benefits through reduced dependence on private vehicles and encouragement of physical activity.</u>”

		Mitigation added to Policy ZE2 in Assessment Table under Objective 12: <u>“Policy could make more explicit reference to improving active travel connectivity and accessibility to key services and locations in support of local health and wellbeing improvements.”</u> Policies promoting a shift to sustainable transport scored positively with an indirect effect from reducing dependence on private vehicle use, hence reducing harmful emissions to improve air quality. Text added to Policy ZE2 in Assessment Table under Objective 1: <u>“It is considered that the policy could be further improved by including targets set in the World Health Organisation (WHO) Global Air Quality Guidelines.”</u> Text amended in ISA Main Report under Section 4.1.1 Objective 1: “Policies related to ‘Zero Emission’ scored <u>strongly mostly positive or neutral</u> against this objective, as they contribute directly to reducing emissions and play a key role in enhancing air quality across the region. <u>However, more considerations could be given to areas with low air quality. It is also recommended that Policy ZE2 reference</u>

		<u>the World Health Organisation (WHO) Global Air Quality Guidelines and include specific measures in reducing harmful impacts of transport.”</u> Text added in ISA Main Report under Section 4.1.1 Objective 1: “<u>Reference specific measures to reduce harmful impacts of transport with regards to targets set in the World Health Organisation (WHO) Global Air Quality Guidelines.”</u>
	Noise as mentioned earlier	Comment noted.
	It is not possible to read, evaluate and comment on a 724 page ISA within the scope of this community consultation - you cannot be seriously expecting the community to say more than we MUST protect nature, we MUST reduce emissions, we MUST include the excluded locations, communities and individuals FIRST.	A Non-Technical Summary has been provided in the suite of documentation to set forth a high level summary of the assessment process and conclusions.
	The Yorkshire Dales National Park is one of Britain Breathing Spaces and is easily accessible from the West Yorkshire area by public transport. This hasn't been included in the integrated sustainability appraisal of the area as an area to access nature, blue and green space.	The LTP policies have been assessed with the ISA Objectives as developed and set out in the Scoping Report, with the methodology for assessment being detailed in the ISA Main Report. ISA Objective 2 covers the protection / enhancement of biodiversity, geodiversity, and the blue-green infrastructure network. Accessibility and connectivity to such natural spaces is further included in this ISA Objective's assessment criteria, and therefore is covered in the ISA.
