1. Introduction

1.1 Purpose of this Report

This Integrated Sustainability Appraisal Report (ISA), produced by Ove Arup & Partners (Arup) on behalf of the West Yorkshire Combined Authority (WYCA or the CA), identifies the potential sustainability impacts of implementing the Mayor's West Yorkshire Local Transport Plan (the Plan or LTP). This report explains the process and work undertaken in developing the Plan to ensure that sustainability, economic and social matters were fully considered.

The ISA has been conducted to fulfil the requirements for a Sustainability Appraisal (SA), Strategic Environment Assessment (SEA), a Health Impact Assessment (HIA) and an Equality Impact Assessment (EqIA). This main ISA report explains and summarises the results of the ISA of the LTP, particularly covering the ISA of reasonable alternatives, thematic policies, and infrastructure intervention types (in addition to an Equality Impact Screening Statement contained in the appendix).

It covers the methodology and results from this round of the ISA (further details on the overall ISA process and work completed to date can be found in Section 2). It also proposes measures to mitigate any significant adverse effects identified during the assessment. By fulfilling these purposes, this report ensures that sustainability is at the core of the plan-making process, promoting more sustainable and resilient development outcomes within the LTP.

A Habitats Regulations Assessment (HRA) of the Plan has also been undertaken; however, this has been reported separately.

1.2 The Mayor's West Yorkshire Local Transport Plan

The West Yorkshire Combined Authority was established in 2014 to bring together economic development and transport functions across West Yorkshire in a more strategic way. In May 2021, the Combined Authority became a Mayoral Combined Authority. The five West Yorkshire District Councils are Bradford, Calderdale, Kirklees, Leeds and Wakefield. The Combined Authority has a statutory duty to produce a local transport plan (LTP) for West Yorkshire and keep it under review.

The Combined Authority is currently developing a new plan covering the period 2025-2040. The Mayor's West Yorkshire Local Transport Plan core principles and strategies will replace the West Yorkshire Transport Strategy 2040, which is the current local transport plan for West Yorkshire.

A 12-week statutory public and stakeholder consultation was undertaken on the new LTP policies and preferred approach between July and October 2025. The next step is the LTP being presented for approval at the Combined Authority meeting in March 2026. The LTP will be adopted and published shortly after.

1.2.1 LTP objectives and network principles

Underpinning the LTP are four objectives and six network principles, which were assessed during the Compatibility Assessment portion of the ISA in August 2024. This assessment has been reported on separately.

The LTP's four objectives of the plan that were previously assessed are as follows:

- **Boosting productivity:** through a better-connected and more attractive West Yorkshire, which expands labour markets, increases innovation and creates jobs, supporting equitable and well-distributed growth.
- **Enabling inclusive growth:** by connecting people and communities with education, training, health and leisure opportunities to deliver equal access for all, and to eliminate transport related social exclusion.
- **Tackling the climate emergency:** through fair and inclusive decarbonisation, reduction of air and noise pollution, enhancement of biodiversity, and resilience to climate events.
- **Improving health and wellbeing:** of people and communities and reducing disparities in public health by promoting physical activity, supporting sense of place and improving air quality.

The LTP's six network principles of the plan are as follows:

- **Safe:** reducing crime and ensuring that people feel safe when travelling. Zero fatalities in the West Yorkshire road network.
- **Inclusive and affordable:** a welcoming network that provides equal access to opportunities for all, removes disadvantage and has affordable fares and tickets.

- **Integrated:** joined up ways to travel, services, timetables, tickets, fares and information.
- **Zero-emission:** cleaner, green options for travel, through electrification and alternative fuels.
- **Active:** everyone can access opportunities for walking, cycling and wheeling to help them live healthier lives.
- **Reliable and resilient:** a well-maintained network that is in good condition, punctual, provides a wide range of choices, and can withstand extreme weather.

The thematic policy chapters within the draft LTP align with these six network principles. Further information on the ISA of the thematic policies can be found in Section 4.1.

1.3 Reporting and Consultation as part of the ISA

Consultation is a core element of the ISA process. Consultation completed to date has been on the ISA Scoping Report.

The Scoping Report was issued for consultation to the three statutory consultation bodies, as well as a range of stakeholders, with a consultation running from Friday 5th April 2024 for a 5-week period. However, this was then extended to 31st May 2024 to allow further time for feedback, with all responses requested in writing by email or post. Consultation responses received as part of the consultation have been considered and appropriately actioned. These can be found in Appendix 3 within the ISA Scoping Report (Post consultation version, August 2024).

Furthermore, the draft LTP was subject to public and stakeholder engagement for an 8-week period in summer 2024. This included engagement on the vision, objectives, and emerging policies. However, ISA documentation was not included as part of this non-statutory engagement.

The 2025 ISA was subject to a 12-week statutory consultation period on the new LTP policies and preferred approach starting in July through to October 2025. Following consultation, this report and assessment tables were updated as a result of any relevant consultation comments. Comments were received from Historic England, Transport for the North (TfN), and White Rose Forest Council, as well as interested members of the public. Most of their comments were not focused on the ISA and were a matter for the LTP to consider. This was also a trend with individual feedback, as many comments centred on

new topics for the LTP to consider, the consultation process itself, and the iterative nature of the ISA. However, some comments required reconsideration of EqlA Screening Statement elements and mitigation presented against Objective 13, as well as mitigation related to health impacts, particularly for Policy ZE2. A more detailed summary of the ISA consultation feedback and any updates made to the report and/or assessment tables can be viewed in Appendix A.5.

2. Applying the Integrated Assessment Framework

2.1 Purpose and Scope of the ISA

The purpose of an ISA is to ensure the consideration and potential sustainability, health, social and economic impacts from implementing the Plan. This ISA contributes to the development of the Plan. It does this through an iterative assessment, which reviews the draft policies and infrastructure intervention types against the ISA framework.

Through this approach, the ISA has recommended ways in which the Plan can be improved. This is in line with Planning Practice Guidance which states: *“The development and appraisal of proposals in plans needs to be an iterative process, with the proposals being revised to take account of the appraisal findings.”* (PPG: Paragraph: 018 Reference ID: 11-018-20140306)

The ISA has considered the requirements and scope of:

- Strategic Environmental Assessment (SEA) in accordance with the Environmental Assessment of Plans and Programmes Regulations 2004 (SI 2004/ 1633, “2004 Regulations” as amended);
- Sustainability Appraisal (SA) (as required by section 19 (5) of the Planning and Compulsory Purchase Act 2004);
- Equality Impact Assessment (EqIA) (as required by section 149 of the Equality Act 2010, as amended); and
- Health Impact Assessment (HIA) (as outlined by national government policy).

In addition, a Habitat Regulations Assessment has been completed as required under Regulation 48 of the Conservation (Natural Habitats, &c.) Regulations 1994 (SI 1994/ 2716, “1994 Regulations”, as amended). The relevant scoping and assessment are within the standalone HRA Report.

2.2 Work Completed to Date as part of the ISA

Work undertaken to date includes the completion of Stages A to D of the ISA process (see Figure 1 below for a summary of the ISA Stages).

For Stage A, a scoping exercise was undertaken to set the context and the baseline and establish the ISA objectives. As detailed in Section 1.3, consultation was completed on the

ISA Scoping Report in spring 2024. The Scoping Report was issued for consultation to statutory consultation bodies and a range of stakeholders. Consultation responses received have been considered and appropriately actioned and are set out in the ISA Scoping Report appendix.

In 2024, assessment of the Plan's objectives and network principles against the ISA framework was also undertaken in the form of a Compatibility Assessment. This forms part of Stage B of the ISA process. This report and accompanying non-technical summary form part of Stage C of the ISA process. The ISA process is outlined in greater detail in Section 2.6.

In 2025, the Plan's thematic policies, reasonable alternatives, and proposed infrastructure intervention types were assessed against the ISA framework as part of Stage B of the ISA process. The main report, along with the accompanying Equality Impact Statement and non-technical summary, constitutes Stage C of the ISA process.

The 2025 ISA underwent a 12-week statutory consultation on the new LTP preferred approach from July to October 2025, and a detailed summary of the feedback received is provided in Appendix A.5. This report has been updated following this feedback, to reflect updated LTP text and any resulting amended ISA scoring. This constitutes Stage D of the ISA process.

2.3 Sustainability Appraisal and Strategic Environmental Assessment

SEA is a process which ensures environmental impact is considered at the formation of plans stage (i.e. the strategic level). SA does the same, but it takes in a broader scope of impacts, looking at the economy and local communities/wider society as well as the environment (i.e. the assessment headings looked at under the banner of sustainability). SA in the UK is mandatory for Local Plans under section 19 (5) of the Planning and Compulsory Purchase Act 2004, which requires a local planning authority to carry out SA of each of the proposals in a plan, during its preparation. SEA is mandatory under the Environmental Assessment of Plans and Programmes Regulations 2004 ("the SEA Regulations"). In the case of the LTP, the SA is included to demonstrate good practice.

2.4 Equality Impact Assessment

EqIA is designed to ensure that discrimination does not occur in the drawing up of plans and policies, and that such plans or policies meet the requirements of equality legislation in the UK, most notably the Equality Act 2010. It is being used as part of the ISA to add

value and depth to the assessment process, whilst demonstrating compliance with the Equality Act 2010 and the duties specified below. Under the Equality Act, public bodies are required to:

- Have due regard to the need to eliminate discrimination;
- Advance equality of opportunity; and
- Foster good relations between different people when carrying out their activities.

This ISA therefore considered in its scope, the likely effects on discriminatory practices; the potential to alter the opportunities of certain groups of people; and/or effect on relationships between different groups of people.

To understand which groups of people (or individuals), may suffer discrimination, the Equality Act sets out a series of “protected characteristics”:

- age
- disability
- gender reassignment
- marriage and civil partnership
- pregnancy and maternity
- race
- religion or belief
- sex, and
- sexual orientation.

EqlA is two-stage process:

- Stage 1: Screening - this involves the assessment of impacts of the strategy/plan against the protected characteristics outlined above. If no negative effects are identified during screening no further assessment is required. If there are effects that cannot easily be mitigated, a full EqlA should be undertaken.
- Stage 2: Full EqlA - this involves more in-depth assessment of the impacts of the strategy/plan, the recommendation of mitigation measures, definition of monitoring and evaluation measures and public consultation.

To ensure this ISA meets the requirements of EqlA, it considered whether there was potential for the Plan’s policy options to affect people differently based on the protected characteristics, which is reflected in the ISA Framework. Further details are set out in Appendix A.1 as part of the supporting detailed Equality Impact Screening Statement.

2.5 Health Impact Assessment

Although a Health Impact Assessment (HIA) is not a statutory requirement of the LTP, SEA requires an assessment of human health. Embedding HIA principles, including the determinants of health and Department of Health requirements, through screening questions ensures this ISA duty is met.

2.6 Integrated Assessment Stages

The approaches to SA, SEA, EqIA and HIA discussed above use similar assessment steps. Broadly speaking, these include:

- screening (i.e. deciding if the assessment is needed);
- setting the baseline context;
- identifying where there are impacts on defined relevant topics areas (e.g. climate change impacts, the determinants of health, or the impact on certain groups of people in society);
- understanding impacts of what is being assessed; and
- making recommendations for mitigation where necessary.

The structure of the ISA is based upon the process contained in the ODPM best practice guidance from 2005 on SEA¹, and Planning Practice Guidance on SEA and SA², updated in 2020. Through integration of equality and health considerations, the ISA framework (i.e. the central component of the ISA) ensures that all four assessment types are considered and completed. The ISA process is outlined in Figure 1 and described in more detail below.

Currently, the ISA has addressed Stages A (scoping) and B (assessment), with this report and the Plan's consultation (as set out in Section 1.2) forming part of Stage C and D.

¹ A Practical Guide to the Strategic Environmental Assessment Directive (ODPM September 2005)

Figure 1: The ISA Process

2.7 The ISA Framework

Developed as part of the scoping stage of work, the ISA framework is made up of a series of ISA objectives and assessment criteria which have been developed specifically for the Plan’s assessment. The ISA Framework is used to identify the likely social, economic and environmental effects and to guide mitigation and policy development.

Under the SEA guidance³, an objective is defined as “*a statement of what is intended, specifying a desired direction of change in trends*”. For the current ISA, objectives are specific aims that the Plan should strive to achieve. Crucially, the ISA objectives, as shown in Table 1 below, may differ from any stated objectives of the Plan, though it is acknowledged there may be synergies.

Table 1: The ISA Framework

No.	ISA objective	Assessment criteria <i>Will the LTP...</i>	ISA topic(s) (SEA topics)
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations? Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	Air; human health

³ A Practical Guide to the Strategic Environmental Assessment Directive (ODPM September 2005)

No.	ISA objective	Assessment criteria <i>Will the LTP...</i>	ISA topic(s) (SEA topics)
		Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi-functional benefits?	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites? Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks? Explore the suitable connectivity between green and blue infrastructure? Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery? Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO₂ where possible within transport schemes? Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure? Support Local Nature Recovery Strategies and work with local nature recovery groups?	Biodiversity, flora, fauna; human health; population
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility? Encourage a reduction in private car use? Encourage greater carbon efficiency in the movement of goods and people?	Climate factors; human health; air

No.	ISA objective	Assessment criteria <i>Will the LTP...</i>	ISA topic(s) (SEA topics)
		Encourage use of innovative new low and zero carbon transport technologies to reduce emissions? Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems? Encourage the prioritisation of climate change mitigation and adaptation? Encourage use of the transport estate for low carbon energy generation? Consider the specific transport needs of rural communities? Explore opportunities for low carbon construction materials and techniques? Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure? Support West Yorkshire's target of achieving net zero by 2038?	
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation? Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change? Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	Climate factors; human health; material assets

No.	ISA objective	Assessment criteria <i>Will the LTP...</i>	ISA topic(s) (SEA topics)
		Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain? Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements? Ensure that transport schemes and any related elements do not increase flood risk to others?	
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity? Promote sustainable waste management practices? Promote the use of recycled or secondary materials in construction? Promote a modal shift to sustainable transport to reduce fuel consumption? Promote the use of local suppliers and locally-produced materials in construction?	Material assets
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)? Minimise the use of impermeable hard surfacing? Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off? Support the use of nature-based solutions to protect aquatic habitats? Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	Water; soil; human health

No.	ISA objective	Assessment criteria <i>Will the LTP...</i>	ISA topic(s) (SEA topics)
		Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land? Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes? Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils? Avoid mineral safeguarding areas? Support the remediation of contaminated land and avoid additional contamination of soils?	Soil; biodiversity, flora, fauna; material assets
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)? Improve access to historic and culturally important sites by sustainable transport modes? Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	Cultural heritage; landscape; material assets
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character? Protect the special qualities and setting of nationally designated landscapes?	Cultural heritage; landscape; material assets

No.	ISA objective	Assessment criteria <i>Will the LTP...</i>	ISA topic(s) (SEA topics)
		Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape? Protect public rights of way? Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place? Improve the streetscape by removing unnecessary clutter?	
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)? Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space? Improve the quality and availability of active travel infrastructure? Explore synergies with green and blue infrastructure proposals for enhancing active travel routes? Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable? Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure? Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	Population; material assets; human health
11	Enhance economic prosperity and	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	Employment; economics

No.	ISA objective	Assessment criteria <i>Will the LTP...</i>	ISA topic(s) (SEA topics)
	access to opportunities	Improve accessibility to services, facilities, and amenities for all users? Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability? Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport? Contribute to establishing an effective and resilient transport network that increases investment? Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	
12	Improve health and wellbeing for all citizens and reduce inequalities in health (HIA specific objective)	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)? Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)? Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport? Promote accessibility to open space, recreational activities, and employment locations? Reduce the physical and perceived impact of the transport network to reduce severance issues?	Human health
13	Promote greater equality of opportunity for all citizens, with the desired	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and	Population

No.	ISA objective	Assessment criteria <i>Will the LTP...</i>	ISA topic(s) (SEA topics)
	outcome of achieving a fairer society (EqIA specific objective)	unemployed people, different sex and sexual orientation groups? Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users? Provide affordable transport options to ensure accessibility to key facilities and services for all users? Improve connections between communities? Enhance access to active travel routes and sustainable modes of transport in the most deprived areas? Improve access to information for all users to promote use of sustainable transport modes?	
14	Improve transport safety, reduce crime and fear of crime, and promote community safety (HIA and EqIA specific objective)	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities? Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all? Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists? Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas? Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	Human health; population
15	Reduce environmental impacts of	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	Air; human health

No.	ISA objective	Assessment criteria <i>Will the LTP...</i>	ISA topic(s) (SEA topics)
	transport including air, noise and light pollution (HIA and EqIA specific objective)	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels? Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels? Promote practices, equipment, and materials which reduce light pollution (e.g., minimum intensity light sources) to assist in improving health levels? Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	

2.8 Assessment Matrices

The assessment criteria comprise a series of considerations which are based on the specific issues, defined at the scoping stage. Using assessment criteria to appraise policy, infrastructure intervention types and reasonable alternatives helps the assessor to arrive at a conclusion about potential impacts in a methodical and consistent manner across ISA objectives; and therefore, helps stakeholders to understand the reasoning behind the assessment. The ISA framework is the starting point in the assessment matrices. The levels of effect used in the assessment matrices is defined in Table 2 below.

Table 2: ISA Levels of Effect

Score	Assessment Description
++	Very positive effect
+	Positive effect
?	Uncertain
-	Negative effect

--	Very negative effect
O	Neutral/no effect

Combined symbols are sometimes used in the assessment (e.g. '+/ ?' or '- / ?'). Where this occurs, it is because there is a strong likelihood of positive/negative effects but that there is insufficient information to achieve certainty at this stage. Alternatively, there may be a combination of positive or negative effects, depending on how the option under consideration is eventually delivered.

Effects are categorised as being likely to occur in the short-term (0-4 years), medium-term (5-9 years), or long-term (10+ years). The assessment also seeks to categorise if the effects are direct (i.e. primary) or indirect (i.e. secondary), and temporary or permanent. The likely spatial extent is also set out to consider if the effect will be a local, regional (i.e. West Yorkshire scale) or wider concern. Where applicable, a description of likely receptors or affected groups is also given, along with any cumulative or synergistic effects which might occur.

The SEA Directive requires that the assessment of effects includes direct/indirect (primary/secondary), cumulative and synergistic effects. As defined within this assessment, indirect (secondary) effects are effects that are not a direct result of the plan but occur away from an original primary effect; for example, improving active travel infrastructure which encourages people to use active travel modes and thus affects air quality in the local area.

As defined within this assessment, cumulative effects are where proposals may not have a significant effect individually, but in combination with other proposals, policies and projects could have a significant effect. Cumulative effects could be:

- Additive: the sum of all the effects together creating a new outcome;
- Neutralising: the sum of all the effects together counteracting each other to reduce the effect.

Synergistic effects are where two or more effects act together to create a greater 'interaction' or effect than when acting along; for example, developments which come forward that each fragment a green infrastructure network with limited effects on specific species, until collectively the network is too small to support the species.

3. Assessment of Reasonable Alternatives

The SEA Directive has a requirement for the ISA process, which includes the SEA, to consider: ‘reasonable alternatives taking into account the objectives and the geographical scope of the plan or programme’ and ‘give an outline of the reasons for selecting the alternatives dealt with’ (Article 5.1 and Annex I(h)). Reasonable alternatives can also be referred to as strategic scenarios or options.

The Planning Practice Guidance states that: “Sustainability appraisal should predict and evaluate the effects of the preferred approach and reasonable alternatives and should clearly identify the significant positive and negative effects of each alternative.” (PPG: Paragraph: 018 Reference ID: 11-018- 20140306). The following section outlines the reasonable alternatives and summarises the key findings from the assessment.

3.1 Defining the Reasonable Alternatives

The CA has identified reasonable alternatives which would satisfy the (SEA) statutory requirements placed upon the plan where an SEA is required. The assessment of these reasonable alternatives was carried out by evaluating the performance of each against the ISA Framework. To assess the reasonable alternatives against the ISA Objectives, a series of assumptions were developed by the CA, based on what are considered likely outcomes from each of the reasonable alternatives. The reasonable alternatives and associated assumptions are summarised in Table 3 below.

Table 3: Alternatives and assumptions (WYCA, 2025)

Strategic area	Alternative 1: Business-as-usual (BAU) (Continuation of the West Yorkshire Transport Strategy 2040)	Alternative 2: Focus on local sustainable travel	Alternative 3: Balanced approach
General – strategic approach	Support economic growth of major urban centres through transport investment in high quality public transport, together with improved orbital highway routes. Elsewhere, promote accessible new developments that support active travel and public transport use.	Focus on local journeys as the main driver for decarbonisation, complemented by support for public transport network to serve longer journeys.	Focus on improving mass transit connectivity (incl. rail, bus, Mass Transit) to key regional centres and areas of economic opportunity, supported by a highly integrated public transport and active travel network. Elsewhere, prioritise public transport-oriented development, supported by

Strategic area	Alternative 1: Business-as-usual (BAU) (Continuation of the West Yorkshire Transport Strategy 2040)	Alternative 2: Focus on local sustainable travel	Alternative 3: Balanced approach
			high-quality active travel networks.
Tackling the climate emergency	Decarbonisation of the network based primarily on electrification. Look for funding opportunities to expand the electric vehicle charging network (Including recharging facilities for taxis and the Car Club network) and continued ambition to deliver a near-to-zero emissions franchised bus fleet. Maximise re-use and recycling of materials in the renewal and maintenance of transport assets.	Emphasis on promoting active travel and low carbon lifestyles as a means to quickly tackling the climate emergency. Decarbonisation of the network based on step change in active travel provision for local journeys, complemented with investment in public transport to serve larger areas. Continued support for electrification of road transport. Continued work with the government in support of rail electrification.	Decarbonisation of the network based on step change in zero-carbon, clean public transport and active travel provision. Continued support to new fuels and electrification of the road network, plus car and cycle share schemes. Continued work with the government in support of rail electrification.
Public transportation and network integration	Bus investment focused on major radial corridors and hotspots. Continued support for P+R, both for bus and rail, and increase in number of parking spaces near key transport hubs. Continuation of gateway rail and bus station improvements in city and town centres. Continuation of the Mass Transit Vision. Work with the industry to enhance the rail network as the core of an integrated public transport system, including investment in capacity	Public transport complements investment in active travel –to serve larger areas and reduce the reliance on car journeys for town-to-city and village-to-city trips. Public support to shared micromobility in smaller towns where they may not be commercially viable. Integration supported by transport hubs in centralised locations to enable efficient interchange, as well as use of technology to allow users to plan, book and pay for	Focus on offering attractive alternatives to owning and using private cars and integrated, end-to-end journeys to provide sustainable access to areas of growth. Promotion of switch to zero emission fuels and shared transport for those journeys that can't be shifted. Key priorities increasing connectivity and integrating the public transport network (incl. rail, mass transit and the franchised bus network) with the active travel network to enable multi-modal door-

	tolerance' of transport-related deaths. Public realm improvements in town and city centres, in support of cycling and walking. Safety improvements and promotion of pedestrian friendly environments, paying attention to the needs of older and frailer people and those with disabilities. Continued engagement with operators, the wider sector and partners to make transport facilities more attractive for young, old, vulnerable and disabled people. Development of concessionary travel offers for targeted groups.	Strong focus on equity, removing barriers to access the network and ensuring schemes meet and exceed required design standards for accessibility, comfort and safety. Improve the affordability of the public transport network	Strong focus on equity, removing barriers to access the network and ensuring schemes meet and exceed required design standards for accessibility, comfort and safety. Improve the affordability of the public transport network. Investment on active travel routes and shared transport to provide missing links in the network and extend the reach of the public transport network to isolated urban communities and rural areas. Adoption of a 'child-first' approach, placing children at the heart of decision-making through collaboration, co-production, co-design and consultation. Support walking, wheeling and cycling to school and ensure bus services provide options for school travel.

3.2 Assessment Summary

This section outlines the findings of the reasonable alternatives assessment and suggests key mitigation or enhancement for each. Refer to Appendix A.2 for the full reasonable alternative assessment tables, including all suggested mitigation and enhancement.

Alternative 1: Business-as-usual

The business-as-usual alternative, or continuation of the West Yorkshire Transport Strategy 2040, performed well against the ISA Objectives, with a beneficial impact against nine of the objectives. This alternative performed strongly against protecting air quality,

reducing emissions from transport, supporting re-use and recycling, amongst other objectives.

However, due to a relatively less focus on sustainability, the performance against the other ISA Objectives is anticipated to be primarily neutral; except for ISA Objective 4 which has a negative alignment against increasing resilience of the transport network to climate change, due to having no reference to climate change adaptation within the BAU alternative.

The key suggested mitigation or enhancement for this alternative is as follows:

- Integrate green and blue infrastructure to enhance the natural environment and reduce environment impacts of transport.
- Include a greater focus on zero carbon public transport, active travel provision, local journeys, and supporting exploration of new fuels.
- Incorporate climate change mitigation and adaptation measures to enhance the resilience of the transport network.
- Implement shared cycling schemes and multi-modal door-to-door journeys across all of West Yorkshire to increase access to opportunities.
- Include a greater focus on design standards for accessibility and reconnecting isolated communities.
- Incorporate measures to create safer spaces in both active travel networks and communities.

Alternative 2: Focus on local sustainable travel

Alternative 2, or the focus on local sustainable travel, performed well against the ISA Objectives, with a beneficial impact against six objectives. This alternative performed strongly against protecting air quality, reducing emissions from transport, promoting sustainable modes of transport, amongst other objectives.

However, due to a relatively less focus on topics such as re-use and recycling, economic opportunities, and equality of opportunity, the performance against the other ISA Objectives is anticipated to be primarily neutral or uncertain; except for ISA Objective 4 which has a negative alignment against increasing resilience of the transport network to

climate change, due to having no reference to climate change adaptation within this alternative.

The key suggested mitigation or enhancement for this alternative is as follows:

- Integrate green and blue infrastructure to enhance the natural environment and reduce environment impacts of transport.
- Include a greater focus on zero carbon public transport, supporting exploration of new fuels, and mass transit connectivity.
- Incorporate climate change mitigation and adaptation measures to enhance the resilience of the transport network.
- Include measures to maximise re-use and recycling of materials in the renewal and maintenance of active travel assets.
- Implement public realm improvements in town, city and rural centres.
- Implement shared cycling schemes and multi-modal door-to-door journeys across all of West Yorkshire to increase access to opportunities.
- Incorporate measures for highway design interventions to improve safety and reduce road casualty.

Alternative 3: Balanced approach

The assessment of the reasonable alternatives found that the balanced approach performed the best overall across the ISA Objectives. The balanced approach performed very strongly over time in relation to protecting local air quality, reducing greenhouse gas emissions from transport, promoting sustainable modes of transport, enhancing economic prosperity, improving health and wellbeing, promoting greater equality of opportunity, and improving safety. These objectives all strongly support the four objectives of the proposed Plan (i.e., boosting productivity, enabling inclusive growth, tackling the climate emergency, and improving health and wellbeing).

However, due to a relatively less focus on topics such as green and blue infrastructure and maximising re-use and recycling, the performance against the other ISA Objectives is anticipated to be primarily neutral; except for ISA Objective 4 which has a negative alignment against increasing resilience of the transport network to climate change, due to having no reference to climate change adaptation within this alternative.

The key suggested mitigation or enhancement for this alternative is as follows:

- Integrate green and blue infrastructure to enhance the natural environment and reduce environment impacts of transport.
- Incorporate climate change mitigation and adaptation measures to enhance the resilience of the transport network.
- Include measures to maximise re-use and recycling of materials in the renewal and maintenance of transport assets.

3.3 Conclusion

The ISA of the reasonable alternatives shows that while all three alternatives have beneficial impacts against key ISA Objectives, the balanced approach (Alternative 3) is the most effective overall. It aligns well with the overarching LTP objectives of boosting productivity, enabling inclusive growth, tackling the climate emergency, and improving health and wellbeing. It promotes sustainable transport modes, enhances economic prosperity, and promotes equality of opportunity.

However, all alternatives lack explicit climate change adaptation measures, particularly for transport network resilience. Despite positive sustainability contributions, none sufficiently prioritise green and blue infrastructure, and only Alternative 1 emphasises circular economy principles like re-use and recycling. To achieve a fully integrated and sustainable approach, it is recommended to focus more on integrating green and blue infrastructure, embedding climate adaptation strategies, and increasing commitments to circular economy principles into sustainable transport infrastructure and asset maintenance.

For a full conclusion on the ISA of reasonable alternatives, see Section 5.1.

4. Assessment of the Mayor's West Yorkshire Local Transport Plan

This section contains a summary of the ISA of the Plan's thematic policies and infrastructure intervention type categories (the latter of which will guide development of the first LTP Implementation Plan, to be developed later in 2025).

There are several instances where strategic aims of the ISA are not applicable to the topic-based nature of the thematic policies or the focus of the infrastructure intervention types. Although it is acknowledged in these instances that each ISA topic is important, it is not possible or appropriate for each policy or infrastructure intervention type to cover every objective.

4.1 Thematic Policies (May 2025)

The draft version of the Plan (December 2024) included a section titled 'Delivering our Vision – the leading transport network principles', which focused on six network principles to support the Plan vision. The principles have been defined in Section 1.2.1 of this ISA report and were assessed as part of the ISA process in the 2024 Compatibility Assessment (as mentioned in Section 2.2).

Within the draft Plan, these principles are then used to frame the six thematic policy chapters, which contain a total of 47 policies. The thematic policy chapters support the overarching Plan objectives, with the overall aim of setting out how the Plan will deliver a leading transport network for West Yorkshire, benefitting people, places, and the planet by embedding sustainable transport choices to enable the economy to grow.

This stage of the ISA assesses each thematic policy against the ISA framework and various categories of potential effects (as set out in Section 2.8). This section outlines each ISA objective separately in order to provide a comprehensive and integrated summary of the thematic policy assessment.

A summary of the assessment findings is presented in the below Section 4.1.1; and Section 5.2.1 highlights overarching conclusions from the ISA of thematic policies. Following public consultation on the draft LTP in 2025, the policies were amended and subsequently reassessed to reflect changes to the policy text, with a summary of the updated 2026 assessment findings presented in Section 4.3.1.

4.1.1 Summary of Assessment Findings

The assessment findings identified a number of strengths in the thematic policies when assessed against the ISA objectives. In particular, the policies scored well in terms of protecting and enhancing air quality, promoting sustainable transport, improving health and wellbeing, enhancing economic prosperity, and reducing the environmental impacts of transport, all which support the four overarching objectives of the Plan.

The assessments findings also identify areas of weakness or uncertainty within the thematic policy chapters across protecting and enhancing the character and quality of landscape and townscape, improving safety, and increasing resilience to climate change. Key mitigation and enhancement recommendations have been outlined under the ISA objectives below, highlighting opportunities to further strengthen the Plan and future projects in the plan area, and therefore the plan as a whole.

For full details of each policy assessment, including suggested mitigation and enhancement, refer to the assessment tables in Appendix A.3. For a full conclusion on the ISA of thematic policies, refer to Section 5.2.

ISA Framework Objective 1: Protect and enhance local air quality

Policies related to 'Zero Emission' scored strongly against this objective, as they contribute directly to reducing emissions and play a key role in enhancing air quality across the region.

Policies promoting the 'Active' thematic policy chapter received mostly positive scores, as encouraging active travel could significantly reduce transport emissions and improve air quality. However, Policy A3 could benefit from incorporating synergies with green and blue infrastructure alongside active travel routes to provide more attractive and connected active travel routes.

The 'Reliable and Resilient' policies received a mix of positive, neutral, and negative scores. In particular, Policy RR2 and RR4 to RR6 scored strongly due to their potential to reduce traffic levels and improve air quality. Other policies could give more consideration to air quality when designing spaces for specific travel modes, especially Policy RR3 and RR8, which relates to the use of private cars and freight.

The policies under the 'Integrated' chapter scored mostly neutral or positive against the objective. Policy I8 and Policy I10 had a strong alignment as they reference bus and active travel, as well as shared transport, all of which will reduce congestion and therefore

improve air quality. Policy I10, however, could be enhanced by making explicit reference to reducing emissions as part of the Mass Transit Strategy. Policy I13 also had scored positively as it could enable a modal shift away from cars and also ensures wider placemaking benefits through green infrastructure. Additionally, Policy I16 had a positive alignment as it references tackling congestion and supporting a mode shift, which will support the minimisation of pollution.

The 'Inclusive and Affordable' policies generally scored neutral due to the lack of synergy between this theme and enhancing local air quality. However, Policy IA2 scored positively against the objective as improved air quality through traffic reduction and green and blue infrastructure can ensure healthy places for people. Policy IA5 also scored positively as it references sustainable transport modes; this could be enhanced by making the link to air quality improvements more explicit.

The policies under the 'Safe' theme scored neutral against the objective protecting and enhancing local air quality does not directly relate to safety. Policy S1, however, scored positively as although there is no direct reference to air quality, it is considered that embedding safety in design will increase the number of people using public transport and active travel routes.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Include measures to reduce traffic levels and limit private car use to reduce transport emissions.
- Make explicit reference to reducing emissions as part of the Mass Transit Strategy.
- Strengthen the link between air quality and policies that promote inclusivity and affordability.

ISA Framework Objective 2: Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network

Policies under 'Zero Emission' scored mostly neutral with some positive scores, as they were not designed to enhance biodiversity or geodiversity, but could indirectly contribute to reducing the impacts on habitats and important sites by mitigating air pollution from transport. Policy ZE2 scored more negatively as it could explore synergies with green and blue infrastructure to further strengthen its aim to reduce the harmful impacts of transport.

The 'Active' policies were generally scored as neutral, with Policies A1, A2, A5 considered to have weak alignment against the objective, which could support their aim to encourage and integrate active travel. It is recommended that these policies include considerations for enhancing green and blue infrastructure and avoid impacts on habitats to help creating more enjoyable and accessible active travel experiences.

Policies related to the 'Reliable and Resilient' thematic policy chapter were mostly scored as neutral against this objective. However, there is a need for more consideration of their potential impacts on habitats, important sites, and accessibility to green and blue infrastructure. This is particularly relevant to Policy RR1, which focuses on reallocating space for public transport. Policies could also benefit from including references to carbon sinks, which would help to reduce the environmental impacts associated with transport emissions and further improve the resilience of the transport system.

The policies under the 'Integrated' thematic policy chapter scored mostly neutral against the objective as protecting and enhancing biodiversity, geodiversity, and the green and blue infrastructure network does not directly relate to delivering joined up ways to travel. Policy I16, however, had a stronger alignment as it references tackling congestion and supporting a mode shift, which will support the minimisation of air pollution and have an indirect positive effect on the environment.

In general, the 'Inclusive and Affordable' policies scored neutral against this objective. Policy IA2, however, scored positively for its references to green and blue infrastructure, but had a weak alignment against the criteria which promotes good design through wildlife friendly approaches. The assessment therefore recommends making explicit reference to how it will enhance nature and biodiversity through good design and updating the policy wording to include 'placemaking'.

The policies under the 'Safe' thematic policy chapter scored neutral against the objective as protecting and enhancing biodiversity, geodiversity, and the green and blue infrastructure network does not directly relate to delivering joined up ways to travel. The assessment, however, still recommends that the Thematic Policy, specifically S5, could be enhanced through addressing safety around blue and green infrastructure, including parks and along canals, to increase accessibility for local communities.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Improve accessibility and integrate active travel routes with green and blue infrastructure.
- Consider transport impacts on habitats and important sites when reallocating road spaces, particularly regarding transport emissions.
- Improve design around green and blue infrastructure, incorporating wildlife-friendly approaches and safety measures.

ISA Framework Objective 3: Reduce greenhouse gas emissions from transport

Policies ZE1, ZE3 and ZE4 under the 'Zero Emission' thematic policy chapter scored strongly, as each of them includes a clear reference to reducing emissions and directly supports West Yorkshire's net zero target. However, Policy ZE2 could be improved by providing clearer measures to reduce greenhouse gas emissions to further align with its aim to reduce harmful impacts of transport.

Policies related to 'Active' received a mix of positive, neutral, and negative scores. While they generally support emission reductions and contribute to the net zero target, more consideration could be given to the specific needs of rural communities. Additionally, there is limited reference to reducing private car use, which would be key for improving the safety and overall experience for active travel users.

The 'Reliable and Resilient' policies generally scored neutral or positive, as they include initiatives to improve the efficiency of transport movements and have the potential to reduce emissions. However, the policies could include more considerations for the specific needs of rural communities. Policy RR3 received more uncertain scores as it is unclear whether the policy would encourage or discourage the use of private cars. Policy RR7 and RR8 would benefit from more explicit references to enhancing transport efficiency, whilst Policy RR9 could take a stronger role in providing net zero initiatives to improve the resilience of transport assets.

Policies across the 'Integrated' thematic policy chapter mostly scored positive or neutral. Policy I2 and I3 have a stronger alignment as promoting and improving connectivity to sustainable transport options could reduce private car use and encourage greater carbon efficiency in transport movements. Policy I10 also scored positively as mass transit will enhance sustainable transport availability and accessibility, encouraging greater carbon efficiency in the movement of goods and people. Policy I16 had a very strong alignment, as the levy will discourage private car use and encourage a model shift, tackling

congestion. The policy could be enhanced by making explicit reference to investing in low and zero carbon technologies, and the provision of levies in rural locations.

The policies under the 'Inclusive and Affordable' thematic policy chapter scored positive or neutral against the objective. Policies scored positively for prioritising and promoting sustainable transport options, considering the needs of rural communities, and improving digital connectivity. Policies IA3, IA4, and IA5 could be enhanced by making explicit reference to reducing emissions through sustainable transport modes.

The policies under the 'Safe' thematic policy chapter scored neutral or positive against the objective. Policy S1 and S4 scored positively as they reference delivering safe, sustainable modes of transport. Policy S3 also had a strong alignment as improving perceptions of safety can be achieved through reducing vehicular traffic and improving the availability and accessibility of other options which in turn, will reduce greenhouse gas emissions. Policy S5 scored positively as safe and secure sustainable transport will promote its use.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Consider the specific needs of rural communities in relation to active travel and public transport infrastructure.
- Include measures to reduce traffic levels and limit private car use to mitigate transport emissions.
- Incorporate climate change mitigation and adaptation measures, including low and zero carbon technologies, to enhance the resilience of the transport network.

ISA Framework Objective 4: Increase resilience of the transport network to climate change and associated extreme weather events

All policies under 'Zero Emission' scored neutral, as the topic primarily focuses on reducing emissions rather than addressing the climatic effects on transport.

Policies related to 'Active' were mostly scored as neutral, however, Policies A1, A2, and A6 have a key gap in considerations for active travel users during extreme weather events. It is recommended that the policies incorporate evacuation plans or improve access to real-time information for active travel users, ensuring their safety and continued mobility during adverse weather conditions.

Policies related to 'Reliable and Resilient' scored mostly neutral, with Policy RR1 found to have weak alignment against the objective due to its insufficient consideration of flood risk, which is relevant to reallocating spaces for transport. Policies RR2 and RR6 to RR8 also fell short as more considerations could be given to adaptation measures for infrastructure in response to extreme weather events. Additionally, Policy RR9 was considered particularly weak, as it makes no reference to climate change adaptation despite its aim of improving the resilience of transport assets.

The policies under the 'Integrated' thematic policy chapter scored neutral against the objective, as increasing resilience of the transport network to climate change and associated extreme weather events does not directly relate to delivering joined up ways to travel.

The policies under the 'Inclusive and Affordable' thematic policy chapter scored neutral against the objective, as increasing resilience of the transport network to climate change and associated extreme weather events does not directly relate to inclusivity and affordability.

The policies under the 'Safe' thematic policy chapter scored mostly neutral, however, Policies S1, S3, and S5 scored positively as they focus on improving safety and security through design, infrastructure, and service interventions, which could include climate mitigation and adaptation. The policies, however, could be enhanced by making more explicit reference to climate resilience in ensuring safe and secure environments.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Include plans for extreme weather events including evacuation plans and real-time information for all transport users.
- Consider impacts of climate change, including flood risks, in relation to transport management.
- Incorporate climate change mitigation and adaptation measures to enhance the resilience of the transport network.
- Make more explicit reference to climate resilience in ensuring safe and secure environments.

ISA Framework Objective 5: Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling

Policies under 'Zero Emission' generally have neutral or positive effects against this objective by contributing to the reduction of fuel consumption and enhancing resource efficiency. However, Policy ZE2 could be strengthened by making a more explicit reference to reducing fuel consumption as a measure to mitigate harmful impacts of transport.

Policies under 'Active' received mostly neutral scores, but all of which support the objective by encouraging a modal shift to more sustainable modes of transport and contributing to a reduction in fuel consumption.

The 'Reliable and Resilient' policies generally have neutral effects against the objective criteria, with Policy RR1, RR2, and RR4 scoring positively for promoting a shift towards more sustainable modes of transport to reduce fuel consumption. However, Policies RR3 and RR7 could have negative effects against this objective by potentially encouraging the use of private vehicles. Policies RR8 and RR9 could also be further strengthened, as there is opportunity for them to include reference to sustainable waste management practices.

The policies under the 'Integrated' thematic policy chapter generally scored neutral against the objective, however, many policies had a strong alignment in terms of promoting a modal shift to sustainable transport which will support a reduction in fuel consumption. It is recommended that I17 makes more explicit reference to the proposed content of the Leeds City Centre Movement Strategy to better align with the assessment objective.

The policies under the 'Inclusive and Affordable' thematic policy chapter scored mostly neutral against the objective; however, policies had a more positive alignment in terms of promoting a modal shift to sustainable transport, as inclusion and affordability can encourage its use and, in turn, reduce fuel consumption.

The policies under the 'Safe' thematic policy chapter scored neutral against the objective, as promoting the prudent use of natural resources, minimising the production of waste, and supporting re-use and recycling does not directly relate to safety.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Include more explicit reference to reducing fuel consumption and private car use by promoting a modal shift to sustainable transport modes.

- Incorporate measures to promote sustainable and circular waste management practices through the management of logistics and freights.
- Make explicit reference to the proposed content of the Leeds City Centre Movement Strategy.

ISA Framework Objective 6: Protect and enhance the water environment

Policies related to the 'Zero Emission' thematic policy chapter provide generally neutral effects against this objective, although Policy ZE2 could benefit from incorporating considerations to mitigate the impact of transport infrastructure on water quality. This could include measures such as integrating sustainable drainage systems and reducing the use of impermeable hard surfacing.

The 'Active' policies also scored mostly neutral. However, it is recommended that Policy A5 include considerations for the resilience of road surfacing and drainage systems, as the policy could involve construction of road infrastructure.

Most of the 'Reliable and Resilient' policies scored neutral against this objective. Policy RR1 scored more negatively due to the concerns that the reallocation of space might overlook its potential impact on road drainage and water quality. Additionally, Policy RR3 could include more considerations for reducing impermeable hard surfacing in relation to car parking spaces, and Policy RR9 could be strengthened by placing greater emphasis on climate change adaptation, particularly in relation to flood risks.

The policies under the 'Integrated' thematic policy chapter scored mostly neutral against the objective, as protecting and enhancing the water environment does not directly relate to delivering joined up ways to travel. Policy I1 and I2 had a weaker alignment as there is no reference to the consideration of minimising the use of impermeable hard surfacing, whereas the policy aims to deliver interchanges and could involve construction of new parking facilities. The assessment therefore recommends making explicit reference to minimising the use of impermeable hard surfacing in relation to creating new parking spaces.

The policies under the 'Inclusive and Affordable' thematic policy chapter scored neutral against the objective, as protecting and enhancing the water environment does not directly relate to inclusivity and affordability.

The policies under the 'Safe' thematic policy chapter scored neutral against the objective, as protecting and enhancing the water environment does not directly relate to safety.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Consider transport impacts on water quality, and incorporate mitigation measures, such as sustainable road drainage and reducing the use of impermeable hard surfacing.
- Incorporate climate change mitigation and adaptation measures to improve the resilience of the transport system, specifically in relation to managing flood risks.
- Minimise the use of impermeable hard surfacing in relation to creating new parking spaces.

ISA Framework Objective 7: Conserve soil resources and quality and seek to remediate contaminated land

Policies under the 'Zero Emission' thematic policy chapter all received neutral scores for this objective, as there is no direct link between the policies and the quality of soil resources.

Policies related to the 'Active' thematic policy chapter were generally scored as neutral, but Policies A1, A2, and A5 could benefit from including considerations for avoiding mineral safeguarding areas when designing active travel routes and road infrastructure.

The 'Reliable and Resilient' policies mostly have neutral effects, although Policy RR3 was scored negatively in relation to land use, as it may lead to the need for new car park construction. It is also recommended that Policy RR9 include considerations for the impacts on soil resources as part of its climate change adaptation measures to improve resilience.

The policies under the 'Integrated' thematic policy chapter generally scored neutral against the objective, as conserving soil resources does not directly relate to delivering joined up ways to travel. I1 and I2 had a weaker alignment due to lack of reference to considerations for land use. The policies could therefore make more explicit reference to encouraging the use of previously developed land in relation to constructing new transport infrastructure, such as transport interchanges and car parking.

The policies under the 'Inclusive and Affordable' thematic policy chapter scored neutral against the objective, as conserving soil resources does not directly relate to inclusivity and affordability.

The policies under the 'Safe' thematic policy chapter scored neutral against the objective, as conserving soil resources does not directly relate to safety.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Include reference to avoiding mineral safeguarding areas when designing for transport infrastructure.
- Consider the protection of soil resources and remediation of contaminated land in relation to improving climate resilience of transport.
- Incorporate considerations for land use planning and encourage the use of previously developed land for construction of transport infrastructure.

ISA Framework Objective 8: Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets

Policies under the 'Zero Emission' thematic policy chapter all received neutral scores, as this theme does not have a direct link to cultural or heritage assets.

Although the 'Active' policies are not directly relevant to this objective, it is recommended that Policies A1, A2, and A5 include more consideration for improving accessibility to key destinations, including cultural and heritage assets, to encourage the use of active travel. Additionally, there is limited reference to protecting heritage assets in relation to managing transport infrastructure.

Policies related to the 'Reliable and Resilient' thematic policy chapter were mostly scored as neutral. However, Policy RR9 scored more negatively due to the limited consideration for transport heritage assets in the asset management of the transport network.

Meanwhile, Policies RR7 could benefit from stronger references to improving accessibility to key locations, including cultural and heritage destinations.

The policies under the 'Integrated' thematic policy chapter scored mostly neutral against the objective; however, Policy I16 had a strong alignment, as tackling congestion will reduce damage to heritage assets caused by pollution.

The policies under the 'Inclusive and Affordable' thematic policy chapter scored neutral against the objective, as conserving and enhancing heritage assets does not directly relate to inclusivity and affordability.

The policies under the 'Safe' thematic policy chapter scored neutral against the objective, as conserving and enhancing heritage assets does not directly relate to safety.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Include more considerations for improving accessibility to key destinations, including cultural and heritage assets, to encourage active travel.
- Increase references to protecting heritage assets in relation to managing transport infrastructure.
- Address the limited consideration for transport heritage assets in the asset management of the transport network.
- Strengthen references to improving accessibility to key locations, including cultural and heritage destinations.

ISA Framework Objective 9: Protect and enhance the character and quality of landscape and townscape

The 'Zero Emission' policies scored mostly neutral against this objective, with the exception of Policy ZE2, which could benefit from considering measures to mitigate the impacts of transport on streetscapes, such as removing unnecessary clutter.

Policies related to 'Active' scored differently against each criterion, with half scoring neutral and half scoring negatively. More emphasis could be given to protecting public rights of way, removing unnecessary clutter, and safeguarding landscapes in relation to promoting active travel.

Policies under 'Reliable and Resilient' generally have neutral effects, although more consideration could be given to protecting public rights of way in the management of the transport network. Policies RR1 and RR9 received more negative scores due to their limited references to protecting landscapes and townscapes as part of the transport asset management considerations.

The 'Integrated' policies generally had a neutral scoring against this objective; however, there is weak alignment with Policy I13, and it has therefore been recommended that the policy explicitly references landscape and townscape, and ways in which to specify features of it, when discussing ensuring wider placemaking matters. Policy I17 also had a weak alignment, as there is no reference to public rights of ways or removing unnecessary

clutter. The assessment recommends making more explicit reference to the proposed content of the Leeds City Centre Movement Strategy to ensure it better aligns with the assessment objective. Policy I16 scored positively as it references tackling congestion and supporting a mode shift, which will have an indirect positive effect on the environment and heritage assets.

The 'Inclusive and Affordable' policies generally had a neutral scoring against this objective; however, there was weak alignment in terms of enhancing the character and quality of landscape and townscape and making the link between public rights of ways and connectivity. The assessment therefore recommends making more explicit to respectful design and maintenance, and utilising public rights of way and nationally designated landscapes to deliver high quality and healthy places. The policy could also be enhanced by including specific principles which align with the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.

The policies under the 'Safe' thematic policy chapter scored neutral against the objective, as protecting and enhancing the landscape does not directly relate to safety.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Protect public rights of way, remove unnecessary clutter, and safeguard landscapes to promote active travel.
- Protect public rights of way and include references to protecting landscapes and townscapes in transport asset management
- Make explicit reference to the proposed content of the West Yorkshire Streets for Everyone Strategy and the Leeds City Centre Movement Strategy.
- Emphasise respectful design, maintenance, and use of public rights of way and nationally designated landscapes for high-quality, healthy places.

ISA Framework Objective 10: Promote sustainable modes of transport, including public transport and active travel

Policies under 'Zero Emission' scored mostly neutral or positive for promoting the shift in fuels and transport modes to enhance the sustainability of transport. However, Policy ZE2 could explore additional opportunities to enhance public transport and active travel infrastructure as a measure to further reduce the harmful impacts of transport.

The 'Active' policies contribute positively to this objective by promoting active travel. However, policies scored negatively against criteria that require consideration for improving the accessibility of active travel to key services. It is recommended that policies include more specific measures and coordinate with land use planning to effectively promote active travel, especially in Policies A1 and A2.

Policies related to the 'Reliable and Resilient' thematic policy chapters received a mix of positive, neutral, and negative scores. Policies RR1, RR2, and RR4 directly support a modal shift towards sustainable modes of transport. However, Policy RR1 could have negative effects on active travel by prioritising public transport over other modes in road space reallocation. Policies RR3 and RR8 have relatively weak alignment to this objective, as they have the potential to encourage the use of private vehicles without references to prioritising sustainable transport options.

The scores across the 'Integrated' thematic policy chapter varied between policies. There was a strong alignment with regard to promoting a modal shift to sustainable forms of transport and improving the quality and availability of active travel infrastructure. There was a weaker alignment against encouraging a shift to low emission vehicles and exploring synergies with green and blue infrastructure proposals for enhancing active travel routes. The policies could be strengthened by including the explicit reference to promoting sustainable modes through enhancing green and blue infrastructure, and low emission vehicle infrastructure. For Policy I17, in particular, it has been recommended to make explicit reference to the proposed content of the Leeds City Centre Movement Strategy to better align with the assessment objective.

The scores across the 'Inclusive and Affordable' thematic policy chapter varied between policies. Policies IA2, IA3, IA4, and IA5 have a strong alignment as they reference removing types of vehicle traffic parking, removing barriers to public transport access, and enhancing infrastructure and connectivity. Policy IA2, however, references the West Yorkshire Streets for Everyone Strategy, so could also include specific principles to align with, in addition to the strategy reference, as this is yet to be adopted. Policies IA1 and IA6 have a weaker alignment, as they do not explicitly state how sustainable transport will be prioritised, and in particular, promoted to children and young people, in line with the objective criteria. The assessment therefore recommends that the policies make more explicit reference to how sustainable modes will be promoted, for example, through improving affordability, accessibility, and quality.

The 'Safe' policies that support safety were generally scored as neutral or positive. Policies S1 and S2, in particular, scored strongly, due to their promotion of sustainable forms of transport and improvements to street design. Policy S2, however, references the West Yorkshire Streets for Everyone Strategy, so could also include specific principles to align with, in addition to the strategy reference, as this is yet to be adopted.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Explore additional opportunities to enhance public transport and active travel infrastructure as a measure to further reduce the harmful impacts of transport.
- Coordinate with land use planning to effectively promote active travel
- Discourage private car use and include sustainable transport options.
- Include specific principles to align with the West Yorkshire Streets for Everyone Strategy and the Leeds City Centre Movement Strategy, once adopted.
- Reference how sustainable modes will be promoted, for example, through improving green and blue infrastructure, affordability, accessibility, and quality.

ISA Framework Objective 11: Enhance economic prosperity and access to opportunities

Policies that support 'Zero Emission' were generally scored as neutral or positive, largely due to their emphasis on investments in decarbonisation initiatives, which could generate economic benefits for the region. However, these policies do not explicitly address improving access to opportunities.

Policies related to the 'Active' thematic policy chapter scored positively for their potential to drive economic outcomes and investments through the promotion of decarbonisation. However, the policies could benefit from more explicit reference to measures that enhance accessibility of active travel to employment locations.

Policies under the 'Reliable and Resilient' thematic policy chapter generally have positive effects against this objective in terms of improving accessibility and reducing journey times for passengers, with the exception of Policies RR7 and RR8, which could benefit from further emphasis on this aspect. Additionally, Policy RR7 could provide more considerations for improving accessibility to key services and opportunity locations through enhancements to the Key Route network (KRN).

‘Integrated’ Policies received a mix of scores. Policies I12 to I14 had a weaker alignment due to their lack of reference to delivering sustainable growth and maximising opportunities in areas which could benefit from this, such as areas with high levels of unemployment and major employment growth areas. These policies could be enhanced by making explicit reference to access to opportunities and how this can maximise growth. Policy I17 also scored weakly and it has been recommended that explicit reference to the proposed content of the Leeds City Centre Movement Strategy is added to ensure alignment with the assessment objective. Other policies had a stronger alignment with the objective, as they focus on providing joined up infrastructure, services, and information which will improve access to opportunities.

Within the ‘Inclusive and Affordable’ Chapter, all policies had a positive alignment in terms of focusing on reducing social exclusion through accessibility, tackling community severance, and connecting isolated urban communities to employment and education. Policy IA3, however, had weak alignment; whilst it focuses on connecting rural areas, it fails to make the explicit reference that Policy IA1 makes regarding education and employment. The assessment therefore recommends that this policy make explicit reference to education and employment, and directly address the issues faced by rural communities, young people, and those in areas with high levels of unemployment in accessing opportunities, such as travel availability, convenience, and reliability.

The policies under the ‘Safe’ thematic policy chapter scored mostly neutral against the objective. Policy S3 and S5 had a stronger alignment as it improving safety will help to improve accessibility to services, facilities, and amenities which previously may have been avoided.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Include measures to enhance accessibility of active travel to employment locations.
- Consider improving accessibility to key opportunity locations through transport network enhancements and Key Route Networks.
- Make explicit reference to access to opportunities to maximise growth.
- Make explicit reference to the proposed content of the Leeds City Centre Movement Strategy.

- Make explicit reference to education and employment and address issues faced by rural communities in accessing opportunities.

ISA Framework Objective 12: Improve health and wellbeing for all citizens and reduce inequalities in health

Policies related to 'Zero Emission' scored mostly neutral or positive, as they indirectly contribute to improving the health and wellbeing of local residents by reducing air pollution. However, the policies do not offer additional benefits in relation to this objective.

While policies related to the 'Active' thematic policy chapter scored positively for promoting health and wellbeing, however, they fall short in providing measures to enhance accessibility to health and education facilities through active travel. It is also recommended that policies incorporate measures to reduce severance issues to further encourage the use of active transport modes.

The 'Reliable and Resilient' policies generally had neutral effects. However, Policies RR1, RR2, and RR7 could benefit from further emphasis on improving accessibility to health and educational facilities, and reducing severance issues of the transport network. On the other hand, Policies RR4 to RR6 were considered to have positive effects in addressing severance issues, as well as Policy RR8 which has explicit reference to reducing negative impacts on health.

The policies under the 'Integrated' thematic policy chapter scored mostly neutral against the objective. Policy I16 scored positively as it references tackling congestion and supporting a mode shift, which will support the minimisation of pollution and have a positive effect on public health. A mode shift to active travel will also promote active, healthy lifestyles. Reinvesting in transport will also improve access and connectivity across West Yorkshire by sustainable transport modes. However, the policy could still be enhanced by making explicit reference to a mode shift to active travel.

Policies under the 'Inclusive and Affordable' thematic policy chapter mostly had neutral effects. Policy IA2 scored positively as it focuses on delivering healthy places for people. Policy IA1 and IA5 also had a strong alignment as they reference improving accessibility and connecting isolated communities to employment, education, services, and leisure. Policies IA4 scored positively as reducing healthcare costs means people dedicate more income on health needs, and The Thematic Policy could be enhanced by making more explicit reference to connecting communities to healthcare services and promoting the

health and wellbeing of children and young people through tailored active travel provision and access to open space and healthy recreation.

‘Safe’ policies generally scored neutral or positive against this objective, as safe mobility and a reduction in severance will reduce accidents, improving health and wellbeing, particularly for high-risk groups. Policy S4 on Delivering Vision Zero scored particularly positively, as it refers to increasing healthy mobility for all in West Yorkshire.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Incorporate measures to reduce severance issues to further encourage the use of active transport modes.
- Focus more on health service accessibility.
- Introduce specific measures to enhance accessibility to health facilities through active travel.

ISA Framework Objective 13: Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society

Although the ‘Zero Emission’ thematic policy chapter is not directly relevant to this objective, Policy ZE1 includes a positive reference to transitioning to a public owned bus fleet, which could improve the affordability and accessibility of public transport.

Additionally, Policy ZE2 could be improved with further emphasis on promoting the accessibility of sustainable transport modes in deprived areas to mitigate harmful impacts on residents.

Policies related to the ‘Active’ thematic policy chapter make good reference to wheeling as part of active travel. However, most policies fall short in addressing the specific needs of vulnerable groups and deprived areas. It is recommended that policies include references for inclusive designs that address the needs of different groups and improve connectivity between communities. Policy A5 received more positive scores for enhancing connectivity across the region.

Policies under the ‘Reliable and Resilient’ thematic policy chapter scored mostly neutral. Policies RR1, RR7, and RR9 could give more consideration to addressing the needs of the most deprived areas. Policy RR4 received uncertain scores in relation to promoting greater equality, as it could further clarify that the removal of on street parking will not impact

disabled parking. In addition, Policies RR2 and RR3 could be further improved by including reference to measures that address the specific needs of different groups.

The scores for the 'Integrated' thematic policy chapter varied greatly. Policy I1 and I2 scored positively as it references ensuring transport interchanges are accessible for all and improving connectivity. Policy I5 scored well as it is aimed at making the network easy to navigate and legible for everyone through branding, marketing, and wayfinding. The policy could be enhanced by making explicit reference to improving the travel confidence of disabled and low mobility users through, and the tools that will be provided to support them, such as level flooring, drop kerbs, and ramps. Similarly, the policy concerning integrated fares and tickets (Policy I7) scored positively as it focuses upon reflecting diverse passenger needs, but could be enhanced by making explicit reference to digital and paper tickets, and how these can be accessed to ensure no one is excluded from offers. It could also ensure better access to information when changes are made to the payment system. Policies I11 to I14, however, had weak alignment to the objective, as they do not explicitly reference equality of opportunity, accessibility, affordability and inclusion, despite focusing on connectivity, sustainable development, and placemaking.

Despite being focused on achieving a fairer society, the scores across the 'Inclusive and Affordable' thematic policy chapter varied. Policy IA1 had a strong alignment as it references connecting isolated urban communities. Policy IA5 scored positively for ensuring that no one is excluded from the transport network, along with Policy IA4 which seeks to reduce transport related social exclusion. IA6 had weak alignment with promoting accessibility and inclusive design particularly for low mobility and disabled users, and access to information, however, scored positive/neutral against other criteria. Policy IA3 also scored weakly in terms of promoting greater equality of opportunity and connecting rural areas through affordability and accessibility. The Thematic Policy could be enhanced by making more explicit reference to how the transport network will meet the needs of specific groups, particularly vulnerable and underrepresented groups, as well as access to information for all users.

The 'Safe' thematic policy chapter has strong alignment with this objective, particularly policies S1, S2, and S4, due to referencing wheeling, 'all users', at risk groups, and equitable mobility. Policy S5 also had positive effects as improvements in safety can encourage groups who wouldn't typically use public transport and active modes to travel using these methods, therefore improving access to opportunity for all. In general, the policies under this theme which reference the West Yorkshire Streets for Everyone

Strategy could also include specific principles to align with, in addition to the strategy reference, as this is yet to be adopted.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Better address the specific needs of vulnerable groups and deprived areas, explicitly referencing how the transport network will do this.
- Make explicit reference to improving the travel confidence of disabled and low mobility users through, and the tools that will be provided to support them, such as level flooring, drop kerbs, and ramps.
- Make explicit reference to digital and paper tickets, and how these can be accessed to ensure no one is excluded from offers.
- More consideration could be given to improving connections between communities.
- Explicitly reference equality of opportunity and inclusion.
- Include specific principles to align with the West Yorkshire Streets for Everyone Strategy, once adopted.

ISA Framework Objective 14: Improve transport safety, reduce crime and fear of crime, and promote community safety

All policies in the 'Zero Emission' thematic policy chapter received neutral scores for this objective, as they are not directly relevant to enhancing safety.

Policies A1 to A3 under the 'Active' thematic policy chapter scored negatively against this objective, with Policy A6 scored more positively, and Policies A4 and A5 considered neutral. This is due to the policies encouraging active travel but lacking explicit references to ensuring the safety of active travel users. Although Policy A6 focuses on enhancing neighbourhood safety, it does not provide specific measures to create a more welcoming environment for active travel.

While Policies under the 'Reliable and Resilient' thematic policy chapter are not highly relevant to this objective, Policies RR5 and RR6 scored more positively as they were considered effective in managing congestion and improving road safety. It is recommended that Policies RR1, RR2, RR7, and RR8 include more explicit references to

reducing risks for vulnerable road users, as these policies would have a greater impact on road management.

Policies under the 'Integrated' thematic policy chapter are generally neutral, however, Policies I1 and I8, which relate to welcoming transport interchanges and shared transport hubs, scored weakly due to a lack of reference to safety. The assessment recommended making explicit reference to developing safe transport hubs and interchanges and how this could be achieved. Policy I17 also had a weaker alignment as it does not reference road safety or traffic calming measures, and therefore it is recommended that the policy makes more explicit reference to the proposed content within the Leeds City Centre Movement Strategy to better align with the objective. Policy I16 had a positive alignment as funds from parking levies can be allocated to safety initiatives, such as better street lighting and traffic calming measures, further enhancing overall safety.

Several of the 'Inclusive and Affordable' policies scored weakly against this objective, including those relating to connecting isolated urban communities and rural areas, and transport for children and young people. The assessment recommended that the policies could make explicit reference to how safety will be embedded across the transport network, specifically to protect more vulnerable groups. Policy IA1 and IA3 could also reference improving freedom of movement through safety initiatives and therefore improving connectivity and access to opportunities. For Policy IA2, it has been recommended to make explicit reference to 'public realm' within the policy wording.

The 'Safe' policies scored strongly against this objective due to their focus on ensuring that people feel safe when travelling. Policy S3 scored particularly well through encouraging improvements in perceptions of safety by embedding best practice across the transport network, with a focus on the most at risk groups. These interventions could lead to a reduction in both crime and fatality levels across West Yorkshire, therefore resulting in improved feelings of safety.

In general, the policies which reference the West Yorkshire Streets for Everyone Strategy (such as Policy S2 and IA2) could also include specific principles to align with, in addition to the strategy reference, as this is yet to be adopted.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Include explicit safety measures for active travel users and provide specific measures to create a more welcoming environment for active travel.

- Include more explicit references to reducing risks for vulnerable road users.
- Reference the proposed content within the Leeds City Centre Movement Strategy to better align with the objective.
- Make explicit reference to how safety will be embedded across the transport network, transport hubs, and interchanges, specifically to protect more vulnerable groups.
- Include specific principles to align with the West Yorkshire Streets for Everyone Strategy, once adopted.

ISA Framework Objective 15: Reduce environmental impacts of transport including air, noise and light pollution

Policies in the 'Zero Emission' thematic policy chapter generally scored positively as they contribute to reducing the environmental impacts of transport by minimising emissions, particularly in relation to air quality. However, Policy ZE2 has the potential to introduce more specific measures to address poor air quality and noise.

Thematic Policies related to 'Active' generally scored strongly against this objective, as promoting active travel could mitigate the impact of transport on residents and the environment. However, Policies A1 could benefit from greater consideration of measures to create a more welcoming environment for active travel users. Meanwhile, Policies A2 and A5 could make more explicit reference to minimising the construction impacts if a need for new road infrastructure arises.

Most policies under the 'Reliable and Resilient' thematic policy chapter were considered to have a neutral or positive effect, as the active management of the transport network can help to reduce transport impacts. Policies RR2 and RR5 scored particularly strongly with their effects on improving travel efficiency and reducing travel needs. However, Policies RR3 and RR8 scored more negatively as they could potentially encourage freight movement, posing greater impacts on the environment and local communities.

Policies under the 'Integrated' thematic policy chapter scored mostly neutral. Policy I3 scored positively due to consistent branding and marketing promoting sustainable choices, which could help to reduce pollution and improve health levels. Policy I16 also had a positive alignment as it references tackling congestion and supporting a mode shift, which will support the minimisation of air pollution. However, Policy I1 scored weakly against improving the impact of transport on the local environment to create more amenable

areas, as there is no reference to the specific measures to address this, whereas the policy aims to deliver interchanges that are welcoming spaces.

Policies under the 'Inclusive and Affordable' thematic policy chapter scored neutral, except for Policy IA2, which received positive, weak, and uncertain scores. The criteria promoting practices, equipment, and materials which reduce air pollution to assist in improving health levels scored positively due to links with delivering healthy places through removing vehicle traffic from roads. Similarly, the criteria focused upon creating more amenable areas scored strongly, as it referenced play and the provision of green and blue infrastructure. The Policy scored uncertain in terms of reducing pollution and weakly for vibration related to construction, equipment, and materials, and therefore the assessment recommended making explicit reference to delivering healthy places through healthier construction and operational practices.

All policies under the 'Safe' thematic policy chapter scored neutral against this objective, except for Policy S1, which had a strong alignment in terms of promoting active travel by providing safe environments for walking, wheeling, and cycling.

The key suggested enhancements or mitigations identified through this ISA objective that apply to the plan are as follows:

- Introduce more specific measures to address poor air quality, noise, and the environmental impact of transport.
- Make explicit reference to limiting private car use and minimising transport emissions.
- Emphasise the delivery of healthy places through healthier construction and operational practices.

4.2 Infrastructure Intervention Types (May 2025)

The Plan and its proposed policies will be implemented through a range of infrastructure interventions, delivered within short-term Implementation Plans typically covering a 5–6-year period.

The draft LTP sets out a set of strategic priorities for delivery and investment, which will form the basis of the Implementation Plans across the life of the LTP. These are as follows:

- A new Mass Transit system, integrated into wider transport system;

- A stable, franchised bus network, supported by bus priority and better passenger facilities;
- A more reliable rail system, through reform and network investment;
- Better, safer walking and cycling infrastructure;
- Enhanced transport and highways asset and network management with increased capital and revenue investment;
- Integrated passenger services and behaviour change.

Infrastructure interventions are expected to range across the categories set out in the following Table 4, as provided by the CA.

Table 4: Infrastructure intervention types (WYCA, 2025)

Infrastructure intervention types	Example infrastructure interventions
A. Infrastructure improvements (physical improvements)	Rail improvement including gateway improvements at major stations, delivery of new stations and network infrastructure upgrades at key points across the region Major and local bus station improvements, along with improvements to bus stops across the region – as well as improving access to bus stations and bus stops Interchange improvements between modes at our bus and rail stations, including smooth interchange between public transport modes, walking wheeling and cycling, and other types of transport including private hire and taxi access. Measures will reduce barriers to access and improve personal safety, ensuring our network is accessible to all Shared transport hubs integrated with our public transport, active travel networks and taxi and private hire vehicle provision, including further roll out of our car club network and other car share schemes Mass Transit Phase 1 Delivery - connecting communities between Leeds and Bradford with Phase One of the network guided by the approach set out in our Mass Transit Vision. Park and ride sites enabling improved connectivity to our public transport and active mode networks. In addition, delivery of a new West Yorkshire Mass Transit Strategy, that builds on our Mass Transit Vision and outlines how we will develop our future mass transit network that integrates with rail, a franchised bus network, active travel and shared transport. Electric vehicle charging infrastructure for zero emission cars, vans and motorcycles; alongside support for the development of alternative fuels infrastructure to enable the decarbonisation of heavy vehicles

Infrastructure intervention types	Example infrastructure interventions
	Measures to improve safety and reduce casualties on our roads, especially for the most vulnerable road users – delivering on our Vision Zero Strategy Improvements to our village, town and city centres, as well as local high streets and neighbourhoods. Delivering high quality healthy places for people; creating connected and safe neighbourhoods where walking wheeling and cycling are safe and convenient for local journeys and access to public transport, and ensuring neighbourhoods are not dominated by non-local through traffic Improvements to walking and cycling provision both on our highways through reallocated roads as part of our Streets for Everyone strategy, as part of wider sustainable travel corridor schemes; improvements to on off-road cycling and walking routes, on greenways, footpaths and bridleways Bus priority and journey time improvement measures on key sustainable travel corridors through reallocated roads as part of our Streets for Everyone strategy Decarbonisation of the public transport system a publicly owned, zero emission bus fleet by 2036, and electrification of key rail links in the region, reducing emissions and improving services Support and promotion of cycle sharing initiatives in the region Improved wired and wireless coverage for digital connectivity, improving connection speeds and access. Supporting a connected network and reducing the need to travel
B. Policy and regulation measures	Development of a West Yorkshire Streets for Everyone Strategy Working in partnership with local authorities and taxi organisations on common standards for taxi licencing across the region Development of a fair and equitable place-based approach to car parking at destinations, and making productive use of kerb space as part of schemes to improve facilities for bus, cycling and walking. Improving cycle and motorcycle parking at destinations as part of this approach Delivery of our Freight Strategy with partnership working with the freight and logistics sector to improve reliability and resilience, and reduce the impacts on communities Development of a regionally strategic approach to integrating development and land use planning, aligning development with transport infrastructure – as part of a transit oriented approach to development. Working with planning authorities to ensure new developments are accessible and promote walking, cycling, bus and Mass Transit.
C. Maintenance and asset management; network	Programmes of highways and public transport asset management and maintenance improvements, to deliver a consistent offer across the leading transport network

Infrastructure intervention types	Example infrastructure interventions
management and operations	Improvements to management of our highways network, through an Urban Traffic Management Control strategy, which can deliver improved traffic management measures and technology to improve network efficiency that supports bus reform, and other management measures such as changes to speed limits. Support for enforcement of traffic and parking restrictions where needed. Review of the Key Route Network (KRN) in the region and working with National Highways to co-ordinate our management of the KRN with their management of the Strategic Road Network
D. Transport service improvements and passenger offer	Strengthened bus services through bus franchising Introduction of a consistent integrated transport brand Improved passenger information across a range of channels for all users, including at public transport stops and interchanges, digital channels as well as phone and printed information. Ticketing improvements and affordable transport fares Network Integration between bus, rail to ensure joined-up services and timetabling as well as improvements to physical interchange Improvements to transport services to address urban and rural isolation for those communities excluded by the current network; as well as ensuring the transport network meets the needs of children and young people Measures to address noise, severance and air quality impacts on local communities affected by road, passenger and freight traffic
E. Behaviour change, engagement, education and consultation	Behaviour change programmes to encourage and enable more use of sustainable travel modes as an alternative to the car; including training, marketing campaigns and events. Programmes will also support vision zero aims, to improve road safety and driver behaviour Development of strategy and projects with community consultation and engagement at the heart of our delivery, as part of an inclusive approach to engagement
F. Data, technology and innovation	Travel information gives the right tools and information from the bus stop to mobile devices. Feasibility studies to investigate opportunities and interventions which help unlock and further the potential of future mobility, digitally connected technology, autonomous vehicles and the concept of a 'future city' Enhancements to data collection capabilities and partnership working to share data between partners; further development of transport analysis tools such as the region's Strategic Transport Model

Infrastructure intervention types	Example infrastructure interventions
G. Cross-cutting and enabling interventions; capacity and capability improvements	Investment in education and training to create the diverse, skilled workforce we need in the region in order to plan, deliver, operate and maintain our transport network. Development of a Market Growth Strategy, to identify complementary measures to grow the market for sustainable travel in our areas of highest public transport accessibility in a fair and equitable way. This could include exploration options for raising new funding locally, including through fiscal measures such as Workplace Parking Levies. Embedding principles needed to support a climate-resilient transport network, and a nature-rich region into what we do Continued and improved partnership working with a range of partners at local, national and regional level Investment in partners' capacity and capability, with training and skills development, strengthening teams across transport planning, delivery and operational areas Technical studies and strategy development to develop our evidence base and support our delivery of improvements to the transport

This stage of the ISA assesses each infrastructure intervention type, or potential intervention, against the ISA framework and various categories of potential effects (as set out in Section 2.8). This section outlines each infrastructure intervention type separately in order to provide a focused summary of the infrastructure intervention type assessment, which can then be fed into subsequent LTP Implementation Plan development.

The infrastructure intervention types have not been reassessed during the 2026 2nd iteration of the ISA, as they are focused on implementation plan approach and remain unchanged, with potential impacts to be considered at the detailed project stage as schemes are developed.

A summary of the assessment findings is presented in the below Section 4.2.1; and Section 5.3 highlights overarching conclusions from the ISA of infrastructure intervention types.

4.2.1 Summary of Assessment Findings

The assessment findings identified a number of strengths in the infrastructure intervention types when assessed against the ISA objectives. In particular, the types scored well in terms of protecting and enhancing air quality, reducing greenhouse emissions from

transport, promoting sustainable modes of transport, enhancing economic opportunity, promoting greater equality of opportunity for all citizens, and reducing the environmental impacts of transport.

The assessments findings also identify areas of weakness or uncertainty within the infrastructure intervention types across increasing resilience to climate change and protecting local air quality. Key mitigation and enhancement recommendations have been outlined under the infrastructure intervention types below, highlighting opportunities to strengthen the forthcoming infrastructure interventions which will be included in the LTP Implementation Plan (which is still in development at the time of writing).

For full details of each infrastructure intervention type assessment, including suggested mitigation and enhancement, refer to the assessment tables in Appendix A.4.

Infrastructure intervention type A: Infrastructure improvements

The 'infrastructure improvements' infrastructure intervention type performed well against the ISA objectives, with a slight, moderate or largely beneficial impact against eight objectives. This infrastructure intervention type performed strongly against ISA Objective 3 and 10 which relates to reducing greenhouse gas emissions from transport and promoting sustainable modes of transport.

This infrastructure intervention type has been scored as having a slight adverse impact on increasing the resilience of the transport network to climate change and associated extreme weather events (ISA Objective 4) as there is no reference to climate change impacts.

The key suggested mitigation or enhancement for this infrastructure intervention type is as follows:

- Integrate green and blue infrastructure and mitigation to reduce environment impacts of transport into physical improvements.
- Incorporate climate change mitigation and adaptation measures to enhance the resilience of the transport network.
- Incorporate measures to promote sustainable and circular waste management practices through physical improvements to infrastructure.
- Ensure physical transport improvements are done equitably to promote greater equality of opportunity.

Infrastructure intervention type B: Policy and regulation measures

‘Policy and regulation measures’ performed well against the ISA objectives, with a slight, moderate or largely beneficial impact against six objectives. This infrastructure intervention type performed strongly against ISA Objective 10 which relates to promoting sustainable modes of transport.

This infrastructure intervention type has been scored as having a slight adverse impact on increasing the resilience of the transport network to climate change and associated extreme weather events (ISA Objective 4) as there is no reference to climate change impacts.

The key suggested mitigation or enhancement for this infrastructure intervention type is as follows:

- Integrate green and blue infrastructure into transport infrastructure and land use planning.
- Incorporate climate change mitigation and adaptation measures to enhance the resilience of the transport network.
- Incorporate measures to promote sustainable and circular waste management practices, and conserve soil resources through regulation measures.
- Promote opportunities to equitably integrate transport with existing and proposed development.

Infrastructure intervention type C: Maintenance and asset management; network management and operations

Infrastructure intervention type C performed well against three of the ISA objectives: ISA Objective 3 which relates to reducing greenhouse gas emissions from transport; ISA Objective 10 which relates to promoting sustainable modes of transport; and ISA Objective 13 which relates to promoting greater equality of opportunity for all citizens. This infrastructure intervention type has been scored as having an uncertain effect on protecting and enhancing local air quality (ISA Objective 1).

The key suggested mitigation or enhancement for this infrastructure intervention type is as follows:

- Focus on sustainable management of highways and public transport to ensure local air quality is protected and enhanced.

- Integrate green and blue infrastructure into maintenance and asset improvements.
- Make more explicit reference to climate change adaptation measures and plans for extreme weather events.
- Incorporate measures to promote sustainable and circular waste management practices, conserve soil resources and remediate contaminated land through asset management.
- Make more explicit reference to enhancing active travel assets and the promotion of community safety as part of network operations.

Infrastructure intervention type D: Transport service improvements and passenger offer

‘Transport service improvements and passenger offer’ performed well against the ISA objectives, with a slight, moderate or largely beneficial impact against six objectives. This infrastructure intervention type performed strongly against ISA Objective 1 which relates to protecting and enhancing local air quality, as well as against ISA Objective 15 which relates to reducing environmental impacts of transport.

The key suggested mitigation or enhancement for this infrastructure intervention type is as follows:

- Integrate green and blue infrastructure into the mitigation of environmental impacts.
- Incorporate measures to address light pollution from transport infrastructure.

Infrastructure intervention type E: Behaviour change, engagement, education and consultation

Infrastructure intervention type E performed well against the ISA objectives, with a slight, moderate or largely beneficial impact against four objectives. This infrastructure intervention type performed strongly against ISA Objective 10 which relates to promoting sustainable modes of transport.

The key suggested mitigation or enhancement for this infrastructure intervention type is as follows:

- Incorporate climate change mitigation and adaptation measures into relevant behaviour change or engagement programmes.

Infrastructure intervention type F: Data, technology and innovation

Infrastructure intervention type F performed well against the ISA objectives, with a slight, moderate or largely beneficial impact against three objectives. This infrastructure intervention type performed well against promoting sustainable modes of transport (ISA Objective 10), increasing access to opportunities (ISA Objective 11), and promoting greater equality of opportunity for all citizens (ISA Objective 13).

The key suggested mitigation or enhancement for this infrastructure intervention type is as follows:

- Include reducing greenhouse gas emissions and reducing environmental impacts from transport as part of the focus on accessibility to travel information.
- Incorporate measures to improve safety and reduce crime in data and technology initiatives.

Infrastructure intervention type G: Cross-cutting and enabling interventions; capacity and capability improvements

‘Cross-cutting and enabling interventions; capacity and capability improvements’ performed well against seven of the ISA objectives. It aligned most strongly with ISA Objective 2, which relates to protecting and enhancing biodiversity and geodiversity; ISA Objective 4, which relates to increasing resilience of the network to climate change; and ISA Objective 13, which relates to promoting greater equality of opportunity for all citizens.

The key suggested mitigation or enhancement for this infrastructure intervention type is as follows:

- Incorporate measures to promote sustainable and circular waste management practices, enhance the water environment, conserve soil resources and remediate contaminated land as part of the focus on climate and nature.
- Incorporate measures to improve safety and reduce crime through the focus on partnership working, training, and skills development.

4.2.2 Conclusion

The ISA of infrastructure intervention types shows strong performance in reducing greenhouse gas emissions, promoting sustainable transport, enhancing economic opportunities, and improving equality of opportunity.

However, there is weak alignment with increasing climate resilience and promoting sustainable waste management. Type A (Infrastructure improvements) benefits from reducing emissions but needs better integration of green infrastructure and climate resilience. Type B (Policy and regulation measures) promotes sustainable transport but would benefit from explicit climate adaptation strategies. Type C (Maintenance and asset management) supports sustainable transport but has uncertainties in air quality impacts. Type D (Transport service improvements) aligns with air quality objectives but could better address light pollution. Type E (Behaviour change and education) promotes sustainable transport but would benefit from including climate adaptation measures. Type F (Data and technology) supports sustainable transport but could enhance emissions reduction and safety measures. Type G (Cross-cutting interventions) aligns with biodiversity and climate resilience but would benefit from greater focus on soil and water conservation.

The LTP Implementation Plan should adopt a holistic approach to strengthen climate resilience, environmental protection, and social equity. For a full conclusion on the ISA of infrastructure intervention types, see Section 5.3.

4.3 Thematic Policies (January 2026)

Following public consultation on the draft LTP in 2025, the draft thematic policies have been updated by the CA to reflect consultation feedback. The six thematic policy chapters remain unchanged in structure but now contain a total of 50 policies.

These LTP policies were reassessed against the same objectives set out in the ISA framework to take account of the amended policy wording. However, the assessment matrix columns for the 2026 reassessment focus on what has been changed since the first iteration of ISA; what updated scoring is across short-, medium- and long-term timescales; and any remaining suggested mitigation or enhancement (i.e. residual impacts). (For any new policies, a fresh assessment matrix was used without additional reassessment columns.) The detailed findings of the reassessment are provided in Appendix A.3, in the form of updated assessment tables.

Following discussion with the Combined Authority, a small number of 2025-assessed policies were revisited. The review found that only minor amendments were necessary in Policies RR1 (against Objectives 2, 4, 6, 9, and 14) and RR3 (against Objective 7).

This section summarises the updated scoring against the assessment objectives and identifies any residual impacts, taking into account the mitigation measures recommended in the previous iteration of the assessment. A summary of the assessment findings is

presented in Section 4.3.1, while Section 5.2.2 sets out the overarching conclusions arising from the 2026 reassessment of the thematic policies.

4.3.1 Summary of Assessment Findings

The assessment findings identified a number of strengths in the thematic policies when reassessed against the ISA objectives. In particular, the policies received improved scores when compared to the 2025 assessment to positive or very positive in terms of protecting and enhancing air quality, reducing greenhouse gas emissions from transport, enhancing economic prosperity, promoting the use of natural resources, and promoting greater equality of opportunity. The previous 2025 assessment findings highlighted areas of weakness, including around increasing resilience to climate change; however, policies received improved scores against this ISA objective, and this can now be considered a strength. Such strengths continue to support the four overarching objectives of the Plan.

The reassessment findings continue to identify areas of weakness or uncertainty within the thematic policy chapters, where suggested mitigation and enhancement from the previous assessment were not incorporated in the LTP by the CA. This was particularly prevalent across protecting and enhancing the character and quality of landscape and townscape, and improving safety. Residual mitigation and enhancement recommendations have therefore been outlined under the ISA objectives below, highlighting opportunities to further strengthen the Plan and future schemes to be implemented in the plan area, and therefore the plan as a whole.

For full details of each policy reassessment, including residual mitigation and enhancement, refer to the assessment tables in Appendix A.3. For a full conclusion on the ISA of thematic policies, refer to Section 5.2.

ISA Framework Objective 1: Protect and enhance local air quality

Policies ZE1 and ZE2 under the 'Zero Emissions' thematic policy chapter received improved scores to very positive against this objective, with an increased emphasis on sustainable mode shift in policy wording. Additional mitigation for Policy ZE2 has been proposed through reference to the World Health Organisation (WHO) Global Air Quality Guidelines.. Scoring for Policies ZE3 and ZE4 remain unchanged as there are no relevant amendments against this objective.

Policies A1 and A5 under the 'Active' thematic policy chapter received improved scores to very positive against this objective, as they refer to integrating green and blue

infrastructure to improve active travel experiences. Residual mitigation has been identified for Policy A1, which is to make more explicit reference to areas with low air quality such as AQMAs in relation to the implementation of this strategy. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

Scoring for Policies RR2, RR6, RR7, RR8, and RR9 in the 'Reliable and Resilient' thematic policy chapter have improved with an increased focus on measures that reduce traffic and promote the use of sustainable transport modes, which could indirectly improve air quality by reducing emissions. Other policies within the chapter received unchanged scores and residual impacts from the previous mitigation suggestions, as they do not include significant updates relevant to this objective.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received positive scores as promoting sustainable transport and prioritising bus franchising and rail will help to minimise air pollution. Scoring against this objective generally remained the same or improved across the existing policies. Policy I1 was amended to refer to facilitating public transport use which resulted in an update from a neutral score to a positive score. Policies I2, I4, and I5 now refer to the Weaver Network and ensuring access to this, alongside increasing sustainable modes and therefore scoring has increased. Policy I13 has added a reference to bus franchising and rail, whilst Policy I17 references supporting wider mass transit delivery, both of which would reduce private vehicle use and congestion, and in turn, minimise air pollution.

Policies IA3 and IA6 under the 'Inclusive and Affordable' thematic policy chapter received improved scores to positive against this objective, due to a focus on sustainable travel, the Weaver Network, and improving access to services and opportunities for employment, education and leisure through sustainable options. The scoring against other policies remains unchanged; however, residual mitigation has been identified, including the need to consider air quality improvements when delivering healthy places.

Policies within the 'Safe' thematic policy chapter remain unchanged, except for Policy S1, which received improved scores for referencing designing active travel infrastructure with climate adaptation in mind. The same residual impact was identified across all other policies, which was to address safety around blue and green infrastructure, including parks and along canals.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Include targets set in the World Health Organisation (WHO) Global Air Quality Guidelines;
- Include reference to green infrastructure as a measure to improve air quality;

Include explicit reference to areas with low air quality, such as AQMAs, in relation to the implementation of this strategy. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

- Include explicit reference to prioritising sustainable and active transport modes;
- Consider air quality improvements when delivering healthy places;
- Include explicit reference to reducing emissions as part of the Mass Transit Strategy; and
- Address safety around blue and green infrastructure, including parks and along canals.

ISA Framework Objective 2: Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network

Scoring for policies under the 'Zero Emission' thematic policy chapter remain mostly unchanged as there are limited amendments directly relevant to this objective. Policy ZE2 received improved scoring in relation to avoiding impacts on habitats and species, with an additional reference to reduce damage to natural environments. However, suggested mitigations from the last iteration remain as residual impacts, which could be addressed by including more explicit reference to specific natural features that require protection and enhancement.

Policies A1 and A5 within the 'Active' thematic policy chapter received improved scores to very positive against this objective, as they refer to integrating green and blue infrastructure to improve active travel experiences. Policy A2 also received a new positive score as it has been amended to refer to connection to key services and cycle parking at key destinations. Residual impacts have been identified, including explicitly referencing avoiding adverse effects on habitats in support of green and blue infrastructure integration and active travel, and ensuring good design in relation to the integration of active travel.

Policies RR3, RR6 and RR7 under the 'Reliable and Resilient' thematic policy chapter received more positive scores in relation to increasing accessibility to green and blue infrastructure, which could be indirectly enhanced by their increased reference to inclusive approach to car parking and public transport improvements. Scoring for Policy RR9 against all criteria has significantly improved to very positive with its additional reference to incorporate blue green infrastructure and natural habitat supports. Other policies within the chapter received unchanged scores as there are limited updates relating to this objective.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received a mix of scores. Policy I0 scored strongly against criteria focused on green and blue infrastructure as measures to promote walking and cycling could include the provision of green infrastructure, such as parks and trees. However, it received a weaker score against one criterion for not considering the need to avoid and protect designated habitats and important sites when promoting active travel. Policy I18 and I19 received mostly neutral scores but scored positively in terms of increasing accessibility to green and blue infrastructure. Policy I19, however, had a weak alignment with one criterion as new rail infrastructure may result in the severance of habitats. Scoring against this objective generally remained the same across the existing policies. Policies I4 and I5, however, received improved scores, as they now refer to providing the right tools and wayfinding so people are confident using the Weaver Network, which will lead to improved access to green and blue infrastructure.

Policies IA2 and IA3 under the 'Inclusive and Affordable' thematic policy chapter received improved scores to positive against this objective, as new references to leisure opportunities and climate change adaptation have been added. However, the negative scoring in Policies IA1 and IA2 remain, and residual recommendations suggest considering connectivity to green and blue infrastructure, as well as good design and placemaking in nature.

Policies within the 'Safe' thematic policy chapter remain unchanged, except for Policy S1, which received improved scores for referencing designing active travel infrastructure with climate adaptation in mind. Policy S5 retained its weak alignment, and a residual impact was identified: to address safety around blue and green infrastructure, including parks and along canals.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Include more explicit reference to avoiding and protecting designated habitats and important sites in relation to managing active travel;
- Include reference to green and blue infrastructure as a measure to promote active travel and connectivity, and the direct and indirect benefits of this;
- Include explicit reference to how nature and biodiversity will be enhanced through good design and updating the policy wording to include 'placemaking'; and
- Address safety around blue and green infrastructure, including parks and along canals.

ISA Framework Objective 3: Reduce greenhouse gas emissions from transport

Policies ZE1, ZE3, and ZE4 under the 'Zero Emission' thematic policy chapter received the same scores and residual impacts from the previous mitigation suggestions, as there are no amendments directly addressing them. Scoring for Policy ZE2 has improved in relation to promoting sustainable mode shift and climate change adaptation. While the policy has been amended to address several suggested mitigations, it is considered that it can be further enhanced by explicitly referencing measures to prioritise sustainable transport options.

Several policies within the 'Active' thematic policy chapter received improved scores. Policy A1, for example, now references integrating green and blue infrastructure to improve active travel experiences, which could promote a modal shift away from private car use. Policy A2 has been amended to refer to connection to key services and cycle parking at key destinations. Policy A5 has been amended to refer to coordination with land use planning which could further promote active travel, and Policy A6 refers to joining up neighbourhoods, which could improve the connectivity of rural communities. However, Policies A1, A2, and A6 also retained some weak scores, and residual impacts were identified, including to reference public transport availability, affordability, and accessibility in relation to promoting multi-modal journeys, disincentives for private car use, and accessibility to green and blue infrastructure.

Policies RR2, RR6, RR7 and RR8 under the 'Reliable and Resilient' thematic policy chapter received improved scores under criteria promoting sustainable mode shift and net zero, with their increased reference to improving network safety and promoting sustainable transport options. Policy RR9 also received more positive scores in relation to climate change adaptation and supporting net zero target with an explicit reference added to the

policy wording. The remaining policies received the same scores from the previous iteration with limited relevant changes in policy text.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received positive scores, as they focus on prioritising and promoting sustainable travel, including bus franchising and rail. Policy I0, however, could be enhanced by specifically referencing minimising emissions from new infrastructure. Scoring against this objective generally remained the same or improved across the existing policies. More positive scoring has been applied to Policy I1, as it now references facilitating public transport use and ensuring climate resilience. Policies I4 and I5 have been amended to reference ensuring the Weaver Network is accessible and easy to navigate, which will lead to an increase in sustainable and active travel. Policy I7 refers to the Fares and Ticketing Strategy which aims to make sustainable travel more affordable and accessible and will encourage a reduction in private car use. Policy I11 refers to taking into account the needs of vulnerable users and Policy I12 refers to increasing accessibility to employment, housing, education, and healthcare through sustainable transport, both of which would support a reduction in greenhouse gas emissions.

Policies under the 'Inclusive and Affordable' thematic policy chapter generally received improved scores against this objective. Policies IA2 and IA6, for example, had an increased focus on climate change adaptation and sustainable travel, whilst Policies IA3 and IA5 referenced improving access to the Weaver Network, as well as services and opportunities for employment, education and leisure through sustainable options.

Policies within the 'Safe' thematic policy chapter remained unchanged, except for Policy S1, which received improved scores for referencing designing active travel infrastructure with climate adaptation in mind.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Consider the specific needs of rural communities in relation to active travel and public transport infrastructure;
- Include general reference to the mass transit scheme and other sustainable transport modes rather than focusing on Phase 1;
- Include explicit reference to minimising emissions from new infrastructure;

- Include explicit reference to prioritising sustainable and active transport modes over private car use, through enhancing availability, affordability, and accessibility;
- Include explicit reference to the use of low and zero carbon transport technologies in relation to promoting sustainable choices; and
- Include explicit reference to the proposed content of the urban centre movement strategies.

ISA Framework Objective 4: Increase resilience of the transport network to climate change and associated extreme weather events

Scoring for policies under the 'Zero Emission' thematic policy chapter remained unchanged as there are no relevant amendments to the policies against this objective. Suggested mitigation measures for Policy ZE2 from the previous iteration are carried forward as residual impacts.

Policy A5 within the 'Active' thematic policy chapter received improved scores as it was amended to refer to integration with blue and green infrastructure, which can both help to manage localised flood risk and create new habitats. Policies A1 and A2 retained their weak alignment, and residual mitigation has been identified, including to reference measures against extreme weather events, the changing climate, and adaptive management. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

Policies RR2 and RR8 under the 'Reliable and Resilient' thematic policy chapter received improved scoring against adaptation to uncertain weather events arising from climate change, with an additional reference to network safety. The updated text for Policy RR9 has addressed all suggested mitigations from the previous assessment, resulting in significantly improved scoring. The other policies received unchanged scores with limited updates to policy text relevant to this objective.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received mostly neutral scores. Policy I0, however, received a positive score against the criterion focused on exploring opportunities for green and blue infrastructure, as reference to measures to promote walking and cycling could include the provision of green infrastructure, such as parks. Policy I19 had a weaker alignment as new rail infrastructure may impact on floodplains, and repeated flood events would result in reliability issues. The

policy could be improved by providing reference to mitigation associated with new rail infrastructure. Scoring against this objective remained the same across the existing policies.

Scoring for policies under the 'Inclusive and Affordable' thematic policy chapter remained unchanged, and no residual impacts have been identified.

Policies within the 'Safe' thematic policy chapter remained unchanged, except for Policy S1, which received improved scores for referencing designing active travel infrastructure with climate adaptation in mind.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Include reference to measures against extreme weather events, the changing climate, and adaptive management including evacuation plans and real-time information for all transport users. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy;
- Incorporate climate change mitigation and adaptation measures to enhance the resilience of the transport network;
- Include reference to mitigation associated with new rail infrastructure; and
- Include explicit reference to the context of the mass transit vision within the policy text.

ISA Framework Objective 5: Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling

Scoring for policies under the 'Zero Emission' thematic policy chapter remained mostly unchanged as there are limited relevant amendments to the policies against this objective. Policy ZE2 received improved scores in relation to promoting modal shift to sustainable transport with its additional reference to it.

Several policies within the 'Active' thematic policy chapter received improved scores. Policy A1, for example, now references integrating green and blue infrastructure to improve active travel experiences, which could promote a modal shift away from private car use which will subsequently reduce fuel consumption. Policy A2 has been amended to refer to connection to key services and cycle parking at key destinations. Policy A5 has

been amended to refer to coordination with land use planning which could further promote active travel, and Policy A6 refers to joining up neighbourhoods, which could improve connectivity of rural communities. Policy A5 includes a residual recommendation to make more explicit reference to resource efficiency in relation to the construction of new active travel routes.

Scoring for Policies RR6, RR7 and RR8 under the 'Reliable and Resilient' thematic policy chapter have improved in relation to promoting sustainable mode shift, as they now include measures to encourage greater public transport use and modal shift of freight traffic, which will reduce fuel consumption. Policy RR9 also received more positive scoring against criteria promoting resource efficiency and waste management, with its additional reference to climate change mitigation and adaptation measures. The remaining policies received unchanged scores with limited updates to policy text relevant to this objective.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received mixed scores. Policies I0 and I18 scored positively in terms of prioritising and promoting sustainable travel which will reduce fuel consumption, however, Policy I0 scored weakly for not explicitly stating how it will enable new infrastructure to be resource efficient. This was similar for Policy I19, which scored positively for making reference to the Railways Reform Bill which aims to simplify the railway system and reduce costs, promoting greater use, but scored weakly for not referencing energy efficiency in new rail infrastructure. Scoring against this objective generally remained the same or improved across the existing policies. Policy I1 now has a stronger alignment as it refers to facilitating public transport use, which supports a transition to sustainable transport modes and reduces fuel consumption. Policy I4, I5, and I9 will ensure that the Weaver Network is accessible and easy to navigate, so the scoring has increased. Policy I11 has been amended to consider the needs of vulnerable users, which could encourage more sustainable transport use. Policy I12 also has a stronger alignment as it refers to increasing accessibility to employment, housing, education, and healthcare through sustainable transport, which will reduce fuel consumption. Policy I17 has retained its weak alignment and could be enhanced by making more explicit reference to the proposed content of the urban centre movement strategies wherever aligns with the assessment objective.

Policies IA3 and IA5 under the 'Inclusive and Affordable' thematic policy chapter received improved scores to very positive against this objective, as they have been amended to reference the Weaver Network, improving access through sustainable options and new

and enhanced services such as stations and stops and information and ticketing. Such improvements will promote a modal shift to sustainable travel and reduce fuel consumption. Scoring for other policies remained unchanged and no residual impacts have been identified.

Policies within the 'Safe' thematic policy chapter remained unchanged, except for Policy S1, which received improved scores for referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan, which will help to promote a modal shift to sustainable transport. The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Incorporate considerations for resource efficiency to reduce harmful impacts of transport and the construction of transport infrastructure;
- Introduce disincentives for private car use in car parks and prioritise sustainable transport needs to reduce fuel consumption; and
- Include more explicit reference to the proposed content of the urban centre movement strategies where this aligns with the assessment objective.

ISA Framework Objective 6: Protect and enhance the water environment

Scoring for policies under the 'Zero Emission' thematic policy chapter remained unchanged as there are no relevant amendments to the policies against this objective. Suggested mitigation measures for Policy ZE2 from the previous iteration are carried forward as residual impacts.

Policies A1 and A5 within the 'Active' thematic policy chapter received improved scores as they refer to integrating green and blue infrastructure to improve active travel experiences. Residual impacts have been identified for Policy A5, including making explicit reference to minimising the use of impermeable hard surfacing in relation to the construction of new active travel infrastructure, flood risk management and habitat creation opportunities associated with green and blue infrastructure, and sufficient drainage systems when creating new road infrastructure through reallocating road spaces.

Most policies under the 'Reliable and Resilient' thematic policy chapter received the same scores as the previous iteration as there were no significant updates to the policy text against this objective. Scoring for Policy RR9 has improved to positive in relation to blue infrastructure enhancement and climate change resilience, as the policy now includes explicit references to them.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received mostly neutral scores, however, Policy I0 had a stronger alignment as measures to promote walking and cycling could include the provision of green infrastructure, such as parks, which can contribute to improvements in the quality of surface water run-off. Scoring against this objective generally remained the same across the existing policies. Policies I1 and I2 have retained their weaker scoring as the mitigation to make more explicit reference to minimising the use of impermeable hard surfacing in relation to constructing potential new parking spaces has not been addressed.

The policies within the 'Inclusive and Affordable' thematic policy chapter remained unchanged, except for Policy IA2 which received a stronger score referencing climate change adaptation.

The policies within the 'Safe' thematic policy chapter remained unchanged and no residual impacts have been identified.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Include reference to green infrastructure as a measure to promote active travel, and the direct and indirect benefits of this;
- Include more explicit reference to flood risk management, sufficient drainage systems, and minimising the use of impermeable hard surfacing in relation to the construction of potential new parking spaces, active travel infrastructure and road space reallocation;
- Include reference to habitat creation opportunities associated with green and blue infrastructure; and
- Incorporate sustainable drainage and other nature-based solutions to mitigate flood risks on transport routes.

ISA Framework Objective 7: Conserve soil resources and quality and seek to remediate contaminated land

Scoring for policies under the 'Zero Emission' thematic policy chapter remained neutral as there were no relevant amendments to the policies against this objective. Suggested mitigation measures for Policy ZE2 from the previous iteration were carried forward as residual impacts.

Policy A5 within the 'Active' thematic policy chapter received an improved score for referring to coordination with land use planning, which could help to avoid mineral safeguarding areas. Policy A1 and A2 retained their weak alignment, and residual impacts were identified, including to make more explicit reference to avoiding mineral safeguarding areas in relation to managing the active travel network. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

Most policies under the 'Reliable and Resilient' thematic policy chapter received the same scores as the previous iteration as there were no significant updates to the policy text against this objective. 2025 Scoring for Policy RR3 has been amended to neutral with regard to avoiding mineral safeguarding areas, as upon discussions with the CA, it was felt that the original scoring felt disproportionate; the new neutral scoring has been carried over to the 2026 reassessment. Policy RR9 has addressed suggested mitigations from the previous assessment and received improved scores regarding soil protection and reducing land contamination. The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received neutral scores. Scoring against this objective generally remained the same across the existing policies. Policies I1 and I2 have retained their weaker scoring as the mitigation to make more explicit reference to encouraging use of previously developed land in relation to constructing potential new parking spaces was not addressed.

Scoring for Policies under the 'Inclusive and Affordable' thematic policy chapter remained unchanged and no residual impacts have been identified.

Scoring for policies under the 'Safe' thematic policy chapter remained unchanged and no residual impacts have been identified.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Include more explicit reference to encouraging the use of previously developed land in relation to constructing potential new parking spaces; and
- Include more explicit reference to avoiding mineral safeguarding areas in relation to managing active travel network. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

ISA Framework Objective 8: Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets

Scoring for policies under the 'Zero Emission' thematic policy chapter remained neutral as there were no relevant amendments to the policies against this objective. Suggested mitigation measures for Policy ZE2 from the previous iteration were carried forward as residual impacts.

Policies A2 and A5 within the 'Active' thematic policy chapter received improved scores as they were amended to refer to the connection to key services and cycle parking at key destinations, and the coordination with land use planning, which could help to connect important sites. Policies A1, A2, and A5 retained their weaker alignment, and residual impacts have been identified, including to consider accessibility to historic sites and to make more explicit reference to the appropriate management of transport in relation to the promotion of active travel. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

Most policies under the 'Reliable and Resilient' thematic policy chapter received the same scores as the previous assessment as there were no significant updates to their policy text against this objective. Policies RR3, RR6 and RR7 received improved scores in promoting access to important sites with their additional reference to inclusive car parking and public transport accessibility. Previous mitigation suggestions for RR9 have been carried forward as residual impacts.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received a mix of scores. Policy I0 had a strong alignment as it focuses on prioritising and promoting sustainable travel which will improve access to heritage sites. Policy I18 also had a strong alignment as coordinated bus networks reduce car dependency, lowering congestion and emissions around heritage sites, reducing the impact. Improved bus networks will also encourage access to heritage sites. Policy I19, however, received weaker scores as new rail infrastructure may impact on heritage assets, and therefore mitigation needs to be considered. Scoring against this objective generally remained the same for the existing policies, retaining neutral scores. Policy I1, however, now refers to facilitating public transport use, which improves access to key destinations by sustainable transport modes, so the scoring has improved. Similarly, Policies I4 and I5 have been amended to ensure the Weaver Network is easy to navigate and accessible, which will lead to improved access to different spaces and facilities. Policy I9 also received a positive

score for seeking opportunities to improve transport with neighbouring regions, which could improve access to heritage.

Scoring for policies under the 'Inclusive and Affordable' thematic policy chapter remained unchanged. Scoring for policies under the 'Safe' thematic policy chapter remained unchanged and no residual impacts have been identified.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Include considerations for transport impacts on designated heritage assets; and
- Include reference to mitigation associated with new rail infrastructure.

ISA Framework Objective 9: Protect and enhance the character and quality of landscape and townscape

Scoring for policies under the 'Zero Emission' thematic policy chapter remained unchanged as there are no relevant amendments to the policies against this objective. Suggested mitigation measures for Policy ZE2 from the previous iteration have been carried forward as residual impacts.

Policies A1 and A5 within the 'Active' thematic policy chapter received improved scores as they have been amended to refer to integrating green and blue infrastructure to improve active travel experiences, and to coordination with land use planning, which could help to reduce impact on designated landscapes. However, all policies, excluding Policy A4, retained weak scores and residual impacts have been identified, including to avoid impacts on nationally designated landscapes, public rights of way, and their settings in relation to managing active travel, and improving landscapes to enhance the perceived safety of active travel.

Scoring for policies under the 'Reliable and Resilient' thematic policy chapter remained mostly unchanged as there were limited amendments relevant to this objective. Policy RR9 received improved scores to positive regarding green and blue infrastructure protection and enhancement with its additional reference to it. Previous mitigation suggestions have been carried forward as residual impacts.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received a mix of scores. Policies I0 and I18 had a strong alignment, as measures to promote walking and cycling could include the provision of green infrastructure, and

coordinated bus networks reduce car dependency, lowering congestion and emissions around important landscapes, reducing the impact. Policy I19, however, received weak scores as new rail infrastructure may negatively impact on landscapes. Scoring against this objective generally remained the same for the existing policies. Policies I13, I16, and I17 retained their weak alignment as mitigation has not been addressed.

Scoring for policies under the 'Inclusive and Affordable' thematic policy chapter remained unchanged, with Policies IA1 and IA2 retaining their weak alignment. Residual recommendations have been identified, including to make explicit reference to connecting isolated communities to green and blue infrastructure and public rights of way, rather than just leisure. It also recommended that explicit reference is made to enhancing landscapes and townscapes through the design and maintenance of transport infrastructure and focusing on local distinctiveness and sense of place.

Scoring for policies under the 'Safe' thematic policy chapter remained unchanged, and no residual impacts have been identified.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Include explicit reference to the proposed content of the urban centre movement strategies where this aligns with the assessment objective;
- Include explicit reference to the protection and enhancement of active travel routes to support the reduced reliance on vehicles;
- Include explicit reference to protecting and enhancing locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place;
- Include explicit reference to removing unnecessary clutter;
- Include reference to avoiding impacts on nationally designated landscapes, PRoWs, and their settings in relation to managing active travel. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy; and
- Include reference to improving landscapes to enhance the perceived safety of active travel.

ISA Framework Objective 10: Promote sustainable modes of transport, including public transport and active travel

Policies ZE3 and ZE4 under the 'Zero Emission' thematic policy chapter received the same scores as the previous iteration as there were no significant amendments relating to this objective. Policy ZE1 received improved scores regarding sustainable modal shift with its increased emphasis on fully zero emission bus fleet by 2036. Scoring for Policy ZE2 increased to positive against the criteria in relation to promoting sustainable transport modes. Suggested mitigation measures from the previous iteration have been carried forward as residual impacts, and the policies can be further improved by explicitly referencing improvements to active travel in support of sustainable mode shift.

Policies A1, A2, A5, and A6 within the 'Active' thematic policy chapter received improved scores to very positive against this objective. Policies A1 and A5, for example, have been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Policy A2 now references the connection to key services and cycle parking at key destinations and Policy A6 proposes joining up neighbourhoods and improving active travel environments, which could help to improve accessibility. Despite these improvements, the policies have also retained weak scores against some criteria and residual impacts have been identified, including to make more explicit reference to coordinating with land use planning to improve active travel infrastructure, and to explore synergies with green and blue infrastructure within neighbourhoods in relation to enhancing safety of active travel routes.

Policy RR1, RR2, RR6, RR7, and RR8 under the 'Reliable and Resilient' thematic policy chapter received more positive scores against the criteria relating to promoting sustainable transport options with their additional reference to public transport enhancement, improving safety, and reducing traffic. Policy RR9 received improved scoring in relation to exploring synergies with green and blue infrastructure, as it now explicitly references them. Other policies received the same scores as previously given and residual impacts across the chapter remained the same.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received mostly positive scores due to focusing on sustainable and active travel. Scoring against this objective generally remained the same or improved. Policy I1 had a stronger alignment as it has been amended to refer to facilitating public transport use, which improves access to key destinations by sustainable transport modes. However, its weak alignment in terms of low emission vehicles has not been addressed. Policies I4 and

I5 have been amended to ensure the Weaver Network is easy to navigate and accessible, which will lead to improved access to different spaces and facilities, improving the alignment. For Policy I12, the 2025 mitigation to reference access to opportunities through sustainable transport has been addressed and therefore the scoring has increased to positive.

Policies IA3, IA5 and IA6 within the 'Inclusive and Accessible' thematic policy chapter have received improved scores through including additional reference to improving access through sustainable options, including the Weaver Network, and improving travel information and payment mechanisms to promote sustainable travel. The weaker scores for policies IA1 and IA6 remained unchanged and residual impacts have been identified, including considering the travel needs of vulnerable, at-risk groups and isolated communities to promote sustainable travel; disincentivising car use, and implementing low emission vehicle infrastructure.

Scores for policies under the 'Safe' thematic policy chapter remained unchanged. Residual impacts have been identified for Policies S2 and S3, including to make explicit reference to green and blue infrastructure and to encouraging sustainable modes as a result of improved safety levels.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Include reference to active travel infrastructure improvements to support sustainable mode shift;
- Consider the promotion of low emission vehicle infrastructure and include reference to charging point provision for low emission vehicles within parking spaces;
- Consider the travel needs of vulnerable, at-risk groups and isolated communities to promote sustainable travel;
- Introduce disincentivises for private vehicle use;
- Include more explicit reference to coordinating with land use planning to improve active travel infrastructure in relation to the integration of active travel; and
- Explore synergies with green and blue infrastructure within neighbourhoods in relation to enhancing safety of active travel routes.

ISA Framework Objective 11: Enhance economic prosperity and access to opportunities

Scoring for most policies under the 'Zero Emission' thematic policy chapter remained unchanged against this objective. Policy ZE2 has been amended to address the previous suggested mitigations with explicit reference to improving access to sustainable transport options, and therefore, it now scores positively.

Policies A2 and A5 within the 'Active' thematic policy chapter received improved scores as they have been amended to refer to the connection to key services and cycle parking at key destinations and the coordination with land use planning, which could promote accessibility to key sites. Policies A1 and A3, however, retained weak scores and residual impacts have been identified, including making more explicit reference to improving accessibility to key destinations and areas with high levels of unemployment in relation to encouraging active travel. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

Scoring for policies RR1, RR2, RR6 and RR7 under the 'Reliable and Resilient' thematic policy chapter have significantly improved with additional reference to public transport, network safety, and bus franchising. Policy RR3 received improved scoring in relation to accessibility to services and facilities as it now references inclusive car parking approach. Other policies received the same scores as before and residual impacts across the chapter include suggested mitigations from the previous assessment.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received very positive scores as they focus on prioritising and promoting sustainable travel, and improved bus and rail systems will increase accessibility to different spaces and facilities for employment opportunities. Scoring against this objective generally remained the same or improved for the existing policies. Scoring for Policy I1 improved as it now refers to facilitating public transport use, which will improve access to key destinations by sustainable transport modes. Policies I4 and I5 have been amended to ensure the Weaver Network is easy to navigate and accessible, which will lead to improved access to different spaces and facilities, improving the alignment. Policy I12 has seen a significant improvement in scoring, going from negative to very positive, as it has addressed mitigation focused on improving accessibility to services, facilities and amenities through sustainable transport.

Policies IA3, IA5, and IA6 within the 'Inclusive and Accessible' thematic policy chapter received improved scores through including additional reference to improving access to opportunities for employment and education and improving travel information and payment mechanisms to promote sustainable travel. Residual impacts have been identified across the policies, including considering social exclusion and the access needs of vulnerable, at-risk groups and isolated communities.

Scoring for policies under the 'Safe' thematic policy chapter remained unchanged, except for Policy S2 which received an improved score as it references implementing suitable signal timings, which will improve journey times and improve travel reliability.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Include explicit reference optimising potential economic outcomes through franchising public transport;
- Coordinate with land use planning to locate charging infrastructure;
- Include reference to the delivery of sustainable growth and improving accessibility in areas of deprivation and those with high levels of unemployment. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy;
- Identify the link between value for money and access to opportunities; and
- Consider social exclusion and the access needs of vulnerable, at-risk groups and isolated communities, both urban and rural.

ISA Framework Objective 12: Improve health and wellbeing for all citizens and reduce inequalities in health

Scoring for policies ZE3 and ZE4 under the 'Zero Emission' thematic policy chapter remained unchanged as there are no significant amendments in relation to this objective. Policy ZE1 and ZE2 received improved scores in terms of promoting the health and wellbeing of the population with a stronger commitment on the transition to sustainable transport modes. Additionally, Policy ZE2 is recommended to be further enhanced with reference to improve active travel connectivity to support integrated local health and wellbeing improvements.

Policies A1, A2, and A5 within the 'Active' thematic policy chapter received improved scores as they have been amended to refer to inclusive and accessible facilities, the connection to key services and cycle parking at key destinations, and the coordination with land use planning and integration with blue and green infrastructure to improve active travel experiences. Policies A1, A2, A3, and A5, however, have retained some weak scores and residual impacts have been identified, including to make more explicit reference to accessibility to key destinations and potential severance issues in relation to the promotion of active travel.

Policies RR1, RR2, and RR7 under the 'Reliable and Resilient' thematic policy chapter received improved scores in terms of enhancing accessibility to key facilities and locations with their increased reference to improving safety and alignment with the public transport network. Policy RR3 added reference to inclusive car parking approach which increased its scoring in relation to promoting accessibility for vulnerable groups. Scoring for Policy RR6 against this objective has mostly improved with its reference to reducing congestion. Policies RR8 and RR9 received improved scoring in promoting the health and wellbeing of the population, as they now reference modal shift in freight and green and blue infrastructure respectively. Policies RR4 and RR5 remained unchanged. Suggested mitigations from the previous assessment are carried forward as residual impacts across the chapter.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received very positive scores as an improved bus and railway system will increase accessibility to different spaces and facilities, including active travel facilities and green infrastructure. Policy I19, however, had a weak alignment with one criterion as new rail infrastructure may result in severance issues. Scoring against this objective generally remained the same or improved for the existing policies. Policies I4 and I5 have been amended to ensure the Weaver Network is easy to navigate and accessible, which will lead to improved access to different spaces and facilities, improving the alignment. Policy I11 has been amended from negative to positive as it considers the needs of vulnerable users as part of the integrated Weaver Network. Policy I12 now references increasing accessibility to employment, housing, education, and healthcare through sustainable transport, and therefore, the scoring has increased to very positive. Policies I13 and I14 have retained their weaker alignment as they did not address mitigation to make explicit reference to ensuring new developments are accessible for everyone and how this will be achieved, and to inclusive growth and placemaking.

Policies IA3 and IA6 within the 'Inclusive and Accessible' thematic policy chapter have received improved scores as they now reference improving access for rural communities through sustainable options and further promoting sustainable travel, which will have a positive impact on health. Residual impacts have been identified across the policies, including to explicitly reference healthcare services, delivering healthy places for vulnerable and isolated groups, and the content within the West Yorkshire Streets for Everyone Strategy. For Policy IA2, it should be explicitly stated that the removal of certain types of vehicle traffic and parking does not include disabled vehicles and parking.

Scoring for policies under the 'Safe' thematic policy chapter remained unchanged, except for Policy S1, which received improved scores for taking into account vulnerable road users. A residual impact has been identified for Policy S3, which is to make explicit reference to reducing severance issues in relation to improving perceptions of safety.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Include explicit reference to ensuring new developments and key destinations are accessible for everyone and how this will be achieved. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy;
- Include explicit reference to inclusive growth and placemaking;
- Include explicit reference to promoting access to healthcare services, delivering healthy places for vulnerable and isolated groups, and the content within the West Yorkshire Streets for Everyone Strategy;
- For Policy IA2, explicitly state that the removal of certain types of vehicle traffic and parking does not include disabled vehicles and parking; and
- Include explicit reference to reducing severance issues in relation to improving perceptions of safety and promoting active travel.

ISA Framework Objective 13: Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society

Scoring for policies under the 'Zero Emission' thematic policy chapter remained mostly unchanged as there are no significant amendments in relation to this objective. Policy ZE2 has partially addressed the suggested mitigation from the previous iteration and received

improved scores to positive regarding access to sustainable transport modes. It is recommended that the policy include explicit reference to inclusive design and consideration for deprived areas.

Policies A2, A4, and A6 within the 'Active' thematic policies chapter received improved scores as they have been amended to refer to inclusive facilities, inclusive cycle sharing, to joining up neighbourhoods.

Scoring for Policies RR1, RR6 and RR7 under the 'Reliable and Resilient' thematic policy chapter have added reference to public transport improvements which resulted in increased scoring against criteria promoting affordability, accessibility, and connectivity. Policy RR2 and RR3 also received more positive score in relation to equality and connectivity, with their reference to network safety and inclusive car parking respectively. Other policies received same scores as before and residual impacts across the chapter include suggested mitigations remained from the previous assessment.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received mostly positive scores as an improved bus and railway system will increase accessibility to opportunities. Policy I0, however, had a weaker alignment as it does not reference 'wheeling' as a sustainable alternative to travelling by car. Scoring against this objective generally remained the same for the existing policies, however this includes negative scoring. Policies I4 and I5 received positive scores as previous mitigation had been addressed. Policy I11 also saw an increase in scores as it was amended to refer to considering the needs of vulnerable users as part of the integrated Weaver Network. Scoring for policies I13, I14 and I17 remained negative as mitigation was not addressed; this includes making explicit reference to inclusive growth and placemaking, ensuring new development are accessible for everyone, and the proposed content of the urban centre movement strategies.

Policies IA3, IA5, and IA6 within the 'Inclusive and Accessible' thematic policy chapter received improved scores as they now reference improving access for rural communities to services and facilities, and access to information and ticketing. Residual impacts have been identified, including to make explicit reference to disabled and low mobility users, affordability, equality of opportunity for rural communities and deprived areas, and the use of accessible and inclusive design to remove barriers to travel. For Policy IA2, it needs to be explicitly stated that the removal of certain types of vehicle traffic and parking does not include disabled vehicles and parking.

Scoring for policies under the 'Safe' thematic policy chapter remained unchanged, except for Policy S1, which received improved scores for taking into account vulnerable road users. A residual impact has been identified for Policy S2, which is to make explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Improve access to information for charging infrastructure users;
- Include explicit reference to wheeling as an alternative to private car use;
- Include explicit reference to inclusive growth and placemaking, ensuring new developments are accessible for everyone, and the proposed content of the urban centre movement strategies;
- Include explicit reference to disabled and low mobility users, affordability, equality of opportunity for rural communities and deprived areas, and the use of accessible and inclusive design to remove barriers to travel;
- For Policy IA2, explicitly state that the removal of certain types of vehicle traffic and parking does not include disabled vehicles and parking; and
- Include explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.

ISA Framework Objective 14: Improve transport safety, reduce crime and fear of crime, and promote community safety

Scoring for policies under the 'Zero Emission' thematic policy chapter remained neutral as there are no relevant amendments to the policies against this objective. Suggested mitigation measures for Policy ZE2 from the previous iteration have been carried forward as residual impacts.

Policies within the 'Active' thematic policy chapter mostly received the same scoring as the previous assessment with limited amendments relevant to this objective. Policy A1 received improved scoring in terms of creating a more welcoming environment for active travel with its reference to integration with green and blue infrastructure. Suggested mitigations from the previous assessment remained as residual impacts across the chapter. For Policy A6, additional mitigation has been added which encourages making

explicit reference to Streets for Everyone and Vision Zero, both of which consider active travel and have a strong safety element.

Most policies under the 'Reliable and Resilient' thematic policy chapter received same scores as the previous assessment as there were limited amendments relevant to this objective. Previous suggested mitigations have also been carried forward as residual impacts. Scoring for Policy RR2 against this objective have significantly improved due to its additional reference to improving network safety. Policy RR8 also received improved scores in relation to traffic calming and road safety with its direct reference to improving safety.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received a mix of positive and neutral scores. Policy I0 scored very positively as it focuses on prioritising and promoting sustainable travel, which could be achieved through improvements to the safety. Scoring against this objective generally remained the same for the existing policies, however this includes negative scoring. Policy I5 received positive scores as consistent wayfinding will contribute to public realm improvements, ensure safe navigation and enable users to give accurate updates on their location. Policy I11 now considers the needs of vulnerable users as part of the integrated Weaver Network. Policy I8 continues to hold a weak alignment, as there is still no reference to public safety, whereas the policies aim to deliver transport hubs and interchanges that are welcoming spaces. Policy I18 also retained its negative scoring as there is no reference to the risks of vehicles, whereas the policy aims to develop a movement strategy and support the delivery of Mass Transit.

Policies within the 'Inclusive and Affordable' thematic policy chapter remained unchanged. Policies IA1, IA3, and IA6 retained their weak alignment, and residual impacts have been identified, including to make explicit reference to how safety will be embedded in transport, and safety improving freedom of movement and therefore connectivity and access to opportunities. Whilst Policy IA2 remained positive, it could still be improved by making explicit reference to 'public realm' within the policy wording. The policy could also include principles to align with the West Yorkshire Streets for Everyone Strategy as this is yet to be adopted.

Scoring for policies under the 'Safe' thematic policy chapter remained unchanged, except for Policy S1, which received improved scores by referencing 'the delivery objectives' set out in Vision Zero and the Police and Crime Plan. Residual impacts have been identified

for Policies S1 and S2, including making explicit reference to how embedding safety in design can improve access to opportunities for all, and to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Introduce traffic calming measures to reduce risks imposed by cars and other vehicles in residential and deprived areas;
- Include references to improving public safety at transport hubs and interchanges through public realm improvements;
- Include explicit reference to the proposed content of the urban centre movement strategies;
- For Policy IA2, explicit reference should be made to 'public realm' within the policy wording, and principles to align with the West Yorkshire Streets for Everyone Strategy; and
- Include explicit reference to how embedding safety in design can improve access to opportunities for all.

ISA Framework Objective 15: Reduce environmental impacts of transport including air, noise and light pollution

Scoring for policies under the 'Zero Emission' thematic policy chapter remained unchanged as there were no relevant amendments to the policies against this objective. Suggested mitigation measures for Policy ZE2 from the previous iteration have been carried forward as residual impacts.

Most policies within the 'Active' thematic policy chapter received same scores as the previous assessment and their suggested mitigations have been carried forward as residual impacts. Policy A1 received improved scoring against criteria in terms of environmental enhancement and active travel promotion, supported by its additional reference to improving active travel experiences through green and blue infrastructure integration.

Policies under the 'Reliable and Resilient' thematic policy chapter have made limited amendments relevant to this objective. Therefore, scoring across this chapter remained

unchanged from the previous assessment, with suggested mitigations carried forward as residual impacts.

The three new policies within the 'Integrated' thematic policy chapter (Policies I0, I18, and I19) received mostly neutral scores, however, Policy I0 scored positively as it focuses on prioritising and promoting sustainable travel which will reduce air pollution, and references measures to promote walking and cycling which could include the provision of green infrastructure. Scoring against this objective generally remained the same for the existing policies, scoring neutral. Policy I11, however, gained a positive score as it has been amended to refer to taking into account the needs of vulnerable users as part of the integrated Weaver Network. Policy I1 remained negative as it does not include measures to improve transport impacts on the local environment.

Policies within the 'Inclusive and Affordable' thematic policy chapter remained unchanged. Policies IA2 retained its weak and uncertain alignment, and residual impacts have been identified, including making explicit reference to delivering healthy places through healthier construction and operational practices.

Scoring for policies under the 'Safe' thematic policy chapter remained unchanged, except for Policy S1, which received improved scores by referencing considering vulnerable road users and designing active travel infrastructure with climate adaptation in mind.

The key residual impacts identified through this ISA objective that apply to the plan are as follows:

- Include measures to improve transport impacts on the local environment;
- Include reference to different measures that can effectively reduce specific types of pollution; and
- Include explicit reference to delivering healthy places through healthier construction and operational practices.

5. ISA Conclusions

This report has outlined part of the ISA Stage B and C process (with the exception of the Compatibility Assessment, which is subject to its own report) and work undertaken to ensure that sustainability, economic and social matters were considered in the development of the Plan. This section draws integrated conclusions from each stage of the ISA as detailed within Sections 3 and 4 of this report.

5.1 ISA of Reasonable Alternatives

The ISA of the reasonable alternatives indicate that while all three alternatives demonstrate beneficial impacts against key ISA Objectives, the balanced approach (Alternative 3) performs most effectively overall. This alternative aligns strongly with the overarching LTP objectives of boosting productivity, enabling inclusive growth, tackling the climate emergency, and improving health and wellbeing. It strongly promotes use of sustainable transport modes, enhances economic prosperity and promotes equality of opportunity.

However, a consistent challenge across all alternatives is the lack of explicit reference to climate change adaptation measures, particularly in ensuring the resilience of the transport network. Additionally, despite positive sustainability contributions, none of the alternatives sufficiently prioritise green and blue infrastructure and only one alternative (Alternative 1) prioritises circular economy principles, such as re-use and recycling.

To achieve a fully integrated and sustainable approach, it is suggested to have a greater focus on integrating green and blue infrastructure to mitigate environmental impacts, embedding climate adaptation strategies to future-proof the transport network, and increasing commitments to circular economy principles in transport asset maintenance. The balanced approach offers the most comprehensive foundation, but by incorporating these other recommendations, it is possible to further refine and strengthen the balanced approach.

5.2 ISA of Thematic Policies

5.2.1 2025 Conclusions

The proposed thematic policies for the Plan have been assessed in relation to the 15 objectives outlined in the ISA framework. In several instances, where policies have been

assessed as weak against certain objectives, this is due to the criteria being primarily addressed by a different thematic policy chapter. It should be noted that the Plan must be considered as a whole, and it is recognised that it is not desirable or practicable to have all objectives covered by every policy.

Overall, the policies performed strongly in relation to promoting a modal shift towards sustainable modes of transport, with the exception of Policies RR3 and RR8, which have the potential to increase the use of private cars and freights and could benefit from including considerations for introducing disincentives or encouraging renewable fuel usage. It is recommended that Policies IA1 and IA6 include references that promote sustainable transport to children and young people, and policies in the 'Integrated' thematic policy chapter further promote sustainable modes through enhancing green and blue infrastructure, and low emission vehicle infrastructure. Policies also generally scored well in terms of enhancing economic prosperity.

Throughout the policies, there are good references to inclusivity, such as wheeling, but the 'Inclusive and Affordable' thematic policy chapter could be enhanced by making more explicit references to how the transport network will meet the needs of specific groups, particularly vulnerable and underrepresented groups, as well as ensuring access to information for all users. The 'Safe' thematic policy chapter contribute strongly to enhancing the perceived safety for road users. However, it is recommended that all policies include more specific measures to reduce risks for vulnerable road users and reference safety in general in relation to the design and management of a resilient and secure transport network.

Where policies mention the allocation and design of infrastructure, it is recommended that they consider the specific needs of deprived and rural communities. It would also be beneficial for the policies to support the minimisation of transport impacts on specific designations, including mineral safeguarding areas, designated landscapes and buildings, and public rights of way. More opportunities could be explored for synergies with land use planning to identify the best locations to improve the connectivity to services and employment opportunities. Reference to land use, including encouraging the use of previously developed land, will be particularly relevant to policies under the 'Reliable and Resilient' and 'Integrated' thematic policy chapters.

Climate change adaptation is considered a key measure for managing the transport network in the foreseeable future and is of particular relevance to the 'Reliable and

Resilient’ and ‘Safe’ thematic policy chapters. Policies S1, S3, and S5 in the ‘Safe’ chapter scored positively as they focus on improving safety and security through design, infrastructure, and service interventions, which could include climate mitigation and adaptation. The policies, however, could be enhanced by making more explicit reference to climate resilience in the policy wording. Although a number of policies also show strong support in addressing air quality or reducing the environmental impacts of transport, either directly or indirectly, it is recommended that more mitigation and adaptation measures be considered for other climate change aspects, such as flood risks, waste management, and supporting schemes for all users during extreme weather events. Specifically, these measures could be further addressed in Policies A1, A2, A6 in the ‘Active’ chapter and Policies RR1, RR2, RR6, RR8, and RR9. Where policies raise the need for the construction of new transport infrastructure, it is recommended that they consider incorporating sustainable and resilient drainage systems as well as reducing the use of impermeable hard surfacing. The policies could also explore more synergies with green and blue infrastructure to mitigate the impact of transport on the environment and encourage active travel, which also promotes the health and safety of local communities.

Finally, it is also noted that unadopted plans, such as the West Yorkshire Streets for Everyone Strategy and the Leeds City Centre Movement Strategy, have been repeatedly mentioned in policies. The policies could be made clearer by including the specific aims proposed that are relevant to the strategy in order to meet the objectives. Specifically, Policies S2, IA2, I17 and A1 could be enhanced to provide more explicit contributions towards the objectives.

It is noted that there are interrelationships between the ISA objectives, particularly where the thematic policies are concerned. These have been drawn out in the summaries and recommendations where relevant.

5.2.2 2026 Conclusions

Following LTP public consultation and LTP amendments to the draft policies, the updated thematic policies have been reassessed against the same 15 ISA objectives. This includes three new policies added to the previous draft under the ‘Integrated’ thematic policy chapter, which provides further support for a shift to sustainable transport modes. Overall, the scoring for the policies has improved, although some remained neutral or showed weaker alignment with the ISA objectives. This reflects the fact that the Plan must be read as a whole, and it is not desirable or practicable to have all objectives covered by every policy.

The refined policies maintain a strong focus on promoting sustainable modal shift, with a significantly increased emphasis within the 'Zero Emissions' and 'Reliable and Resilient' thematic policy chapters. The expanded reference to relevant measures further supports air quality improvements and climate change adaptation. However, it is recommended that more explicit reference to disincentives for private car use be included. Notably, Policies ZE2 and RR9 received improved scores across a range of objectives with their additional reference to nature protection and climate change adaptation and mitigation measures. Policy ZE2 is further recommended to incorporate targets set in the World Health Organisation (WHO) Global Air Quality Guidelines to achieve more desirable air quality outcomes.

Similarly, the 'Integrated' thematic policy chapter placed greater emphasis on prioritising public transport modes, supported by increased reference to bus franchising and the delivery of rail and mass transit. The three new policies under 'Integrated' all relate to prioritising sustainable transport modes and promoting bus franchising and rail. This resulted in indirect effects in improving accessibility and connectivity, air quality, and environment enhancement. However, it is considered that the chapter could give further attention to avoiding and protecting designated habitats and important sites, and more specifically reference minimising emissions and promoting resource efficiency when developing new infrastructure.

The policy updates demonstrated increased awareness of incorporating climate change adaptation and mitigation measures into the design process, most explicitly referenced within Policies S1, I1, IA2, and RR9. However, more consideration could be given to adaptation measures for extreme weather events, especially for active travel users. It is also recommended that more consideration be given to measures that enhance the resilience of the transport network across the Plan, including flood risk management considerations in infrastructure design, such as incorporating sustainable drainage systems and minimising the use of impermeable hard surfaces.

Some policies have been amended to strengthen reference to inclusivity, but further consideration could be given to designing for the needs of specific vulnerable and at-risk groups, areas of high unemployment, and rural communities. For example, Policies IA2 and RR4 are recommended to explicitly state that the removal of certain types of vehicle traffic and that parking does not apply to disabled vehicles and parking. An additional reference to the Weaver Network across the Plan implies an integrated transport system that enables modal shift, which aligns with objectives promoting sustainable transport

options and improving health and wellbeing of the local population. However, some reference to specific types of transport options have been removed which may reduce clarity in policy wording.

Additionally, the revised policies included increased reference to coordination with land use planning, explicitly reflected in Policy A5, along with new references to integrating with green and blue infrastructure to enhance active travel experiences in Policies A1 and A5. Across different chapters, it is recommended that further reference be made to the design of green and blue infrastructure, including considerations for connectivity, biodiversity, and surrounding safety. Policies I12, A2, IA3, and IA6 are also strengthened through explicit reference to improving connections to services and opportunities for employment, housing, healthcare, education, and leisure, supporting more positive scoring against various objectives. However, the policies could include additional reference to encouraging the use of previously developed land when building new infrastructure.

In addition to the above, suggested mitigations from the 2025 assessment remained partly unresolved in this iteration as residual effects. This generally related to including more explicit reference to the protection and enhancement of specific features, including natural habitats and designated sites, heritage assets, mineral safeguarding areas, and PRow. Clarity with reference to other policy documents, including the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, LCWIP ambition, and urban centre movement strategies, has been recommended, and content relevant to the LTP policy should be drawn out and incorporated directly into the policy wording.

5.3 ISA of Infrastructure Intervention Types

The ISA of infrastructure intervention types demonstrates strong performance in key ISA topic areas such as reducing greenhouse gas emissions from transport, promoting sustainable modes of transport, enhancing economic opportunities, and improving equality of opportunity. However, there remains weak alignment related to increasing resilience to climate change and promoting sustainable and circular waste management practices, for instance.

‘Infrastructure improvements’ (Type A) shows significant benefits in reducing emissions and promoting sustainable modes of transport but would benefit from stronger integration of green and blue infrastructure to address environmental impacts and enhance the natural environment. Additionally, climate resilience and circular waste management could be incorporated to enhance long-term sustainability of this infrastructure intervention type.

Similarly, 'Policy and regulation measures' (Type B) performed well in promoting sustainable transport but would benefit from explicit measures to integrate climate adaptation strategies and equitable transport development.

'Maintenance and asset management' (Type C) performed strongly against reducing emissions from transport and promoting sustainable transport and equality of opportunity, but presented uncertainties in local air quality impacts. Potential mitigation includes a focus on sustainable asset management, climate change adaptation measures, and active travel infrastructure enhancements. 'Transport service improvements' (Type D) demonstrated strong alignment with air quality and environmental impact reduction objectives. However, addressing light pollution could be included as an environmental mitigation measure to strengthen this infrastructure intervention type.

'Behaviour change, engagement, education and consultation' (Type E) performed strongly against promoting sustainable modes of transport, but incorporating climate change adaptation measures into these initiatives will further enhance their sustainability and impact. 'Data, technology and innovation' (Type F) contribute positively to objectives concerning promotion of sustainable transport, accessibility and equality. However, this infrastructure intervention type could also incorporate measures for emissions reduction, environmental impact mitigation, and safety improvements to further enhance these infrastructure interventions.

'Cross-cutting and enabling interventions' (Type G) demonstrated strong alignment across multiple ISA objectives, particularly in enhancing biodiversity, increasing climate resilience and promoting equality of opportunity. However, further emphasis on soil conservation, water environment enhancement and contaminated land remediation would enhance the sustainability of this infrastructure intervention type.

Moving forward, the development of these infrastructure intervention types within the LTP Implementation Plan should seek to take a holistic and integrated approach that strengthens climate resilience, environmental protection and social equity to ensure that transport infrastructure and relevant interventions contribute to a more sustainable and inclusive future.

6. Next steps: Monitoring

Monitoring of the Plan will be completed post-adoption, in accordance with the SEA Directive and Regulation 17 of The Environmental Assessment of Plans and Programmes Regulations 2004. It requires the person by whom the plan or programme was prepared to monitor with a view to identifying, at an early stage, unforeseen adverse effects, and being able to undertake appropriate remedial action. This ISA has set up a framework against which monitoring could be undertaken. It will enable any unexpected adverse effects due to implementation of the Plan to be identified and potential mitigation options explored. The monitoring arrangements can be set out in the Post-Adoption Statement.

A.1	Equality Impact Screening of Thematic Policies	15

1. Introduction

This statement describes the process and findings of the Equality Impact Screening which is an integral element of the ISA of the Mayor's West Yorkshire Local Transport Plan ('the Plan'). The Equality Impact Screening for the Plan is not a separate process and has been embedded within the ISA and its objectives. However, for transparency and clarity, this separate statement on the Equality Impact Screening is provided as an appendix to the full ISA.

1.1 Background

As detailed in Section 3.2.2 of the ISA Main Report, the Equality Act imposes a duty on public bodies that shape policy, deliver services and/or employ people. The duty requires public bodies to:

- Have due regard to the need to eliminate discrimination;
- advance equality of opportunity; and
- foster good relations between different people when carrying out their activities.

The ISA considers, in its scope, the likely effects on discriminatory practices; the potential to alter the opportunities of certain groups of people; and/or effect on relationships between different groups of people. In order to understand which groups of people (or individuals), may suffer discrimination, the Equality Act sets out a series of "protected characteristics":

- Age;
- Disability;
- Gender Reassignment;
- Marriage and Civil Partnership;
- Pregnancy and Maternity;
- Race;
- Religion or Belief;
- Sex; and
- Sexual Orientation

The Equality Impact Screening is designed to ensure that discrimination does not occur in the drawing up of plans and policies, and that such plans or policies meet the requirements of equality legislation in the UK, most notably the Equality Act 2010. It is being used as part of the ISA to add value and depth to the assessment process.

It should be noted that the Equality Impact Screening element of the ISA seeks to not only avoid/mitigate negative impacts on equality but is also focused on enhancing the Plan's objectives and policies in relation to equality matters. As such, the ISA goes beyond the minimum requirements of assessing impacts in line with the Equality Act 2010, but also provides a holistic assessment of equality, diversity and health and wellbeing (an important factor in determining equality) and embeds this within the ISA framework and throughout the assessment of the iterations of the draft Plan.

1.2 Purpose of the Equality Impact Statement

The purpose of this Equality Impact Statement is to outline how due regard has been given in the full ISA to the potential effects of the proposed policies and strategy on the protected characteristics or persons identified under the Equality Act, but also looking at equality issues more holistically (as explained above). This Statement is structured to demonstrate compliance with the requirements of the Equality Act 2010. It includes the following sections:

- Section 2: Summary of requirements of Equality Act 2010;
- Section 3: Description of Equality Impact Screening methodology;
- Section 4: Results of Equality Impact Screening; and
- Section 5: Summary and conclusions.

2. Requirements of the Equality Act 2010

The Equality Act (2010) came into effect in October 2010 with the aim of harmonising all current discrimination law and strengthening the laws that prevent discrimination. It applies to the provision of services and public functions and includes the development of local authority policies and plans. The Act maintains the protection provided by previous legislation and therefore prevents discrimination on the basis of nine protected characteristics: age; disability; gender reassignment; marriage and civil partnership; pregnancy and maternity; race; religion or belief; sex; and sexual orientation.

Inequality can exist in a number of forms and with regards to spatial planning, this can include inadequate provision of, and access to services (e.g. health, food stores, and education facilities), good quality housing, employment opportunities, a healthy living environment and transport infrastructure for all members of society.

The Equality Act 2010 does not outline how public authorities should assess the effects on equality of new policies and programmes, but doing so is an important part of complying with the general duty. The approach in this report reflects the principles of the Equality Framework for Local Government¹.

An EqlA seeks to improve the work of local authorities and ensures that the policies and plans it develops do not discriminate in the manner in which they provide services and employment. EqlA also aims to ensure that local authorities do all they can to advance equality of opportunity between the people who do, and the people who do not share a relevant protected characteristic.

¹ Equality and Human Rights Commission (2009). Equality Impact Assessment Guidance.

3. Methodology of the Equality Impact Screening

3.1 Key Stages of the Equality Impact Screening

The methodology adopted for the Equality Impact Screening of the draft Plan involves two principal stages. Stage 1 is the Equality Impact screening, with stages as follows:

- Identification of the purpose/aims of the strategy/plan;
- Identification of other plans/policies/strategies that relate to the strategy/plan in relation to equality;
- Summarise baseline information on equality issues; and
- Assess the impacts of the strategy/plan on protected characteristics or persons.

The steps within Stage 2 include:

- Gathering of any additional baseline information;
- Agreement of scope with wider stakeholders as necessary;
- Detailed assessment of strategy/plan; recommendations for mitigation; identification of monitoring measures for implementation; and
- Reporting of screening results, further consultation as necessary and finalise based on responses.

3.2 Equality Impact Screening

The Screening stage has been split into four tasks as set out below.

Task 1: Identification of the vision and objectives of the Plan

The following questions were used as part of this task:

- What are the main visions, objectives and outcomes of the Plan and its policies?
- Who will implement the Plan's policies?
- Who will be affected by the Plan's policies?

Task 2: Description of other plans, programmes and strategies related to or used to develop the Plan

This identified relevant documents that relate to the development of the Plan in relation to equality. This task was completed as part of the ISA Scoping stage and detailed in the ISA's Scoping Report.

Task 3: Review baseline data

This involves identifying relevant data on equality issues across West Yorkshire's geography. This task was completed as part of the ISA Scoping stage and detailed in the ISA's Scoping Report.

Task 4: Screening

This task brings together information gained at Tasks 1-3 to support a screening conclusion, which is embedded within the ISA Scoping and Assessment process. The screening uses the ISA scoring categories used across the ISA, shown in Table 1, and is informed by the following questions:

- Will the policy have a negative impact on the protected characteristic or person?
- How can the identified negative impact be avoided or mitigated?
- How can identified positive impacts be enhanced?
- Is monitoring of the issue during implementation required?

This screening focuses on the protected characteristics identified in the Equality Act. The wider EqIA assessment has been embedded into the full ISA. The ISA Framework includes a specific EqIA Objective: “Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society.”

Table 1: Assessment Key

Score	Assessment Description
++	Very positive effect
+	Positive effect
?	Uncertain
-	Negative effect
--	Very negative effect
O	Neutral/no effect

4. Results of the Equality Impact Screening

Tasks 1 to 3 below formed part of the scoping stage for the ISA. This ensured that equality issues were embedded into the ISA from the outset. For completeness, the tasks are summarised here.

4.1 Task 1: Identification of the vision and objectives of the Plan

4.1.1 What are the main visions, objectives and outcomes of the Plan and its policies?

The Local Transport Plan sets out how transport will play its part in achieving the missions of the West Yorkshire Plan and in supporting the ambitions set out in the West Yorkshire Local Growth Plan and Climate and Environment Plan. Its vision is: “for a leading transport network for West Yorkshire: benefitting people, places and our planet by embedding sustainable transport choices to enable the economy to grow”.

To reflect West Yorkshire’s diverse people, places, and the scale of the transport challenges it faces, West Yorkshire Combined Authority (WYCA) has developed the Plan with six key principles in mind: safe, inclusive and affordable, zero-emission, reliable and resilient, active, and integrated. These principles underpin the strategy and articulate the policies.

To support and achieve the overarching objectives of the Plan, and ensure the delivery of a transport network that offers outstanding access to opportunity across the region, five key elements have been identified as fundamental components of the strategy:

- Inclusive, reliable, attractive bus services, delivered through bus franchising;
- Reliable and accessible rail services;
- A mass transit system, with Phase 1 providing tram services in Leeds and Bradford;
- An expanded active travel network, enabling more people to walk, wheel and cycle for their journeys; and
- Integration across public transport and active travel.

The strategy will support achieving the following four objectives, which underpin the LTP vision:

- Boosting productivity;
- Enabling inclusive growth;
- Tackling the climate emergency; and
- Improving health and wellbeing.

Following consultation and WYCA governance approval, the intention is to adopt the final Plan in 2026. Once adopted, it will form a key policy document for all of the local transport authorities and relevant organisations within the plan area.

The Plan also includes Thematic Policy Chapters which mirror the six key principles outlined above.

These policies have been assessed as part of the ISA process. The methodology, results and conclusions are outlined within the ISA Main Report and Appendices.

4.1.2 Who will implement the Plan policies?

WYCA, along with delivery partners, will implement the Plan. Once the Plan is adopted, WYCA will work collaboratively with delivery partners and relevant organisations to support the delivery of the vision and ambitions outlined within the Plan for transport infrastructure across West Yorkshire.

4.1.3 Who will be affected by the Plan policies?

The Plan applies to the WYCA area consisting of five local authority areas, including Bradford, Calderdale, Kirklees, Leeds, and Wakefield. It will affect people living, working and visiting this area.

4.2 Task 2: Description of other plans, programmes and strategies related to or used to develop the Plan

A list of plans, programmes and strategies that are most directly related to the Plan in relation to equality issues are provided within the Scoping Report appendix, with key themes for the ISA drawn out in the Scoping Report. The relevant plans include the following.

4.2.1 International

- EU Employment Equality Framework (2000)
- EU Race Equality Framework (2000/43/EU)
- UNECE Convention on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters (Aarhus Convention) (1998)
- WHO National Programmes for Age Friendly Cities and Communities Guide (2023)

4.2.2 National

- A Sure Start to Later Life: Ending Inequalities for Older People – A Social Exclusion Unit Final Report (2006)
- Building a Society for all Ages (2009)

- Disability Discrimination Act (2005)
- Equalities Review (2007)
- Equality Act (2010)
- Equality Framework for Local Government (2021)
- Every Child Matters (2003)
- Older People: Their Transport Needs and Requirements (DfT, 2001)
- Public Sector Equality Duty (Equality Act 2010)
- Race Relations (Amendment) Act (2011)
- Tackling Health Inequalities: A Programme for Action (2003)
- Transport and Inequality: An Evidence Review for the Department of Transport (2019)

4.2.3 Regional

- TfN Connecting Communities: Socially Inclusive Transport Strategy for the North of England (2023)
- TfN Strategic Transport Plan: People and Place Framework (2024)
- TfN: Transport and social exclusion in the North in 2023/24
- The Mayor of West Yorkshire's Safety of Women and Girls Strategy
- West Yorkshire Draft Inclusive Growth Framework
- West Yorkshire Equity, Diversity, and Inclusion Plan 2022 – 2025 (2022)
- West Yorkshire Equity, Diversity, and Inclusion Report 2023/2024 (2024)

4.2.4 Local

- Bradford Children and Young People's Strategy 2023 to 2025
- Bradford Equality Objectives and Equality Plan 2021-2025 (2021)
- Calderdale Equality Duty Report (2024)
- Kirklees Inclusion and Diversity Annual Report 2022/2023 (2023)
- Kirklees Social Value Policy (2022)
- Leeds Equality, Diversity and Inclusion Annual Report (2023)
- Wakefield Equality, Diversity and Inclusion Policy and Action Plan (2022)
- Wakefield Equality, Diversity and Inclusion Annual Report 2022-2023 (2023)

4.3 Task 3: Review Baseline Data

The ISA Scoping Report, which was drafted in 2024, details the population and demographic baseline and trends for the five local authorities comprising the West Yorkshire geography. This should be referred to for data related to many of the Equality

Act 2010 protected characteristics. Please note that it was not possible to readily obtain data at the local authority level for all protected characteristics. This is not considered to be a significant limitation to the Equality Impact Screening process given the city-region scale at which policies apply and that the assessment is based on the nature (positive, negative, neutral or uncertain) of the effect. This baseline review was shared and consulted with relevant organisations and stakeholders across the plan area as the ISA Scoping stage.

4.4 Task 4: Screening

This section summarises the Equality Impact Screening, including new and amended policies following consultation on the draft LTP in 2025. The tables associated with this assessment are contained within Appendix A.1 of this report.

There have been improvements to ISA policies which seek to enhance equality across West Yorkshire. Whilst the updated 2026 position is outlined in detail as an integral part of the ISA Main Report, the following summarises a number of the key changes (however, this is not an exhaustive list).

4.4.1 Thematic Policies

The Plan has six thematic chapters which cover a wide range of topics, including Safe; Inclusive and Affordable; Zero Emission; Reliable and Resilient; Active; and Integrated. Given their strategic nature, they do not tend to focus on protected characteristics. The majority of the policies therefore are expected to have a neutral effect against the protected characteristics.

A number of policies within the Plan, however, have received positive scores against Objective 13: “Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society.”

Under the Zero Emission chapter, policies scored positively against the age, disability, pregnancy and race characteristics, as these groups are more vulnerable and therefore will be more impacted by these policies. Policy ZE2 scored very positively as it references reducing the harmful impacts of transport on groups most at risk.

Policies related to the Active thematic chapter generally scored positively in terms of age and disability, particularly as they make good reference to wheeling as part of active travel and providing infrastructure to support this. Policies A2, A4 and A6 scored positively across all protected characteristics, having specifically used ‘inclusive and accessible’ in their policy wording.

The Integrated chapter sets out to join up ways to travel whilst enhancing services, timetables, tickets, fares, and information, and scored positively against the protected characteristics. Policy I1 states that transport interchanges will be welcoming spaces, accessible for all, and Policy I2 references improving access more generally. Policy I3 will ensure consistency in branding and marketing to improve recognisability, and Policy I5 will enhance wayfinding to ensure the system is legible for everyone. Policy I4 states that it will improve travel confidence and ensure help is available in an accessible and inclusive way. Policy I7 states that the fares and ticketing offer will be reflective of diverse passenger needs and represent value for money. Policies I11 and I12 scored highly as they reference considering the needs of vulnerable users and increasing accessibility to housing, employment, education, and healthcare. Policy I14 also states that new developments will be made accessible. Policy I0, however, a new policy in 2026 on prioritising sustainable alternatives to travel by car, scored negatively against the age and disability protected characteristics, as whilst it references walking and cycling, it fails to consider wheeling. The policy could therefore be enhanced by making explicit reference to wheeling as an alternative to travelling by car.

The Inclusive and Affordable chapter concerns creating a welcoming network that provides opportunities for all, removes disadvantages, and has affordable fares and tickets. Policies IA1 and IA3 focus upon connecting communities and improving access to services and opportunities, specifically for isolated urban and rural communities that may experience lower levels of connectivity. Policy IA2 states that high quality and healthy places will be delivered through the development of the West Yorkshire Streets for Everyone Strategy. Policy IA5 on Removing Barriers to Accessing our Network states that the transport network will be made accessible through new schemes and enhancing existing infrastructure, ensuring no one is excluded. Similarly, Policy IA4 also seeks to reduce transport related social exclusion. Policy IA6 will ensure that the transport network meets the needs of children and young people, enabling access to education, and promoting independent travel.

The 'Safe' thematic chapter has strong alignment due to referencing the provision of wheeling infrastructure, achieving equitable mobility, and ensuring safety for 'all users' with a particular focus on vulnerable road users and those groups most at risk.

Under the Reliable and Resilient chapter, Policy RR1 seeks to improve bus reliability and journey times, in line with the West Yorkshire Streets for Everyone Strategy (although this is yet to be adopted). Policies RR2 and RR8 reference improving safety, allowing for

positive scoring across the protected characteristics. Policy RR3 also states that it will develop an inclusive, fair and equitable place-based approach to car parking. Policy RR4, however, received uncertain scores against age and disability as it refers to better serving the community for wheeling; however, does not reference retaining on-street parking for disabled people. Policy RR7 scored positively as it aims to ensure the accessibility of public transport.

A number of the thematic policies have been strengthened in response to the 2025 ISA or following consultation on the draft LTP in 2025. Those particularly relevant to equality are summarised below:

- Policies S1 and I11 now take into account the needs of vulnerable road users;
- Policy S2 now references signal timings, which will improve the freedom of movement for older people, disabled people or those with low mobility, and pregnant people;
- Policy IA3 now references improving access to services and opportunities, as well as referencing the Streets for Everyone Strategy;
- Policy A2 has been strengthened by including reference to inclusive and accessible facilities;
- Policy A4 states that it will promote cycling in an accessible and inclusive way;
- Policies RR2 and RR8 have been enhanced by referencing improving safety;
- Policy RR3 now references taking an inclusive approach to car parking;
- Policy RR7 now references ensuring the accessibility of public transport;
- Policy I2 states that it will improve access to the park and ride;
- Policy I4 now states that it will provide access to information in an inclusive and accessible way; and
- Policy I12 has been enhanced by referencing increasing accessibility to housing and employment, as well as education and healthcare facilities.

Three new policies have been added to the Plan since the first iteration of the ISA in 2025; these were included in the LTP consultation but were not included in the pre-consultation assessment. Policy I0 had a weak alignment against the age and disability protected characteristics, as it references different types of sustainable and active travel, including

walking and cycle, but does not reference wheeling. Policies I18 and I19, on bus franchising and strategic rail, scored neutral.

For the full screening, please refer to Appendix A.1.

4.5 Residual recommendations from the 2025 ISA

The recommendations outlined in the 2025 ISA have been reviewed again in 2026, following LTP consultation and amendments to the draft LTP policy, and some are still considered beneficial for strengthening policy against the objectives and continue to be pertinent to the Equality Impact Screening. These residual recommendations are outlined below.

Policies within the 'Integrated' chapter could be enhanced through explicitly referencing improving connectivity to the most deprived areas, improving the travel confidence of disabled people and those with low mobility, inclusive growth and access to opportunities for all, and affordability across sustainable modes.

The 'Inclusive and Affordable' chapter could be strengthened by ensuring the needs of disabled and low mobility users of the network are considered, particularly through the delivery of car parking, as well as the needs of younger travellers. Reference to connecting rural areas through affordability and accessibility could also enhance policy, specifically Policy IA3.

The policies within the 'Reliable and Resilient' Chapter could be improved by referencing the needs of deprived areas and vulnerable groups, ensuring the needs of disabled and low mobility users are considered in the delivery of car parking, and the connectivity between spaces when reallocating road space.

Policy S2 within the 'Safe' chapter could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.

Within the 'Active' chapter, particularly Policy A1, there could be more explicit reference to inclusive design and accessibility in relation to the promotion of active travel. Where relevant references are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy. The policies could also be enhanced by referencing inclusive design in relation to the active travel network, considering the needs of vulnerable groups, and ensuring accessibility within and to more deprived areas.

The 'Zero Emission' chapter could be enhanced by referencing the promotion of inclusive design, access to active travel and sustainable transport in deprived areas and improving access to information in relation to implementing charging infrastructure.

For the full assessment of thematic policies, please refer to Appendix A.3 in the Main Report.

5. Conclusions

The Plan sets out the proposed approach that the Combined Authority will take towards transport development across West Yorkshire. The development of the Plan has been influenced by a number of other plans, programmes and assessments that relate to the protected characteristics or persons under the Equality Act 2010. EqlA considerations have been included within the ISA objectives and throughout the Integrated Sustainability Appraisal of the Plan.

It is important to note that a number of the policies in the screening table are scored as having a neutral impact against the protected characteristics. This is due to the holistic, strategic nature of the plan with the delivery partners and transport authorities providing further detail in the future regarding the design and implementation of transport schemes within the plan area as appropriate.

The assessment, which was integral to the ISA and summarised within this Equality Impact Statement, has found that the Plan is unlikely to have negative effects on protected characteristics or persons identified under the Equality Act 2010, and as a result, an independent EqlA has not been deemed necessary. Additionally, LTP Implementation Plans will be developed by the Combined Authority, which will contain greater detail on proposed schemes to implement the policies; these will be subject to more detailed assessment. EqlA considerations have been included within the ISA objectives as part of the Integrated Assessment of the Plan.

From this, it can be concluded that the plan overall provides a strong policy basis with regard to equality for future growth and transportation infrastructure planning within the plan area.

A.1 Equality Impact Screening of Thematic Policies

Policy Reference	Policy	Protected Characteristics								
		Age	Disability	Gender Reassignment	Marriage and Civil Partnership	Pregnancy and Maternity	Race	Religion or Belief	Sex	Sexual Orientation
Thematic Chapter: Safe										
S1	Embedding safety in design	++	++	+	+	++	+	+	+	+

A.2 Assessment of Reasonable Alternatives

Reasonable Alternative	1. Business-as-usual							
Ref	Objective	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	+	+	+	I	P	The alternative has positive effects as it makes direct reference to investment in high quality public transport and supporting active travel use, which will enhance air quality.	None identified
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	o	o	o	I	P	The alternative has neutral effects as there is no reference to biodiversity or geodiversity, however the alternative is focused on tackling the climate emergency through electrification and re-use and recycling of materials.	Alternative could make more explicit reference to enhancing biodiversity through integration of green and blue infrastructure into transport and active travel improvements.
3	Reduce greenhouse gas emissions from transport	+	+	+	D	P	The alternative has positive effects as it makes direct reference to the decarbonisation of the network based primarily on electrification.	Alternative could make more explicit reference to zero carbon public transport, active travel provision, a focus on local journeys, and supporting new fuels.
4	Increase resilience of the transport network to climate change and associated extreme weather events	-	-	-	D	P	The alternative has negative effects as there is no reference to climate change adaptation, other than decarbonisation, however the alternative is focused on physical improvements and could result in negative climate impacts.	Alternative could make explicit reference to climate change mitigation and adaptation measures to ensure resilience of the physical improvements.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	+	+	+	D	P	The alternative has positive effects as it makes direct reference to maximising re-use and recycling of materials in the renewal and maintenance of transport assets.	None identified
6	Protect and enhance the water environment	o	o	o	I	P	The alternative has neutral effects as there is no reference to the water environment, however the alternative is focused on tackling the climate emergency through electrification and re-use and recycling of materials.	Alternative could make more explicit reference to enhancing the water environment through integration of green and blue infrastructure into transport and active travel improvements.
7	Conserve soil resources and quality and seek to remediate contaminated land	o	o	o	I	P	The alternative has neutral effects as there is no reference to soil resources or contaminated land, however the alternative is focused on tackling the climate emergency through electrification and re-use and recycling of materials.	None identified
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	o	o	o	I	P	The alternative has neutral effects as there is no reference to heritage assets, however the alternative is focused on public realm improvements in town and city centres.	None identified
9	Protect and enhance the character and quality of landscape and townscape	+	+	+	D	P	The alternative has positive effects as it makes direct reference to public realm improvements in town and city centres.	None identified
10	Promote sustainable modes of transport, including public transport and active travel	+	+	+	D	P	The alternative has positive effects as it makes direct reference to public realm improvements in support of cycling and walking, as well as shared cycle schemes in districts.	Alternative could make more explicit reference to implementing shared cycling schemes across all of West Yorkshire and investment into active travel networks.

11	Enhance economic prosperity and access to opportunities	+	+	+	D	P	The alternative has positive effects as it makes direct reference to supporting economic growth of major urban centres and improved orbital routes.	Alternative could make more explicit reference to implementing multi-modal door-to-door journeys to increase access to opportunities.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	+	+	+	I	P	The alternative has positive effects as it makes direct reference to prioritising access to town centres, local services and the public transport network as well as shared cycle schemes in districts.	Alternative could make more explicit reference to implementing shared cycling schemes across all of West Yorkshire as well as access to vital health facilities in local communities.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	+	+	+	D	P	The alternative has positive effects as it focuses on improvements to public realm and making transport facilities attractive for young, old, vulnerable and disabled people.	Infrastructure type could make more explicit reference to design standards for accessibility and improvements of physical transport infrastructure for isolated communities and rural areas.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	+	+	+	D	P	The alternative has positive effects as it makes direct reference to working with partners to deliver highway interventions to improve safety.	Alternative could make more explicit reference to Vision Zero, and creating safer and more welcoming spaces in active travel networks and communities.
15	Reduce environmental impacts of transport including air, noise and light pollution	o	o	o	I	P	The alternative has neutral effects as there is no reference to pollution, however the alternative is focused on decarbonisation, reducing congestion, and public realm improvements.	None identified

Reasonable Alternative	2. Focus on local sustainable travel							
Ref	Objective	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	+	+	++	I	P	The alternative has positive effects as it makes direct reference to promoting local journeys, active travel and low carbon lifestyles, which will enhance local air quality over time.	Alternative could make explicit reference to clean, zero carbon public transport network.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	o	o	o	I	P	The alternative has neutral effects as there is no reference to biodiversity or geodiversity, however the alternative is focused on promoting active travel and low carbon lifestyles.	Alternative could make more explicit reference to enhancing biodiversity through integration of green and blue infrastructure into active travel improvements.
3	Reduce greenhouse gas emissions from transport	+	+	++	D	P	The alternative has positive effects as it makes direct reference to promoting local journeys, active travel and low carbon lifestyles, which will reduce emissions over time.	Alternative could make more explicit reference to zero carbon public transport and supporting new fuels.
4	Increase resilience of the transport network to climate change and associated extreme weather events	-	-	-	D	P	The alternative has negative effects as there is no reference to climate change adaptation, however the alternative is focused on active travel improvements.	Alternative could make explicit reference to climate change mitigation and adaptation measures to ensure resilience of the physical improvements.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	o	o	o	I	P	The alternative has neutral effects as it makes no reference to maximising re-use and recycling of materials.	Alternative could make explicit reference to maximising re-use and recycling of materials in the renewal and maintenance of active travel assets.
6	Protect and enhance the water environment	o	o	o	I	P	The alternative has neutral effects as there is no reference to the water environment, however the alternative is focused on promoting active travel and low carbon lifestyles.	Alternative could make more explicit reference to enhancing the water environment through integration of green and blue infrastructure into active travel improvements.
7	Conserve soil resources and quality and seek to remediate contaminated land	o	o	o	I	P	The alternative has neutral effects as there is no reference to soil resources or contaminated land, however the alternative is focused on active travel improvements.	None identified
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	o	o	o	I	P	The alternative has neutral effects as there is no reference to heritage assets, however the alternative is focused on creating more welcoming places.	None identified
9	Protect and enhance the character and quality of landscape and townscape	o	o	o	I	P	The alternative has neutral effects as there is no reference to landscape or townscape, however the alternative is focused on creating more welcoming places through active travel investment.	Alternative could make more explicit reference to public realm improvements in town and city centres, and rural areas.
10	Promote sustainable modes of transport, including public transport and active travel	+	+	++	D	P	The alternative has positive effects as it makes direct reference to local journeys via active travel and support for public transport network for longer journeys, which will promote sustainable modes of transport over time.	Alternative could make explicit reference to mass transit connectivity.

11	Enhance economic prosperity and access to opportunities	?	?	?	D	P	The alternative has uncertain effects as it focuses on local journeys which could increase access to local opportunities whilst making longer journeys more challenging, therefore impacting access to further opportunities.	Alternative could make more explicit reference to implementing multi-modal door-to-door journeys to increase access to opportunities.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	+	+	+	I	P	The alternative has positive effects as it makes direct reference to promoting active travel and low carbon lifestyles, which will improve health and wellbeing.	Alternative could make more explicit reference to implementing shared cycling schemes across all of West Yorkshire.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	?	?	?	D	P	The alternative has uncertain effects as it focuses on local journeys which could increase access to local opportunities whilst making longer journeys more challenging, therefore impacting access to further opportunities.	Alternative could make more explicit reference to implementing multi-modal door-to-door journeys to increase access to opportunities.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	+	+	+	D	P	The alternative has positive effects as it makes direct reference to adopting Vision Zero, creating safer and more welcoming spaces for people using active travel networks.	Alternative could make more explicit reference to highway design interventions to improve safety and reduce road casualty.
15	Reduce environmental impacts of transport including air, noise and light pollution	+	+	+	I	P	The alternative has positive effects as it makes direct reference to promoting active travel and low carbon lifestyles, which will reduce environmental impacts of transport.	None identified

Reasonable Alternative	3. Balanced approach							
Ref	Objective	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	+	++	++	I	P	The alternative has positive effects as it makes direct reference to zero carbon, clean public transport and active travel provision.	None identified
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	o	o	o	I	P	The alternative has neutral effects as there is no reference to biodiversity or geodiversity, however the infrastructure type is focused on active travel provision.	Alternative could make more explicit reference to enhancing biodiversity through integration of green and blue infrastructure into transport and active travel improvements.
3	Reduce greenhouse gas emissions from transport	+	++	++	D	P	The alternative has positive effects as it makes direct reference to the decarbonisation of the network based on step change in zero carbon, clean public transport and active travel provision.	None identified
4	Increase resilience of the transport network to climate change and associated extreme weather events	-	-	-	D	P	The alternative has negative effects as there is no reference to climate change adaptation, however the alternative is focused on decarbonisation.	Alternative could make explicit reference to climate change mitigation and adaptation measures to ensure resilience of the physical improvements.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	o	o	o	I	P	The alternative has neutral effects as it makes no reference to resources or recycling, however it seeks to explore fuel alternatives.	Alternative could make explicit reference to maximising re-use and recycling of materials in the renewal and maintenance of transport assets.
6	Protect and enhance the water environment	o	o	o	I	P	The alternative has neutral effects as there is no reference to the water environment, however the alternative is focused on decarbonisation and active travel provision.	Alternative could make more explicit reference to enhancing the water environment through integration of green and blue infrastructure into transport and active travel improvements.
7	Conserve soil resources and quality and seek to remediate contaminated land	o	o	o	I	P	The alternative has neutral effects as there is no reference to soil resources or contaminated land, however the alternative is focused on decarbonisation and active travel provision.	None identified
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	o	o	o	I	P	The alternative has neutral effects as there is no reference to heritage assets, however the alternative is focused on creating safer and more welcoming spaces for people using the active travel network.	None identified
9	Protect and enhance the character and quality of landscape and townscape	+	+	+	D	P	The alternative has positive effects as it makes direct reference to creating safer and more welcoming spaces for people using the active travel network.	None identified
10	Promote sustainable modes of transport, including public transport and active travel	+	++	++	D	P	The alternative has positive effects as it makes direct reference to improving mass transit connectivity, as well as integrating public transport and active travel, which will promote sustainable modes of transport over time.	None identified

11	Enhance economic prosperity and access to opportunities	+	+	++	D	P	The alternative has positive effects as it makes direct reference to supporting key regional centres and areas of economic opportunity, supported by an integrated public and active transport network.	None identified
12	Improve health and wellbeing for all citizens and reduce inequalities in health	+	+	++	I	P	The alternative has positive effects as it makes direct reference to prioritising access to creating safer and more welcoming spaces, investing in high quality active travel networks, and shared cycling schemes across all of West Yorkshire.	None identified
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	+	++	++	D	P	The alternative has positive effects as it focuses on creating safer places, removing barriers to access the network, exceeding design standards for accessibility, adopting a child-first approach for school travel, and reaching isolated urban and rural areas.	None identified
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	+	+	++	D	P	The alternative has positive effects as it focuses on creating safer places, removing barriers to access the network, exceeding design standards for accessibility, adopting a child-first approach for school travel, and reaching isolated urban and rural areas.	None identified
15	Reduce environmental impacts of transport including air, noise and light pollution	o	o	o	I	P	The alternative has neutral effects as there is no reference to pollution, however the alternative is focused on decarbonisation, active travel routes, and collaboration to support school travel for children.	None identified

A.3 Assessment of Thematic Policies

Policy Name	A1																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanant	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	++	D	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has positive effects as the initiative of making active travel as the natural choice will reduce emissions and improve air quality.	Policy could make more explicit reference to areas with low air quality such as AQMAs in relation to the implementation of this strategy. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	++	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to areas with low air quality such as AQMAs in relation to the implementation of this strategy. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	++	D	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has positive effects as the initiative of making active travel as the natural choice will support modal shift away from private car use, reduce emissions and improve air quality.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	++	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	++	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to positive and very positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	-	-	-	I	T	Regional	Mineral safeguarding areas	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	N/A	The policy has negative effects as there is no reference to the considerations of avoiding designated habitats and important sites, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to avoiding designated habitats and important sites in relation to managing active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Partially	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to positive .	It is considered that the policy could be further enhanced by explicitly referencing avoiding adverse effects on habitats in support of green and blue infrastructure integration.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on active travel.	Policy could make more explicit reference to avoiding designated habitats and wildlife corridors in relation to the locations of new active travel iroutes. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Partially	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to positive .	It is considered that the policy could be further enhanced by explicitly referencing ecological connectivity in support of green and blue infrastructure integration.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure connectivity, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	++	++	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to very positive .	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	-	-	-	D	P	Regional	Transport infrastructure, wildlife, biodiversity	The promotion of active travel could enhance air quality and support the development of wildlife-friendly approaches in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	N/A	The policy has negative effects as there is no reference to good designs in support of promoting active travel, whereas the policy aims to make active travel as the natural choice for short journeys.	Policy could make more explicit reference to good designs in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Y	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	++	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to positive and very positive .	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	The promotion of active travel could enhance air quality and support the development of carbon sinks in the long term.	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	-	-	-	D	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has negative effects as there is no reference to improving accessibility, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to improving accessibility in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Y	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to positive .	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?'	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	The promotion of active travel could enhance air quality and support local nature recovery in the long term.	N/A	The policy has neutral effects as there is no reference to Local Nature Recovery Strategy or local nature recovery groups, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to public transport, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	-	-	-	D	T	Regional	Transport network, transport infrastructure, local communities	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has negative effects as there is no reference to encouraging a reduction in private car use, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to disincentives for private car use in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Y	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences, which could promote a modal shift away from private car use. Therefore, the scoring has increased to positive .	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel directly encourages greater carbon efficiency.	Policy could make more explicit reference to measures to promote active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Y	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences, which could promote a modal shift away from private car use. Therefore, the scoring has increased to positive .	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport technologies, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	O	O	O	I	P	Wider	Transport network, air quality, local communities	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has neutral effects as there is no mention of low-carbon passenger travel, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	+	I	T	Wider	Transport network, natural environment	The promotion of active travel could enhance air quality and support climate change mitigation and adaptation in the long term.	N/A	The policy has positive effects as the promotion of active travel encourages climate change mitigation.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	+	+	+	I	T	Regional	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has positive effects as the promotion of active travel directly encourages low carbon energy generation in transport.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	The policy has been amended by increasing focus on promoting active travel experiences with no reference to energy generation. Therefore, the scoring has changed to 'O'.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	-	-	-	D	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to considerations for the needs of rural communities, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to the specific transport needs of rural communities in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to the specific transport needs of rural communities in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to low carbon materials or technologies, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	-	-	-	I	T	Regional	Air quality, transport infrastructure	N/A	N/A	The policy has negative effects as there is no reference to the development and maintenance of transport infrastructure, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to the development and maintenance of transport infrastructure in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to the development and maintenance of transport infrastructure in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel directly support West Yorkshire's net zero target by 2038.	Policy could make more explicit reference to specific measures that promotes active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Y	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	++	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences, which could promote a modal shift away and support net zero target. Therefore, the scoring has increased to positive and very positive .	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	-	-	-	I	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has negative effects as there is no reference to the consideration of extreme weather events and the changing climate, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to measures against extreme weather events and the changing climate in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to measures against extreme weather events and the changing climate in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure or flood risks, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment		N/A	The policy has neutral effects as there is no reference to floodplains, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment		N/A	The policy has neutral effects as there is no reference to compensatory measures for floodplain land take, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	-	-	-	I	P	Wider	natural environment, built environment, local communities, transport network		N/A	The policy has negative effects as there is no reference to the consideration of uncertainties in climatic effects, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to adaptive management and design in relation to uncertainties in climatic effects. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to adaptive management and design in relation to uncertainties in climatic effects. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network		N/A	The policy has neutral effects as there is no reference to flood risks, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Regional	Transport network, energy infrastructure	The policy may raise need for new active travel routes and infrastructure, which will need to consider the resource efficiency in construction and operation in the long term.	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	The policy may raise need for new active travel routes and infrastructure, which will need to consider waste management during construction in the long term.	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	The policy may raise need for new active travel routes and infrastructure, which will need to consider the resource efficiency in construction and operation in the long term.	N/A	The policy has neutral effects as there is no reference to recycling, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Wider	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has positive effects as the promotion of active travel directly promote a modal shift to sustainable transport and reduces fuel consumption.	Policy could make more explicit reference to specific measures that promotes active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Y	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	++	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences, which could promote a modal shift away and support net zero target. Therefore, the scoring has increased to positive and very positive .	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	The policy may raise need for new active travel routes and infrastructure, which will need to consider the road drainage systems to avoid future issues in the long term.	N/A	The policy has neutral effects as there is no reference to road drainage, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastrucure	The policy may raise need for new active travel routes and infrastructure, which will need to consider the materials used in construction to prevent futher issues in the long term.	N/A	The policy has neutral effects as there is no reference to road surfacing, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to positive .	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	The promotion of active travel could enhance air quality and support the development of nature-based solutions in the long term.	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to positive .	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	The policy may raise need for new active travel routes and infrastructure, which will need to consider the road drainage systems to avoid future issues in the long term.	N/A	The policy has neutral effects as there is no reference to drainage systems, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning in the long term.	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resources, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to agricultural soils, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	-	-	-	I	T	Regional	Mineral safeguarding areas	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning, including mineral safeguarding areas in the long term.	N/A	The policy has negative effects as there is no reference to the considerations of avoiding mineral safeguarding areas, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to avoiding mineral safeguarding areas in relation to managing active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to avoiding mineral safeguarding areas in relation to managing active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to contaminated land, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cutural and heritage assets, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to heritage and cultural assets, however the policy is focused on active travel.	Policy could make more explicit reference to improving connection to key destinations in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to improving connection to key destinations in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	-	-	-	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has negative effects as there is no reference to the appropriate management of transport infrastructure, whereas the policy aims to promote active travel.	Policy could make more explicit reference to the appropriate management of transport in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to the appropriate management of transport in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects there is no reference to landscape or townscape, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences, which could have a positive effectg on enhancing landscape and townscape characters. Therefore, the scoring has increased to positive .	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	-	-	-	I	T	Regional	Landscape, natural environment	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning, including protecting designated landscapes and theri settings in the long term.	N/A	The policy has negative effects as there is no reference to the considerations of protecting nationally designated landscapes and their settings, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Pollicy could make more explicit reference to avoiding impacts on nationally designated landscapes and their settings in relation to managing active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to avoiding impacts on nationally designated landscapes and their settings in relation to managing active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects there is no reference to green and blue infrastructure, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences, which could have a positive effectg on enhancing landscape and townscape characters. Therefore, the scoring has increased to positive .	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	I	T	Regional	Public rights of way	N/A	N/A	The policy has negative effects as there is no reference to the potential impacts on public rights of way, whereas the policy promotes active travel.	Policy could make more explicit reference to protecting public rights of way in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to protecting public rights of way in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to buildings or townscapes, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	-	-	-	I	T	Regional	Built environment	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has negative effects there is no reference to removing unnecessary clutter, whereas the policy aims to promote active travel.	Policy could make more explicit reference to removing unnecessary clutters in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to removing unnecessary clutters in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	-	-	-	I	T	Regional	Road network, transport network	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has negative effects as there is no reference to traffic calming measures or disincentives for private car use, whereas the policy aims to promote active travel.	Policy could make more explicit reference to disincentives for private car use in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to disincentives for private car use in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	+	D	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has positive effects as there is reference to promoting active travel.	Policy could make more explicit reference to improving accessibility to key destinations in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Partially	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to very positive in the long term.	It is considered that the policy could be further enhanced by explicitly referencing improving accessibility to key services and facilities, and employment sites by active travel.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	-	-	-	D	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving the quality and availability of active travel infrastructure, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to improving the quality and availability of active travel infrastructure in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Y	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	++	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to positive and very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	-	-	-	D	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	N/A	The policy has negative effects as there is no reference to exploring synergies with green and blue infrastructure proposals for active travel, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to exploring synergies with green and blue infrastructure proposals for active travel in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Y	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	++	++	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	-	-	-	D	P	Regional	Transport network, transport infrastructure, local communities	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has negative effects as there is no reference to improving the convenience or accessibility of active travel, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to improving the convenience and accessibility of active travel in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Partially	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing measures to improve the convenience and accessibility of active travel.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has neutral effects there is no reference to charging points, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	-	-	-	I	P	Regional	Local communities, built environment, emploument sites, housing sites, transport network	N/A	N/A	The policy has negative effects as there is no reference to coordinating with land use planning to improve active travel infrastructure, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to coordinating with land use planning to improve active travel infrastructure in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to coordinating with land use planning to improve active travel infrastructure in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has neutral effects as there is no reference to employment, however the policy is focused on active travel.	Policy could make more explicit reference to improving access to skills development and areas with high levels of unemployment in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to improving access to skills development and areas with high levels of unemployment in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	I	P	Regional	Local communities, built environment, services and facilities	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has positive effects as there is referent to improving accessibility in general by integrating active travel with public transport.	Policy could make more explicit reference to improving accessibility to key destinations in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to improving accessibility to key destinations in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	The promotion of active travel may introduce conflict with other modes of transport and impact journey times, careful coordination is required for the long term.	N/A	The policy has neutral effects as there is no reference to journey times for passengers and freight, however the policy is focused on active travel.	Policy could make more explicit reference to reduction of journey times through integrating active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to reduction of journey times through integrating active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to optimising economic potential, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to investments, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	-	-	-	I	P	Regional	Air quality, employment site, housing site, transport network	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to accessibility to key destinations in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to accessibility to key destinations in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	P	Wider	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has positive effects as the promotion of active travel could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	++	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	P	Wider	Air quality, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	++	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	-	-	-	I	P	Regional	Built environment, service and facility, transport network	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has negative effects as there is no reference to improving connectivity, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to improving connectivity to key destinations in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to accessibility to key destinations in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has neutral effects as there is no reference to open space, recreational activities and employment locations, however the policy is focused on active travel.	Policy could make more explicit reference to improving accessibility to key destinations in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to accessibility to key destinations in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	-	-	-	I	T	Regional	Local communities, transport network	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on severance issues in the long term.	N/A	The policy has negative effects as there is no reference to the consideration of potential severance issues, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to consideration of potential severance issues in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to consideration of potential severance issues in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to addressing the needs of vulnerable groups, however the policy is focused on active travel.	Policy could make more explicit reference to consideration of the needs of different vulnerable groups in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to consideration of the needs of different vulnerable groups in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to inclusive designs and accessibility, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to inclusive designs and accessibility in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to inclusive designs and accessibility in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	+	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has positive effects as there is reference to integrating active travel and public transport, which promotes affordable options of transport.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	-	-	-	I	P	Regional	Local communities, transport network	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has negative effects as there is no reference to improving connectivity, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to improving connectivity between communities in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to improving connectivity between communities in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has negative effects as there is no reference to improving accessibility in deprived areas, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to improving accessibility in deprived areas in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to improving accessibility in deprived areas in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	-	-	-	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving access to information, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to improving access to informatio in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to improving access to information in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to public realm and natural surveillance, however the policy is focused on active travel.	Policy could make more explicit reference to the improvements of public realm and levels of natural surveillance in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Partially	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences, which creates a more welcoming environment for active travel. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by referencing improvements to public realm and natural surveillance.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	-	-	-	I	T	Regional	Local community, service and facility	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has negative effects as there is no reference to improving safety and security issues through transport schemes, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to the improvement of safety and security issues in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to the improvement of safety and security issues in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on active travel.	Policy could make more explicit reference to reducing risks imposed by cars and other vehicles in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to reducing risks imposed by cars and other vehicles in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	-	-	-	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has negative effects as there is no reference to traffic calming measures, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to traffic calming measures in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	-	-	-	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to traffic calming measures in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce safety issues in place, which will need to be considered in the long term,	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on active travel.	Policy could make more explicit reference to enhancing road safety in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	N	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	Policy could make more explicit reference to enhancing road safety in relation to the promotion of active travel. Where relevant reference are mentioned in the West Yorkshire Streets for Everyone Strategy, Active Travel Vision, and LCWIP ambition, they should be highlighted within the policy.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Local community, air quality, vulnerable population	The policy may raise need for new active travel routes and infrastructure, which will need to consider the construction impacts in the long term.	N/A	The policy has neutral effects there is no reference to construction or operation impacts, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	O	O	O	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	+	+	+	D	P	Regional	Local community, noise level	N/A	N/A	The policy has positive effects as the promotion of active travel could reduce vibration and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	+	+	Although the policy has been amended by referencing Active Travel Vision, LCWIP ambition, and integrating green and blue infrastructure to improve active travel experiences, it is considered that it would not impact scoring from the 1st iteration of assesment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	D	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has positive effects as the promotion of active travel could reduce air pollution and reduce impacts on the health and wellbeing of all local and wider communities.	Policy could make more explicit reference to specific measures in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Y	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	++	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to very positive.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	-	-	-	I	P	Regional	Local community, air quality, green and blue infrastructure, built environment	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has negative effects as there is no reference to creating more amenable areas, whereas the policy aims to promote active travel as a natural choice for shorter journeys.	Policy could make more explicit reference to creating more amenable areas in relation to the promotion of active travel. Where relevant reference are mentioned in the Active Travel Strategy or West Yorkshire Streets for Everyone Strategy, they should be highlighted within the policy.	Y	The policy now references Active Travel Vision and LCWIP ambition, and improvement to travel experience by integrating green and blue infrastructure into active journeys.	+	++	++	The policy has been amended to refer to integrating green and blue infrastructure to improve active travel experiences. Therefore, the scoring has increased to positive and very positive.	None identified.

Policy Name	A2																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanant	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	++	D	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has positive effects as the promotion of active travel will reduce emissions and improve air quality.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	++	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	++	D	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has positive effects as the promotion of active travel will support modal shift away from private car use, reduce emissions and improve air quality.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	++	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on integrating active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	-	-	-	I	T	Regional	Mineral safeguarding areas	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	N/A	The policy has negative effects as there is no reference to the considerations of avoiding designated habitats and important sites, whereas the policy aims to integrate active travel infrastructure.	Policy could make more explicit reference to avoiding designated habitats and important sites in relation to managing active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to avoiding designated habitats and important sites in relation to managing active travel.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on integrating active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on integrating active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	-	-	-	D	P	Regional	Transport infrastructure, wildlife, biodiversity	The promotion of active travel could enhance air quality and support the development of wildlife-friendly approaches in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	N/A	The policy has negative effects as there is no reference to good designs in support of promoting active travel, whereas the policy aims to integrate active travel.	Policy could make more explicit reference to good designs in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to good designs in relation to the integration of active travel.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	The promotion of active travel could enhance air quality and support the development of carbon sinks in the long term.	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on integrating active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	-	-	-	D	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to integrate active travel with the public transport network.	Policy could make more explicit reference to improving accessibility to key destinations in relation to the integration of active travel.	Y	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	++	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increased to positive and very positive.	It is considered that the policy could be further enhanced by explicitly referencing accessibility to green and blue infrastructure.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	The promotion of active travel could enhance air quality and support local nature recovery in the long term.	N/A	The policy has neutral effects as there is no reference to Local Nature Recovery Strategy or local nature recovery groups, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as there is reference to integrating active travel with the public transport network, which could enhance the accessibility to public transport.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	The policy no longer refers to public transport network, which is considered a key reference against this assessment criteria. Therefore, the scoring has decreased to 'O'.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has neutral effects as there is no reference to reduction in private car use, however the policy is focused on integrating active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel directly encourages greater carbon efficiency.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	++	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport technologies, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Wider	Transport network, air quality, local communities	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has positive effects as there is reference to promoting active travel and public transport.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to energy generation, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	-	-	-	D	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to considerations for the needs of rural communities, whereas the policy aims to integrate active travel with the transport network.	Policy could make more explicit reference to the specific transport needs of rural communities in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the specific transport needs of rural communities in relation to the integration of active travel.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to low carbon materials or technologies, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	+	+	+	D	T	Regional	Air quality, transport infrastructure	N/A	N/A	The policy has positive effects as there is reference to implementing high quality facilities to integrate active travel, which would support the minimisation of embedded emissions.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel directly support West Yorkshire's net zero target by 2038.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	++	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	-	-	-	I	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has negative effects as there is no reference to the consideration of extreme weather events and the changing climate, whereas the policy aims to integrate active travel.	Policy could make more explicit reference to measures against extreme weather events and the changing climate in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to measures against extreme weather events and the changing climate in relation to the integration of active travel.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on integrating active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to floodplains, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to compensatory measures for floodplain land take, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	-	-	-	I	P	Wider	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to the consideration of uncertainties in climatic effects, whereas the policy aims to integrate active travel.	Policy could make more explicit reference to adaptive management and design in relation to uncertainties in climatic effects.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to adaptive management and design in relation to uncertainties in climatic effects.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Regional	Transport network, energy infrastructure	The policy may raise need for new active travel routes and infrastructure, which will need to consider the resource efficiency in construction and operation in the long term.	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	The policy may raise need for new active travel routes and infrastructure, which will need to consider waste management during construction in the long term.	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	The policy may raise need for new active travel routes and infrastructure, which will need to consider the resource efficiency in construction and operation in the long term.	N/A	The policy has neutral effects as there is no reference to recycling, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Wider	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has positive effects as the integration of active travel directly promote a modal shift to sustainable transport and reduces fuel consumption.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	++	++	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increased to very positive.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	The policy may raise need for new active travel routes and infrastructure, which will need to consider the road drainage systems to avoid future issues in the long term.	N/A	The policy has neutral effects as there is no reference to road drainage, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastrucrture	The policy may raise need for new active travel routes and infrastructure, which will need to consider the materials used in construction to prevent futher issues in the long term.	N/A	The policy has neutral effects as there is no reference to road surfacing, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on integrating active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	The promotion of active travel could enhance air quality and support the development of nature-based solutions in the long term.	N/A	The policy has neutral effects as there is no reference to nature based solutions, however the policy is focused on integrating active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	The promotion of active travel could enhance air quality and support the development of blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to blue infrastructure, however the policy is focused on integrating active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to drainage, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning in the long term.	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resources, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to agricultural soils, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	-	-	-	I	T	Regional	Mineral safeguarding areas	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning, including mineral safeguarding areas in the long term.	N/A	The policy has negative effects as there is no reference to the considerations of avoiding mineral safeguarding areas, whereas the policy aims to integrate active travel with the transport network.	Pollicy could make more explicit reference to avoiding mineral safeguarding areas in relation to managing active travel network.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Pollicy could make more explicit reference to avoiding mineral safeguarding areas in relation to managing active travel network.

7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to contaminated land, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	-	-	-	D	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to integrate active travel with the public transport network.	Policy could make more explicit reference to improving accessibility to key destinations in relation to the promotion of active travel.	Y	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	++	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increased to positive and very positive.	It is considered that the policy could be further enhanced by explicitly referencing accessibility to historic and cultural sites.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	-	-	-	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has negative effects as there is no reference to the appropriate management of transport infrastructure, whereas the policy aims to promote active travel.	Policy could make more explicit reference to the appropriate management of transport in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the appropriate management of transport in relation to the integration of active travel.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects there is no reference to landscape or townscape, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	-	-	-	I	T	Regional	Landscape, natural environment	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning, including protecting designated landscapes and their settings in the long term.	N/A	The policy has negative effects as there is no reference to the considerations of protecting nationally designated landscapes and their settings, whereas the policy aims to integrate active travel with the transport network.	Policy could make more explicit reference to avoiding impacts on nationally designated landscapes and their settings in relation to managing active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to avoiding impacts on nationally designated landscapes and their settings in relation to managing active travel.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on integrating active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	I	T	Regional	Public rights of way	N/A	N/A	The policy has negative effects as there is no reference to the potential impacts on public rights of way, whereas the policy aims to integrate active travel with the transport network.	Policy could make more explicit reference to protecting public rights of way in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to protecting public rights of way in relation to the integration of active travel.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to buildings or townscapes, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	-	-	-	I	T	Regional	Built environment	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has negative effects there is no reference to removing unnecessary clutter, whereas the policy aims to integrate active travel.	Policy could make more explicit reference to removing unnecessary clutter in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to removing unnecessary clutter in relation to the integration of active travel.

10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has neutral effects as there is no reference to disincentives for private car use, however the policy is focused on the integration of active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	-	-	-	D	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to integrate active travel with the public transport network.	Policy could make more explicit reference to improving accessibility to key destinations in relation to the promotion of active travel.	Y	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	++	++	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increased to positive and very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	+	D	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has positive effects as there is reference to delivering high quality facilities for active travel.	Policy could make more explicit reference to the specific types of facilities that improve the quality and availability of active travel.	Y	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	++	++	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on integrating active travel with the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Regional	Transport network, transport infrastructure, local communities	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has positive effects as the integration of active travel directly promote a modal shift to sustainable transport and improves the convenience of active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	++	++	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has neutral effects there is no reference to charging points, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	-	-	-	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has negative effects as there is no reference to coordinating with land use planning to improve active travel infrastructure, whereas the policy aims to integrate active travel with the transport network.	Policy could make more explicit reference to coordinating with land use planning to improve active travel infrastructure in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to coordinating with land use planning to improve active travel infrastructure in relation to the integration of active travel.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	-	-	-	D	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to integrate active travel with the public transport network.	Policy could make more explicit reference to improving accessibility to key destinations in relation to the promotion of active travel.	Y	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increase to positive.	It is considered that the policy could be further enhanced by explicitly referencing access to employment and skills development opportunities, considering areas with high unemployment rates.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	-	-	-	D	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to integrate active travel with the public transport network.	Policy could make more explicit reference to improving accessibility to key destinations in relation to the promotion of active travel.	Y	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	++	++	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increase to positive and very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	The promotion of active travel may introduce conflict with other modes of transport and impact journey times, careful coordination is required for the long term.	N/A	The policy has neutral effects as there is no reference to journey times for passengers and freight, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	+	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has positive effects as the promotion of active travel encourages decarbonisation of transport and may help to optimise the potential economic outcomes for West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	+	I	T	Regional	Local economy, transport network, transport infrastructure	The promotion of active travel could contribute to building an effective and resilient transport network in the long term.	N/A	The policy has positive effects as the promotion of active travel may increase investments for West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	-	-	-	D	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to integrate active travel with the public transport network.	Policy could make more explicit reference to improving accessibility to key destinations in relation to the promotion of active travel.	Y	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increase to positive.	It is considered that the policy could be further enhanced by explicitly referencing access to expected employment and residential growth areas.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	P	Wider	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has positive effects as the promotion of active travel could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	++	The policy has been amended to refer to inclusive and accessible facilities. Therefore, the scoring has increase to very positive.	It is considered that the policy could be further enhanced by referencing considerations for the needs of different groups.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	P	Wider	Air quality, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	++	The policy has been amended to refer to inclusive and accessible facilities. Therefore, the scoring has increase to very positive.	It is considered that the policy could be further enhanced by referencing considerations for the needs of different groups.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	-	-	-	D	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving connectivity to key destinations, whereas the policy aims to integrate active travel with the public transport network.	Policy could make more explicit reference to improving connectivities to key destinations in relation to the promotion of active travel.	Y	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increase to positive.	It is considered that the policy could be further enhanced by explicitly referencing access to healthcare services and educational facilities.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	-	-	-	D	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to integrate active travel with the public transport network.	Policy could make more explicit reference to improving accessibility to key destinations in relation to the promotion of active travel.	Y	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	The policy has been amended to refer to connection to key services and cycle parking at key destinations. Therefore, the scoring has increase to positive.	It is considered that the policy could be further enhanced by explicitly referencing access to open space, recreational activities, and employment locations.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	-	-	-	I	T	Regional	Local communities, transport network	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on severance issues in the long term.	N/A	The policy has negative effects as there is no reference to the consideration of potential severance issues, whereas the policy aims to integrate active travel with the transport network.	Policy could make more explicit reference to consideration of potential severance issues in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to consideration of potential severance issues in relation to the integration of active travel.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	-	-	-	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to the consideration of the needs of different age groups, whereas the policy aims to integrate active travel with the transport network.	Policy could make more explicit reference to consideration of the needs of different vulnerable groups in relation to the integration of active travel.	Partially	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	The policy has been amended to refer to inclusive facilities. Therefore, the scoring has increase to positive.	It is considered that the policy could be further enhanced by explicitly referencing inclusive design measures in consideration of the needs of different groups.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to inclusive designs and accessibility, whereas the policy aims to integrate active travel with the transport network.	Policy could make more explicit reference to inclusive designs and accessibility in relation to the integration of active travel.	Partially	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	The policy has been amended to refer to inclusive facilities. Therefore, the scoring has increase to positive.	It is considered that the policy could be further enhanced by explicitly referencing inclusive design measures in consideration of the needs of different groups.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects there is no reference to affordability, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	O	O	O	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	-	-	-	D	P	Regional	Local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving connectivity between communities, whereas the policy aims to integrate active travel with the public transport network.	Policy could make more explicit reference to improving connectivity between communities in relation to the promotion of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving connectivity between communities in relation to the promotion of active travel.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has negative effects as there is no reference to improving accessibility in deprived areas, whereas the policy aims to integrate active travel.	Policy could make more explicit reference to improving accessibility in deprived areas in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving accessibility in deprived areas in relation to the integration of active travel.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	-	-	-	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving access to information, whereas the policy aims to integrate active transport.	Policy could make more explicit reference to improving access to information in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving access to information in relation to the integration of active travel.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	-	-	-	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has negative effects as there is no reference to creating a more welcoming environment for active travel, whereas the policy aims to integrate active travel.	Policy could make more explicit reference to the improvements of public realm and levels of natural surveillance in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the improvements of public realm and levels of natural surveillance in relation to the integration of active travel.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	-	-	-	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has negative effects as there is no reference to improving safety and security issues through transport schemes, whereas the policy aims to integrate active travel.	Policy could make more explicit reference to the improvement of safety and security issues in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the improvement of safety and security issues in relation to the integration of active travel.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	-	-	-	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has negative effects as there is no reference to reducing risks imposed by cars and other vehicles, whereas the policy aims to integrate active travel with the transport network.	Policy could make more explicit reference to reducing risks imposed by cars and other vehicles in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to reducing risks imposed by cars and other vehicles in relation to the integration of active travel.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	-	-	-	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has negative effects as there is no reference to traffic calming measures, whereas the policy aims to integrate active travel with the transport network.	Policy could make more explicit reference to traffic calming measures in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to traffic calming measures in relation to the integration of active travel.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	-	-	-	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has negative effects as there is no reference to enhancing road safety, whereas the policy aims to integrate active travel with the transport network.	Policy could make more explicit reference to enhancing road safety in relation to the integration of active travel.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to enhancing road safety in relation to the integration of active travel.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	-	-	-	D	T	Regional	Local community, air quality, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to the construction and operation impacts, whereas the policy is likely to introduce construction of new road infrastructure.	Policy could make more explicit reference to mitigating construction and operation impacts in relation to the creating new road infrastructure.	N	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	-	-	-	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to mitigating construction and operation impacts in relation to the creating new road infrastructure.

15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	+	+	+	D	P	Regional	Local community, noise level	N/A	N/A	The policy has positive effects as the promotion of active travel could reduce vibration and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	D	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has positive effects as the promotion of active travel could reduce air pollution and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	+	D	P	Regional	Local community, air quality, noise level, green and blue infrastructure, built environment	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has positive impacts as the integration of active travel with the transport network could improve impacts of transport in terms of air quality improvement and noise reduction.	None identified.	No mitigation identified in 2025.	The policy now references inclusive and accessible facilities for active travel, integrated within the Weaver Network, connection with key services, and cycle parking at key destinations. References to the public transport network is removed.	+	+	+	Although the policy has been amended by referencing inclusive and accessible facilities, integration within the Weaver Network, connection to key services and cycle parking at key destinations, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	A3																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	++	D	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has positive effects as the promotion of active travel will reduce emissions and improve air quality.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	++	D	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has positive effects as the promotion of active travel will support modal shift away from private car use, reduce emissions and improve air quality.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	Locating active travel routes close to green and blue infrastructure could better encourage active travel practices.	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	O	O	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	The promotion of active travel could enhance air quality and avoid impacts on designated habitats and sites. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	N/A	The policy has neutral effects as there is no reference to designated habitats and sites, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	Locating active travel routes close to green and blue infrastructure could better encourage active travel practices.	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	Locating active travel routes close to green and blue infrastructure could better encourage active travel practices.	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	i	P	Regional	Transport infrastructure, wildlife, biodiversity	The promotion of active travel could enhance air quality and support the development of wildlife-friendly approaches in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	N/A	The policy has neutral effects as there is no reference to wildlife-friendly approaches, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	D	P	Regional	Carbon sinks, transport infrastructure	The promotion of active travel could enhance air quality and support the development of carbon sinks in the long term.	Locating active travel routes close to carbon sinks could improve active travel experiences and better encourage active travel practices.	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	D	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?"	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	The promotion of active travel could enhance air quality and support local nature recovery in the long term.	N/A	The policy has neutral effects as there is no reference to Local Nature Recovery Strategy or local nature recovery groups, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	The coordination with the public transport system alongside improvements of the active travel infrastructure could better encourage active travel practices.	The policy has neutral effects as there is no reference to public transport, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	?	?	?	I	T	Regional	Transport network, transport infrastructure, local communities	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	The reduction in private car use alongside improvements of the active travel infrastructure could better encourage active travel practices.	The policy has uncertain effects as the policy promotes active travel and a modal shift away from private car use, however there is no reference to disincentives for private car use, which would be essential to encouraging active travel.	Policy could make more explicit reference to disincentives for private car use in relation to improving safety for active travel practices.	N	The policy has not changed.	?	?	?	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to disincentives for private car use in relation to improving safety for active travel practices.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel directly encourages greater carbon efficiency.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport technologies, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	O	O	O	I	P	Wider	Transport network, local communities	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has neutral effects as there is no mention of low-carbon passenger travel, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	+	I	T	Wider	Transport network, natural environment	The promotion of active travel could enhance air quality and support climate change mitigation and adaptation in the long term.	N/A	The policy has positive effects as the promotion of active travel encourages climate change mitigation.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	T	Regional	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has neutral effects as there is no reference to energy generation, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	-	-	-	D	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to considerations for the needs of rural communities, whereas the policy aims to encourage active travel.	Policy could make more explicit reference to the specific transport needs of rural communities in relation to the encouraging active travel.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to the specific transport needs of rural communities in relation to the encouraging active travel.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to low carbon materials or technologies, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Wider	Air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of transport infrastructure, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel directly support West Yorkshire's net zero target by 2038.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has neutral effects as there is no reference to extreme weather events, however the policy is focused on encouraging active travel practices.	Policy could make more explicit reference to eviction plans during extreme weather events in relation to active travel practices.	N	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to eviction plans during extreme weather events in relation to active travel practices.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	Locating active travel routes close to carbon sinks could improve active travel experiences and better encourage active travel practices.	The policy has neutral effects as there is no reference to flood risk management and habitats, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to floodplains, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to compensatory measures for floodplain land take, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Wider	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Regional	Transport network, energy infrastructure	The policy may raise need for new active travel routes and infrastructure, which will need to consider the resource efficiency in construction and operation in the long term.	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	The policy may raise need for new active travel routes and infrastructure, which will need to consider waste management during construction in the long term.	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastrcture, local communities, supply chain, construction industry	The policy may raise need for new active travel routes and infrastructure, which will need to consider the resource efficiency in construction and operation in the long term.	N/A	The policy has neutral effects as there is no reference to recycling, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Wider	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has positive effects as the encouragement of active travel directly promote a modal shift to sustainable transport and reduces fuel consumption.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	The policy may raise need for new active travel routes and infrastructure, which will need to consider the road drainage systems to avoid future issues in the long term.	N/A	The policy has neutral effects as there is no reference to road drainage, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastrcture	The policy may raise need for new active travel routes and infrastructure, which will need to consider the materials used in construction to prevent futher issues in the long term.	N/A	The policy has neutral effects as there is no reference to road surfacing, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	Locating active travel routes close to green and blue infrastrcture could improve active travel experineces and better encourage active travel practices.	The policy has neutral effects as there is no reference to surface water run-off, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	The promotion of active travel could enhance air quality and support the development of nature-based solutions in the long term.	N/A	The policy has neutral effects as there is no reference to nature based solutions, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	The promotion of active travel could enhance air quality and support the development of blue infrastructure in the long term.	Locating active travel routes close to blue infrastructure could improve active travel experineces and better encourage active travel practices.	The policy has neutral effects as there is no reference to flood risks or habitats, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	The policy may raise need for new active travel routes and infrastructure, which will need to consider the road drainage systems to avoid future issues in the long term.	N/A	The policy has neutral effects as there is no reference to drainage systems, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning in the long term.	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resources, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

7	Conserve soil resources and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to agricultural soils, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to contaminated land, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	Locating active travel routes close to cultural and heritage assets could improve active travel experiences and better encourage active travel practices.	The policy has neutral effects as there is no reference to the protection and enhancement of cultural and heritage assets, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	Locating active travel routes close to cultural and heritage assets could improve active travel experiences and better encourage active travel practices.	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the appropriate management of transport infrastructure, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects there is no reference to landscape or townscape, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects there is no reference to protecting landscapes, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	-	-	-	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	Locating active travel routes close to green and blue infrastructure, and beautiful landscape and townscape could improve active travel experiences and better encourage active travel practices.	The policy has negative effects as there is no reference to green and blue infrastructure or improvement to landscape and townscape, whereas the policy aims to encourage active travel.	Policy could make more explicit reference to improving landscape and townscape in relation to encouraging active travel practices.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to improving landscape and townscape in relation to encouraging active travel practices.

9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	I	T	Regional	Public rights of way	N/A	N/A	The policy has negative effects as there is no reference to the potential impacts on public rights of way, whereas the policy aims to encourage active travel.	Policy could make more explicit reference to protecting public rights of way in relation to encouraging active travel.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to protecting public rights of way in relation to encouraging active travel.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	Locating active travel routes close to high quality buildings and townscapes could improve active travel experiences and better encourage active travel practices.	The policy has neutral effects as there is no reference to buildings or townscapes, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	I	T	Regional	Built environment	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has neutral effects as there is no reference to unnecessary clutter, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	The reduction of private car use alongside improvement of active travel infrastructure could enhance safety and better encourage active travel on main roads.	The policy has neutral effects as there is no reference to disincentives for private car use, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	+	D	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has positive effects as there is reference to promoting active travel.	Policy could make more explicit reference to improving accessibility to key services and destinations in relation to the promotion of active travel.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to improving accessibility to key services and destinations in relation to the promotion of active travel.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has neutral effects as there is no reference to improving the quality and availability of active travel infrastructure, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	Locating active travel routes close to green and blue infrastructure could improve active travel experiences and better encourage active travel practices.	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Wider	Transport network, transport infrastructure, local communities	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has positive effects as there is reference to promoting active travel.	Policy could make more explicit reference to improving the convenience and accessibility of active travel in relation to encouraging active travel.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to improving the convenience and accessibility of active travel in relation to encouraging active travel.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has neutral effects there is no reference to charging points, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to coordinating with land use planning to improve active travel infrastructure and journey times, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to encourage active travel.	Policy could make more explicit reference to improving accessibility to key destinations in relation to encouraging active travel.	N	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to improving accessibility to key destinations in relation to encouraging active travel.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	–	–	–	D	P	Regional	Local communities, built environment, services and facilities	The promotion of active travel may introduce conflict with other modes of transport and impact journey times, careful coordination is required for the long term.	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, however the policy is focused on encouraging active travel.	Policy could make more explicit reference to improving accessibility to services, facilities and amenities in relation to encouraging active travel.	No mitigation identified in 2025.	The policy has not changed.	–	–	–	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to improving accessibility to services, facilities and amenities in relation to encouraging active travel.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	The promotion of active travel may introduce conflict with other modes of transport and impact journey times, careful coordination is required for the long term.	N/A	The policy has neutral effects as there is no reference to journey times for passengers and freight, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	+	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has positive effects as the promotion of active travel encourages decarbonisation of transport and may help to optimise the potential economic outcomes for West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	The promotion of active travel could contribute to building an effective and resilient transport network in the long term.	N/A	The policy has neutral effects as there is no reference to establishing transport network, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as there is no reference to improving accessibility to key destinations, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	P	Wider	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has positive effects as the promotion of active travel could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	P	Wider	Air quality, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to improving accessibility to key destinations, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	–	–	–	D	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to encourage active travel.	Policy could make more explicit reference to improving accessibility to key destinations in relation to encouraging active travel.	N	The policy has not changed.	–	–	–	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to improving accessibility to key destinations in relation to encouraging active travel.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	O	O	O	I	T	Regional	Local communities, transport network	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on severance issues in the long term.	N/A	The policy has neutral effects as there is no reference to severance issues, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	-	-	-	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to the consideration of the needs of different age groups, whereas the policy aims to encourage active travel.	Policy could make more explicit reference to consideration of the needs of different vulnerable groups in relation to encouraging active travel.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to consideration of the needs of different vulnerable groups in relation to encouraging active travel.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to inclusive designs and accessibility, whereas the policy aims to encourage active travel.	Policy could make more explicit reference to inclusive designs and accessibility in relation to encouraging active travel.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to inclusive designs and accessibility in relation to encouraging active travel.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects there is no reference to affordability, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to improving connectivity between communities, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has negative effects as there is no reference to improving accessibility in deprived areas, whereas the policy aims to encourage active travel.	Policy could make more explicit reference to improving accessibility in deprived areas in relation to encouraging active travel.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to improving accessibility in deprived areas in relation to encouraging active travel.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	+	+	+	D	T	Regional	Local communities, transport network	N/A	N/A	The policy has positive effects as there is reference to maketing campaigns and events, which could improve access to information for users of active travel infrastructure.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	-	-	-	I	T	Regional	Local community, built environment, service and facility	N/A	Locating active travel routes close to public realms could improve active travel experineices and better encourage active travel practices.	The policy has negative effects as there is no reference to creating a more welcoming environment for active travel, whereas the policy aims to encourage active travel.	Policy could make more explicit reference to the improvements of public realm and levels of natural surveillance in relation to encouraging active travel.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to the improvements of public realm and levels of natural surveillance in relation to encouraging active travel.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has neutral effects as there is no reference to improving safety, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has neutral effects as there is no reference to reducing risks imposed by cars and other vehicles, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy is focused on encouraging active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	-	-	-	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has negative effects as there is no reference to enhancing road safety, whereas the policy aims to encourage active travel.	Policy could make more explicit reference to enhancing road safety in relation to encouraging active travel.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	Policy could make more explicit reference to enhancing road safety in relation to encouraging active travel.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Local community, air quality, vulnerable population	The policy may raise need for new active travel routes and infrastructure, which will need to consider the construction impacts in the long term.	N/A	The policy has neutral effects there is no reference to construction or operation impacts, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	+	+	+	D	P	Regional	Local community, noise level	N/A	N/A	The policy has positive effects as the promotion of active travel could reduce vibration and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	D	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has positive effects as the promotion of active travel could reduce air pollution and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	O	O	O	I	P	Regional	Local community, air quality, green and blue infrastructure, built environment	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has neutral effects as there is no reference to improving impacts of transport on local environment, however the policy is focused on encouraging public transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	O	O	O	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

Policy Name	A4																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	+	D	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has positive effects as improving access to cycles will reduce emissions and improve air quality.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	D	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has positive effects as improving access to cycles will support modal shift away from private car use, reduce emissions and improve air quality.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	O	O	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	The promotion of active travel could enhance air quality and support the development of habitats and important sites in the long term.	N/A	The policy has neutral effects as there is no reference to habitats or important sites, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure connectivity, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	The promotion of active travel could enhance air quality and support the development of wildlife-friendly approaches in the long term.	N/A	The policy has neutral effects as there is no reference to wildlife-friendly approaches, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	The promotion of active travel could enhance air quality and support the development of carbon sinks in the long term.	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure accessibility, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?"	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	The promotion of active travel could enhance air quality and support local nature recovery in the long term.	N/A	The policy has neutral effects as there is no reference to local nature recovery, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to public transport, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to private car use, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as improving access to cycles will encourage greater carbon efficiency in transport movements.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport technologies, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as there is reference to promote cycling.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	+	I	T	Wider	Transport network, natural environment	The promotion of cycling could enhance air quality and support climate change mitigation and adaptation in the long term.	N/A	The policy has positive effects as improving access to cycles encourages climate change mitigation.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	+	+	+	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has positive effects as improving access to cycles directly encourages low carbon energy generation in transport.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	The policy has been amended to refer to accessible and inclusive cycle sharing with no explicit reference to energy generation. Therefore, the scoring has changed to 'O'.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	O	O	O	I	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to considerations for the needs of rural communities, however the policy is focused on improving access to cycles.	Policy could make more explicit reference to the specific transport needs of rural communities in relation to the the locations to promote access to cycles.	N	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the specific transport needs of rural communities in relation to the the locations to promote access to cycles.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to low-carbon materials or techniques, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Regional	Air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the development or maintenance of transport infrastructure, however the policy is focused on improving access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has positive effects as the promotion of a cycling directly support West Yorkshire's net zero target by 2038.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Regional	Transport network, natural environment, built environment	N/A	N/A	The policy has neutral effects as there is no reference to extreme weather events, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to floodplains, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to compensatory measures to floodplain land take, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Regional	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to uncertainties in climatic effects, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Regional	Transport network, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to waste management, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastrcture, local communities, supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to recycling, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has positive effects as the promotion of cycling directly promote a modal shift to sustainable transport.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	N/A	N/A	The policy has neutral effects as there is no reference to road drainage, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastrcture	N/A	N/A	The policy has neutral effects as there is no reference to surfacing, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	The promotion of active travel could enhance air quality and support the development of nature based solutions in the long term.	N/A	The policy has neutral effects as there is no reference to nature based solutions, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	The promotion of active travel could enhance air quality and support the development of blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to blue infrastructure, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to drainage systems, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to land use, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resources, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to agricultural soils, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to contaminated land, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to protecting or enhancing cultural and heritage assets, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to transport infrastructure, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	O	O	O	I	T	Regional	Public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of way, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to buildings or townscapes, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	I	T	Regional	Built environment	N/A	N/A	The policy has neutral effects as there is no reference to unnecessary clutters, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	N/A	N/A	The policy has neutral effects as there is no reference to private car use, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	O	O	O	I	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to accessibility to key services, however the policy is focused on access to cycles.	Policy could make more explicit reference to improving access to key services in relation to promoting shared cycle access.	N	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving access to key services in relation to promoting shared cycle access.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	++	++	++	D	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has positive effects as improving access to cycles directly improves the availability of active travel infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	++	++	++	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	I	P	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as improving access to cycles could promote modal shift to sustainable mode of transport and support the improvement of access to various destinations.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to charging points, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	-	-	-	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has negative effects as there is no reference to coordinating with land use planning for the locations to promote access to cycles, whereas the policy aims to improve access to cycles.	Policy could make more explicit reference to land use planning in relation to improving cycle parking and storage in key locations.	N	The policy now references accessible and inclusive promotion of cycle sharing.	-	-	-	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to land use planning in relation to improving cycle parking and storage in key locations.

11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population+CK63	N/A	N/A	The policy has neutral effects as there is no reference to employment, however the policy is focused on improving access to cycles.	Policy could make more explicit reference to improving accessibility to key destinations in relation to improving cycle access.	N	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving accessibility to key destinations in relation to improving cycle access.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	I	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has positive effects as improving access to cycles could support the improvement of sustainable access to various destinations.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to journey times for passengers and freight, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	+	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has positive effects as the promotion of cycling encourages decarbonisation of transport and may help to optimise the potential economic outcomes for West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	+	I	T	Regional	Local economy, transport network, transport infrastructure	The promotion of active travel could contribute to building an effective and resilient transport network in the long term.	N/A	The policy has positive effects as the promotion of cycling and working in partnership could contribute to the improvement of transport network and have the potential to attract investment.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as there is no reference to employment and residential growth areas, however the policy is focused on access to cycles.	Policy could make more explicit reference to improving accessibility to major employment and residential growth areas in relation to improving access to cycles.	N	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving accessibility to major employment and residential growth areas in relation to improving access to cycles.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	P	Wider	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has positive effects as the promotion of cycling could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	++	The policy has been amended to refer to accessible and inclusive cycle sharing. Therefore, the scoring has changed to very positive for the long term.	It is considered that the policy could be further enhanced by referencing specific measures to promote inclusive cycle sharing, in consideration of the needs of different groups.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	P	Wider	Air quality, local communities	N/A	N/A	The policy has positive effects as the promotion of cycling could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	+	+	+	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has positive effects as improving access to cycles could support the improvement of sustainable access to various destinations.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by referencing accessibility and connection to key destinations in support of cycle sharing promotion.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to severance issues, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	-	-	-	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to the consideration of the needs of different age groups, whereas the policy aims to improve access to cycles.	Policy could make more explicit reference to consideration of the needs of different vulnerable groups in relation to improving access to cycles.	Partially	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	The policy has been amended to refer to inclusive cycle sharing. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by referencing specific measures to promote inclusive cycle sharing, in consideration of the needs of different groups.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to inclusive designs and accessibility, whereas the policy aims to improve access to cycles.	Policy could make more explicit reference to inclusive designs and accessibility in relation to improving access to cycles.	Partially	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	The policy has been amended to refer to inclusive cycle sharing. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by referencing specific measures to promote inclusive cycle sharing, in consideration of the needs of different groups.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	+	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has positive effects as improving access to cycles could support the improvement of sustainable access to various destinations.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	O	O	O	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	D	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to access to active travel in the most deprived areas, whereas the policy aims to improve access to travel.	Policy could make more explicit reference to needs of the most deprived areas in relation to improving access to cycles.	N	The policy now references accessible and inclusive promotion of cycle sharing.	-	-	-	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to needs of the most deprived areas in relation to improving access to cycles.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	-	-	-	D	T	Regional	Local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to access to information, whereas the policy aims to improve access to travel.	Policy could make more explicit reference to increasing access to information in relation to access to cycles.	N	The policy now references accessible and inclusive promotion of cycle sharing.	-	-	-	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to increasing access to information in relation to access to cycles.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to welcoming environments, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The large increase in cyclists could introduce safety issues to pedestrians, especially the vulnerable population.	N/A	The policy has neutral effects as there is no reference to public safety, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The large increase in cyclists could introcute safety issues to pedestrians, especially the vulnerable population.	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The large increase in cyclists could introcute safety issues to pedestrians, especially the vulnerable population.	N/A	The policy has neutral effects as there is no reference to road safety, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Local community, air quality, vulnerable population	The promotion on cycles can reduce air and noise pollutions through travel.	N/A	The policy has neutral effects as there is no reference to construction and operation impacts, however the policy focuses on access to cycles.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	O	O	O	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	+	+	+	D	P	Regional	Local community, noise level	N/A	N/A	The policy has positive effects as the promotion of cycling could reduce vibration and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	D	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has positive effects as the promotion of cycling could reduce air pollution and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	+	D	P	Regional	Local community, air quality, green and blue infrastructure, built environment	The large increase in cyclists could introcute safety issues to pedestrians, especially the vulnerable population.	N/A	The policy has positive effects as the promotion of cycling could improve impacts of transport on local environments and create more amenable areas.	None identified.	No mitigation identified in 2025.	The policy now references accessible and inclusive promotion of cycle sharing.	+	+	+	Although the policy has been amended by referencing inclusive and accessible cycle sharing, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts	
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	++	D	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has positive effects as the promotion of active travel will reduce emissions and improve air quality.	None identified.	No mitigation identified in 2025.	The policy noew references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	++	D	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has positive effects as the promotion of active travel will support modal shift away from private car use, reduce emissions and improve air quality.	None identified.	No mitigation identified in 2025.	The policy noew references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy noew references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to integration with blue and green infrastructure. Therefore, the scoring has increased to positive and very positive.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	-	-	-	I	T	Regional	Mineral safeguarding areas	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	N/A	The policy has negative effects as there is no reference to the considerations of avoiding designated habitats and important sites, whereas the policy aims to extend active travel network.	Pollicy could make more explicit reference to avoiding designated habitats and important sites in relation to planning for active travel routes.	Partially	The policy noew references coordination with land use planning and integration with blue and green infrastruccture. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to coordination with land use planning and integration with blue and green infrastructure, which could help to reduce impacts on biological and geological assets. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing designated habitats and important sites.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy noew references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to integration with blue and green infrastructure. Therefore, the scoring has increased to positive and very positive.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy noew references coordination with land use planning and integration with blue and green infrastruccture. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	++	++	The policy has been amended to refer to integration with blue and green infrastructure. Therefore, the scoring has increased to positive and very positive.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	-	-	-	D	P	Regional	Transport infrastructure, wildlife, biodiversity	The promotion of active travel could enhance air quality and support the development of wildlife-friendly approaches in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	N/A	The policy has negative effects as there is no reference to good designs in support of promoting active travel, whereas the policy aims to exten active travel network.	Pollicy could make more explicit reference to specific good designs in relation to high quality active travel routes.	Partially	The policy noew references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to coordination with land use planning and integration with blue and green infrastructure, which could help to reduce impacts on biological and geological assets. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing best practice design in support of biodiversity net gain and nature recovery.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	The promotion of active travel could enhance air quality and support the development of carbon sinks in the long term.	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy noew references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	O	O	O	I	P	Regional	Local communities, green and blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy noew references coordination with land use planning and integration with blue and green infrastruccture. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to integration with blue and green infrastructure. Therefore, the scoring has increased to positive and very positive.	None identified.	

2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?"	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	The promotion of active travel could enhance air quality and support local nature recovery in the long term.	N/A	The policy has neutral effects as there is no reference to Local Nature Recovery Strategy or local nature recovery groups, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as there is reference to integrating active travel with the public transport network, which could enhance the accessibility to public transport.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has neutral effects as there is no reference to reduction in private car use, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel directly encourages greater carbon efficiency.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to coordination with land use planning and integration with blue and green infrastructure, which could further promote active travel. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport technologies, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	++	D	P	Wider	Transport network, air quality, local communities	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has positive effects as there is reference to extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	++	++	The policy has been amended to refer to coordination with land use planning and integration with blue and green infrastructure, which could further promote active travel. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	+	I	T	Wider	Transport network, natural environment	The promotion of active travel could enhance air quality and support climate change mitigation and adaptation in the long term.	N/A	The policy has positive effects as the promotion of active travel encourages climate change mitigation.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to energy generation, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	O	O	O	I	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to rural communities, however the policy is focused on extending active travel network.	Policy could make more explicit reference to the needs of rural communities in relation to improving connectivity of active travel routes.	Partially	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to coordination with land use planning alongside joining up disconnected areas, which could help to address needs of rural communities. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing the needs of rural communities.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Wider	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to low carbon materials or technologies, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	+	+	+	D	T	Regional	Air quality, transport infrastructure	N/A	N/A	The policy has positive effects as there is reference to improving and extending the active travel network, which would support the minimisation of embedded emissions through new infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel directly support West Yorkshire's net zero target by 2038.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to coordination with land use planning and integration with blue and green infrastructure, which could further promote active travel. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has neutral effects as there is no reference to extreme weather events, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to integration with blue and green infrastructure. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing flood risk management and habitat creation opportunities associated with green and blue infrastructure.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to floodplains, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to compensatory measures for floodplain land take, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Wider	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to the consideration of uncertainties in climatic effects, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	-	-	-	I	T	Regional	Transport network, energy infrastructure	N/A	N/A	The policy has negative effects as there is no reference to resource efficiency, whereas the policy aims to extend active travel network.	Policy could make more explicit reference to resource efficiency in relation to the construction of new active travel routes.	N	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	-	-	-	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to resource efficiency in relation to the construction of new active travel routes.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	The policy may raise need for new active travel routes and infrastructure, which will need to consider waste management during construction in the long term.	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastrcture, local communities, supply chain, construction industry	The policy may raise need for new active travel routes and infrastructure, which will need to consider the resource efficiency in construction and operation in the long term.	N/A	The policy has neutral effects as there is no reference to recycling, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Wider	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has positive effects as the promotion of active travel directly promote a modal shift to sustainable transport and reduces fuel consumption.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to coordination with land use planning and integration with blue and green infrastructure, which could further promote active travel. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	The policy may raise need for new active travel routes and infrastructure, which will need to consider the road drainage systems to avoid future issues in the long term.	N/A	The policy has neutral effects as there is no reference to road drainage, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	-	-	-	I	P	Regional	Road infrastrcture	N/A	N/A	The policy has negative effects as there is no reference to road surfacing, whereas the policy aims to extend active travel routes.	Policy could make more explicit reference to minimising the use of impermeable hard surfacing in relation to the construction of new active travel infrastructure.	N	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	-	-	-	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to minimising the use of impermeable hard surfacing in relation to the construction of new active travel infrastructure.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	The promotion of active travel could enhance air quality and support the development of nature-based solutions in the long term.	N/A	The policy has neutral effects as there is no reference to nature based solutions, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	The promotion of active travel could enhance air quality and support the development of blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to blue infrastructure, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to integration with blue and green infrastructure. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing flood risk management and habitat creation opportunities associated with green and blue infrastructure.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	-	-	-	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has negative effects as there is no reference to drainage systems, however the policy is likely to introduce new road infrastructure.	Policy could make more explicit reference to sufficient drainage systems when creating new road infrastructure through reallocating road spaces.	N	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	-	-	-	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to sufficient drainage systems when creating new road infrastructure through reallocating road spaces.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning in the long term.	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resources, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

7	Conserve soil resources and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to agricultural soils, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	-	-	-	I	T	Regional	Mineral safeguarding areas	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning, including mineral safeguarding areas in the long term.	N/A	The policy has negative effects as there is no reference to the considerations of avoiding mineral safeguarding areas, whereas the policy aims to extend active travel routes.	Policy could make more explicit reference to avoiding mineral safeguarding areas in relation to planning and managing active travel network.	Partially	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to coordination with land use planning, which could help to avoid mineral safeguarding areas. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing avoiding mineral safeguarding areas.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to contaminated land, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	-	-	-	D	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to extend active travel network.	Policy could make more explicit reference to improving accessibility to key destinations in relation to extending active travel network.	Partially	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to coordination with land use planning, which could help to connect important sites. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing access to historic and cultural sites.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	-	-	-	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has negative effects as there is no reference to the appropriate management of transport infrastructure, whereas the policy aims to promote active travel.	Policy could make more explicit reference to the appropriate management of transport in relation to the integration of active travel.	N	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	-	-	-	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the appropriate management of transport in relation to the integration of active travel.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, natural environment, landscape, built environment	N/A	N/A	The policy has neutral effects there is no reference to landscape or townscape, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	-	-	-	I	T	Regional	Landscape, natural environment	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning, including protecting designated landscapes and their settings in the long term.	N/A	The policy has negative effects as there is no reference to the considerations of protecting nationally designated landscapes and their settings, whereas the policy aims to extend active travel network.	Policy could make more explicit reference to avoiding impacts on nationally designated landscapes and their settings in relation to planning and managing active travel infrastructure.	Partially	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to coordination with land use planning, which could help to reduce impact on designated landscapes. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing access to designated landscapes.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	O	O	O	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to integration with blue and green infrastructure to promote active travel. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing protection and enhancement of green and blue infrastructure in relation to improved landscape and townscape.

9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	I	T	Regional	Public rights of way	N/A	N/A	The policy has negative effects as there is no reference to the potential impacts on public rights of way, whereas the policy aims to extend active travel network.	Policy could make more explicit reference to protecting public rights of way in relation to the construction and operation of active travel.	N	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	-	-	-	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to protecting public rights of way in relation to the construction and operation of active travel.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to buildings or townscapes, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	I	T	Regional	Built environment	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has neutral effects there is no reference to removing unnecessary clutter, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	O	O	O	I	T	Regional	Road network, transport network	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has neutral effects as there is no reference to disincentives for private car use, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	+	D	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has positive effects as extending the active travel network can promote accessibility.	Policy could make more explicit reference to improving accessibility to key services and destinations in relation to extending active travel network.	Y	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to coordination with land use planning, which could promote accessibility to key services and facilities. Therefore, the scoring has increased to very positive.	It is considered that the policy could be further enhanced by explicitly referencing accessibility to employment sites.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	++	++	D	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has positive effects as there is reference to delivering high quality facilities, improving availability and connectivity for active travel.	Policy could make more explicit reference to the specific types of facilities that improve the quality and availability of active travel.	Y	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	++	++	++	The policy has been amended to refer to integration with blue and green infrastructure to promote active travel. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	++	++	++	The policy has been amended to refer to integration with blue and green infrastructure to promote active travel. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Regional	Transport network, transport infrastructure, local communities	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has positive effects as the extension of active travel network directly promote a modal shift to sustainable transport and improves the convenience of active travel.	Policy could make more explicit reference to the specific types of facilities that improve the convenience and accessibility of active travel.	Y	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to coordination with land use planning and integration with blue and green infrastructure to promote active travel. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has neutral effects there is no reference to charging points, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	-	-	-	I	P	Regional	Local communities, built environment, employment sites, housing sites, transport network	N/A	N/A	The policy has negative effects as there is no reference to coordinating with land use planning to improve active travel infrastructure, whereas the policy aims to extend active travel network.	Policy could make more explicit reference to coordinating with land use planning to improve active travel infrastructure in relation to the planning and managing the active travel network.	Y	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to coordination with land use planning. Therefore, the scoring has increased to very positive.	It is considered that the policy could be further enhanced by explicitly referencing accessibility to new housing and employment sites.

11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to employment, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to coordination with land use planning, which could promote accessibility to key sites. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing accessibility to employment and skills development opportunities, in consideration of areas with high unemployment rate.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has positive effects as there is reference to extending active travel network which improves accessibility for all users.	Policy could make more explicit reference to improving accessibility to key services and destinations in relation to extending active travel network.	Y	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	++	++	The policy has been amended to refer to coordination with land use planning. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	The promotion of active travel may introduce conflict with other modes of transport and impact journey times, careful coordination is required for the long term.	N/A	The policy has neutral effects as there is no reference to journey times for passengers and freight, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	+	I	T	Regional	Local economy, transport network, transport infrastructure		N/A	The policy has positive effects as the promotion of active travel encourages decarbonisation of transport and may help to optimise the potential economic outcomes for West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	+	I	T	Regional	Local economy, transport network, transport infrastructure	The promotion of active travel could contribute to building an effective and resilient transport network in the long term.	N/A	The policy has positive effects as the promotion of active travel may increase investments for West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	-	-	-	D	P	Regional	Air quality, employment site, housing site, transport network		N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to extend active travel network.	Policy could make more explicit reference to improving accessibility in relation to extending active travel network.	Y	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to coordination with land use planning. Therefore, the scoring has increased to very positive.	It is considered that the policy could be further enhanced by explicitly referencing accessibility to new housing and employment sites.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	P	Wider	Air quality, local communities, vulnerable population, air quality		N/A	The policy has positive effects as the promotion of active travel could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to coordination with land use planning and integration with blue and green infrastructure. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	P	Wider	Air quality, local communities		N/A	The policy has positive effects as the promotion of active travel could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to coordination with land use planning and integration with blue and green infrastructure. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	-	-	-	D	P	Regional	Built environment, service and facility, transport network		N/A	The policy has negative effects as there is no reference to improving accessibility to key destinations, whereas the policy aims to extend active travel network.	Policy could make more explicit reference to improving accessibility to key destinations in relation to extending active travel network.	Y	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to coordination with land use planning, which could support enhanced accessibility to services and facilities.	It is considered that the policy could be further enhanced by explicitly referencing accessibility to healthcare services and educational facilities.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network		N/A	The policy has neutral effects as there is no reference to open space, recreational activities, and employment locations, however the policy is focused on extending active travel network.	Policy could make more explicit reference to improving accessibility to key destinations in relation to extending active travel network.	Y	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	The policy has been amended to refer to coordination with land use planning, which could support enhanced accessibility to services and facilities.	It is considered that the policy could be further enhanced by explicitly referencing accessibility to recreational activities and employment locations.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	-	-	-	I	T	Regional	Local communities, transport network	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on severance issues in the long term.	N/A	The policy has negative effects as there is no reference to the consideration of potential severance issues, whereas the policy aims to extend active travel network.	Policy could make more explicit reference to consideration of potential severance issues in relation to the construction and operation of active travel infrastructure.	N	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	-	-	-	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to consideration of potential severance issues in relation to the construction and operation of active travel infrastructure.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to the consideration of the needs of different age groups, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to inclusive designs and accessibility, whereas the policy aims to extend active travel network.	Policy could make more explicit reference to inclusive designs and accessibility in relation to the design of active travel network.	N	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	-	-	-	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to inclusive designs and accessibility in relation to the design of active travel network.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	+	D	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has positive effects there is reference to extending active travel network, which improves affordable transport options.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	The policy has been amended to refer to coordination with land use planning, which could support enhanced accessibility to services and facilities.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	++	D	P	Regional	Local communities, transport network	N/A	N/A	The policy has positive effects as there is reference to improving connectivity between disconnected areas.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	++	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	+	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has positive effects as there is reference to improving connectivity between disconnected areas, which could cover the most deprived areas.	Policy could make more explicit reference to accessibility in deprived areas in relation to the joining up areas.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing the needs of the most deprived areas.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to improving access to information, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	O	O	O	I	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has neutral effects as there is no reference to creating a more welcoming environment for active travel, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce challenges to traffic and road management, which will need to be considered in the long term.	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	O	O	O	I	T	Regional	Local community, built environment, service and facility	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has neutral effects as there is no reference to enhancing road safety, however the policy is focused on extending active travel network.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	O	O	O	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	?	?	?	I	T	Regional	Local community, air quality, vulnerable population	The policy may raise need for new active travel routes and infrastructure, which will need to consider the construction impacts in the long term.	N/A	The policy has uncertain effects as there is no reference to mitigations for construction impacts, however the promotion of active travel could improve operation impacts.	Policy could make more explicit reference to reducing impacts on resident in relation to the the construction and operation of active travel network.	N	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	?	?	?	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to reducing impacts on resident in relation to the the construction and operation of active travel network.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	+	+	+	D	P	Regional	Local community, noise level	N/A	N/A	The policy has positive effects as the promotion of active travel could reduce vibration and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	D	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has positive effects as the promotion of active travel could reduce air pollution and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	+	D	P	Regional	Local community, air quality, noise level, green and blue infrastructure, built environment	The promotion of active travel could introduce safety issues without appropriate measures in place, which will need to be considered in the long term,	N/A	The policy has positive impacts as the integration of active travel with the transport network could improve impacts of transport in terms of air quality improvement and noise reduction.	None identified.	No mitigation identified in 2025.	The policy now references coordination with land use planning and integration with blue and green infrastructure. Reference to strategic, region-wide Active Travel Network is replaced with Weaver Network.	+	+	+	Although the policy has been amended by referencing coordination with land use, integration with blue and green infrastructure, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	A6																				
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanant	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts	
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	++	D	P	Regional	Air quality, local communities, vulnerable populations	N/A	N/A	The policy has positive effects as the promotion of active travel will reduce emissions and improve air quality.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	++	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	++	D	T	Regional	Air quality, local communities, transport network, Road network	N/A	N/A	The policy has positive effects as the promotion of active travel will support modal shift away from private car use, reduce emissions and improve air quality.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	++	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitat	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	O	O	O	I	T	Regional	Air quality, habitats, protected species, biological and geological sites	The promotion of active travel could enhance air quality and support the development of habitats and important sites in the long term.	N/A	The policy has neutral effects as there is no reference to habitats or important sites, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, wildlife corridors and networks	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	O	O	O	I	T	Regional	Green and blue infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure connectivity, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Transport infrastructure, wildlife, biodiversity	The promotion of active travel could enhance air quality and support the development of wildlife-friendly approaches in the long term.	N/A	The policy has neutral effects as there is no reference to wildlife-friendly approaches, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	O	O	O	I	P	Regional	Carbon sinks, transport infrastructure	The promotion of active travel could enhance air quality and support the development of carbon sinks in the long term.	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	-	-	-	D	P	Regional	Local communities, green and blue infrastructure	N/A	Creating and enhancing green and blue infrastructure within neighbourhoods could greatly improve the perceived safety for active travel.	The policy has negative effects as there is no reference to improving accessibility to of local communities to green and blue infrastructure, whereas the policy aims to improve safety of neighbourhoods.	Policy could make more explicit reference to improving accessibility to green and blue infrastructure within neighbourhoods in relation to enhancing perceived safety of active travel.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	-	-	-	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving accessibility to green and blue infrastructure within neighbourhoods in relation to enhancing perceived safety of active travel.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?'	O	O	O	I	T	Regional	Natural environment, local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to local nature recovery, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to public transport, however the policy focuses on improving safety for active travel.	Policy could make more explicit reference to enhancing public transport availability, affordability, and accessibility in relation to promoting multi-modal journeys.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to enhancing public transport availability, affordability, and accessibility in relation to promoting multi-modal journeys.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	I	T	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as there is reference to mitigate traffic, which could reduce private car use.	Policy could make more explicit reference to disincentives for private car use within neighbourhoods in relation to enhancing safety for active travel.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to disincentives for private car use within neighbourhoods in relation to enhancing safety for active travel.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel directly encourages greater carbon efficiency.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	O	O	O	I	P	Wider	Transport network, air quality, local communities	N/A	N/A	The policy has neutral effects as there is no reference to transport technologies, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	regional	Transport network, air quality, local communities	N/A	N/A	The policy has positive effects as improving safety for active travel can promote low-carbon passenger travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	++	The policy has been amended to refer to improving active travel environments,. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	+	I	T	Wider	Transport network, natural environment	The promotion of active travel could enhance air quality and support climate change mitigation and adaptation in the long term.	N/A	The policy has positive effects as the promotion of active travel encourages climate change mitigation.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to energy generation, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	-	-	-	D	P	Regional	Local communities, rural communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to considerations for the needs of rural communities, whereas the policy aims to improve safety for active travel.	Policy could make more explicit reference to the specific transport needs of rural communities in relation to the safety for active tra.	Partially	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	The policy has been amended to refer to joining up neighbourhoods, which could improve connectivity of rural communities.Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing the needs of rural communitites.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Regional	Transport infrastructure, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to low carbon materials and techniques, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	O	O	O	I	T	Regional	Air quality, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to development or maintenance of infrastructure, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	T	Regional	Air quality, transport infrastructure, energy infrastructure, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel directly support West Yorkshire's net zero target by 2038.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	-	-	-	I	T	Wider	Transport network, natural environment, built environment	N/A	N/A	The policy has negative effects as there is no reference to extreme weather events, whereas the policy aims to improve safety of active travel.	Policy could make more explicit reference to eviction plans during extreme weather events in relation to active travel practices.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	-	-	-	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to eviction plans during extreme weather events in relation to active travel practices.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	O	O	O	I	T	Regional	Air quality, green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to floodplains, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Flood risk, built environment	N/A	N/A	The policy has neutral effects as there is no reference to compensatory measure for floodplain land take, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	-	-	-	I	P	Wider	natural environment, built environment, local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to uncertainties in climatic effects, whereas the policy aims to improve safety for active travel.	Policy could make more explicit reference to eviction plans during extreme weather events in relation to active travel practices.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	-	-	-	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to eviction plans during extreme weather events in relation to active travel practices.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	T	Regional	Flood risk, transport network	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	O	O	O	I	T	Regional	Transport network, energy infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Waste management infrastructure, local communities	N/A	N/A	The policy has neutral effects as there is no reference to waste management, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Waste management infrastructure, local communities, supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to public transport, however the policy focuses on improving safety for active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Wider	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has positive effects as the promotion of active travel directly promote a modal shift to sustainable transport and reduces fuel consumption.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	++	The policy has been amended to refer to joining up neighbourhoods and improving active travel environments, which could further promote active travel. Therefore, the scoring has increased to very positive.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Regional	Supply chain, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	T	Regional	Water quality, road infrastructure, drainage system	The policy may raise need for new active travel routes and infrastructure, which will need to consider the road drainage systems to avoid future issues in the long term.	N/A	The policy has neutral effects as there is no reference to road drainage, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	P	Regional	Road infrastrucrture	N/A	N/A	The policy has neutral effects as there is no reference to surfacing, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	O	O	O	I	T	Regional	Green and blue infrastructure, water quality	N/A	N/A	The policy has neutral effects as there is no reference to surface water run off, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Habitats, water quality	N/A	N/A	The policy has neutral effects as there is no reference to nature-based solutions for habitats, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	O	O	O	I	T	Regional	Green and blue infrastructure, habitats, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to flood risks, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to drainage systems, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	T	Regional	Drainage system, flood risk	N/A	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Soil resource, peatland, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to soil resources, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	T	Regional	Soil resource	N/A	N/A	The policy has neutral effects as there is no reference to agricultural soils, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	T	Regional	Mineral safeguarding areas	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	T	Regional	Soil resource, contaminated land	N/A	N/A	The policy has neutral effects as there is no reference to contaminated land, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	T	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	O	O	O	I	P	Regional	Local communities, cultural and heritage asset, historic and culturally important sites, transport network	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	I	T	Regional	Cultural and heritage asset, transport infrastructure, landscape, built environment	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscape, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	T	Regional	Landscape, natural environment	N/A	N/A	The policy has neutral effects as there is no reference to designated landscapes, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	-	-	-	I	P	Regional	Air quality, green and blue infrastructure, landscape, built environment	N/A	Creating and enhancing green and blue infrastructure within neighbourhoods could greatly improve the perceived safety for active travel.	The policy has negative effects as there is no reference to enhancing green and blue infrastructure to create improved ladscape and townscape, whereas the policy aims to improve safety of neighbourhoods.	Policy could make more explicit reference to enhancing green and blue infrastructure to improve the landscape and townscape within neighbourhoods in relation to enhancing perceived safety of active travel.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	-	-	-	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to enhancing green and blue infrastructure to improve the landscape and townscape within neighbourhoods in relation to enhancing perceived safety of active travel.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	I	T	Regional	Public rights of way	N/A	N/A	The policy has negative effects as there is no reference to protecting public rights of way, whereas the policy aims to improve safety of active travel.	Policy could make more explicit reference to protecting puclic rights of way in relation to promoting safety for walking.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	-	-	-	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to protecting puclic rights of way in relation to promoting safety for walking.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Regional	Cultural and heritage asset, built environment	N/A	N/A	The policy has neutral effects as there is no reference to enhancing buildings and townscapes to maintaing sense of place, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	-	-	-	I	T	Regional	Built environment	N/A	N/A	The policy has negative effects as there is no reference to removing unnecessary clutter, whereas the policy aims to improve safety of active travel.	Policy could make more explicit reference to removing unnecessary clutters in relation to improving safety for active travel.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	-	-	-	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is consiered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to removing unnecessary clutters in relation to improving safety for active travel.

10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	+	+	+	D	T	Regional	Road network, transport network	N/A	N/A	The policy has positive effects as there is reference to restricting traffic in residential areas.	Policy could make more explicit reference to specific disincentives for private car use within neighbourhoods in relation to enhancing safety for active travel.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving ctive travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to specific disincentives for private car use within neighbourhoods in relation to enhancing safety for active travel.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	+	D	P	Regional	Local communities, built environment, employment sites, open space, services and facilities	N/A	N/A	The policy has positive effects as improving safety for active travel can promote accessibility for all users.	Policy could mak more explicit reference to improving accessibility to key services in relation to promoting active travel.	Partially	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	++	The policy has been amended to refer to joining up neighbourhoods and improving active travel environments, which could help to improve accessibility of active travel. Therefore, the scoring has increased to very positive.	It is considered that the policy could be further enhanced by explicitly referencing accessibility to key services and facilities, employment sites and open space.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	O	O	O	I	P	Regional	Local communities, road infrastructure, transport network	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	The policy has been amended to refer to improving active travel environments,. Therefore, the scoring has increased to positive.	It is considered that the policy could be further enhanced by explicitly referencing specific measures to improve the quality and availability of active travel infrastructure.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	-	-	-	I	T	Regional	Air quality, green and blue infrastructure, landscape, road infrastructure	N/A	Locating active travel routes close to green and blue infrastructure could improve active travel experiences and sense of safety.	The policy has negative effects as there is no reference to exploring synergies with green and blue infrastructure to enhance active travel routes, whereas the policy aims to improve safety of neighbourhoods.	Policy could make more explicit reference to exploring synergies with green and blue infrastructure within neighbourhoods in relation to enhancing safety of active travel routes.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	-	-	-	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to exploring synergies with green and blue infrastructure within neighbourhoods in relation to enhancing safety of active travel routes.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Regional	Transport network, transport infrastructure, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel directly promote a modal shift to sustainable transport and improves the convenience of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	++	The policy has been amended to refer to joining up neighbourhoods and improving active travel environments. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	O	O	O	I	P	Regional	Transport infrastructure, energy infrastructure	The promotion of active travel may introduce conflict with other modes of transport and impact the transport network operation, careful coordination is required for the long term.	N/A	The policy has neutral effects there is no reference to charging points, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	O	O	O	I	P	Regional	Local communities, emloyment sites, housing sites, transport network	N/A	N/A	The policy has neutral effects there is no reference to land use planning, however the policy is focused on active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	O	O	O	I	P	Regional	Local communities, employment sites, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to employment and skills development opportunities, however the policy is focused on improving safety of active travel.	Policy could make more explicit reference to improving accessibilities to areas with high levels of unemployment in relation to promoting active travel.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving accessibilities to areas with high levels of unemployment in relation to promoting active travel.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	I	P	Regional	Local communities, built environment, services and facilities	N/A	N/A	The policy has positive effects as improving safety for active travel could improve accessibility for all users.	Policy could make more explicit reference to improving accessibilities to key services in relation to promoting active travel.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving accessibilities to key services in relation to promoting active travel.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to journey times for passengers and frieght, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to economic outcomes, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	O	O	O	I	T	Regional	Local economy, transport network, transport infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to investments, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	O	O	O	I	P	Regional	Air quality, employment site, housing site, transport network	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	P	Wider	Air quality, local communities, vulnerable population, air quality	N/A	N/A	The policy has positive effects as the promotion of active travel could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	P	Wider	Air quality, local communities	N/A	N/A	The policy has positive effects as the promotion of active travel could improve air quality and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	O	O	O	I	P	Regional	Built environment, service and facility, transport network	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	O	O	O	I	P	Regional	Employment site, open space, built environment, transport network	N/A	N/A	The policy has neutral effects as there is no reference to open space, recreational activities, and employment locations, however the policy is focused on improving safety of active travel.	Policy could make more explicit reference to improving accessibility to key locations in relation to promoting active travel.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to improving accessibility to key locations in relation to promoting active travel.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	+	+	+	D	T	Regional	Local communities, transport network	N/A	N/A	The policy has positive effects as there is reference to restricting traffic in residential areas, which could reduce severance issues.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	++	The policy has been amended to refer to improving active travel environments and reducing non-local traffic. Therefore, the scoring has increased to very positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	O	O	O	I	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to considerations for the needs of varying vulnerable groups, however the policy is focused on improving safety of neighbourhoods.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	D	T	Regional	Local communities, vulnerable population	N/A	N/A	The policy has negative effects as there is no reference to inclusive designs and accessibility, whereas the policy aims to improve safety of neighbourhoods.	Policy could make more explicit reference to inclusive designs and accessibility in relation to the design of active travel network.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	-	-	-	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to inclusive designs and accessibility in relation to the design of active travel network.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	O	O	O	I	T	Regional	Transport network, transport infrastructure, local communities, services and facilities	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	-	-	-	I	P	Regional	Local communities, transport network	N/A	N/A	The policy has negative effects as there is no reference to improving connections between communities, whereas the policy aims to create connected and safe neighbourhoods.	Policy could make more explicit reference to improving the connection between communities in relation to improving safety of neighbourhoods.	Y	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	++	++	The policy has been amended to refer to joining up neighbourhoods. Therefore, the scoring has increased to positive and very positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	O	O	O	I	P	Regional	Transport network, transport infrastructure, local communities, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	O	O	O	I	T	Regional	Local communities, transport network	N/A	N/A	The policy has neutral effects as there is no reference to accessibility ro information, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	-	-	-	D	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has negative effects as there is no reference to improvement of public realms and levels of natural surveillance, whereas the policy aims to improve safety of active travel.	Policy could make more explicit reference to the improvement of public realms and levels of natural surveillance in relation to creating safer and more welcoming environmentt for active travel.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	-	-	-	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the improvement of public realms and levels of natural surveillance in relation to creating safer and more welcoming environmentt for active travel. The policy could also be enhanced by making explicit reference to Streets for Everyone and Vision Zero, both of which consider active travel and have a strong safety elemen
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	+	+	+	D	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has positive effects as there is reference to restricting traffic in residential areas, which can improve actual and perceived safety.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	+	D	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has positive effects as there is reference to restricting traffic in residential areas, which can reduce risk of cars and other vehicles.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	+	+	+	D	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has positive effects as there is reference to restricting traffic in residential areas.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	+	+	+	D	T	Regional	Local community, built environment, service and facility	N/A	N/A	The policy has positive effects as there is reference to restricting traffic in residential areas, which can enhance road safety.	Policy could make more explicit reference to the specific measures that improves safety and access in relation to ensuring neighbourhoods are not dominated by non-local traffic.	N	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to the specific measures that improves safety and access in relation to ensuring neighbourhoods are not dominated by non-local traffic.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Local community, air quality, vulnerable population	N/A	N/A	The policy has neutral effects as there is no reference to construction and operation impacts, however the policy is focused on improving safety of active travel.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	O	O	O	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	+	+	+	D	P	Regional	Local community, noise level	N/A	N/A	The policy has positive effects as the promotion of active travel and reduction in car traffic could reduce vibration and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	D	T	Regional	Local community, air quality, transport infrastructure	N/A	N/A	The policy has positive effects as the promotion of active travel and reduction in car traffic could reduce air pollution and reduce impacts on the health and wellbeing of all local and wider communities.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	+	D	P	Regional	Local community, air quality, noise level, green and blue infrastructure, built environment	N/A	N/A	The policy has positive impacts as the encouragement of active travel and reduction in car traffic could improve impacts of transport in terms of air quality improvement and noise reduction.	None identified.	No mitigation identified in 2025.	The policy now references joining up neighbourhoods and improving active travel environments through reducing the dominance of non-local traffic.	+	+	+	Although the policy has been amended by referencing joining up neighbourhoods and improving active travel through reducing non-local traffic, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	IA1																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to designated habitats and protected species and important biological and geological sites, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	-	-	-	D	P	Local	Local communities, green infrastructure, blue infrastructure	Green and blue infrastructure deteriorates if not enhanced and looked after, whereas if they are, they are able to thrive and become central to communities.	Improvements in active travel, connectivity and health.	This policy has negative effects as the link between green and blue infrastructure and connecting urban communities has not been made.	This policy could be enhanced by making explicit reference to connecting isolated communities to green and blue infrastructure, rather than just leisure.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to connecting isolated communities to green and blue infrastructure, rather than just leisure.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?"	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to LNRS' or local nature recovery groups, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	The policy has positive effects as it looks to prioritise sustainable transport options.	The policy could be enhanced by making explicit reference to enhancing public transport.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to enhancing public transport.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discounting private car use.	The policy has positive effects as it looks to prioritise sustainable transport options.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discounting private car use.	The policy has positive effects as it looks to prioritise sustainable transport options.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	D	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on connecting isolated urban communities.	This policy could be enhanced by making explicit reference to connecting isolated communities to green and blue infrastructure, rather than just leisure.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to connecting isolated communities to green and blue infrastructure, rather than just leisure.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	-	-	-	D	T	Regional	Built environment, protected landscapes, public rights of way	Public rights of way deteriorate if not enhanced and looked after, whereas if they are, they are able to thrive and become central to communities.	Improvements in active travel, connectivity, and health.	This policy has negative effects as the link between public rights of way and connecting urban communities has not been made.	This policy could be enhanced by making explicit reference to connecting isolated communities through public rights of way, rather than just leisure.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to connecting isolated communities through public rights of way, rather than just leisure.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of sustainable transport as their main form of transport.	Could have synergistic effects when accessibility, active travel, and affordability are improved.	This policy has negative effects as it does not address the link between disincentivising private car use and prioritising sustainable transport.	This policy could be enhanced by making explicit reference to disincentivising private car use as a way of prioritising sustainable transport.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to disincentivising private car use as a way of prioritising sustainable transport.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of sustainable transport as their main form of transport.	Could have synergistic effects when combined with disincentivising private car use.	This policy has positive effects as it references connecting isolated communities to education, employment, leisure, and services.	This policy could be enhanced by making additional reference to connecting communities to open space.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making additional reference to connecting communities to open space.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of sustainable transport as their main form of transport.	Could have synergistic effects when combined with disincentivising private car use.	This policy has negative effects as it does not explicitly state how sustainable travel will be prioritised.	This policy could be enhanced by making explicit reference to improving active travel infrastructure as a way of prioritising sustainable transport.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to improving active travel infrastructure as a way of prioritising sustainable transport.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of sustainable transport as their main form of transport.	Could have synergistic effects when combined with disincentivising private car use.	This policy has negative effects as it does not explicitly state how sustainable travel will be prioritised.	This policy could be enhanced by making explicit reference to connecting isolated communities through green and blue infrastructure.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to connecting isolated communities through green and blue infrastructure.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of sustainable transport as their main form of transport.	Could have synergistic effects when combined with disincentivising private car use.	This policy has negative effects as it does not explicitly state how sustainable travel will be prioritised.	This policy could be enhanced by making explicit reference to making sustainable travel options more convenient, affordable, and accessible.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to making sustainable travel options more convenient, affordable, and accessible.

10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of sustainable transport as their main form of transport.	Could have synergistic effects when combined with disincentivising private car use.	This policy has negative effects as it does not explicitly state how sustainable travel will be prioritised.	This policy could be enhanced by making explicit reference to low emission vehicle infrastructure as a way of prioritising sustainable transport.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to low emission vehicle infrastructure as a way of prioritising sustainable transport.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of sustainable transport as their main form of transport.	Could have synergistic effects when combined with disincentivising private car use.	This policy has positive effects as it references connecting isolated communities to education, employment, leisure, and services.	This policy could be enhanced by making additional reference to connecting communities to housing.	N	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making additional reference to connecting communities to housing.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	+	D	P	Local	Lower socio-economic groups and deprived areas	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as it references connecting isolated communities to education and employment.	This policy could be enhanced by making additional reference to connecting with areas where there are high levels of unemployment.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making additional reference to connecting with areas where there are high levels of unemployment.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as it references connecting isolated communities to services.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	This policy has neutral effects as there is no reference to the journey times, however, the policy is focused on connecting isolated urban communities.	This policy could be enhanced by making explicit reference to supporting the reduction of overall journey times and improving travel convenience and reliability as a way of connecting isolated urban communities.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to supporting the reduction of overall journey times and improving travel convenience and reliability as a way of connecting isolated urban communities.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	This policy has neutral effects as there is no reference to the decarbonisation of transport, however, the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	This policy has neutral effects as there is no reference to the decarbonisation of transport, however, the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as it references connecting isolated communities to employment.	This policy could be enhanced by making additional reference to connecting communities to housing.	N	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making additional reference to connecting communities to housing.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through connecting isolated communities to healthcare, thereby promoting health and wellbeing.	Investing in reliable and affordable public transport reduces the number of cars on the road, leading to lower emissions and fewer traffic accidents. This also provides access to essential services for low-income communities	This policy has positive effects as it tackles accessibility to services, which could include health services.	This policy could be enhanced by making explicit reference to healthcare services.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to healthcare services.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through connecting isolated communities to healthcare, thereby promoting health and wellbeing.	Investing in reliable and affordable public transport reduces the number of cars on the road, leading to lower emissions and fewer traffic accidents. This also provides access to essential services for low-income communities	This policy has positive effects as it references accessibility to services, which could include health services.	This policy could be enhanced by making explicit reference to healthcare services.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to healthcare services.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through connecting isolated communities to healthcare, thereby promoting health and wellbeing.	Investing in reliable and affordable public transport reduces the number of cars on the road, leading to lower emissions and fewer traffic accidents. This also provides access to essential services for low-income communities	This policy has positive effects as it references connecting isolated communities to services and education.	This policy could be enhanced by making explicit reference to healthcare services.	N	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to healthcare services.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through improved access to open space.	Investing in reliable and affordable public transport reduces the number of cars on the road, leading to lower emissions and fewer traffic accidents. This also provides access to essential services for low-income communities	This policy has positive effects as it references connecting isolated communities to employment and leisure.	This policy could be enhanced by making explicit reference to healthcare services and open space.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to healthcare services and open space.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through improved access to spaces, reducing severance.	Investing in reliable and affordable public transport reduces the number of cars on the road, leading to lower emissions and fewer traffic accidents. This also provides access to essential services for low-income communities	This policy has positive effects as it references tackling community severance.	This policy could be enhanced by making explicit reference to how community severance will be tackled.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to how community severance will be tackled.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as it references connecting isolated urban communities to opportunities.	This policy could be enhanced by making explicit reference to promoting equality of opportunity.	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to promoting equality of opportunity.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has negative effects as it does not explicitly reference connectivity for disabled and low mobility users.	This policy could be enhanced by making explicit reference to disabled and low mobility users.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to disabled and low mobility users.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as it references connecting isolated urban communities to services.	This policy could be enhanced by making explicit reference to affordability .	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to affordability .
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	++	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as it references connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	++	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as it references prioritising sustainable transport options to connect isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	++	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	This policy has neutral effects as there is no reference to access to information, however, the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	-	-	-	D	P	Regional	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	This policy has negative effects as it does not make the link between safety and connecting isolated urban communities.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	-	-	-	D	P	Regional	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	This policy has negative effects as it does not make the link between safety and connecting isolated urban communities.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	-	-	-	I	P	Regional	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	This policy has negative effects as it does not make the link between safety and connecting isolated urban communities.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	-	-	-	I	P	Local	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	This policy has negative effects as it does not make the link between safety and connecting isolated urban communities.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	-	-	-	I	P	Local	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	This policy has negative effects as it does not make the link between safety and connecting isolated urban communities.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.

15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to pollution, however the policy is focused on connecting isolated urban communities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1 st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

Policy Name	IA2																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	0	0	0	D	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on delivering high quality and healthy places for people.	This policy could be enhanced by making explicit reference to how nature and green and blue infrastructure can enhance air quality to deliver healthy places, particularly for vulnerable populations.	N	The policy now references adapting to climate change.	0	0	0	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to how nature and green and blue infrastructure can enhance air quality to deliver healthy places, particularly for vulnerable populations.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	D	T	Regional	Air quality, vulnerable communities	Increased trips by private motor vehicle will worsen the air quality over time, and therefore health, if efforts for minimisation are not sustained.	Developing infrastructure for walking and cycling encourages these modes of transport, reducing reliance on motor vehicles and decreasing pollution levels	This policy has positive effects as it references removing certain types of vehicles from the roads, which will improve air quality.	This policy could be enhanced by making explicit reference to air quality when delivering healthy places.	N	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to air quality when delivering healthy places.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multifunctional benefits?	+	+	+	D	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats	Increased trips by private motor vehicle will worsen the air quality over time, and therefore health, if efforts for minimisation are not sustained.	Potential for synergistic effects when combined with increased use of sustainable transport modes.	This policy has positive effects as it references using green and blue infrastructure to deliver healthy places for people.	This policy could be enhanced by making explicit reference to air quality when delivering healthy places.	N	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to air quality when delivering healthy places.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	0	0	0	D	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	This policy has neutral effects as it does not reference designated habitats and protected species, and important biological and geological sites, however, the policy is about delivering high quality and healthy places for people.	This policy could be enhanced by making explicit reference to avoiding significant adverse effects on designated habitats and protected species, important biological sites and geological sites when delivering healthy places.	N	The policy now references adapting to climate change.	0	0	0	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to avoiding significant adverse effects on designated habitats and protected species, important biological sites and geological sites when delivering healthy places.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	-	-	-	D	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	Biodiversity, geodiversity, and green and blue infrastructure deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	Provide recreational spaces whilst improving health.	This policy has negative effects as it does not explicitly reference the creation of wildlife corridors and networks.	This policy could be enhanced by making explicit reference to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks	N	The policy now references adapting to climate change.	-	-	-	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	-	-	-	D	T	Regional	Green spaces, green infrastructure, blue infrastructure	Biodiversity, geodiversity, and green and blue infrastructure deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	Provide recreational spaces whilst improving health.	This policy has negative effects as it does explicitly infer to the connectivity between green and blue infrastructure.	This policy could be enhanced by making explicit reference to connectivity between green and blue infrastructure.	N	The policy now references adapting to climate change.	-	-	-	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to connectivity between green and blue infrastructure.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	-	-	-	D	P	Regional	Green spaces, green infrastructure, blue infrastructure	Biodiversity, geodiversity, and green and blue infrastructure deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	Provide recreational spaces whilst improving health.	This policy has negative effects as it does not reference how it will enhance nature through good design.	This policy could be enhanced by making explicit reference to how it will enhance nature and biodiversity through good design and updating the policy wording to include 'placemaking'.	N	The policy now references adapting to climate change.	-	-	-	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to how it will enhance nature and biodiversity through good design and updating the policy wording to include 'placemaking'.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	+	+	+	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, carbon sinks	Biodiversity, geodiversity, and green and blue infrastructure deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	Provide recreational spaces whilst improving health.	This policy has positive effects as it references using green infrastructure to deliver healthy places for people.	This policy could be enhanced by making explicit reference to green infrastructure being used as carbon sinks.	N	The policy now references adapting to climate change.	+	++	++	The policy has been amended by referencing adapting to climate change. Therefore, the scoring has increased to very positive.	This policy could be enhanced by making explicit reference to green infrastructure being used as carbon sinks.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	+	+	+	D	P	Local	Green spaces, green infrastructure, blue infrastructure	Biodiversity, geodiversity, and green and blue infrastructure deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	Provide recreational spaces whilst improving health.	This policy has positive effects as it references using green and blue infrastructure to deliver healthy places for people.	This policy could be enhanced by making explicit reference to the accessibility of green and blue infrastructure.	N	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the accessibility of green and blue infrastructure.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	0	0	0	D	T	Local	Green spaces, green infrastructure, blue infrastructure, local nature recovery groups	N/A	N/A	This policy has neutral effects as it does not reference LNRS, however, the policy is about delivering high quality and healthy places for people.	This policy could be enhanced by making explicit reference to supporting Local Nature Recovery Strategies and working with local nature recovery groups to enhance nature.	N	The policy now references adapting to climate change.	0	0	0	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to supporting Local Nature Recovery Strategies and working with local nature recovery groups to enhance nature.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	The policy has positive effects as there is reference to balancing the needs of sustainable transport.	This policy could be enhanced by making explicit reference to measures that enhance public transport availability, affordability, and accessibility.	N	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to measures that enhance public transport availability, affordability, and accessibility.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discounting private car use.	The policy has positive effects as it offers disincentives for car use and incentives for public transport.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discounting private car use.	The policy has positive effects as it offers disincentives for car use and incentives for public transport.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	++	++	The policy has been amended by referencing adapting to climate change. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Local	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to greenhouse gas emissions from transport, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	++	++	The policy has been amended by referencing adapting to climate change. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Regional	Transport network, road network, road users, utility network, construction industry	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discentivising private car use.	The policy has positive effects as there is reference to balancing the needs of sustianable transport.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	+	+	+	D	T	Regional	Utility network, construction industry, water environment, blue infrastructure	Increase water absorption and reduce surface runoff, leading to a cumulative reduction in flood risk over time	Enhanced green and blue spaces can improve community wellbeing by providing recreational areas and improving air quality, while also reducing flood risk	The policy has positive effects as it references enhancing nature, biodiversity, and green and blue infrastructure.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	++	++	The policy has been amended by referencing adapting to climate change. Therefore, the scoring has increased to very positive.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	-	-	-	D	P	Regional	Built environment, protected landscapes	Over time, thoughtful integration of transport infrastructure can lead to more visually appealing and cohesive urban and rural landscapes.	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	This policy has negative effects as it does not make the link between the the design, construction, repair, and maintenance of transport infrastructure and delivering high quality places.	This policy could be enhanced by making explicit reference to enhancing the landscape and townscape through the design and maintenance of transport infrastructure, which in turn, delivers high quality places.	N	The policy now references adapting to climate change.	-	-	-	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to enhancing the landscape and townscape through the design and maintenance of transport infrastructure, which in turn, delivers high quality places.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	-	-	-	D	P	Regional	Built environment, protected landscapes	Landscapes may be eroded over time as development comes forward	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	This policy has negative effects as it does not make the link between the protecting nationally designated landscapes and delivering high quality places.	This policy could be enhanced by making explicit reference to enhancing the landscape and townscape through protecting the special qualities and setting on nationally designated landscapes.	N	The policy now references adapting to climate change.	-	-	-	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to enhancing the landscape and townscape through protecting the special qualities and setting on nationally designated landscapes.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	+	+	+	D	T	Regional	Built environment, protected landscapes, blue and green infrastructure	Landscapes may be eroded over time as development comes forward	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	This policy has positive effects as it references using green and blue infrastructure to deliver healthy places for people.	The policy could be enhanced by including principles which align with the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.	N	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by including principles which align with the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	D	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of way, however the policy is focused on delivering high quality and healthy places for people.	This policy could be enhanced by making explicit reference to public rights of way in delivering healthy places.	N	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to public rights of way in delivering healthy places.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	-	-	-	D	P	Regional	Built environment, protected landscapes	Buildings and townscapes may be eroded over time as development comes forward	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	This policy has negative effects as it does not make the link between strengthening local distinctiveness and sense of place, and delivering high quality places.	This policy could be enhanced by making explicit reference to local distinctiveness and sense of place in delivering high quality places.	N	The policy now references adapting to climate change.	-	-	-	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to local distinctiveness and sense of place in delivering high quality places.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	+	+	+	D	T	Regional	Built environment, protected landscapes	Streetscapes may be eroded over time as development comes forward	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	This policy has positive effects as it makes reference to improving the streetspace.	This policy could be enhanced by making explicit reference to removing unnecessary clutter from streets.	N	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to removing unnecessary clutter from streets.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when accessibility, active travel, and affordability are improved.	This policy has positive effects as it makes reference to removing certain types of parking	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.	N	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	This policy has positive effects as it makes reference to balancing the needs of public transport.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.	N	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	This policy has positive effects as it makes reference to delivering high quality places, in part through roadspace reallocation and enhancing nature and green and blue infrastructure.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.	N	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	This policy has positive effects as it makes reference to delivering high quality places, in part through roadspace reallocation and enhancing nature and green and blue infrastructure.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.	N	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	This policy has positive effects as it makes reference to delivering high quality places, in part through roadspace reallocation and balancing the needs of public transport.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.	N	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.

10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	This policy has negative effects as it does not make the link between providing infrastructure for low emission vehicles and delivering high quality and healthy places.	This policy could be enhanced by making explicit reference to infrastructure for low emission vehicles.	N	The policy now references adapting to climate change.	-	-	-	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to infrastructure for low emission vehicles.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	This policy has positive effects as it makes reference to balancing the needs of public transport.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.	N	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Local	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	The policy has positive effects as it has potential to improve accessibility for non-car users.	The policy could be enhanced by making explicit reference to improving accessibility to services.	N	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to improving accessibility to services.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	+	I	P	Local	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	The policy has positive effects as there is reference to enhancing spaces for economic activity and balancing the needs of sustainable transport.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	+	I	T	Local	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	The policy has positive effects as there is reference to enhancing spaces for economic activity and balancing the needs of sustainable transport.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through positive planning.	Increased physical activity, improved mental and physical health, and increased independence.	This policy has positive effects as it references delivering healthy places for people.	This policy could be enhanced by making explicit reference to delivering healthy places for particularly vulnerable groups and how this will be achieved.	N	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to delivering healthy places for particularly vulnerable groups and how this will be achieved.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through positive planning.	Increased physical activity, improved mental and physical health, and increased independence.	This policy has positive effects as it references delivering healthy places for people.	This policy could be enhanced by making explicit reference to delivering healthy places for different groups within the wider population and how this will be achieved.	N	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to delivering healthy places for different groups within the wider population and how this will be achieved.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to healthcare services, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through improved access to open space.	Increased physical activity, improved mental and physical health, and increased independence.	This policy has positive effects as it references providing spaces for sitting, socialising and place, as well as enhancing nature and green and blue infrastructure.	This policy could be enhanced by making explicit reference to accessibility.	N	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to accessibility.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through reduced physical impact of the transport network.	Increased physical activity, improved mental and physical health, and increased independence.	This policy has positive effects as it makes reference to roadspace reallocation, which will reduce the physical impacts transport infrastructure has on people.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.	N	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by including principles which to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Inclusive public infrastructure supports the needs of different groups, reducing social and economic disparities	The policy has positive effects as it references sitting provision, which considers the needs of older people, disabled people, and those with low mobility.	This policy could be enhanced by explicitly stating that removal of certain types of vehicle traffic and parking does not include disabled drivers and parking.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	+	+	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by explicitly stating that removal of certain types of vehicle traffic and parking does not include disabled drivers and parking.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on delivering high quality and healthy places for people.	This policy could be enhanced by explicitly stating that removal of certain types of vehicle traffic and parking does not include disabled drivers and parking.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by explicitly stating that removal of certain types of vehicle traffic and parking does not include disabled drivers and parking.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	+	+	++	D	P	Regional	Transport network, road network, road users, local communities	Over time, safer and healthier spaces and transport options can improve the overall quality of life by reducing stress, promoting social interactions, and creating more livable communities.	Improvements to public spaces and reductions in crime encourage people to feel more secure, increasing use of public spaces.	This policy has positive effects as it references delivering high quality places for people through integrating spaces for sitting, socialising and play, which in turn, will increase natural surveillance.	This policy could be enhanced by making explicit reference to 'public realm' within the policy wording. The policy could also include principles to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.	N	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to 'public realm' within the policy wording. The policy could also include principles to align with in addition to the West Yorkshire Streets for Everyone Strategy reference, as this is yet to be adopted.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	++	D	P	Regional	Transport network, road network, road users, local communities	Over time, safer and healthier spaces and transport options can improve the overall quality of life by reducing stress, promoting social interactions, and creating more livable communities.	Improvements to public spaces and reductions in crime encourage people to feel more secure, increasing use of public spaces.	The policy has positive effects as it has potential to reduce the risk imposed by cars through reducing space dedicated to cars and balancing the needs of public transport .	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on delivering high quality and healthy places for people.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	o	o	o	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	+	+	++	D	P	Regional	Transport network, road network, road users, local communities	Over time, safer and healthier spaces and transport options can improve the overall quality of life by reducing stress, promoting social interactions, and creating more livable communities.	Improvements to public spaces and reductions in crime encourage people to feel more secure, increasing use of public spaces.	The policy has positive effects as it has potential to reduce the risk imposed by cars through reducing space dedicated to cars and balancing the needs of public transport .	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	?	?	?	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Improved health and reduced health inequalities through promoting healthier construction and operational practices, equipment and materials.	Increased physical activity, improved mental and physical health, and increased independence.	This policy has uncertain effects as there is no explicit reference in the policy text to reducing noise, air and light pollution, whereas these are essential in delivering high quality and helthy places.	This policy could be enhanced by making explicit reference to delivering healthy places through healthier construction and operational practices.	N	The policy now references adapting to climate change.	?	?	?	Although the policy has been amended by the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to delivering healthy places through healthier construction and operational practices.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	-	-	-	D	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Improved health and reduced health inequalities through promoting healthier construction and operational practices, equipment and materials.	Increased physical activity, improved mental and physical health, and increased independence.	This policy has negative effects as it does not make the link between suitable materials and delivering healthy place for people.	This policy could be enhanced by making explicit reference to delivering healthy places through healthier construction and operational practices.	N	The policy now references adapting to climate change.	-	-	-	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to delivering healthy places through healthier construction and operational practices.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	++	D	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Improved health and reduced health inequalities through promoting healthier construction and operational practices, equipment and materials.	Increased physical activity, improved mental and physical health, and increased independence.	This policy has positive effects as it makes reference to removing certain types of vehicles and parking from spaces.	This policy could be enhanced by making explicit reference to delivering healthy places through healthier construction and operational practices.	N	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to delivering healthy places through healthier construction and operational practices.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	++	D	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Improved health and reduced health inequalities through promoting healthier construction and operational practices, equipment and materials.	Increased physical activity, improved mental and physical health, and increased independence.	This policy has positive effects as it makes reference to providing spaces for sitting, socialising, play, enhancing nature, blue and green infrastructure and spaces for pop up events.	None identified.	No mitigation identified in 2025.	The policy now references adapting to climate change.	+	+	++	Although the policy has been amended by referencing adapting to climate change, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	IA3																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference air quality, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	+	The policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options. This will contribute to lowering air pollution emissions. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	D	T	Regional	Air quality, vulnerable communities	Increased trips by private motor vehicle will worsen the air quality over time, and therefore health, if efforts for minimisation are not sustained.	Developing infrastructure for walking and cycling encourages these modes of transport, reducing reliance on motor vehicles and decreasing pollution levels	This policy has positive effects as it will enable a modal shift to sustainable travel.	The policy could be enhanced by making explicit reference to reducing emissions through increasing uptake of sustainable modes of transport.	Partially	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing the Weaver Network and improving access to services and opportunities for employment, education and leisure through sustainable options. This will contribute to lowering air pollution emissions. Therefore, the scoring has increased to very positive.	The policy could be further enhanced by making explicit reference to reducing emissions.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	This policy has neutral effects as it does not reference air quality, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Green spaces, green infrastructure, carbon sinks	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	+	The policy has been amended by referencing improving access to opportunities for leisure through sustainable options, which could include green and blue infrastructure. Therefore, the scoring has increased to positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?"	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, local nature recovery groups	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discentivising private car use.	This policy has positive effects as it promotes the use of sustainable forms of transport.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing the Weaver Network and improving access to services and opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing the Weaver Network and improving access to services and opportunities for employment, education and leisure through sustainable options. This will contribute to lowering air pollution emissions. Therefore, the scoring has increased to very positive.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discounting private car use.	This policy has positive effects as it promotes the use of sustainable forms of transport.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing the Weaver Network and improving access to services and opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	+	+	+	D	P	Local	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discounting private car use.	This policy has positive effects as it considers the specific transport needs of rural communities.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	++	++	++	The policy has been amended by referencing the Weaver Network and improving access for rural communities to services and opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discounting private car use.	This policy has positive effects as it promotes the use of sustainable forms of transport alongside improved digital connectivity.	The policy could be enhanced by making explicit reference to reducing emissions through extending the network of sustainable modes of transport.	Partially	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing the Weaver Network and improving access for rural communities to services and opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	The policy could be further enhanced by making explicit reference to reducing emissions.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Regional	Transport network, road network, road users, utility network, construction industry	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discentivising private car use.	This policy has positive effects as it promotes the use of sustainable forms of transport alongside improved digital connectivity.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing the Weaver Network and improving access for rural communities to services and opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to reducing road traffic and congestion, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using active travel routes and public transport will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	In rural areas, combining public transport with active travel options (e.g., bike-sharing programs at bus stops) can create a more efficient and user-friendly transport system. This synergy encourages more people to use sustainable transport, amplifying the benefits	The policy has positive effects as it promotes accessibility to services and facilities through extending the reach of the transport network into areas with lower levels of connectivity.	The policy could be enhanced by making explicit reference to connecting rural areas to key services, employment sites, and open space.	Y	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing improving access for rural communities to opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of active travel as their main form of transport	In rural areas, combining public transport with active travel options (e.g., bike-sharing programs at bus stops) can create a more efficient and user-friendly transport system. This synergy encourages more people to use sustainable transport, amplifying the benefits	The policy has positive effects as there is reference to improving connectivity through active travel options.	The policy could be enhanced by making explicit reference to quality and availability.	N	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to quality and availability.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of active travel as their main form of transport	In rural areas, combining public transport with active travel options (e.g., bike-sharing programs at bus stops) can create a more efficient and user-friendly transport system. This synergy encourages more people to use sustainable transport, amplifying the benefits	The policy has positive effects as there is reference to improving connectivity through active travel options.	The policy could be enhanced by making explicit reference to enhancing existing active travel options through green and blue infrastructure.	N	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by enhancing existing active travel options through green and blue infrastructure.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using active travel routes and public transport will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	In rural areas, combining public transport with active travel options (e.g., bike-sharing programs at bus stops) can create a more efficient and user-friendly transport system. This synergy encourages more people to use sustainable transport, amplifying the benefits	The policy has positive effects as there is reference to improving connectivity through active travel and shared transport options.	The policy could be enhanced by making explicit reference to convenience, accessibility, and affordability.	N	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing improving access for rural communities to opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	The policy could be enhanced by making explicit reference to convenience, accessibility, and affordability.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to encouraging a shift to low emission vehicles, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to new development, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	+	D	P	Local	Lower socio-economic groups and deprived areas	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it promotes accessibility to services and facilities through extending the reach of the transport network into areas with lower levels of connectivity.	The policy could be enhanced by making explicit reference to connecting rural areas to employment and skills development opportunities.	Y	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing improving access for rural communities to opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	None identified.

11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	-	-	-	D	P	Local	Lower socio-economic groups and deprived areas	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as there is no explicit reference as to where rural areas will be connected to.	The policy could be enhanced by making explicit reference to connecting rural areas to services, facilities and amenities.	Y	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing improving access for rural communities to opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to journey times, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	+	D	P	Local	Lower socio-economic groups and deprived areas	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it has the potential to contribute to the decarbonisation of transport in rural areas by providing sustainable alternatives.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to increasing investment, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	-	-	-		P	Local	Lower socio-economic groups and deprived areas	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as there is no explicit reference as to where rural areas will be connected to.	The policy could be enhanced by making explicit reference to connecting rural areas to major employment and residential growth areas.	Partially	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing improving access for rural communities to opportunities for employment through sustainable options. Therefore, the scoring has increased to very positive.	The policy could be further enhanced by making explicit reference to connecting rural areas to residential growth areas.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through positive planning.	Increased physical activity, improved mental and physical health, and increased independence.	The policy has positive effects as it will provide more opportunities for active travel.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to the content within the West Yorkshire Streets for Everyone Strategy, as this is yet to be adopted.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing improving access for rural communities to opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on connecting rural areas.	The policy could be enhanced by making explicit reference to connecting rural areas to key locations.	Y	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing improving access for rural communities to opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Improved connectivity make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has negative effects as it does not make the link between promoting greater equality of opportunity and connecting rural areas.	The policy could be enhanced by making explicit reference to how connecting rural areas will promote equality of opportunity.	N	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	The policy has been amended by referencing improving access for rural communities to opportunities for employment, education and leisure through sustainable options. Therefore, the scoring has increased to very positive.	The policy could be enhanced by making explicit reference to how connecting rural areas will promote equality of opportunity.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	o	o	o	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	This policy has neutral effects as it does not reference accessible and inclusive design, however the policy is focused on connecting rural areas.	The policy could be enhanced by making explicit reference to how connecting rural areas will promote equality of opportunity.	N	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy., it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how connecting rural areas will promote equality of opportunity.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Improved connectivity makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has negative effects as it does not make the link between promoting greater equality of opportunity and connecting rural areas.	The policy could be enhanced by making explicit reference to how connecting rural areas through affordability and accessibility will promote equality of opportunity.	N	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	-	-	-	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how connecting rural areas through affordability and accessibility will promote equality of opportunity.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Improved connectivity makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as it makes reference to improving connections to rural communities.	The policy could be enhanced by making explicit reference to how connecting rural areas will promote equality of opportunity.	N	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how connecting rural areas will promote equality of opportunity.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Improved connectivity makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as it makes reference to improving connections to areas with lower levels of connectivity.	The policy could be enhanced by making explicit reference to how connecting rural areas will promote equality of opportunity, particularly in deprived areas.	N	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how connecting rural areas will promote equality of opportunity, particularly in deprived areas.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Improved connectivity makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as it makes reference to improving digital connectivity.	The policy could be enhanced by making explicit reference to how connecting rural areas will promote equality of opportunity.	N	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	+	+	++	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how connecting rural areas will promote equality of opportunity.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	-	-	-	D	P	Regional	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	This policy has negative effects as it does not make the link between safety and connecting isolated urban communities.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.	N	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	-	-	-	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	-	-	-	D	P	Regional	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	This policy has negative effects as it does not make the link between safety and connecting isolated urban communities.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.	N	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	-	-	-	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	This policy could be enhanced by making explicit reference to safety improving freedom of movement and therefore connectivity and access to opportunities.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on connecting rural areas.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access to services and opportunities for employment, education and leisure, and the Streets for Everyone Strategy.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access to services and opportunities for employment, education and leisure through sustainable options, and the Streets for Everyone Strategy,, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference air quality, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference air quality, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	This policy has neutral effects as it does not reference air quality, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, carbon sinks	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?"	o	o	o	I	T	Local	Green spaces, green infrastructure, local nature recovery groups	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Wider	Transport network, road network, road users, air quality	Affordable access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Affordable transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as there is reference to ensuring fares and tickets offer good value for money across the public transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	I	T	Wider	Transport network, road network, road users, air quality	Affordable access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Affordable transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as there is reference to ensuring fares and tickets offer good value for money across the public transport network, which promotes the use of sustainable transport.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Local	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	I	T	Wider	Transport network, road network, road users, air quality	Affordable access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Affordable transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as affordability will enable a modal shift to more sustainable forms of transport.	The policy could be enhanced by making explicit reference to reducing emissions through sustainable modes of transport.	N	The policy now references the Weaver Network, replacing 'public transport'.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to reducing emissions through sustainable modes of transport.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	I	P	Wider	Transport network, road network, road users, utility network, construction industry	Affordable access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Affordable transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	This policy has positive effects as there is reference to ensuring fares and tickets offer good value for money across the public transport network, which promotes the use of sustainable transport.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to reducing road traffic and congestion, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using public transport will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Affordable public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it makes reference to improving access to public transport.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to the quality and availability of active travel, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to the green and blue infrastructure, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	++	++	++	D	P	Wider	Transport network, road network, road users, air quality	The increased number of residents in areas using public transport will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Affordable public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it makes reference to improving access to public transport through affordability.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	++	++	++	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low emission vehicle infrastructure, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to housing and unemployment areas, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	+	D	P	Local	Lower socio-economic groups and deprived areas	Affordable access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Affordable transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it makes reference to reducing social exclusion.	The policy could be enhanced by making explicit reference to social exclusion from employment and skills development opportunities.	N	The policy now references the Weaver Network, replacing 'public transport'.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to social exclusion from employment and skills development opportunities.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Local	Lower socio-economic groups and deprived areas	Affordable access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Affordable transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it makes reference to reducing social exclusion.	The policy could be enhanced by making explicit reference to social exclusion from services, facilities, and amenities.	N	The policy now references the Weaver Network, replacing 'public transport'.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to social exclusion from services, facilities, and amenities.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to supporting a reduction in journey times, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	+	I	P	Wider	Lower socio-economic groups and deprived areas	Affordable access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Affordable transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to ensuring fares and tickets offer good value for money and working in cross-boundary partnerships, which could help to optimise the economic outcomes for West Yorkshire.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to increasing investment, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to physical accessibility, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through positive planning.	Increased physical activity, improved mental and physical health, and increased independence.	The policy has positive effects as it reducing transport costs means people can dedicate more income to health needs.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through positive planning.	Increased physical activity, improved mental and physical health, and increased independence.	The policy has positive effects as it reducing transport costs means people can dedicate more income to health needs.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Affordability of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references removing cost as a barrier to transport and reducing social exclusion.	The policy could be enhanced by making explicit reference to supporting low income and unemployed people.	N	The policy now references the Weaver Network, replacing 'public transport'.	+	+	++	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to supporting low income and unemployed people.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to accessible and inclusive design, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	++	++	++	D	T	Wider	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Affordability of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has very positive effects as it references making the public transport network good value for money.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	++	++	++	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	++	D	T	Wider	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Affordability of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references reducing social exclusion.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	+	+	++	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	++	D	T	Wider	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Affordability of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references reducing social exclusion.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	+	+	++	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to access to information, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on affordable fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, replacing 'public transport'.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	IA5																			
Ref	Objective	Assessment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	+	D	T	Local	Air quality, vulnerable communities	Increased trips by private motor vehicle will worsen the air quality over time, and therefore health, if efforts for minimisation are not sustained.	Developing infrastructure for walking and cycling encourages these modes of transport, reducing reliance on motor vehicles and decreasing pollution levels	This policy has positive effects as it references sustainable modes which will reduce air pollution.	The policy could be enhanced by making explicit reference to reducing emissions through sustainable modes of transport.	N	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to reducing emissions through sustainable modes of transport.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	D	T	Local	Air quality, vulnerable communities	Increased trips by private motor vehicle will worsen the air quality over time, and therefore health, if efforts for minimisation are not sustained.	Developing infrastructure for walking and cycling encourages these modes of transport, reducing reliance on motor vehicles and decreasing pollution levels	This policy has positive effects as it references sustainable modes which will reduce air pollution.	The policy could be enhanced by making explicit reference to reducing emissions through sustainable modes of transport.	N	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to reducing emissions through sustainable modes of transport.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	This policy has neutral effects as it does not reference air quality, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, carbon sinks	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?"	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, local nature recovery groups	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	This policy has positive effects as it promotes sustainable modes of transport through increased accessibility and availability.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	++	The policy has been amended by referencing improving access. Therefore, the scoring has increased to very positive.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	++	The policy has been amended by referencing improving access to the Weaver Network, which will encourage a reduction in private car use. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	This policy has positive effects as it promotes sustainable modes of transport through increased accessibility and availability.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	This policy has positive effects as it promotes sustainable modes of transport through increased accessibility and availability and integrated facilities and services.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	++	The policy has been amended by referencing improving access to the Weaver Network through new and enhanced services, which will encourage a reduction in private car use. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Local	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	This policy has positive effects as through removing barriers to the use of sustainable transport.	The policy could be enhanced by making explicit reference to reducing emissions through sustainable modes of transport.	N	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	++	The policy has been amended by referencing improving access to the Weaver Network, which will contribute to achieving Net Zero. Therefore, the scoring has increased to very positive.	The policy could be enhanced by making explicit reference to reducing emissions through sustainable modes of transport.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Regional	Transport network, road network, road users, utility network, construction industry	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discounting private car use.	This policy has positive effects as it promotes the use of sustainable forms of transport.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	++	The policy has been amended by referencing improving access to the Weaver Network, which will promote a modal shift to sustainable transport. Therefore, the scoring has increased to very positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to reducing road traffic and congestion, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it promotes a shift to sustainable transport by removing barriers to access.	The policy could be enhanced by making explicit reference to improving accessibility to services and key locations.	N	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to improving accessibility to services and key locations.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it makes reference to enhancing existing infrastructure.	The policy could be enhanced by making explicit reference to improving active travel infrastructure.	N	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to improving active travel infrastructure.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to blue and green infrastructure, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it makes reference to making the transport network accessible.	The policy could be enhanced by making explicit reference to the types of schemes and enhancements that will be introduced.	Partially.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	++	The policy has been amended by referencing improving access to the Weaver Network, which will promote a modal shift to sustainable transport. The reference to 'new schemes' has also been removed. Therefore, the scoring has increased to very positive.	N
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low emission vehicle infrastructure, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to housing and employment areas, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with disincentivising private car use.	The policy has positive effects as it will improve accessibility to services, facilities and amenities by removing barriers to travel.	The policy could be enhanced by making explicit reference to improving accessibility to services and key locations.	Y	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	++	The policy has been amended by referencing improving access to the Weaver Network, through enhanced services, stations and stops. Therefore, the scoring has increased to very positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through positive planning.	Increased physical activity, improved mental and physical health, and increased independence.	The policy has positive effects as it will improve accessibility and therefore reduce social isolation, as well as improving active lifestyles.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through positive planning.	Increased physical activity, improved mental and physical health, and increased independence.	The policy has positive effects as it will improve accessibility and therefore reduce social isolation, as well as improving active lifestyles.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however it is focused on removing barriers to accessing the transport network.	The policy could be enhanced by making explicit reference to improving accessibility to these areas specifically.	Partially	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to improving accessibility to these areas specifically.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Accessibility of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it will improve the accessibility and affordability of sustainable transport modes.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Accessibility of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has a positive effect as it references ensuring that no one is excluded is the transport network.	The policy could be enhanced by making more explicit reference to how barriers will be removed through accessible and inclusive design.	N	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making more explicit reference to how barriers will be removed through accessible and inclusive design.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Accessibility of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it provides affordable transport options (public transport and active travel).	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to improving connections between communities, however it is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	+	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Accessibility of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has a positive effect as it references making the transport network accessible.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	+	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Accessibility of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference improving access to information.	The policy could be enhanced by making explicit reference to improving access to transport information as a way of removing barriers to accessing the network.	Y	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	+	+	++	The policy has been amended by referencing improving access to the Weaver Network, through information and ticketing. Therefore, the scoring has increased to very positive.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on removing barriers to accessing the transport network.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. The text 'new schemes' has been removed.	o	o	o	Although the policy has been amended by referencing the Weaver Network, improving access through new and enhanced services such as stations and stops, and information and ticketing. , it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Ref	Objective	Assessment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference air quality, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	+	The policy has been amended by referencing promoting sustainable travel, which will support the minimisation of air pollution emissions. Therefore, the scoring has increased to very positive.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference air quality, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	+	The policy has been amended by referencing promoting sustainable travel, which will support the minimisation of air pollution emissions. Therefore, the scoring has increased to very positive.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	This policy has neutral effects as it does not reference air quality, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, carbon sinks	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Green spaces, green infrastructure, blue infrastructure	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, local nature recovery groups	N/A	N/A	This policy has neutral effects as it does not reference biodiversity, geodiversity, and blue and green infrastructure, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	The policy has been amended by referencing access to travel information and promoting sustainable travel, which will support the minimisation of air pollution emissions. Therefore, the scoring has increased to very positive.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	The policy has been amended by referencing access to promoting sustainable travel, which will support the minimisation of air pollution emissions. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	The policy has been amended by referencing access to travel information, payment mechanisms and promoting sustainable travel, which will support the minimisation of air pollution emissions. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Local	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	This policy has neutral effects as it does not reference greenhouse gas emissions, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	The policy has been amended by referencing sustainable travel, which will contribute to achieving Net Zero. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	This policy has neutral effects as it does not reference climate change and associated extreme weather events, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recyclings, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to reducing road traffic and congestion, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it promotes accessibility to public transport to key services and facilities.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	The policy has been amended by referencing access to travel information, payment mechanisms and promoting sustainable travel. Therefore, the scoring has increased to very positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has negative effects as it does not reference active travel.	The policy could be enhanced by making explicit reference to ensure active travel networks meet the needs of children and young people.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	-	-	-	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to ensure active travel networks meet the needs of children and young people.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting access to key services, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has negative effects as it does not reference making transport more accessible and affordable for young people, particularly for those in low income households, deprived areas, and less connected areas.	The policy could be enhanced by making explicit reference to making transport more accessible and affordable for young people, particularly for those in low income households, deprived areas, and less connected areas.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	The policy has been amended by referencing access to travel information, payment mechanisms and promoting sustainable travel. Therefore, the scoring has increased to very positive.	The policy could be enhanced by making explicit reference to making transport more accessible and affordable for young people, particularly for those in low income households, deprived areas, and less connected areas.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low emission vehicle infrastructure, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to housing and employment areas, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Affordable transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references enabling access to education and other opportunities.	The policy could be enhanced by making explicit reference to improving access for those in high levels of unemployment.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	+	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to improving access for those in high levels of unemployment.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Affordable transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as improving network legibility will improve access to services, facilities, and amenities.	The policy could be enhanced by making explicit reference to improving access to services, facilities, and amenities for young people.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	The policy has been amended by referencing access to travel information, payment mechanisms and promoting sustainable travel. Therefore, the scoring has increased to very positive.	The policy could be enhanced by making explicit reference to improving access to services, facilities, and amenities for young people.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved health and reduced health inequalities through positive planning.	Increased physical activity, improved mental and physical health, and increased independence.	The policy has positive effects as it promotes greater independence and increased access to opportunities.	The policy could be enhanced by making explicit reference to promoting the health and wellbeing of children and young people through tailored active travel provision and access to open space and healthy recreation.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	+	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to promoting the health and wellbeing of children and young people through tailored active travel provision and access to open space and healthy recreation.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	The policy has been amended by referencing promoting sustainable travel, which will have a positive impact on health. Therefore, the scoring has increased to very positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however it is focused on transport for children and young people.	The policy could be enhanced by making explicit reference to promoting the health and wellbeing of children and young people through tailored active travel provision and access to open space and healthy recreation.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to promoting the health and wellbeing of children and young people through tailored active travel provision and access to open space and healthy recreation.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however it is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Accessibility of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references enabling access to opportunities for young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Accessibility of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference promoting accessible and inclusive design (except for legibility and wayfinding), or meeting the needs of young disabled people.	The policy could be enhanced by making explicit reference to how accessible and inclusive design will be used to ensure transport networks meet the needs of young people and young disabled people.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	-	-	-	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how accessible and inclusive design will be used to ensure transport networks meet the needs of young people and young disabled people.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Accessibility of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references enabling access to education and opportunities for young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Accessibility of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references enabling access to education and opportunities for young people, and promoting independent travel.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Accessibility of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference enhancing access to transport for young people in the most deprived areas.	The policy could be enhanced by making explicit reference to enhancing access to transport for young people in the most deprived areas.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	+	The policy has been amended by referencing promoting sustainable travel. Therefore, the scoring has increased to positive.	The policy could be enhanced by making explicit reference to enhancing access to transport for young people in the most deprived areas.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Potential link to other initiatives which seek to integrate communities	Accessibility of transport makes it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference improving access to information for young people and parents to promote independent travel.	The policy could be enhanced by making explicit reference to improving access to transport information as a way of promoting independent travel.	Y	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	++	++	The policy has been amended by referencing access to ravel information and promoting sustainable travel. Therefore, the scoring has increased to very positive.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	-	-	-	D	P	Regional	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	The policy has negative effects as it does not make explicit reference to how safety will be embedded.	The policy could be enhanced by making explicit reference to how safety will be embedded, for example, through making improvements to public realm and levels of natural surveillance.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	-	-	-	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how safety will be embedded, for example, through making improvements to public realm and levels of natural surveillance.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	+	+	++	D	P	Regional	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	The policy has positive effects as it makes reference to embedding safety to improve access to opportunities for young people.	The policy could be enhanced by making explicit reference to how safety will be embedded.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	+	+	++	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how safety will be embedded.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	-	-	-	D	P	Regional	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	The policy has negative effects as it does not make explicit reference to how safety will be embedded.	The policy could be enhanced by making explicit reference to how safety will be embedded, for example, through reducing the risk that vehicles pose on children and young people, such as speeding.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	-	-	-	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how safety will be embedded, for example, through reducing the risk that vehicles pose on children and young people, such as speeding.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	-	-	-	D	P	Regional	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	The policy has negative effects as it does not make explicit reference to how safety will be embedded.	The policy could be enhanced by making explicit reference to how safety will be embedded, for example, through increasing traffic calming initiatives, particularly in deprived areas.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	-	-	-	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how safety will be embedded, for example, through increasing traffic calming initiatives, particularly in deprived areas.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	-	-	-	D	P	Regional	Transport network, road network, road users, local communities	Safe transportation and routes can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Could have synergistic effects when combined with schemes that address accessibility, affordability, and reliability.	The policy has negative effects as it does not make explicit reference to how safety will be embedded.	The policy could be enhanced by making explicit reference to how safety will be embedded, for example, through providing initiatives to enhance road safety for young people.	N	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	-	-	-	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to how safety will be embedded, for example, through providing initiatives to enhance road safety for young people.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise, and light pollution, however the policy is focused on transport for children and young people.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel.	o	o	o	Although the policy has been amended by referencing the Weaver Network, access to travel information and payment mechanisms, and promoting sustainable travel, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	I0												
Ref	Objective	Assesement Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	+	+	+	I	T	Local	Air quality, vulnerable communities	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to air quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as promoting the greater use of sustainable transport will help to minimise air pollution.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	++	D	T	Regional	Air quality, vulnerable communities	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to air quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as promoting the greater use of sustainable transport will help to minimise air pollution.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	+	+	+	I	T	Regional	Air quality, vulnerable communities	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to air quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as parks.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	-	-	-	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and	N/A	The policy has negative effects as there is no reference to the considerations of avoiding and protecting designated habitats and important sites, whereas the policy aims to promote active travel.	Pollicy could make more explicit reference to avoiding and protecting designated habitats and important sites in relation to managing active travel.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	+	+	+	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and	N/A	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as parks.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	+	+	+	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	N/A	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as parks.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	O	O	O	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to habitats or important sites, however the policy is focused on sustainable travel.	None identified.

2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	+	+	+	I	P	Regional	Carbon sinks	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	The policy could significantly contribute to air quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as parks with trees which act as carbon sinks.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	+	+	+	I	P	Local	Local communities, green infrastructure, blue infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	The policy could significantly contribute to air quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as parks.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	O	O	O	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to habitats or important sites, however the policy is focused on sustainable travel.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	++	D	T	Regional	Transport network, road network, road users, air quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to the promotion of sustainable transport alongside other policies that improves the convenience, accessibility, and affordability of public transport.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	++	I	T	Regional	Transport network, road network, road users, air quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to the promotion of sustainable transport alongside other policies that improves the convenience, accessibility, and affordability of public transport.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	++	I	T	Regional	Transport network, road network, road users, air quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to the promotion of sustainable transport alongside other policies that improves the convenience, accessibility, and affordability of public transport.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	+	+	+	I	T	Regional	Transport network, road network, road users, air quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to the promotion of sustainable transport alongside other policies that improves the convenience, accessibility, and affordability of public transport.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to the promotion of sustainable transport alongside other policies that improves the convenience, accessibility, and affordability of public transport.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to the promotion of sustainable transport alongside other policies that improves the convenience, accessibility, and affordability of public transport.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	O	O	O	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low carbon energy generation, however the policy is focused on sustainable travel.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	+	+	+	I	P	Regional	Transport network, road network, road users, air quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to the promotion of sustainable transport alongside other policies that improves the convenience, accessibility, and affordability of public transport.	The policy has positive effects as rural communities are likely to travel by car due to lack of sustainable transport infrastructure, and so promoting this in rural areas will support more sustainable movement.	The policy could be enhanced by specifically referencing target areas for investment, such as rural areas.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	O	O	O	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low carbon energy generation, however the policy is focused on sustainable travel.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	-	-	-	I	P	Regional	Transport network, road network, road users, air quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to the promotion of sustainable transport alongside other policies that improves the convenience, accessibility, and affordability of public transport.	The policy has negative effects as it references transport measures and investment, but does not reference how it will minimise emissions from new infrastructure.	The policy could be enhanced by specifically referencing minimising emissions from new infrastructure.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term.	The policy could significantly contribute to the promotion of sustainable transport alongside other policies that improves the convenience, accessibility, and affordability of public transport.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel, which supports the Net Zero mission.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	O	O	O	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to low carbon energy generation, however the policy is focused on sustainable travel.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	+	+	+	I	T	Local	Transport network, road network, road users, vulnerable communities	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	The policy could significantly contribute to air quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as parks.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	O	O	O	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flooding, however the policy is focused on sustainable travel.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	O	O	O	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flooding, however the policy is focused on sustainable travel.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	O	O	O	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climatic effects focused on sustainable travel.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	O	O	O	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flooding, however the policy is focused on sustainable travel.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	-	-	-	I	P	Regional	Utility network, construction industry	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discentivising private car use.	The policy has negative effects as it references transport measures and investment, but does not reference how it will enable new infrastructure to be resource efficient.	The policy could be enhanced by specifically referencing resource efficiency in new infrastructure.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	O	O	O	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to waste, however the policy is focused on sustainable travel.	None identified.

5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	O	O	O	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to waste, however the policy is focused on sustainable travel.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	++	I	P	Regional	Transport network, road network, road users, utility network, construction industry	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Could have synergistic effects when combined with discentivising private car use.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	O	O	O	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to waste, however the policy is focused on sustainable travel.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	O	O	O	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on sustainable travel.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	O	O	O	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on sustainable travel.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	+	+	+	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these areas.	The policy could significantly contribute to water quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as parks.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	O	O	O	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on sustainable travel.	None identified.

6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	+	+	++	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	The promotion of active travel could enhance air quality and support the development of green and blue infrastructure in the long term. However the policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and	The policy could significantly contribute to water quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as parks.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	O	O	O	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on sustainable travel.	None identified.
7	Conserve soil resources and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	O	O	O	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to the soil and land, however the policy is focused on sustainable travel.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	O	O	O	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to the soil and land, however the policy is focused on sustainable travel.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	O	O	O	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to the soil and land, however the policy is focused on sustainable travel.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	O	O	O	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to the soil and land, however the policy is focused on sustainable travel.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	O	O	O	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to the soil and land, however the policy is focused on sustainable travel.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	O	O	O	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to the heritage assets, however the policy is focused on sustainable travel.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	+	+	++	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on land use planning, including protecting heritage.	Coordinating transport infrastructure with heritage planning ensures that new developments complement the existing character and aesthetics of the area	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	O	O	O	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to the heritage assets, however the policy is focused on sustainable travel.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	O	O	O	D	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to the heritage assets, however the policy is focused on sustainable travel.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	O	O	O	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to the heritage assets, however the policy is focused on sustainable travel.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	+	+	++	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning, including protecting designated landscapes and their settings in the long term.	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as parks.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	+	+	++	I	T	Regional	Built environment, protected landscapes, public rights of way	The policy may raise need for new active travel routes and infrastructure, which will need to consider the locations and potential impacts on these land use planning, including protecting designated landscapes and their settings in the long term.	Coordinating transport infrastructure with landscape and townscape planning ensures that new developments complement the existing character and aesthetics of the area	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as PRoWs.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.

9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	O	O	O	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to the landscape or townscape, however the policy is focused on sustainable travel.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	O	O	O	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to the landscape or townscape, however the policy is focused on sustainable travel.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	+	+	++	I	T	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	++	D	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	+	+	++	I	T	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as parks.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	The policy could be enhanced by specifically referencing EV charging infrastructure as a measure to promote sustainable travel, and the direct and indirect benefits to this.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	+	+	++	I	P	Regional	Transport network, road network, road users, air quality	The increased number of residents in areas using transport infrastructure will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	Accessible public transport, combined with active travel options like walking and cycling, creates a more integrated and accessible transport network. This synergy makes it easier for residents to move around, improving access to jobs, education, and services.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	The policy could be enhanced by specifically referencing target areas for investment.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	+	+	++	I	P	Local	Lower socio-economic groups and deprived areas	Enhanced accessibility can lead to a reduction in greenhouse gas emissions and air pollution over time, as more people opt for public transport over private vehicles	High-quality and widely accessible transport options can create a more efficient and user-friendly network, encouraging more people to use sustainable modes of transport	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	The policy could be enhanced by specifically referencing target areas for investment.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas	Enhanced accessibility can lead to a reduction in greenhouse gas emissions and air pollution over time, as more people opt for public transport over private vehicles	High-quality and widely accessible transport options can create a more efficient and user-friendly network, encouraging more people to use sustainable modes of transport	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	The policy could be enhanced by specifically referencing target areas for investment.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas	Enhanced accessibility can lead to a reduction in greenhouse gas emissions and air pollution over time, as more people opt for public transport over private vehicles	High-quality and widely accessible transport options can create a more efficient and user-friendly network, encouraging more people to use sustainable modes of transport	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	The policy could be enhanced by specifically supporting a reduction in journey times as a measure to promote sustainable travel, and the direct and indirect benefits to this.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	++	I	P	Local	Lower socio-economic groups and deprived areas	Enhanced accessibility can lead to a reduction in greenhouse gas emissions and air pollution over time, as more people opt for public transport over private vehicles	High-quality and widely accessible transport options can create a more efficient and user-friendly network, encouraging more people to use sustainable modes of transport	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	++	D	T	Local	Lower socio-economic groups and deprived areas	Enhanced accessibility can lead to a reduction in greenhouse gas emissions and air pollution over time, as more people opt for public transport over private vehicles	High-quality and widely accessible transport options can create a more efficient and user-friendly network, encouraging more people to use sustainable modes of transport	The policy has positive effects as it focuses on prioritising and promoting sustainable travel through investment.	None identified.

11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	+	+	++	I	P	Local	Lower socio-economic groups and deprived areas	Enhanced accessibility can lead to a reduction in greenhouse gas emissions and air pollution over time, as more people opt for public transport over private vehicles	High-quality and widely accessible transport options can create a more efficient and user-friendly network, encouraging more people to use sustainable modes of transport	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	The policy could be enhanced by specifically referencing target areas for investment.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas	Improved accessibility to transport, especially active transport options like walking and cycling, can lead to increased physical activity.	Combining improved transport accessibility with health initiatives can amplify benefits. For example, creating safe, accessible walking and cycling paths can encourage more people to engage in physical activity, further enhancing public health	The policy has positive effects as it focuses on prioritising and promoting active travel which will improve health and wellbeing.	The policy could be enhanced by specifically referencing inclusive sustainable travel.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved accessibility to transport, especially active transport options like walking and cycling, can lead to increased physical activity.	Combining improved transport accessibility with health initiatives can amplify benefits. For example, creating safe, accessible walking and cycling paths can encourage more people to engage in physical activity, further enhancing public health	The policy has positive effects as it focuses on prioritising and promoting active travel which will improve health and wellbeing.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	+	+	++	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved accessibility to transport, especially active transport options like walking and cycling, can lead to increased physical activity.	Combining improved transport accessibility with health initiatives can amplify benefits. For example, creating safe, accessible walking and cycling paths can encourage more people to engage in physical activity, further enhancing public health	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	The policy could be enhanced by specifically referencing target areas for investment.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved accessibility to transport, especially active transport options like walking and cycling, can lead to increased physical activity.	Combining improved transport accessibility with health initiatives can amplify benefits. For example, creating safe, accessible walking and cycling paths can encourage more people to engage in physical activity, further enhancing public health	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	The policy could be enhanced by specifically referencing target areas for investment.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	+	+	++	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved accessibility to transport, especially active transport options like walking and cycling, can lead to increased physical activity.	Combining improved transport accessibility with health initiatives can amplify benefits. For example, creating safe, accessible walking and cycling paths can encourage more people to engage in physical activity, further enhancing public health	The policy has positive effects as it focuses on prioritising and promoting active travel.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	-	-	-	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference 'wheeling' as a sustainable alternative to travelling by car.	The policy could be enhanced by specifically referencing wheeling.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	++	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it focuses on prioritising and promoting active travel.	The policy could be enhanced by specifically referencing inclusive sustainable travel.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	The policy could be enhanced by specifically referecning the provision of affordable options as a measure to promote sustainable travel, and the direct and indirect benefits to this.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	++	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	+	+	++	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	The policy could be enhanced by specifically referencing target areas for investment.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	+	+	++	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it focuses on prioritising and promoting sustainable travel.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	+	+	++	D	P	Local	Transport network, road network, road users, local communities	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Safer public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it focuses on prioritising and promoting sustainable travel, which could be achieved through improvements to the public realm	The policy could be enhanced by specifically referecning improving the public realm as a measure to promote sustainable travel, and the direct and indirect benefits to this.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	+	+	++	D	P	Regional	Transport network, road network, road users, local communities	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Safer public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it focuses on prioritising and promoting sustainable travel, which could be achieved through improvements to the safety.	The policy could be enhanced by specifically referencing improving safety as a measure to promote sustainable travel, and the direct and indirect benefits to this.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	+	+	++	I	P	Local	Transport network, road network, road users, local communities	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Safer public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it focuses on prioritising and promoting sustainable travel, which could be achieved through improvements to the safety.	The policy could be enhanced by specifically referencing improving safety as a measure to promote sustainable travel, and the direct and indirect benefits to this.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	+	+	++	I	P	Local	Transport network, road network, road users, local communities	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Safer public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it focuses on prioritising and promoting sustainable travel, which could be achieved through improvements to the safety.	The policy could be enhanced by specifically referencing improving safety as a measure to promote sustainable travel, and the direct and indirect benefits to this.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	+	+	++	I	P	Local	Transport network, road network, road users, local communities	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Safer public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it focuses on prioritising and promoting sustainable travel, which could be achieved through improvements to the safety.	The policy could be enhanced by specifically referencing improving safety as a measure to promote sustainable travel, and the direct and indirect benefits to this.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	O	O	O	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to construction and operation, however the policy is focused on sustainable travel.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	O	O	O	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to construction and operation, however the policy is focused on sustainable travel.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	++	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Changes in travel patterns as people begin to take advantage of sustainable transport as their main form of transport	The policy could significantly contribute to air quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as it focuses on prioritising and promoting sustainable travel which will reduce air pollution.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	++	D	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Changes in travel patterns as people begin to take advantage of sustainable transport as their main form of transport	The policy could significantly contribute to air quality enhancement alongside other policies that encourage modal shift from private car use to public transport.	The policy has positive effects as measures to promote walking and cycling could include the provision of green infrastructure, such as parks.	The policy could be enhanced by specifically referencing green infrastructure as a measure to promote active travel, and the direct and indirect benefits to this.

Policy Name	I1																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference on reducing environmental impacts of transport, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which supports transition to sustianable transport modes and reduction in emissions. Therefore, the scoring has increased to +.	It is considered that the policy could be further enhanced by including explicit reference to areas with low air quality such as AQMAs.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference on reducing environmental impacts of transport, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which supports transition to sustianable transport modes and reduction in emissions. Therefore, the scoring has increased to +.	It is considered that the policy could be further enhanced by including explicit reference to prioritise sustainable and active transport modes over private car use.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to habitats or important sites, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to wildlife-friendly approaches, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to nature recovery, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Reducing reliance on private vehicles can lead to lower greenhouse gas emissions, improved air quality, and decreased noise pollution over time	Combining different modes of transport (e.g., buses, trains, cycling) can create a more efficient and user-friendly transport network, encouraging more people to use sustainable options	The policy has positive effects as it references ensuring transport interchanges are accessible for all.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	++	++	The policy has been amended to refer to facilitating public transport use. Therefore, the scoring has increased to ++.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to disincentives for private car use, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references faciilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use. Therefore, the scoring has increased to +.	It is considered that the policy could be further enhanced by including explicit reference to prioritise sustainable and active transport modes over private car use.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to carbon efficiency, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which promotes greater carbon efficiency in movements. Therefore, the scoring has increased to +.	It is considered that the policy could be further enhanced by including explicit reference to prioritise sustainable and active transport modes over private car use.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to transport technologies, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Providing additional car parking space could encourage use of private cars without associated sustainable transport access.	Multi-modal transport interchanges could provide opportunities for better integration of all tranport modes and support park and ride services to public transport.	The policy has positive effects as there is reference to delivering quality integrated facilities and services, including cycle parking and welcoming spaces.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	++	++	The policy has been amended to refer to facilitating public transport use alongside delivernig quality integrated facilities and services. Therefore, the scoring has increased to ++.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to ensuring resilience to climate change. Therefore, the scoring has increased to +.	It is considered that the policy could be further enhanced by including explicit reference to climate change mitigation and adaptation measrues.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to carbon energy generation, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to rural communities, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low carbon construction, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to emissions, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to emissions and net zero targets, however the policy is focused on investmenet in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which supports net zero. Therefore, the scoring has increased to +.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	0	0	0	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to extreme weather events, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to ensuring resilience to climate change. Therefore, the scoring has increased to +.	It is considered that the policy could be further enhanced by including explicit reference to climate change mitigation and adaptation measures.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	0	0	0	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	0	0	0	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	0	0	0	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risks adaptations, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	0	0	0	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	0	0	0	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risks adaptations, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	0	0	0	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	0	0	0	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climatic effects, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	0	0	0	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	0	0	0	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risks adaptations, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	0	0	0	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	0	0	0	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	0	0	0	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	0	0	0	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	0	0	0	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	0	0	0	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to recycling, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	0	0	0	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	0	0	0	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport modes, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which supports transition to sustainable transport modes and reduces fuel consumption. Therefore, the scoring has increased to +.	It is considered that the policy could be further enhanced by including explicit reference to prioritise sustainable and active transport modes over private car use.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	0	0	0	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	0	0	0	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to water quality, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	-	-	-	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	Providing additional car parking space could encourage use of private cars without associated sustainable transport access.	Multi-modal transport interchanges could provide opportunities for better integration of all transport modes and support park and ride services to public transport.	The policy has negative effects as there is no reference to the consideration of minimising the use of impermeable hard surfacing, whereas the policy aims to deliver interchanges and could involve construction of new parking facilities.	Policy could make more explicit reference to minimising the use of impermeable hard surfacing in relation to creating any new parking spaces.	N	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	-	-	-	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by making explicit reference to minimising the use of impermeable hard surfacing in parking provision.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to blue infrastructure, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to drainage, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by including reference to drainage systems in support of climate change resilience.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	-	-	-	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	Providing additional car parking space could encourage use of private cars without associated sustainable transport access.	Multi-modal transport interchanges could provide opportunities for better integration of all transport modes and support park and ride services to public transport.	The policy has negative effects as there is no reference to the considerations for land use, whereas the policy aims to deliver interchanges including cycle and car parking and may raise need for new parking facilities.	Policy could make more explicit reference to encouraging use of previously developed land in relation to constructing potential new parking spaces.	N	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	-	-	-	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could make more explicit reference to encouraging use of previously developed land in relation to constructing potential new parking spaces.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil or contaminated land, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil or contaminated land, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil or contaminated land, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to cultural or heritage assets, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility of sustainable transport modes, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which improves access to key destinations by sustainable transport modes. Therefore, the scoring has increased to +.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to cultural or heritage assets, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	+	+	+	D	P	Regional	Built environment, protected landscapes	Providing additional car parking space could encourage use of private cars without associated sustainable transport access.	Multi-modal transport interchanges could provide opportunities for better integration of all transport modes and support park and ride services to public transport.	The policy has positive effects as there is reference to delivering multi-modal transport interchanges that are welcoming spaces.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscape, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of ways, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to buildings or townscape, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to enhance places. Therefore, the scoring has increased to +.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	+	+	+	I	T	Regional	Built environment, protected landscapes	Providing additional car parking space could encourage use of private cars without associated sustainable transport access.	Multi-modal transport interchanges could provide opportunities for better integration of all transport modes and support park and ride services to public transport.	The policy has positive effects as delivering multi-modal transport interchange could concentrate cycle and car parking and remove the need for on street parking on streetscapes.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to disincentives for private car use, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to improving accessibility to key destinations, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which improves access to key destinations by sustainable transport modes. Therefore, the scoring has increased to +.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Enhanced infrastructure for active transport can significantly reduce greenhouse gas emissions and air pollution over time	High-quality and widely available active transport options can create a more efficient and user-friendly network, encouraging more people to choose sustainable modes of transport	The policy has positive effects as it will deliver multimodal transport interchanges and support cycling through cycle parking.	The policy could explicitly mention other forms of active travel.	N	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting sustainable transport modes, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which promotes a shift to sustainable transport modes. Therefore, the scoring has increased to +.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	-	-	-	I	P	Regional	Transport network, road network, road users, air quality	Providing additional car parking space could encourage use of private cars without associated sustainable transport access.	Multi-modal transport interchanges could provide opportunities for better integration of all transport modes and support park and ride services to public transport.	The policy has negative effects as there is no reference to provision of charging points, whereas the policy aims to deliver interchanges and could involve construction of new parking facilities.	Policy could make more explicit reference to provision of charging points in relation to enhancing existing or creating any new parking spaces.	N	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	-	-	-	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by explicitly referencing charging point provision for low emission vehicles within parking spaces.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility of sustainable transport modes, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility of sustainable transport modes, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which improves access to key destinations by sustainable transport modes. Therefore, the scoring has increased to +.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Enhanced accessibility can lead to a reduction in greenhouse gas emissions and air pollution over time, as more people opt for public transport over private vehicles	High-quality and widely accessible transport options can create a more efficient and user-friendly network, encouraging more people to use sustainable modes of transport	The policy has positive effects as it ensure transport interchanges are accessible for all.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	+	I	T	Regional	Lower socio-economic groups and deprived areas	Providing additional car parking space could encourage use of private cars without associated sustainable transport access.	Multi-modal transport interchanges could provide opportunities for better integration of all transport modes and support park and ride services to public transport.	The policy has positive effects as there is reference to delivering multi-modal transport interchanges including additional parking spaces, which could reduce the overall journey times and travel convenience.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to decarbonisation, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which improves access to key destinations by sustainable transport modes. Therefore, the scoring has increased to +.	None identified.

11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	+	+	+	D	T	Local	Lower socio-economic groups and deprived areas	Providing additional car parking space could encourage use of private cars without associated sustainable transport access.	Multi-modal transport interchanges could provide opportunities for better integration of all transport modes and support park and ride services to public transport.	The policy has positive effects as there is reference to investment in transport interchanges.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility of sustainable transport modes, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which improves access to key destinations by sustainable transport modes. Therefore, the scoring has increased to +.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas	Improved accessibility to transport, especially active transport options like walking and cycling, can lead to increased physical activity.	Combining improved transport accessibility with health initiatives can amplify benefits. For example, creating safe, accessible walking and cycling paths can encourage more people to engage in physical activity, further enhancing public health	The policy has positive effects as it promotes wellbeing by providing increased accessibility to services for all and reducing overall journey times.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Improved accessibility to transport, especially active transport options like walking and cycling, can lead to increased physical activity.	Combining improved transport accessibility with health initiatives can amplify benefits. For example, creating safe, accessible walking and cycling paths can encourage more people to engage in physical activity, further enhancing public health	The policy has positive effects as it promotes wellbeing by providing increased accessibility to services for all and reducing overall journey times.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to promoting accessibility of sustainable transport modes, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to improving accessibility to key destinations, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to facilitating public transport use, which improves access to key destinations by sustainable transport modes. Therefore, the scoring has increased to +.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to severance issues, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references ensuring transport interchanges are accessible for all.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to affordability, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to connectivity between communities, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to promoting access to sustainable transport modes, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference on improving access to information, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	-	-	-	D	P	Local	Transport network, road network, road users, local communities	Providing additional car parking space could encourage use of private cars without associated sustainable transport access.	Multi-modal transport interchanges could provide opportunities for better integration of all transport modes and support park and ride services to public transport.	The policy has negative effects as there is no reference to public safety in public realms, whereas the policy aims to deliver interchanges that are welcoming spaces.	Policy could make more explicit reference to improving the safety and security of public spaces in relation to enhancing existing or creating any new transport interchanges	Partially	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+	+	+	The policy has been amended to refer to safety and enhancing places. Therefore, the scoring has changed to positive.	It is considered that the policy could be further enhanced by including measures and designs to improve safety in public spaces.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	-	-	-	D	P	Regional	Transport network, road network, road users, local communities	Providing additional car parking space could encourage use of private cars without associated sustainable transport access.	Multi-modal transport interchanges could provide opportunities for better integration of all transport modes and support park and ride services to public transport.	The policy has negative effects as there is no reference to public safety, whereas the policy aims to deliver interchanges that are welcoming spaces.	Policy could make more explicit reference to improving the safety and security of public spaces in relation to enhancing existing or creating any new transport interchanges	Partially	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	+/?	+/?	+/?	The policy has been amended to refer to safety and enhancing places, however, the effect on improving transport scheme safety is unclear. Therefore, the scoring has changed to +/?.	It is considered that the policy could be further enhanced by including considerations for safety of transport schemes in relation to transport interchange designs.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference on road safety, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference on traffic calming, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference on road safety, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference on reducing environmental impacts of transport, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference on reducing environmental impacts of transport, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference on reducing environmental impacts of transport, however the policy is focused on investment in transport interchange.	None identified.	No mitigation identified in 2025.	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	o	o	o	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	-	-	-	D	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Providing additional car parking space could encourage use of private cars without associated sustainable transport access.	Multi-modal transport interchanges could provide opportunities for better integration of all transport modes and support park and ride services to public transport.	The policy has negative effects as there is no reference to the specific measures that reduce impacts of transport, whereas the policy aims to deliver interchanges that are welcoming spaces.	Policy could make more explicit reference to measures that reduce impacts of transport in relation to enhancing existing or creating any new parking spaces.	Partially	The policy now references facilitating public transport use, creating safe spaces, and ensuring resilience to climate change and enhance places at transport interchanges.	-	-	-	Although the policy has been amended by making reference to public transport, safety, climate change resilience, and enhancing places, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	It is considered that the policy could be further enhanced by including measures to improve transport impacts.

Policy Name	I2																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to improving air quality, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to improving air quality, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	The policy has been amended to refer to the Weaver Network alongside reference to increase sustainable mode share. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to habitats or important sites, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to wildlife-friendly approaches, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to local nature recovery, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as improving connectivity to public transport and active mode networks through park and ride could promote the use of sustainable forms of transport.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	It is considered that the policy could be further enhanced by including explicit reference to public transport availability, affordability, and accessibility.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as improving connectivity to public transport and active mode networks through park and ride could reduce private car use.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as improving connectivity to public transport and active mode networks through park and ride could reduce private car use and encourage greater carbon efficiency in transport movements.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to transport technologies, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as improving connectivity to public transport and active mode networks through park and ride could promote a wider choice of low-carbon passenger travel.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	It is considered that the policy could be further enhanced by including explicit reference to integrated facilities, services, and active travel improvements.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	+	+	+	I	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as improving connectivity to public transport and active mode networks through park and ride could encourage modal shift to sustainable transport and promote low carbon energy generation.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	The policy has been amended to refer to the Weaver Network with no explicit reference to energy generation. Therefore, the scoring has changed to 'o'.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	-	-	-	I	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as there is no reference to the considerations for the specific needs of rural communities, whereas the policy aims to improve connectivity of the public transport and active mode networks.	Policy could make more explicit reference to the considerations for the specific needs of rural communities in relation to improving connectivity of the public transport and active mode networks	N	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	-	-	-	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	Policy could make more explicit reference to the considerations for the specific needs of rural communities in relation to improving connectivity of the public transport and active mode networks
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low carbon construction, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	+	+	+	I	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as improving connectivity to public transport and active mode networks through park and ride could encourage modal shift to sustainable transport and reduce emissions.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	I	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as improving connectivity to public transport and active mode networks through park and ride could encourage modal shift to sustainable transport and support the net zero target.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to extreme weather events, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risk adaptation, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risk adaptation, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risk adaptation, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climatic effects, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risk adaptation, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to recycling, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Regional	Transport network, road network, road users, utility network, construction industry	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as improving connectivity to public transport and active mode networks through park and ride could encourage modal shift to sustainable transport and reduce fuel consumption.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to drainage, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	-	-	-	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as there is no reference to the considerations for minimising the use of impermeable hard surfacing, whereas the policy aims to improve connectivity of the public transport and active mode networks and may raise need for new car park facilities.	Policy could make more explicit reference to minimising the use of impermeable hard surfacing in relation to constructing potential new parking spaces.	N	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	-	-	-	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	Policy could make more explicit reference to minimising the use of impermeable hard surfacing in relation to constructing potential new parking spaces.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to blue infrastructure, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to drainage, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
7	Conserve soil resources and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	-	-	-	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as there is no reference to the considerations for land use, whereas the policy aims to improve connectivity of the public transport and active mode networks and may raise need for new car park facilities.	Policy could make more explicit reference to encouraging use of previously developed land in relation to constructing potential new parking spaces.	N	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	-	-	-	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	Policy could make more explicit reference to encouraging use of previously developed land in relation to constructing potential new parking spaces.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil and contaminated land, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil and contaminated land, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil and contaminated land, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscapes, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscapes, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape or townscapes, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of ways, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to buildings or townscapes, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to streetscapes, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to disincentives for private car use, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to accessibility of sustianable transport modes, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to improving connectivity to active mode networks.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	It is considered that the policy could be further enhanced by explicitly referencing active travel infrastructure.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to improving connectivity to public transport and active mode networks, which promotes modal shift to sustianble forms of transport.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	-	-	-	I	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as there is no reference to the considerations for charging points, whereas the policy aims to improve connectivity of the public transport and active mode networks and may raise need for new car park facilities.	Policy could make more explicit reference to provision of charging points in relation to enhancing exisiting or consturcting potential new parking spaces.	N	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	-	-	-	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	Policy could make more explicit reference to provision of charging points in relation to enhancing exisiting or consturcting potential new parking spaces.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to coordinating with land use planning, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	-	-	-	I	P	Local	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as there is no reference to the considerations for areas with high levels of unemployment, whereas the policy aims to improve connectivity of the public transport and active mode networks.	Policy could make more explicit reference to areas with high levels of unemployment in relation to improving transport connectivity through park and ride facilities.	N	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	-	-	-	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	Policy could make more explicit reference to areas with high levels of unemployment in relation to improving transport connectivity through park and ride facilities.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to accessibility to key destinations, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as improving connectivity to public transport and active mode networks through park and ride could support a reduction in overall journey times.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic outcomes, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic outcomes, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to accessibility by sustainable transport, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to helath and wellbeing, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to helath and wellbeing, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to accessibility by sustainable transport, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to accessibility to key destinations, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to severance issues, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as improving connectivity to public transport and active mode networks through park and ride could support a disabled access to the public transport system.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to affordability, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to connection between communities, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	-	-	-	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as there is no reference to the considerations for the most deprived areas, whereas the policy aims to improve connectivity of the public transport and active mode networks.	Policy could make more explicit reference to the most deprived areas in relation to improving transport connectivity through park and ride facilities.	N	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	-	-	-	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	Policy could make more explicit reference to the most deprived areas in relation to improving transport connectivity through park and ride facilities.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to access to information, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to environmental impacts, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to environmental impacts, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to environmental impacts, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to environmental impacts, however the policy is focused on park and ride.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network but removed reference to connectivity , public transport and active modes networks.	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

Policy Name	I3																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to habitats and important sites, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to carbon sinks, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to nature recovery, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	0	0	0	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to public transport availability, affordability, and accessibility, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	0	0	0	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Marketing and improving access to information for public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to promote sustainable choices through branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Marketing and improving access to information for public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to promote sustainable choices through branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	-	-	-	I	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Encourage use of low carbon transport technologies as part of the sustainable choices could reduce more emissions.	The policy has negative effects as there is no reference to low and zero carbon transport technologies, whereas the policy aims to promote sustainable choices.	Policy could mkae more explicit reference to the use of low and zero carbon transport technologies in relation to promoting sustainable choices.	N	The policy now references the Weaver Network,	0	0	0	The policy has been amended to refere to the Weaver Network with no explicit reference to low and zero carbon tranport technologies. Therefore, the scoring has changed to '0'.	Policy could mkae more explicit reference to the use of low and zero carbon transport technologies in relation to promoting sustainable choices.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	0	0	0	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	0	0	0	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	0	0	0	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to climate change, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	0	0	0	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	0	0	0	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low energy generation, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	0	0	0	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	0	0	0	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to rural communities, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	0	0	0	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	0	0	0	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to construction materials and techniques, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	0	0	0	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	0	0	0	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	0	0	0	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Marketing and improving access to information for public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to promote sustainable choices through branding and marketing, which supports the net zero target.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to extreme weather events. however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risks adaptation, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risks adaptation, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risks adaptation, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climatic effects, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to flood risks adaptation, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to resource efficiency, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to waste management, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to recycling, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Regional	Transport network, road network, road users, utility network, construction industry	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Marketing and improving access to information for public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to promote sustainable choices through branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to suppliers, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to drainage, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to surfacing, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to nature-based solutions, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to drainage, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to land use, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil or contaminated land, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil or contaminated land, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to mineral safeguarding areas, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil or contaminated land, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to cultural and heritage assets, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to public rights of ways, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to buildings or townscapes, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to streetscapes, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to private cars, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to infrastructure, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Marketing and improving access to information for public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to promote sustainable choices through branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to charging points, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to land use planning, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to journey times, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	+	+	+	I	P	Local	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Marketing and improving access to information for public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to promote sustainable choices through branding and marketing, which could bring potential economic outcomes.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to the transport network and investments, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to severance issues, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to inclusive designs, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to affordability, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. .	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to connectivity, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. .	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to accessibility, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. .	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	+	+	+	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to promote sustainable choices through branding and marketing, which could improve access to information.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. .	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. .	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to public safety, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. .	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to roadsafety, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. .	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to traffic calming measures, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. .	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to road safety, however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. .	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to however the policy is focused on branding and marketing.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	o	o	o	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. .	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	+	+	+	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Marketing and improving access to information for public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to promote sustainable choices through branding and marketing, which could reduce vibrations and improve health levels.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. .	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	+	+	+	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Marketing and improving access to information for public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to promote sustainable choices through branding and marketing, which could reduce air quality and improve health levels.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	+	+	+	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Marketing and improving access to information for public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to promote sustainable choices through branding and marketing, which could improve impacts of transport and improve health levels.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network,	+	+	+	Although the policy has been amended by making reference to the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria. ,	None identified.

Policy Name	I4																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	l	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	++	The policy has been amended to refer to providing the right tools in an accessible and inclusive way so people are confident to travel using the Weaver Network. This will lead to an increase in sustainable and active travel, lowering air pollution. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	l	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	++	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will lead to an increase in sustainable and active travel, lowering air pollution. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	l	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	l	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	l	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	l	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	l	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	l	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	l	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will lead to improved access to different spaces and facilities. Therefore, the scoring has increased to positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?"	o	o	o	l	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	o	o	o	l	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	++	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will promote the use of sustainable transport. Therefore, the scoring has increased to positive.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	++	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will promote the use of sustainable transport. Therefore, the scoring has increased to positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will promote the use of sustainable transport and improve efficiency of movement. Therefore, the scoring has increased to positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	Policy could mkae more explicit re+DK17
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	++	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will promote the use of sustainable transport. Therefore, the scoring has increased to positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	++	The policy has been amended to refer to providing the right tools so people are confident to travel using the Weaver Network. This will promote the use of sustainable transport and contribute to achieving Net Zero through lowering emissions. Therefore, the scoring has increased to positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	++	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will promote the use of sustainable transport and help to lower fuel consumption. Therefore, the scoring has increased to positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will lead to improved access to different spaces and facilities. Therefore, the scoring has increased to positive.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscape, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to reducing road traffic and congestion, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to access to key services, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will lead to improved access to different spaces and facilities. Therefore, the scoring has increased to positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to active travel, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will promote access to active travel infrastructure. Therefore, the scoring has increased to positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to access to green and blue infrastructure, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references access to information, which in return, will make the transport network more accessible.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	++	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. Therefore, the scoring has increased to positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to access to low emission vehicle infrastructure, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to access to housing and employment areas, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	This policy has neutral effects as there is no reference to the decarbonisation of transport, however, the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will lead to improved access to different spaces and facilities. Therefore, the scoring has increased to positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references access to information, which in return, will make the transport network more accessible.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will lead to improved access to different spaces and facilities. Therefore, the scoring has increased to positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references access to information, which in return, will make the transport network more accessible.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network, which is an improved, integrated transport system. Therefore, the scoring has increased to positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	This policy has neutral effects as there is no reference to the decarbonisation of transport, however, the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas	N/A	N/A	This policy has neutral effects as there is no reference to the decarbonisation of transport, however, the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	This policy has neutral effects as there is no reference to the decarbonisation of transport, however, the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will lead to improved access to different spaces and facilities. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	This policy has neutral effects as there is no reference to health and wellbeing, however, the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will promote access to active travel infrastructure and improve health and wellbeing. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	This policy has neutral effects as there is no reference to health and wellbeing, however, the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools so people are confident to travel using the Weaver Network. This will promote access to active travel infrastructure and improve health and wellbeing. Therefore, the scoring has increased to positive.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	This policy has neutral effects as there is no reference to health and wellbeing, however, the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will lead to improved access to different spaces and facilities. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	This policy has neutral effects as there is no reference to health and wellbeing, however, the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will lead to improved access to different spaces and facilities. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	This policy has neutral effects as there is no reference to health and wellbeing, however, the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will promote access to active travel infrastructure and reduce severance. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	-	-	-	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as there is no explicit reference to how travel confidence will be improved for disabled and low mobility users.	The policy could be enhanced by making explicit reference to improving the travel confidence of disabled and low mobility users, and the tools that will be provided to support them, such as level flooring, drop kerbs, and ramps.	Y	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools in an accessible and inclusive way. Therefore, the scoring has increased to positive.	The policy could be enhanced by making explicit reference to improving the travel confidence of disabled and low mobility users, and the tools that will be provided to support them, such as level flooring, drop kerbs, and ramps.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network and improve community connections. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	+	The policy has been amended to refer to providing the right tools an accessible and inclusive way so people are confident to travel using the Weaver Network. This will lead to improved access to different spaces and facilities. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Consistent access to reliable transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references access to information, which in return, will make the transport network more accessible.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	+	+	++	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	D	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on customer service and travel information.	The policy could be enhanced by making explicit reference to how access to information improves safety, particularly for vulnerable groups.	N	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references providing the right tools and access to information 'in an accessible and inclusive way' and introduces the 'Weaver Network'.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	I5																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	++	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone by ensuring consistent wayfinding. This will lead to an increase in sustainable and active travel, loweing air pollution. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	++	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone by ensuring consistent wayfinding. This will lead to an increase in sustainable and active travel, loweing air pollution. Therefore, the scoring has increased to positive.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to access, inclusion, and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to providing enhanced and consistent wayfinding to ensure the Weaver Network is easy to navigate and is legible for everyone. This will lead to improved access to different spaces and facilities by sustainable modes. Therefore, the scoring has increased to positive.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?'	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	++	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through ensuring consistent wayfinding. This will make the network more accessible and lead to an increase in sustainable and active travel. Therefore, the scoring has increased to positive.	None identified.

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	++	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through ensuring consistent wayfinding. This will make the network more accessible and lead to an increase in sustainable and active travel. Therefore, the scoring has increased to positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through ensuring consistent wayfinding. This will make the network more accessible and lead to an increase in sustainable and active travel. Therefore, the scoring has increased to positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through ensuring consistent wayfinding. This will make the network more accessible and lead to an increase in sustainable and active travel. Therefore, the scoring has increased to positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	++	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through consistent wayfinding. This will lead to an increase in sustainable and active travel and contribute to achieving Net Zero through lowering emissions. Therefore, the scoring has increased to positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	++	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through consistent wayfinding. This will lead to an increase in sustainable and active travel and reduce fuel consumption. Therefore, the scoring has increased to positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to providing enhanced and consistent wayfinding to ensure the Weaver Network is easy to navigate and is legible for everyone through consistent wayfinding. This will lead to improved access to different spaces and facilities by sustainable modes. Therefore, the scoring has increased to positive.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscape, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects there is no reference to promoting sustainable modes of transport, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects there is no reference to promoting sustainable modes of transport, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to providing enhanced and consistent wayfinding to ensure the Weaver Network is easy to navigate and is legible for everyone through consistent wayfinding. This will lead to improved access to different spaces and facilities by sustainable modes. Therefore, the scoring has increased to positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects there is no reference to promoting sustainable modes of transport, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	++	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through consistent wayfinding. This will improve the quality of active travel infrastructure. Therefore, the scoring has increased to positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects there is no reference to promoting sustainable modes of transport, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as embedding wayfinding techniques will make transport more convenient and accessible.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	++	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through consistent wayfinding. This will make the network more accessible and lead to an increase in sustainable and active travel. Therefore, the scoring has increased to positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects there is no reference to promoting sustainable modes of transport, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects there is no reference to promoting sustainable modes of transport, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects there is no reference to enhancing economic opportunities, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to providing enhanced and consistent wayfinding to ensure the Weaver Network is easy to navigate and is legible for everyone through consistent wayfinding. This will lead to improved access to different spaces and facilities by sustainable modes. Therefore, the scoring has increased to positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as embedding wayfinding techniques will make transport more convenient and accessible.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to providing enhanced and consistent wayfinding to ensure the Weaver Network is easy to navigate and is legible for everyone through consistent wayfinding. This will lead to improved access to different spaces and facilities by sustainable modes. Therefore, the scoring has increased to positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects there is no reference to enhancing economic opportunities, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects there is no reference to enhancing economic opportunities, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects there is no reference to enhancing economic opportunities, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects there is no reference to enhancing economic opportunities, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to providing enhanced and consistent wayfinding to ensure the Weaver Network is easy to navigate and is legible for everyone through consistent wayfinding. This will lead to improved access to different spaces and facilities by sustainable modes. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	This policy has neutral effects as there is no reference to health and wellbeing, however, the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone. This will make the network more accessible and lead to an increase in sustainable and active travel, improving health outcomes. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	This policy has neutral effects as there is no reference to health and wellbeing, however, the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone. This will make the network more accessible and lead to an increase in sustainable and active travel, improving health outcomes. Therefore, the scoring has increased to positive.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	This policy has neutral effects as there is no reference to health and wellbeing, however, the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to providing enhanced and consistent wayfinding to ensure the Weaver Network is easy to navigate and is legible for everyone through consistent wayfinding.. This will lead to improved access to different spaces and facilities by sustainable modes. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	This policy has neutral effects as there is no reference to health and wellbeing, however, the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to providing enhanced and consistent wayfinding to ensure the Weaver Network is easy to navigate and is legible for everyone through consistent wayfinding.. This will lead to improved access to different spaces and facilities by sustainable modes. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	This policy has neutral effects as there is no reference to health and wellbeing, however, the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through consistent wayfinding.. This will make the network more accessible and lead to an increase in sustainable and active travel, reducing severance. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Enhanced equality and inclusion in transport can lead to a reduction in greenhouse gas emissions and air pollution over time, as more people opt for public transport over private vehicles	Enhanced equality and inclusion can improve mobility for all demographic groups, including the elderly and disabled, fostering greater social inclusion and equity	The policy has positive effects as it is aimed at making the network easy to navigate and legible for everyone.	The policy could be enhanced by making explicit reference to improving the travel confidence of disabled and low mobility users through , and the tools that will be provided to support them, such as level flooring, drop kerbs, and ramps.	Partially	The policy now references the Weaver Network and consistent wayfinding.	+	+	++	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through consistent wayfinding. This will improve the confidence of vulnerable users. Therefore, the scoring has increased to very positive.	The policy could be enhanced by making explicit reference to improving the travel confidence of disabled and low mobility users through , and the tools that will be provided to support them, such as level flooring, drop kerbs, and ramps.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to providing enhanced and consistent wayfinding to ensure the Weaver Network is easy to navigate and is legible for everyone through consistent wayfinding.. This will lead to improved access to different spaces and communities by sustainable modes. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to providing enhanced and consistent wayfinding to ensure the Weaver Network is easy to navigate and is legible for everyone through consistent wayfinding.. This will lead to improved access to different spaces and facilities by sustainable modes. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	+	+	++	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as it references enhanced wayfinding which improves access to information, which in return, will make the transport network more accessible.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to providing enhanced and consistent wayfinding to ensure the Weaver Network is easy to navigate and is legible for everyone through consistent wayfinding.. This will improve access to information. Therefore, the scoring has increased to positive.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	+	+	++	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through consistent wayfinding. This will contribute to public realm improvements, ensure safe navigation and enable users to give accurate updates on their location. Therefore, the scoring has increased to positive.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	D	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on customer service and travel information.	The policy could be enhanced by making explicit reference to how strong wayfinding improves safety, particularly for vulnerable groups.	N	The policy now references the Weaver Network and consistent wayfinding.	+	+	+	The policy has been amended to refer to ensuring the Weaver Network is easy to navigate and legible for everyone through consistent wayfinding. This will ensure safe navigation and enable users to give accurate updates on their location. Therefore, the scoring has increased to positive.	The policy could be enhanced by making explicit reference to how strong wayfinding improves safety, particularly for vulnerable groups.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on customer service and travel information.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and consistent wayfinding.	o	o	o	Although the policy has been amended by making reference to consistent wayfinding and the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on enhanced wayfinding.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on taxi and private hire vehicles.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to reducing road congestion, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to access to key services, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to active travel, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as providing taxi points at transport interchanges will encourage more people to use public transport, making it more convenient.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low emission vehicle infrastructure, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low emission vehicle infrastructure, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as providing taxi points at transport interchanges will improve accessibility to services.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved connectivity to public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as providing taxi points at transport interchanges will improve travel convenience and reliability.	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	+	+	+	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to enhancing economic prosperity and access to opportunities, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to promoting equality of opportunity, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to promoting equality of opportunity, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to promoting equality of opportunity, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to promoting equality of opportunity, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to promoting equality of opportunity, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to promoting equality of opportunity, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on taxi and private hire vehicles	The policy could be enhanced by making explicit reference to ensuring standards for licensing mention safety for all.	N	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on taxi and private hire vehicles	None identified.	No mitigation identified in 2025.	The policy now rferences the Weaver Network.	o	o	o	Although the policy has been amended by referencing the Weaver Network, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	I7																				
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts	
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?'	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.	
3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	+	++	++	The policy has been amended to refer to the Fares and Ticketing Strategy which aims to make sustainable travel more affordable and accessible. Therefore, the scoring has increased to very positive.	None identified.	

3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	+	+	+	The policy has been amended to refer to the Fares and Ticketing Strategy which aims to make sustainable travel more affordable and accessible and will encourage a reduction in private car use. Therefore, the scoring has increased to very positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low-carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	+	+	+	The policy has been amended to refer to the Fares and Ticketing Strategy which aims to integrate the ticketing offer. Therefore, the scoring has increased to positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	+	+	+	The policy has been amended to refer to the Fares and Ticketing Strategy which aims to make sustainable travel more affordable and accessible to encourage use, and contribute to achieving Net Zero. Therefore, the scoring has increased to very positive.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to providing disincentives for private car use, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to access to key services, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to availability, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to green and blue infrastructure, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Wider	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Affordable and convenient public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to value for money and convenience.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	+	+	++	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low emission vehicle infrastructure, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to housing and employment land, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on integrated fares and tickets.	The policy could be enhanced by making the link between value for money and access to opportunities.	N	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making the link between value for money and access to opportunities.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Wider	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Affordable and convenient public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to making paying for travel simple, easier, convenient and flexible, which improves accessibility to services.	The policy could be enhanced by making the link between value for money and access to services, facilities, and amenities.	N	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	+	+	++	The policy has been amended to refer to the Fares and Ticketing Strategy and making the offer accessible. Therefore, the scoring has increased to very positive.	The policy could be enhanced by making the link between value for money and access to opportunities.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Affordable and convenient public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to making paying for travel simple, easier, convenient and flexible, which improves accessibility to services.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	+	+	+	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on integrated fares and tickets.	The policy could be enhanced by making the link between value for money and access to open space, recreational activities and employment locations.	N	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making the link between value for money and access to open space, recreational activities and employment locations.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	+	+	+	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Convenient and flexible transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to ensuring fares and tickets are reflective of diverse passenger needs.	The policy could be enhanced by making explicit reference to different groups of people and how the ticketing offer will meet their needs e.g. tickets for students or for older people	N	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	+	+	+	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by making explicit reference to different groups of people and how the ticketing offer will meet their needs e.g. tickets for students or for older people
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	+	+	+	D	P	Wider	Lower socio-economic groups and deprived areas, vulnerable groups	Convenient and flexible transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to ensuring fares and tickets are reflective of diverse passenger needs.	The policy could be enhanced by making explicit reference to different groups of people and how the ticketing offer will meet their needs e.g. tickets for disabled and low mobility users.	N	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	+	+	++	The policy has been amended to refer to the Fares and Ticketing Strategy and making the offer accessible. Therefore, the scoring has increased to very positive.	The policy could be enhanced by making explicit reference to different groups of people and how the ticketing offer will meet their needs e.g. tickets for students or for older people
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	+	+	+	D	T	Wider	Lower socio-economic groups and deprived areas, vulnerable groups	Convenient and flexible transportation can improve social mobility by enabling individuals to pursue better job opportunities and education, breaking the cycle of poverty.	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has positive effects as there is reference to ensuring fares and tickets are value for money and reflective of diverse passenger needs.	The policy could be enhanced by making explicit reference to different groups of people and how the ticketing offer will meet their needs e.g. tickets for students or for older people	N	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	+	+	++	The policy has been amended to refer to the Fares and Ticketing Strategy and making the offer accessible, which aims to make sustainable travel more affordable. Therefore, the scoring has increased to very positive.	The policy could be enhanced by making explicit reference to different groups of people and how the ticketing offer will meet their needs e.g. tickets for students or for older people
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to connections between communities, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to active travel, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	-	-	-	D	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	Better access to transport information allows individuals to make more informed travel choices, leading to increased use of sustainable transport options over time	When people have easy access to accurate and timely information, they are more likely to use public transport, which can lead to higher ridership and better service provision	The policy has negative effects as better access to information will be required when changes are made to the payment system.	The policy could be enhanced by making explicit reference to digital and paper tickets, and how these can be accessed to ensure no one is excluded from offers. It could also ensure better access to information when changes are made to the payment system.	Partially	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	+	+	+	The policy has been amended to refer to the Fares and Ticketing Strategy and making the offer accessible. Therefore, the scoring has increased to positive.	The policy could be enhanced by making explicit reference to digital and paper tickets, and how these can be accessed to ensure no one is excluded from offers. It could also ensure better access to information when changes are made to the payment system.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	o	o	o	I	P	Regional	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on integrated fares and tickets.	None identified.	No mitigation identified in 2025.	The policy now references the Fares and Ticketing Strategy and making the offer accessible.	o	o	o	Although the policy has been amended by referencing the Fares and Ticketing Strategy and making the offer accessible, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

Policy Name	I8																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	+	+	+	D	T	Regional	Air quality, vulnerable communities	Cumulative reduction in greenhouse gas emissions and air pollutants over time	The combined use of shared transport and other sustainable modes can amplify the reduction in emissions, leading to faster improvements in air quality	The policy has positive effects as shared transport will help to reduce the number of cars on the road, thereby reducing traffic and congestion and improving air quality.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Cumulative reduction in greenhouse gas emissions and air pollutants over time	The combined use of shared transport and other sustainable modes can amplify the reduction in emissions, leading to faster improvements in air quality	The policy has positive effects as it will provide enhanced public and active travel accessibility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Cumulative reduction in greenhouse gas emissions and air pollutants over time	The combined use of shared transport and other sustainable modes can amplify the reduction in emissions, leading to faster improvements in air quality	The policy has positive effects as it encourages greater carbon efficiency by promoting shared transport and active travel.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Cumulative reduction in greenhouse gas emissions and air pollutants over time	The combined use of shared transport and other sustainable modes can amplify the reduction in emissions, leading to faster improvements in air quality	The policy has positive effects as it promotes low carbon passenger travel and integrated facilities.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	+	+	+	D	P	Regional	Transport network, road network, road users, utility network, construction industry	As fuel consumption decreases, there is a corresponding reduction in greenhouse gas emissions, contributing to better air quality and mitigating climate change	Promoting sustainable transport can encourage behavioral changes, such as increased use of public transport and active transport, leading to a collective reduction in fuel consumption	The policy has positive effects as it promotes a modal shift to sustainable transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	+	+	+	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as shared transport will help to reduce the number of cars on the road, thereby reducing traffic and congestion.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as it will provide enhanced public and active travel accessibility.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that disincentivise private car use and promote sustainable transport.	The policy has positive effects as it references developing active travel networks.	The policy could be enhanced by making explicit reference to how active travel networks will be developed and connected through shared transport, particularly high quality networks	N	The policy has not changed.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to how active travel networks will be developed and connected through shared transport, particularly high quality networks
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	-	-	-	D	T	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that disincentivise private car use and promote sustainable transport.	The policy has negative effects as it does not make the link between integrating green and blue infrastructure networks with shared transport hubs.	The policy could be enhanced by making explicit reference to linking green and blue infrastructure networks to shared transport hubs.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to linking green and blue infrastructure networks to shared transport hubs.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	+	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that disincentivise private car use and promote sustainable transport.	The policy has positive effects as it references promoting shared transport, which is a more sustainable option than private cars.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	-	-	-	D	P	Regional	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that disincentivise private car use and promote sustainable transport.	The policy has negative effects as it does not make reference the potential to encourage more shared transport options (e.g. ubers/rideshares) to be low emission.	The policy could be enhanced by making explicit reference to promoting the use of low emission vehicles for shared transport services	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to promoting the use of low emission vehicles for shared transport services
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to housing and employment areas, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Regional	Lower socio-economic groups and deprived areas	Sustainable transport options, such as reliable public transit and active transport infrastructure, can improve overall mobility, making it easier for people to access essential services like healthcare, education, and employment	Better access to services can stimulate local economies by making it easier for people to reach jobs, education, and other essential services, thus promoting economic growth	The policy has positive effects as by providing wider availability of alternatives and integration with the sustainable transport network, the policy promotes accessibility to services.	None identified.	No mitigation identified in 2025.	The policy has not changed.	+	+	+	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on shared transport.	The policy could be enhanced by making explicit reference to inclusive design for all users, in particular, disabled and low mobility users.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to inclusive design for all users, in particular, disabled and low mobility users.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	D	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Improved public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on shared transport.	The policy could be enhanced by making explicit reference to promoting shared transport options in deprived areas.	N	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be enhanced by making explicit reference to promoting shared transport options in deprived areas.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	-	-	-	D	P	Local	Transport network, road network, road users, local communities	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Safer public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference safety with regard to transport hubs. This is particularly important as these spaces are often perceived as unsafe and typically lack safety features.	The policy could be improved by making explicit reference to developing safe transport hubs and how this will be achieved.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be improved by making explicit reference to developing safe transport hubs and how this will be achieved.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Improve actual and perceived safety and security issues relating to transport schemes to improve access of opportunity for all?	-	-	-	D	P	Regional	Transport network, road network, road users, local communities	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Safer public transport systems make it easier for people to access jobs, education, and healthcare, reducing social and economic disparities	The policy has negative effects as it does not reference safety with regard to transport hubs. This is particularly important as these spaces are often perceived as unsafe and typically lack safety features.	The policy could be improved by making explicit reference to developing safe transport hubs and how this will be achieved.	N	The policy has not changed.	-	-	-	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	The policy could be improved by making explicit reference to developing safe transport hubs and how this will be achieved.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Reduce the risks that cars and other vehicles impose on vulnerable transport users such as pedestrians, motorcyclists, and cyclists?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Increase initiatives aiming to calm traffic in residential areas, particularly in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Provide initiatives that enhance road safety and reduce the number of accidents, particularly for vulnerable users and those in deprived areas?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Reduce construction and operation noise, air and light pollution for residents and particularly vulnerable users?	o	o	o	I	T	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce vibration (e.g., quiet surfacing, reduced speed limits) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

15	Reduce environmental impacts of transport including air, noise and light pollution	Promote practices, equipment, and materials which reduce air pollution (e.g., active travel, low emission vehicles) to assist in improving health levels?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.
15	Reduce environmental impacts of transport including air, noise and light pollution	Improve impact of transport on the local environment to create more amenable areas for travel, work, and play (e.g., through provision of green and blue infrastructure)?	o	o	o	I	P	Regional	Air pollution, noise pollution, light pollution, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air, noise and light pollution, however the policy is focused on shared transport.	None identified.	No mitigation identified in 2025.	The policy has not changed.	o	o	o	Scoring has not changed from the 1st iteration of assessment based on no amendments being made against this assessment criteria.	None identified.

Policy Name	I9																			
Ref	Objective	Assesment Criteria	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Direct or Indirect	Temporary or Permanent	Spatial Consideration: Local, Regional, Wider	Receptors and/or Affected Groups	Potential Cumulative Effects	Potential Synergistic Effects	Explanation Against Objective	Mitigation/Enhancement	Has the 2025 mitigation been addressed?	Commentary on changes made since 2025	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of new scoring	Residual Impacts
1	Protect and enhance local air quality	Support the minimisation of air pollutant emissions and enhancement of air quality particularly in areas with low air quality (e.g., AQMAs) and where this pollution disproportionately affects vulnerable populations?	o	o	o	I	T	Local	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Support an improvement in air quality through reduced traffic levels and congestion, and enabling modal shift away from private car use?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
1	Protect and enhance local air quality	Explore opportunities for green and blue infrastructure and habitat creation and enhancement, which delivers multi functional benefits?	o	o	o	I	T	Regional	Air quality, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to air quality, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Avoid direct or indirect significant adverse effects on designated habitats and protected species, and important biological and geological sites?	o	o	o	I	T	Local	Green spaces, green infrastructure, blue infrastructure, habitats	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect and enhance green and blue infrastructure to maximise ecological connectivity, avoiding severance of habitats and providing wildlife corridors and networks?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Explore the suitable connectivity between green and blue infrastructure?	o	o	o	I	T	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Promote good design in relation to transport infrastructure, through best practice wildlife-friendly approaches which seek to secure biodiversity net gain and support nature recovery?	o	o	o	I	P	Regional	Green spaces, green infrastructure, blue infrastructure, habitats, protected species, nature, wildlife	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Protect existing and/or create new carbon sinks, where practical, in order to absorb increased amounts of CO2 where possible within transport schemes?	o	o	o	I	P	Regional	Carbon sinks	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Increase accessibility of local communities to appropriately designed multifunctional green and blue infrastructure?	o	o	o	I	P	Local	Local communities, green infrastructure, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
2	Protect and enhance biodiversity, geodiversity and the green and blue infrastructure network	Support Local Nature Recovery Strategies and work with local nature recovery groups?’	o	o	o	I	T	Regional	Local nature recovery groups	N/A	N/A	The policy has neutral effects as there is no reference to biodiversity, geodiversity and the green and blue infrastructure network, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

3	Reduce greenhouse gas emissions from transport	Promote the use of sustainable forms of transport through enhanced public transport availability, affordability, and accessibility?	+	+	+	D	T	Wider	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as it makes reference to ensuring joined-up services and timetabling, which enhance the availability and accessibility of various transport modes.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage a reduction in private car use?	+	+	+	D	T	Wider	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as it make reference to making attractive and easy alternative to owning and using a car.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage greater carbon efficiency in the movement of goods and people?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of innovative new low and zero carbon transport technologies to reduce emissions?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Promote a wider choice of low carbon passenger travel through quality integrated facilities and services, active travel improvements (including walking and cycling), demand management, network management, travel planning and intelligent transport systems?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage the prioritisation of climate change mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Encourage use of the transport estate for low carbon energy generation?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Consider the specific transport needs of rural communities?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	The policy has been amended to refer to seeking opportunities to improve transport with neighbouring regions, which could include rural areas. Therefore, the scoring has increased to positive.	None identified.
3	Reduce greenhouse gas emissions from transport	Explore opportunities for low carbon construction materials and techniques?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Minimise embedded emissions from the development of new transport infrastructure and the maintenance of existing infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
3	Reduce greenhouse gas emissions from transport	Support West Yorkshire's target of achieving net zero by 2038?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference greenhouse gas emissions, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	The policy has been amended to refer to the Weaver Network which will encourage sustainable travel and contribute to achieving Net Zero. Therefore, the scoring has increased to positive.	None identified.

4	Increase resilience of the transport network to climate change and associated extreme weather events	Promote an increase in the resilience and sustainability of the transport network to extreme weather events and a changing climate by integrating climate mitigation and adaptation?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Explore opportunities for creating green and blue infrastructure which can both help to manage localised flood risk and create new habitats, taking into account the vulnerability of habitats to climate change?	o	o	o	I	T	Local	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that floodplains are used for their natural purpose and are protected from inappropriate development?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that appropriate compensatory measures are put in place where transport schemes require a land take from the floodplain?	o	o	o	I	T	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Encourage adaptive management and design to respond to uncertainties in climatic effects and scheme requirements?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
4	Increase resilience of the transport network to climate change and associated extreme weather events	Ensure that transport schemes and any related elements do not increase flood risk to others?	o	o	o	I	P	Regional	Transport network, road network, road users, vulnerable communities	N/A	N/A	The policy has neutral effects as there is no reference to climate change and associated extreme weather events, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Enable new infrastructure to be resource efficient (materials, energy, water, sustainable procurement, etc.) in construction and operation, to reduce extraction and increase circularity?	o	o	o	I	P	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote sustainable waste management practices?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of recycled or secondary materials in construction?	o	o	o	I	T	Regional	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote a modal shift to sustainable transport to reduce fuel consumption?	o	o	o	I	P	Regional	Transport network, road network, road users, utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	The policy has been amended to refer to the Weaver Network which will encourage sustainable travel. Therefore, the scoring has increased to positive.	None identified.
5	Promote prudent use of natural resources, minimise the production of waste, and support re-use and recycling	Promote the use of local suppliers and locally-produced materials in construction?	o	o	o	I	T	Local	Utility network, construction industry	N/A	N/A	The policy has neutral effects as there is no reference to natural resources, waste, and recycling, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

6	Protect and enhance the water environment	Protect the quality of surface and groundwater resources by incorporating sustainable road drainage (e.g., SuDS)?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Minimise the use of impermeable hard surfacing?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Protect and enhance green and blue infrastructure contributing to improvements in the quality of surface water run-off?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Support the use of nature-based solutions to protect aquatic habitats?	o	o	o	I	T	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Explore opportunities for blue infrastructure enhancement to help manage localised flood risk and create new habitats?	o	o	o	I	T	Local	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
6	Protect and enhance the water environment	Ensure drainage systems are sufficiently resilient to climate change and periods of intense rainfall?	o	o	o	I	P	Regional	Utility network, construction industry, water environment, blue infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to the water environment, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and seek to remediate contaminated land	Encourage use of previously developed land and minimise use of greenfield land?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Encourage the protection of soil resources and peatlands, particularly during the construction phase of schemes?	o	o	o	I	T	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid disturbance, harm, contamination, or permanent (irreversible) loss of the most highly productive agricultural soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Avoid mineral safeguarding areas?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
7	Conserve soil resources and quality and seek to remediate contaminated land	Support the remediation of contaminated land and avoid additional contamination of soils?	o	o	o	I	P	Regional	Utility network, construction industry, soil, contaminated land, remediated land	N/A	N/A	The policy has neutral effects as there is no reference to soil, however, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Conserve, protect and enhance the region's designated and non-designated cultural and heritage assets and their settings (e.g., locally important buildings, archaeological remains, world heritage sites, scheduled monuments, listed buildings and structures, registered parks and gardens, registered battlefields and conservation areas)?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Improve access to historic and culturally important sites by sustainable transport modes?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	The policy has been amended to refer to seeking opportunities to improve transport with neighbouring regions, which could improve access to heritage. Therefore, the scoring has increased to positive.	None identified.
8	Conserve and, where appropriate, enhance those elements which contribute to the significance of the area's heritage assets	Support the appropriate management of transport infrastructure which include or impact upon designated heritage assets?	o	o	o	I	P	Regional	Built heritage assets, protected landscapes, protected or locally significant views	N/A	N/A	The policy has neutral effects as there is no reference to heritage assets, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Encourage the design, construction, repair, and maintenance of transport infrastructure which respects and enhances the landscape and townscape character?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect the special qualities and setting of nationally designated landscapes?	o	o	o	I	P	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance green and blue infrastructure which contributes to improved landscape and townscape?	o	o	o	I	T	Regional	Built environment, protected landscapes, blue and green infrastructure	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect public rights of way?	o	o	o	I	T	Regional	Built environment, protected landscapes, public rights of way	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Protect and enhance locally important buildings and townscapes, maintaining and strengthening local distinctiveness and sense of place?	o	o	o	I	P	Local	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
9	Protect and enhance the character and quality of landscape and townscape	Improve the streetscape by removing unnecessary clutter?	o	o	o	I	T	Regional	Built environment, protected landscapes	N/A	N/A	The policy has neutral effects as there is no reference to landscape and townscape character, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Reduce road traffic and congestion through introducing disincentives for private car use (e.g., congestion charging, limiting parking spaces)?	+	+	+	D	T	Wider	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has a positive effect as there is reference to ensuring alternatives to owning and using a car.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

10	Promote sustainable modes of transport, including public transport and active travel	Promote accessibility (particularly by active travel and public transport) to key services and facilities, employment sites and open space?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to promoting access to key services, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	The policy has been amended to refer to seeking opportunities to improve transport with neighbouring regions, which could improve access to different spaces, services and facilities. Therefore, the scoring has increased to positive.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Improve the quality and availability of active travel infrastructure?	+	+	+	D	P	Wider	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as it improves the availability of active travel infrastructure by providing better integration between active travel and other modes.	The policy could be enhanced by explicitly referencing integrating the active travel network and improving active travel infrastructure.	Partially	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by explicitly referencing integrating the active travel network and improving active travel infrastructure.
10	Promote sustainable modes of transport, including public transport and active travel	Explore synergies with green and blue infrastructure proposals for enhancing active travel routes?	o	o	o	I	T	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as it does not reference green and blue infrastructure, however the policy is focused on network integration.	The policy could be enhanced by explicitly referencing incorporating green and blue infrastructure into the transport network.	N	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	The policy could be enhanced by incorporating green and blue infrastructure into the transport network.
10	Promote sustainable modes of transport, including public transport and active travel	Promote modal shift to more sustainable forms of transport and continue making these forms of travel more convenient, accessible, and affordable?	+	+	++	D	P	Wider	Transport network, road network, road users, air quality	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as it makes reference to making the transport network an attractive and easy alternative to owning and using a car.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	++	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Encourage a shift to low emission vehicles through provision of charging points and supporting infrastructure?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to low emission vehicle infrastructure, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
10	Promote sustainable modes of transport, including public transport and active travel	Coordinate with land use planning to ensure new housing and employment areas are served by adequate sustainable transport options?	o	o	o	I	P	Regional	Transport network, road network, road users, air quality	N/A	N/A	The policy has neutral effects as there is no reference to housing and employment areas, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve sustainable access to employment and skills development opportunities, particularly in areas with high levels of unemployment?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	The policy has been amended to refer to seeking opportunities to improve transport with neighbouring regions, which could improve access to different spaces, services and facilities. Therefore, the scoring has increased to positive.	None identified.
11	Enhance economic prosperity and access to opportunities	Improve accessibility to services, facilities, and amenities for all users?	+	+	+	D	P	Wider	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as there is reference to ensuring joined-up services and timetabling, which improves accessibility to services.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Support the reduction of overall journey times (passengers and freight) and improve travel convenience and reliability?	+	+	+	D	P	Wider	Lower socio-economic groups and deprived areas	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as there is reference to ensuring joined-up services and timetabling, which improves accessibility to services.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Encourage the optimisation of potential economic outcomes for West Yorkshire from decarbonisation of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

11	Enhance economic prosperity and access to opportunities	Contribute to establishing an effective and resilient transport network that increases investment?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
11	Enhance economic prosperity and access to opportunities	Ensure accessibility by sustainable forms of transport to expected major employment and residential growth areas?	o	o	o	I	P	Local	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to economic prosperity and access to opportunities, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	The policy has been amended to refer to seeking opportunities to improve transport with neighbouring regions, which could improve access to different spaces, services and facilities. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing of vulnerable groups (children and adolescents; older people; disabled people and people with other health problems; low-income groups and communities with high level of deprivation)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote the health and wellbeing and of the wider population (residents, workers, commuters, cyclists, pedestrians, drivers, tourists and visitors)?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Ensure that new and existing development is connected to healthcare services and educational facilities by sustainable modes of transport?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	The policy has been amended to refer to seeking opportunities to improve transport with neighbouring regions, which could improve access to different spaces, services and facilities. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Promote accessibility to open space, recreational activities, and employment locations?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	The policy has been amended to refer to seeking opportunities to improve transport with neighbouring regions, which could improve access to different spaces, services and facilities. Therefore, the scoring has increased to positive.	None identified.
12	Improve health and wellbeing for all citizens and reduce inequalities in health	Reduce the physical and perceived impact of the transport network to reduce severance issues?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to health and wellbeing, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote greater equality of opportunity to the varying age groups of residents (the older population and younger travellers), disabled people, different nationalities and ethnic groups, different religious groups, low income and unemployed people, different sex and sexual orientation groups?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on network integration.	The policy could be enhanced by making explicit reference to how the transport network will be an easy alternative to owning a car for vulnerable groups who often rely on the use of private cars e.g. disabled people.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Promote accessibility and inclusive design to sustainable modes of transport and essential facilities for all users, particularly disabled and low mobility users?	o	o	o	I	P	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on network integration.	The policy could be enhanced by making explicit reference to how the transport network will be an easy alternative to owning a car for vulnerable groups who often rely on the use of private cars e.g. disabled people.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.

13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Provide affordable transport options to ensure accessibility to key facilities and services for all users?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve connections between communities?	+	+	+	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	May be synergistic effects when combined with other schemes that promote active travel.	The policy has positive effects as there is reference to ensuring joined-up services and timetabling, as well as improving cross-boundary travel, which could improve connection between communities.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	++	The policy has been amended to refer to seeking opportunities to improve transport with neighbouring regions, which could improve connections between communities. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Enhance access to active travel routes and sustainable modes of transport in the most deprived areas?	o	o	o	I	T	Local	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	+	+	+	The policy has been amended to refer to seeking opportunities to improve transport with neighbouring regions, which could improve access to different spaces, services and facilities, including those in deprived areas. Therefore, the scoring has increased to positive.	None identified.
13	Promote greater equality of opportunity for all citizens, with the desired outcome of achieving a fairer society	Improve access to information for all users to promote use of sustainable transport modes?	o	o	o	I	T	Regional	Lower socio-economic groups and deprived areas, vulnerable groups	N/A	N/A	The policy has neutral effects as there is no reference to equality of opportunity, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
14	Improve transport safety, reduce crime and fear of crime, and promote community safety	Contribute to improvements of public realm and levels of natural surveillance to create a more welcoming environment for active travel, physical activity, and accessing key facilities?	o	o	o	I	P	Local	Transport network, road network, road users, local communities	N/A	N/A	The policy has neutral effects as there is no reference to safety, however the policy is focused on network integration.	None identified.	No mitigation identified in 2025.	The policy now references the Weaver Network and seeking opportunities to improve transport with neighbouring regions.	o	o	o	Although the policy has been amended by referencing the Weaver Network and seeking opportunities to improve transport with neighbouring areas, it is considered that it would not impact scoring from the 1st iteration of assessment against this assessment criteria.	None identified.
